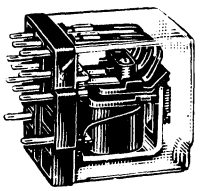
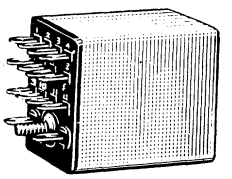
Has 15 amp. contacts. Inverted coil construction protects armature and contacts. Contacts D.P.D.T. U/L rated for 15 amps at 115 VAC non-inductive, or 1 H.P. at 115/230 v., 60 c. Screw type terminals easily accessible. Size: $3\frac{5}{16}$" x 2½" x $2\frac{1}{16}$". Shipping wt. 8 oz.



SERIES 1220 RELAY

10 ampere DPDT or 3PDT relay is designed to reduce both cost and height by eliminating radio-type plug, extra wiring and sub-assembly between relay and plug. Complete with dust cover and mounting bracket. Plug-in, solder or quick-connect terminals. U/L listed. Size: $1\frac{5}{32}$" x $1\frac{11}{16}$" x $1\frac{9}{16}$". Coils available for 6-240 VAC, 6-110 VDC.



SERIES 1310 RELAY

This is Guardian's 4PDT 3 amp plug-in relay. Designed and built for maximum endurance and reliability, it is especially suitable for computers, data processing, logic systems, business machines, or any other application that requires uncompromising quality. The new 1300 Series is available AC or DC, plug-in or quick-disconnect, 6 to 115 VAC and 6 to 110 VDC. Contact rating 3 amps at 30 VDC or 115 VAC resistive.

Get your entire Control Assembly from Guardian, Complete and Ready to Plug in... Anything from a Single Switch to a complete Machine Control. • Write today.

SOLENOIDS

The Guardian solenoid line is the most complete in the industry. It includes intermittent or continuous duty types up to 230V, A.C. or up to 230V, D.C. A new line of tubular solenoids now provides a range from a pull of 50 pounds to a fraction of an ounce.

Guardian's engineering department is ready at all times to assist in modifying standard solenoids or developing custom engineered units to fit your specialized applications.

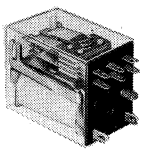
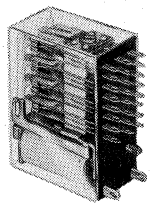
TELEPHONE RELAYS

VERSAPAC TYPE 67

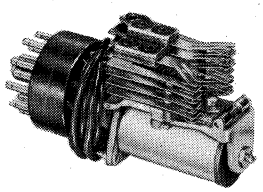
The Hart-Advance "VersaPac" 67 miniature industrial relay is especially designed for industrial applications requiring 2 to 8 form C's where space, weight and cost are important. Single and bifurcated contacts rated at 3 and 5 amps are available. The use of Armco magnetic ingot iron and a one-piece frame and core provide for unusually precise adjustments. Mechanical life expectancy is in excess of 100 million operations. Contact resistance is: .050 ohms max. before life; .100 ohms max. after life. A plastic cover protects the relay, and sockets are available.



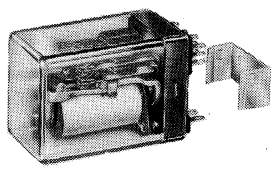
2 FORM C



8 FORM C



PLUG-IN



TYPE 8 PI

TYPE 8

The Hart-Advance type 8 is an extremely versatile multi-contact telephone type relay. It is available with many variations of coils, contact arrangements and ratings, adjustments, terminals and mountings. Armco magnetic ingot iron is used in all parts of the magnetic circuit. Contact blades are made of spring temper nickel-silver. Standard contacts are twin palladium alloy, gold flashed. Standard terminals are solder type, but printed circuit and taper tab terminals may also be supplied.

The Series 8PI is a Type 8 relay with specific spring forms and a mating flush mounted socket and clear plastic cover which snaps over the socket. Outstanding benefits include pre-wiring socket possibilities, quick installation and removal of relay, environmental protection, and cost savings. Relay is supplied less socket and cover unless specified.

See page 3, "Type 8 Magnetic Latching" relay.

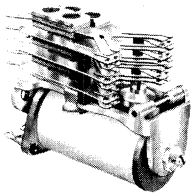
TELEPHONE RELAYS

TYPE 8 MAGNETIC LATCHING



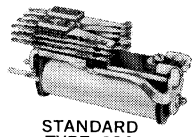
The Type 8ML remains magnetically latched from remnant magnetism until demagnetized by reverse polarity pulse.

The Type 8LA is a mechanical latch using two Type 8 relays. Pile-ups of up to twelve Form C can be supplied (six on each unit).

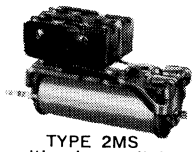
contact arrangement	COILS operate voltage	operate resist. ohms	release voltage	release resist. ohms
4 form C	24VDC	150	110VAC	11,000
4 form C	24VDC	150	24VDC	2,000
4 form C	110VAC	1000	24VDC	12,500

other spring and coil combinations available upon request

TYPE 2

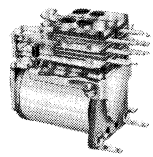


STANDARD TYPE 2QA (Quick Acting)

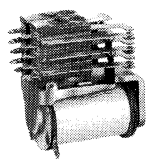


TYPE 2MS with micro switch

The Hart-Advance type 2 relay is a long frame telephone type designed especially for long life and application versatility. All parts of the magnetic circuit are of magnetic ingot iron for DC operation and silicon steel for AC. Contacts are available to meet applications from dry circuit to 10 amps. Varnish Impregnated coils and pile-up can be supplied to meet extreme humidity conditions. The type 2 is available with special coils and adjustments to provide for slow operate or slow release timing while snap switch contacts and micrometer adjustments are also available. A wide variety of enclosures adds versatility to the type 2 relay.



TYPE 4B with taper tab terminals



TYPE 4C

TYPE 4

The Hart-Advance type 4 is a compact, high reliability telephone type relay. Magnetic ingot iron is used for all parts of the magnetic circuit. The type 4 is the smallest in overall size while the 4A is the same overall size yet provides for greater coil winding space. The 4B has the same general construction but is slightly larger to provide for still greater coil winding space. The type 4C is the same size as the 4B but utilizes an armature bearing pin in lieu of bearing screws to increase sensitivity and provide for faster operating speed. All standard type 4's are supplied with solder terminals while taper tab, printed circuit, and plug-in features are also available. Through the use of ¼" dia. silver contacts, the type 4C can be supplied with double make contacts with a rating of 35 amps.

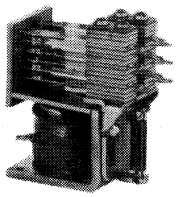
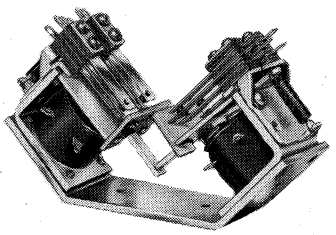
GENERAL PURPOSE RELAYS

TYPE 12



TYPE 12



TYPE 12 LA
(Latching)

The Hart-Advance Type 12 is a general purpose relay that combines low cost and contact versatility to make it ideal for many applications. It is available with contact ratings of 5 or 10 amps and configurations of 1 thru 6 form C; and is suitable for AC or DC operation. Its versatility is further enhanced through the use of one of the standard enclosures.

GHA—5 AMP CONTACTS
GHB—10 AMP CONTACTS
GHS—5 AMP CONTACTS
PLATE CIRCUIT RELAY

TYPE GH

The Hart-Advance GH relay is especially engineered for maximum efficiency at lowest cost. The small size of this relay allows for installation in equipment where space is a problem. GH relays are available in 3 open series — GHA (5 ampere rating), GHB (10 ampere rating), GHS (5 ampere plate circuit type). These relays are also available in plastic dustite enclosures with 8 pin plug for 1C and 2C, and 11 pin for 3C. UL approved versions available.

GENERAL PURPOSE RELAYS

SERIES W, WU

GENERAL DESCRIPTION — The Series W is a double-pole, double-throw relay, available with socket for plug-in application or for use without socket with standard quick-connect terminals for simplicity and ease in wiring. Rated for 1 and 2 HP motor loads, it offers high quality, dependable performance and long life.

These relays are ideal for use in appliances, automation equipment, motor starting, heater circuits, clock controlled systems, laundry equipment, vending machines, machine tools, furnace controls, panel boards and air conditioners.

SERIES W

Series WU — UL approved to UL508. Provided with Class A insulation.

The Series W plug-in design allows rapid removal and replacement of relays for preventive maintenance. Servicemen can replace relays without wiring and soldering problems.

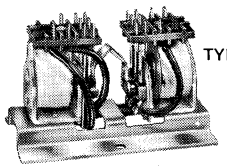
THREE BASIC MOUNTING ARRANGEMENTS — Type 1—Panel Mountings. Type 2—Side Mountings. Type 3—Socket (Includes retaining clip.)

W-RELAY HOLDING CIRCUIT — Available as an optional extra is a normally open holding contact for the coil circuit. This permits sustaining operation of the relay from momentary switches, as found in customary Start-Stop push-button stations, without sacrificing one of the heavy-duty load contacts where the coil voltage may be different from the load circuit voltage.

FUNCTIONAL SWITCH ASSEMBLY DESIGN — Evenly spaced contact return springs give almost simultaneous contact transfer on both sets of contacts. Simple one-piece construction of the contact fingers together with oversized contacts and the solid silver contact bar give long, trouble-free life.

TYPE LG

The Hart-Advance LG Relay combines two of the popular GH series into a latching assembly ideally suited for applications where it is desirable to use only a momentary signal to produce a continuous indication, and to reset electrically. This unit is available with 5 or 10 amp contacts and contact arrangements of 1 through 6 form C.



TYPE LG

TYPE MK

The Hart-Advance MK relay requires less than ½ cubic inch mounting space. All parts are cadmium cronak plated to prevent corrosion. Insulation material of silicone glass and hinges or beryllium copper assure stable performance under shock, vibration, and temperature extremes. The MK is available with palladium contacts and contact arrangements of 1 and 2 form C. Mounting of the open relay is accomplished by means of a single 2-56 screw. Also available are a choice of 3 standard hermetically sealed enclosures.

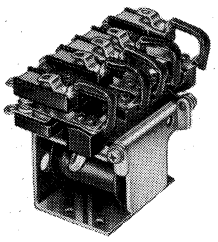
POWER RELAYS

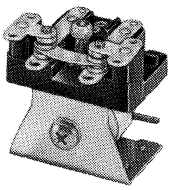
TYPE 33B & 33BLA



TYPE 33B — 5 POLE

The Hart-Advance type 33B relay is a compact power relay designed for versatility and long life. It is available as a latching or non-latching unit of 1 through 5 poles with contact ratings of up to 25 amps. Quick disconnect terminals and a wide variety of enclosures add to its versatility. Contacts and terminals are mounted on molded phenolic blocks, and adjusting screws on each blade permit close adjustment of contact gap, overtravel and contact pressure. The armature pivots on machined phosphor bronze bearing pins, while adjustment of the armature and yoke assembly allows precise alignment between armature and pole face.

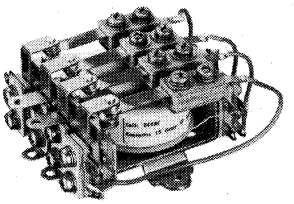
TYPE PG



TYPE PG1Z

The Hart-Advance type PG is a general purpose power relay available in AC or DC with DPDT(2C) or SPDT-DB(1Z) contact arrangements. This relay is excellent for general industrial power control circuits. The standard relay has a contact rating of 15 amps but the 1Z arrangement offers a 30 amp rating. The additional rating is achieved by including a jumper between the blades, thus providing heavy duty contacts without affecting the physical size, vibration, or shock characteristics. A wide variety of enclosures are also available.

TYPE PC



TYPE PC4C

The Hart-Advance PC relay is a compact positive-acting unit available with either AC or DC coil. This relay is used in air conditioning and lighting systems, small motor starting, garage door openers —wherever dependable circuit switching is necessary. The 1/4" dia. contacts are rated at 15 amps resistive at 115VAC or 26.5VDC. Contact arrangements from 1 through 4 poles are available. The large contact surfaces are kept clean by good wiping action.

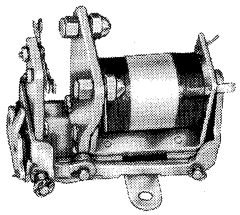
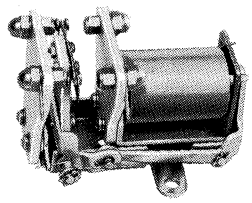
TELEPHONE & POWER RELAYS



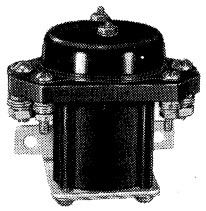
TYPE HV/1X



TYPE HV/1Z

TYPE HV HIGH VOLTAGE SWITCHING RELAY

The Hart-Advance HV relay is a small unit developed especially for making and breaking high voltage circuits of low current capacities. Its excellent insulation characteristics will permit the relay to handle higher voltages than relays of comparable size. A system of levers operating the armature provides the necessary wide gap for high voltage switching, but keeps the size of the relay to a minimum. The contact assembly is mounted on ceramic to insure high insulation plus strength and low energy loss. The specially designed contact assembly provides for minimum bounce. The ¼" diameter silver cadmium oxide contacts will break up to 5000V RMS at 200 milliamps current. Special forms available in oil-filter enclosure for switching up to 12,000 volts.



TYPE ES

TYPE ES

The Hart-Advance type ES contactor is a compact, ruggedly built, enclosed, solenoid-type relay designed for heavy duty DC applications. Originally designed and built for military applications. the ES is now widely used in both military and industrial applications. This unit is ideal for use in transferring high current loads. The dust-tite enclosure assures trouble free operation while the ⅜" double-make contacts provide dependable load control. The unit employs an unusually powerful solenoid with spring loading to ensure positive operate and release.

SPECIFICATIONS	TYPE HV	TYPE ES
weight	7.5 ounces maximum	11 ounces max.

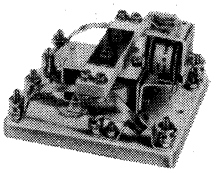
COAXIAL ANTENNA RELAYS

TYPE AT

The Hart-Advance AT relay is designed especially for heavy duty Radio Frequency transmitter antenna changeover, and high voltage switching applications. This relay is for fixed-station usage with a conservative rating of 1 KW. It is also ideal for switching industrial loads because of its ¼" diameter silver contacts and wide contact gap. The AT relay is built for easy connection to antenna lines and is available with auxiliary single pole single throw normally open contacts. The AL latching relay is an adaptation of the AT to be used when it is desirable to use only momentary current for relay switching.



TYPE AT2C

TYPE AH

The Hart-Advance AH relay is designed specifically for Radio Frequency operation. The small size of this unit makes it ideal for use in compact sets where the load does not exceed ½ KW. High contact pressure is obtained through the use of long phosphor bronze springs. Low-loss handling of radio frequency energy is assured by the steatite insulation, and adequate spacing between contacts. This relay is fast and positive in action and will operate in any position. Standard contact rating is 10 amps resistive. The AH is available for either AC or DC operation.

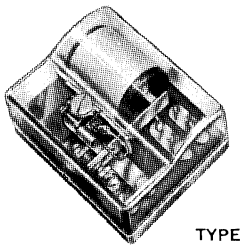
SENSITIVE D.C. RELAYS
TIME AND THERMAL TIME DELAY RELAYS



TYPE SV

TYPE SV

The Hart-Advance SV is an ultra-sensitive durable, dustite and fully adjustable relay incomparable for use in any DC circuit restricted to a few thousandsths of a watt power consumption. The counter-balanced armature design permits excellent operation in any position. The transparent, molded plastic cover guards against dust or dirt reaching the contacts or other working parts — yet allows immediate visual inspection. The sturdy molded bakelite base has both screw and solder terminal connectors, and a convenient means of mounting is provided.

Standard factory adjustment is 5 milliwatt sensitivity and field adjustments are easily made by using the vernier screws. The silver contacts and spring tension can be accurately and permanently set—yet easily changed.

SPECIFICATIONS	TYPE SV

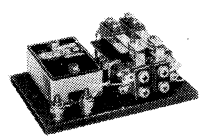
SERIES DT

SERIES DT

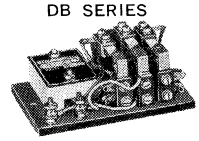
The Hart-Advance DT relay is an efficient, dependable, low cost thermal delay relay. It may be used in conjunction with various relays for delayed making or breaking of controlled circuits. The DT has an adjustable time delay of 5 to 60 seconds and is supplied with an isolated heater with 4 terminal connections. Simply constructed, this unit is housed in unglazed porcelain and operates on the bi-metal-thermal principle. The heat rise is negligible because of the porcelain housing. This assures uniform operation, subject only to ambient temperature changes and line voltage fluctuation.

TYPE DB & DM

The Hart-Advance DB-DM adjustable time delay relay is excellent for use in pre-heating tube filaments, specialized lighting circuits, photographic controls, and protection applications. The DB provides a time delay before break. When energized, it immediately closes the controlled circuit — remaining closed only for the preset period, or until the initial circuit is broken. The DM provides a delay before make. Once energized, it furnishes an adjustable delayed make for the controlled circuit. When the controlled circuit is completed, it remains closed until the initial circuit is broken. Completion of the controlled circuits starts the cooling of the time delay device. Both series utilize a bi-metallic thermal unit which can be adjusted for delays of 5 to 60 seconds. Cooling of the thermal units for proper re-cycling requires 8 to 10 times the delay period.



DB SERIES



DM SERIES

SPECIFICATIONS	TYPE DT
weight	1.4 ounces max.
contact arrangement	1 form A or B only
contact material	⅛″ dia. silver
contact rating	2 amps resistive at 115VAC or 26.5VDC 0.8 amps inductive at 115VAC or 26.5 VDC
ambient temperature	−55°C to +85°C
terminals	solder lug. Supplied with an isolated heater with four connections.
mounting	two 5/32″ dia. clearance holes for 6-32 screws
coil voltage	standard 6, 12, 24, 115 or 220 volts AC or DC. Upon request, any DC or AC voltage up to 220 volts can be supplied.
coil	2 watts nominal required to operate
timing	adjustable delay of 5 to 60 seconds
timing tolerance	±10% at 25°C; ±25% over ambient temp. range
cooling period	8 to 10 times the preset delay period

SPECIFICATIONS	TYPE DB & DM
weight	8 ounces max.
enclosure	not available
contact arrangement	2 form C max. (DPDT)
contact material	¼″ dia. fine silver
contact resistance	.100 ohms max.
contact rating	10 amps resistive at 115 VAC or 26.5 VDC 5 amps inductive at 115VAC or 26.5 VDC
ambient temperature	−55°C to +85°C
terminals	stud and nut
mounting	two .152 dia. holes on 3 5/16″ centers
dielectric strength	500 volts RMS
insulation resistance	100 megohms min.
delay time & tolerance	5 to 60 seconds ±10% at 26°C; ±25% over amb. temp.
recycling time	8 to 10 times the delay period
sensitivity	DC relay 1.5 watts; AC relay 10 volt-amps
coil dissipation	DC relay — 3 watts max.; AC relay — 14 V/A

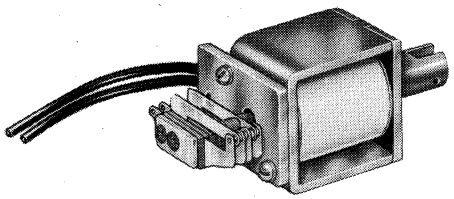
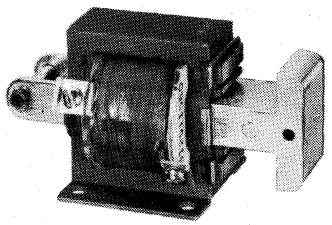
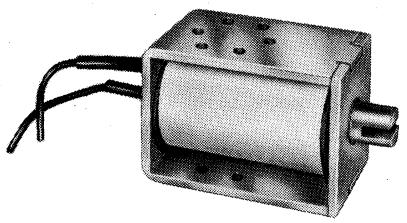
SOLENOIDS



SOLID FRAME SOLENOID
with Auxiliary Contacts



LAMINATED FRAME SOLENOID



SOLID FRAME SOLENOID

Hart-Advance solid frame solenoids are manufactured using high grade steel in all parts of the magnetic circuit. Carefully controlled annealing after all machining operations are completed, assures maximum efficiency. The frame is dove-tailed and staked to the end plate to add mechanical strength and to increase performance. The solid frame solenoids are supplemented by the type 51 laminated frame unit which has been designed and engineered to meet the most stringent AC requirements. A wide selection of special features is available to fit each solenoid to a specific application.

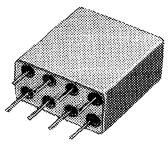
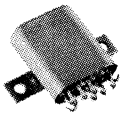
MILITARY TYPE CRYSTAL CAN RELAYS



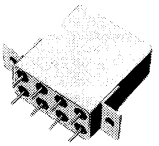
TYPE 30

The Hart-Advance TYPE 30 microminiature relay combines compactness with rugged dependability. The superior performance designed and built into this double-pole/double throw relay makes it the ideal component for the most demanding military and commercial applications — aircraft and missile controls, computers, communication systems, and other hi-grade electronic circuitry. Outstanding features include rotary armature, bifurcated gold-flashed contacts rated at Low Level to 2 Amps and 250 MW maximum sensitivity. Another Hart-Advance exclusive is "Thermo-Dri" nitrogen back-filling of the hermetically sealed unit for contamination-free operation under the most adverse environmental conditions. The TYPE 30 is available in a wide range of header and mounting configurations. Meets MIL R5757/10 and NASA specifications.



TYPE MV

The Hart-Advance MV combines proven design with modern production methods to provide a reliable DPDT micro-miniature relay for the most demanding applications. The use of gold plated silver-magnesium-nickel contacts allows for reliable switching from dry circuit to 2 amps. The simple, efficient magnetic circuit combined with dual coil construction provide for maximum sensitivity. This relay is available from stock in all popular header and enclosure styles with custom enclosures manufactured on special order. Meets MIL R5757/10.



TYPE VR

The Hart-Advance TYPE VR is a .2" grid-spaced, hermetically sealed relay developed to exceed the requirements of MIL R5757/D. This unit will withstand 100 G shock and 35 G vibration through 3,000 CPS. Having a nominal operating power of 250 MW, the VR can also be supplied as a 100 MW relay. The DPDT contacts are gold plated silver-magnesium-nickel alloy with a rating of 3 Amps resistive at 28 VDC. Meets and exceeds MIL R5757/10.

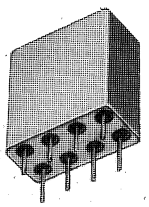
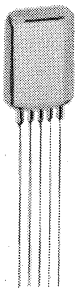
MILITARY TYPE CRYSTAL CAN RELAYS



TYPE TKS

The Model TKS Relay is designed specifically for long life dry circuit reliability and low operating power requirements, Hart-Advance Series T relays incorporate these design features. The coil and switch sections are completely isolated, eliminating contact contamination from organic coil materials. Unique hinged armature design eliminates bearings and pins, prevents contact contamination from bearing particles. Birfurcated contacts; parallel switching improves dry circuit reliability. Welded construction prevents contact contamination from solder fluxes or migrating flux particles. Improved sensitivity, designed for operation at 100 milliwatts or less at pull-in.



TYPE NM

The Hart-Advance TYPE NM relay is the ideal component for aircraft, missile, control equipment, and other applications where extended life is essential and where space limitations are critical — occupies less than .04 cubic-inch. Contact resistance is extraordinarily low, making it invaluable for dry circuit applications. The simplified design of the TYPE NM achieves high shock and vibration resistance and affords an operating sensitivity of 100 MW. Available from stock with either screw-down mounting bracket or mounting bracket for printed circuit use.

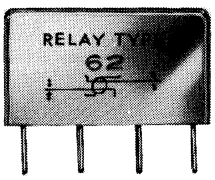
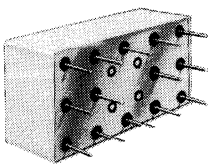
MICRO-MINIATURE MILITARY TYPE RELAYS



TYPE 62

TYPE 62

A highly versatile half-size microminiature relay, the Hart-Advance TYPE 62 is ideally suited to all of today's modern circuitry as well as tomorrow's advanced military systems. Superior dependability, uniformity, and sensitivity are assured through the uniquely simplified design of the TYPE 62. Greater resistance to vibration and shock is achieved through unitized welded construction and balanced armature with integral return spring and back stop. Increased reliability and sensitivity are accomplished by use of a single coil having optimum magnetic characteristics. Greater heat dissipation is afforded by the massive pole pieces. The use of gold-flashed, silver-magnesium-nickel alloy contacts provides exceptional stability in high temperature environments. For contamination-free operation, the TYPE 62 is hermetically sealed and back-filled with "Thermo-Dri" nitrogen. Meets MIL R5757/9 and NASA specifications.



TYPE 64

TYPE 64

The TYPE 64 embodies engineering advances truly unique among today's four-pole, double-throw relays — twice the versatility of conventional 2 PDT's, half the size of conventional 4 PDT's . . . with no sacrifice in performance! Designed specifically to meet aero-space needs, the TYPE 64 features All-Welded Construction and "Thermo-Dri" nitrogen backfilling to assure contamination-free operation. Symmetrical circuitry simplifies wiring. Available in various coil resistances and all popular header stlyes. The TYPE 64 sets a new standard of relay reliability . . . Meets MIL-R-5757/12.

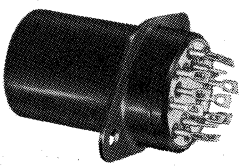
MILITARY RELAYS

TYPE R

Size for size, ounce for ounce, and at any standard shock and vibration resistance, Hart-Advance Series R relays can be built to carry a broader range of voltages and amperages than any other relay of its type commercially available today.

In both laboratory tests and actual service, they excell in reliability. Standard as single coil units, they are also available with two coils (either or both of which will operate the unit) in 2-pole or 4-pole, double-throw models.

TYPES RA & SA



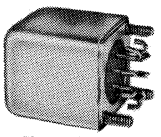
SERIES RA & SA

Hart-Advance Series RA and SA miniature relays incorporate rectified circuits using the highest grade miniature silicon diode rectifiers in a very unique potted construction within the coil case of the relay. This construction permits the RA and SA relays to be operated from an external AC power source and continue to provide the same reliable performance found in the Hart-Advance Series R and S relays. (See Bulletins R-12-15 and S-13-18 respectively.)

Several types of rectifier circuits are available including: half wave (back to back); full wave bridge and special circuits.

Series SA relays differ from RA relays in that they have completely inorganic switches. These SA relays should be used where you require long shelf life, long periods between operations, dry circuit switching and utmost reliability. In actual service under many adverse environmental conditions, the Series RA and SA — like the Series R and S relays — have excellent reliability. Physically and electrically, Series RA and SA are interchangeable.

TYPE VGS



TYPE VGS

The Hart-Advance TYPE VGS, an ultrasensitive version of the former VG Series, is a hermetically-sealed, rotary action, DPDT, miniature relay ideally suited for aircraft and missile use. Engineered for sensitivity, this rugged compact relay occupies less than one cubic-inch of space and withstands 15 G's to 2,000 CPS vibration while utilizing only 125 MW of power.

The gold plated silver-magnesium-nickel alloy contacts are rated at 5 Amps resistive. Reliable operation at temperatures from −55°C to +125°C is attained by using the latest in magnetic and insulation materials and by manufacturing under ideal conditions of temperature, humidity, and dust control.

TYPE S

Combining the broad range of performance characteristics pioneered by Hart-Advance Series R Relays, with new design features for even greater reliability in dry circuits, Series S Relays will permit intermixing of dry and wet circuits safely in such applications as guided missiles, computers, jet engine controls, automation control systems and similar critical devices.

Coils are separately sealed within the outer hermetically sealed cases to isolate the switch mechanism from possible contamination by gases from the coil insulation. Contacts are specially processed and cleaned before assembly; the switch mechanism has been simplified and insulators are entirely inorganic to eliminate other possible causes of malfunction.

SPECIFICATIONS	TYPE VGS	SERIES R & S	SERIES RA & SA

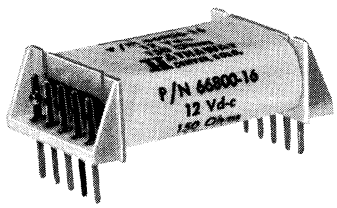
Coil Data, Models R & S — Resistances: 1 ohm to 50,000 ohms; Arrangements: single coil, two independent coils, either or both of which will operate unit. Continuous duty.

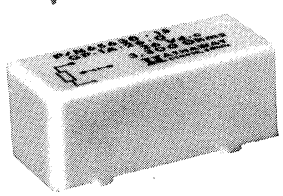
Coil Data, Models RA & SA — 28 - 220 V, 60 - 400 cycles A.C. Various rectifier circuits are available, i.e., half wave, full wave and special circuits. Continuous duty.

HATHAWAY COMPONENTS

MINIATURE

DRIREED SWITCHES, RELAYS





NEW 2 AMP—25 WATT SWITCHING
1.6" x .5" x .5"

OPEN FRAME
Intermediate Reed Relay.
Also available with snap-on magnetic shielding case.

"GP" GENERAL PURPOSE:
1A Size: .5" x .5" x 1.15"

HERMETIC SEALED CONTACTS

EPOXY SEALED CASE
Nylon Case and Bobbin, Epoxy filled.

INSTRUMENTATION RELAY
Printed Circuit mounting.
Less than 1 ms switch time, 5 x 10^8 Ohms minimum isolation resistance.

LOW SILHOUETTE
.350" x .350" x 1.2"

NEW 1 AMP OR MICROAMP

OPEN FRAME
Low Silhouette at .350" high .150" plug-in pin spacing. Low-loss, spot welded reed to pin connection. Also available with snap-on magnetic shielding case.

HIGH EFFICIENCY, 1 FORM A 120 MW STD. TO 50 MW SPECIAL

"K" SERIES
1A Size: .5" x .5" x 1.5"
PC mounting, Nylon case and bobbin, Epoxy filled.
Efficient coil with low power consumption.

"J" SERIES
1A Size: .4" x .4" x 1.10"
Axial lead version of the K Series.

"R" SERIES
Versatile, ruggedized. Up to 12 Form 'A's — 4 Form Cs. Many special configurations.

Electrostatic shield. Magnetic latch up to 2 poles; pick and hold up to 11 poles.

RELAYS WITH EXTRA DIMENSION

TO-5 MICROMINIATURE RELAYS — SERIES MA AND MS

NEW

Product Bulletin 90

All welded, DPDT relays manufactured in accordance with MIL-R-5757.

CONTACT RATING

1 ampere at 32 volts DC max, low level 0 to 0.1 ampere at 50 mV DC or AC, minimum current per MIL-R-5757/40 and /70.

UNIQUE PROCESSING TECHNIQUES ENSURE LONG LIFE

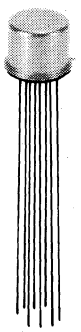
All handling and processing techniques are fully controlled and documented. Complete identification and traceability records are maintained. All parts are 100 percent inspected and cleaned prior to assembly. Critical assembly and inspection stations are housed within laminar flow work stations.

HI-G'S CLEANING PROCESS REMOVES ALL TYPES OF CONTAMINATES

A unique cleaning system entirely housed in a laminar flow bench utilizing vapor degreasing, ultrasonic agitation, spray cleaning, and use of solvents with an organic base, water and detergent is capable of removing organic as well as inorganic soils. A special spray cleaning process using a highly volatile solvent is used as a final cleanup of the completed assembly.

VACUUM DEGASSING

After final cleaning, the relays are immediately placed into a vacuum outgassing station. The vacuum system is fully protected against contamination with molecular sieve traps, liquid nitrogen, and water cooled optical baffles. A high temperature vacuum oven with controls capable of maintaining temperature limits and gradients within ±1°C is connected to the pumping station. Relays are outgassed above 200°C at vacuum levels of 10^{-6} torr (0.001 micron) for 16 hours.



FULL SIZE

FINAL SEAL OPERATION

At the conclusion of the outgassing cycle, the open relays are passed from the vacuum oven through an interlock into an atmospheric controlled dry box. The back filling gas is continuously recirculated through an inert gas purification system, capable of changing the entire volume of gas within the dry box every 5 minutes. Within the dry box is a projection seal welder, which hermetically seals the housing to the relay assembly.

FINAL TEST

All relays are checked for contact resistance, pull in and drop out, dielectric strength, insulation resistance, contact bounce, operate and release time, and coil resistance. Additionally, each relay is submitted to a 5000 cycle low level miss test.

ELECTRICAL CHARACTERISTICS

Sensitivity at 25°C: MA Series — 125 mW.
MS Series — 65 mW.

Life: 50,000 operations at min current loads.
100,000 operations min at max rated load.
1,000,000 operations min at low level.

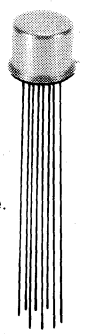
Overload: 2 amps at 32 VDC for 100 operations min.

Contact Resistance: (a) 100 milliohms initial at rated load.
(b) 200 milliohms after rated life.
(c) 3Ω max during min current life. 0.5Ω after life.
(d) 50Ω max at 15 μA and 15 mV rms.

Contact Bounce: 1.5 ms max.

Operate Time: 2.0 ms max at nom coil voltage at 25°C (MA Series).
4.0 ms max at nom coil voltage at 25°C (MS Series).

Release Time: 1.5 ms at 25°C (MA Series).
2.0 ms max at 25°C (MS Series).



Dielectric Strength: 500 V rms between all mutually insulated points at sea level.

Insulation Resistance: 5000 MΩ min between mutually insulated terminals.

ENVIRONMENTAL CHARACTERISTICS

Temperature Range: −65°C to +125°C.

Vibration: 0.5" DA from 5-34 Hz, 30 G from 34-3000 Hz, 10 μs max contact opening.

Shock: 75 G (11 ms duration), saw tooth, 10 μs max contact opening.

Acceleration: 100 G.

Leakage Rate: 1×10^{-8} cc/s max.

WEIGHT

Series MA: 2.9 grams max.

Series MS: 4.5 grams max.

Hi-G Part No.	MIL Part No.
2T-2994	M5757/28

CRYSTAL CAN RELAYS

ENVIRONMENTAL CHARACTERISTICS FOR STANDARD CRYSTAL CAN SERIES

Life: 100,000 operations at 125°C and rated load.
Temperature: −65°C to +125°C, operating.
Vibration: 10 to 2000 Hz, 20G min.
Shock: 100 G, 11 milliseconds.
Sealing: Hermetic, to 80,000′

Insulation Resistance: 1000 megohms min., except coil-to-case at high temperature 500 megohms min.

Dielectric Strength: Contacts-to-case: 1000 volts rms, 60 Hz, mutually insulated terminals: 500 volts rms standard.

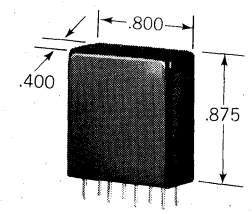
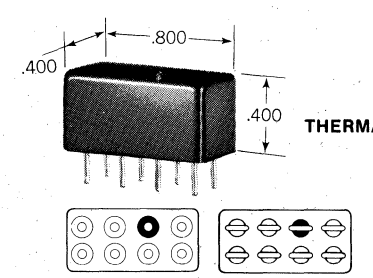
THERMAL EMF RELAYS — SERIES EK-EB Product Bulletin 156



CONTACT RATING
The series EK & EB have been specifically designed to minimize the thermal EMF generation of the relay contacts during low level switching. Although the design is centered around this low level application, the relay is capable of switching signals up to and including 2 amperes at 30 VDC.

Relay Type	Series 2EK	Series 2EB
Rated Contact Current	2 Amperes	2 Amperes
Maximum Weight	0.37 Ounce	0.95 Ounce
Construction	All Welded	All Welded
Notes	Available in 2-pole units	Available in 2-pole units

Type	Voltage Code	Nominal DC Coil Voltage	Max Continuous Coil Voltage	Max Pull-in Voltage @ 25°C	Min Drop-out Voltage @ 25°C	DC Coil Resistance Ohms ±10% @ 25°C
2EK	**106**	6	7.2	3.1	.35	40
or	**112**	12	14.4	6.3	.75	160
2EB	**126**	26.5	32	13.0	1.5	675



THERMAL EMF: 10 microvolts max. between closed contacts with relay at room ambient and coil energized and stabilized with nominal rated voltage.

The thermal EMF generation is measured on EK and EB relays while enclosed in a chamber that provides a shielded test condition and a still air environment.

All inter-connections are symmetrical to minimize function variations. Measurements are made using a high impedance micro voltmeter.

ENVIRONMENTAL CHARACTERISTICS FOR STANDARD CRYSTAL CAN SERIES

Life: 100,000 operations at 125°C and rated load.
Temperature: −65°C to +125°C, operating.
Vibration: 10 to 2000 Hz, 20G min.
Shock: 100 G, 11 milliseconds.
Sealing: Hermetic, to 80,000′

CRYSTAL CAN RELAYS

RADIO FREQUENCY RELAYS

Product Bulletin 155

Standard input and output connections from RF contacts are RG-196/U Teflon insulated coaxial cable, 6″ in length, unterminated. Other lengths, types of cable, or coaxial connector terminations available on special order. These relays meet or exceed the applicable portions of MIL-R-5757/D and MIL-R-3928.

RADIO FREQUENCY CHARACTERISTICS	
Frequency Range	0 - 500 MHz*
Voltage Standing Wave Ratio (VSWR)	<1.1:1 typical
Insertion Loss	0.16db typical
Characteristic Impedance	50 ohms†
Crosstalk	−50db typical

** Usable to 1000 MHz with reduced RF characteristics*
† Other impedances available on special order

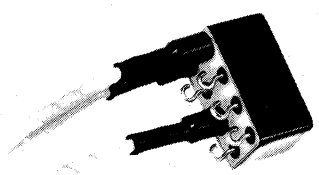
DICE CUBE RADIO FREQUENCY RELAY — SERIES RFC

Operate Power 150 mW

Relay Type	RFC
Size	0.5-inch cube
Contact Rating	200 watts RF cold switching 75 watts RF hot switching
Maximum Weight	0.3 ounce (without terminations)

NOTE: Electrical characteristics same as series C

HALF SIZE CRYSTAL-CAN RADIO FREQUENCY RELAY — SERIES RFK

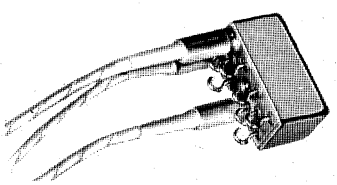


Operate Power 250 mW

Relay Type	RFK
Size	.4 x .8 x .4 inch
Contact Rating	200 watts RF cold switching 75 watts RF hot switching
Maximum Weight	0.37 ounce (without terminations)

NOTE: Electrical characteristics same as series K

LATCHING HALF SIZE CRYSTAL-CAN RADIO FREQUENCY RELAY — SERIES RFKL

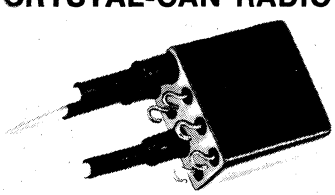


Operate Power 150 mW

Relay Type	RFKL
Size	.4 x .8 x .4 inch
Contact Rating	200 watts RF cold switching 75 watts RF hot switching
Maximum Weight	0.37 ounce (without terminations)

NOTE: Electrical characteristics same as series KL

CRYSTAL-CAN RADIO FREQUENCY RELAY — SERIES RFB

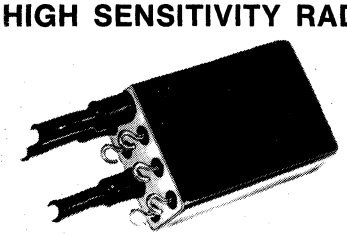


Operate Power 250 mW

Relay Type	RFB
Size	.875 x .800 x .400 inch
Contact Rating	200 watts RF cold switching 75 watts RF hot switching
Maximum Weight	0.95 ounce (without terminations)

NOTE: Electrical characteristics same as series B

HIGH SENSITIVITY RADIO FREQUENCY RELAY — SERIES RFBC



Operate Power 40 mW

Relay Type	RFBC
Size	1.275 x .800 x .400 inch
Contact Rating	200 watts RF cold switching 75 watts RF hot switching
Maximum Weight	1.0 ounce (without terminations)

NOTE: Electrical characteristics same as series BC

CRYSTAL CAN RELAYS

ASSURED RELIABILITY RELAYS — SERIES AR Product Bulletin 154

AR SERIES FEATURES

- All welded construction
- State of the art materials
- Intermediate current switching capability
- Vibration immunity to 30 G's, 3000 Hz
- Shock immunity to 150 G's
- Available with bifilar wound coils (For coil transient suppression)
- Available with ceramic terminal seals
- Meets requirements of MIL-R-39016
- 100% environmental testing

Hi-G's AR Series production facilities are completely atmosphere controlled and meet the requirements of a class 100 clean room per MIL-STD-209. Contamination is virtually eliminated.

ORDERING INFORMATION

Series Number — determines terminal Grid:

3500 = Inline Pins, 3700 = Stagger Pins } .100 Grid

3600 = Inline & Plug-in, 3800 = Stagger Pins } .150 Grid

Variation Code — **00** through **99** determines shielding and special features.

Number of Poles — **1** through **4.**

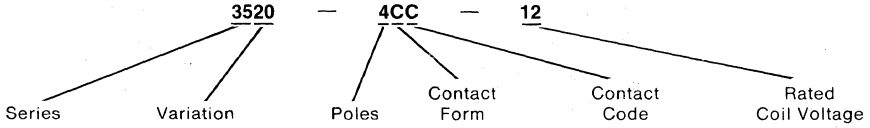
Contact "form" or configuration — **A, B,** or **C.**

A = Normally open contacts
B = Normally closed contacts
C = one normally open and one normally closed contact

Contact code — **A** through **Z** describes specific plating and blade designs.

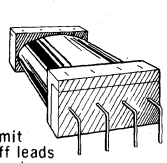
Coil Voltage (rated) — **5, 6 ,12, 24** or **48** dc.

EXAMPLE:

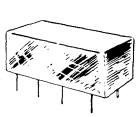


describes a .100 grid PC mounted relay with external magnetic shielding. It has 4 form C contacts designed for the heavy duty switching of 10 watts and a coil rated at 12 volts dc.

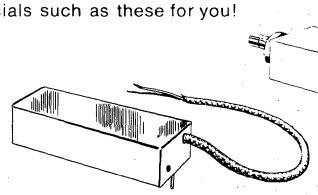
SPECIALS: Special versions of Series 3500/3600 relays are limited only by the bounds of imagination and budget. Let our APPLIED IMAGINATION work to produce specials such as these for you!



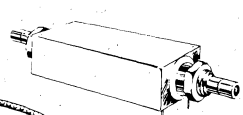
outboard bends permit clipping off leads to replace relay without special desoldering tools



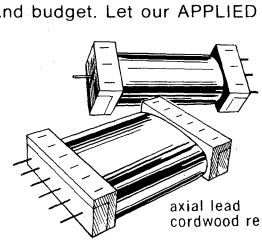
½ size crystal can glass reed relay



low capacitance specials



RF reed relay



axial lead cordwood relays

Authorized Hi-G Relay Distributors are located throughout the U.S. and Canada.

Spring St. & Rt. 75, Windsor Locks, Conn. 06096, 203-623-2481

ELECTRONIC TIME DELAY RELAYS, VOLTAGE & PHASE SENSORS

ELECTRICAL CHARACTERISTICS

Input Voltage: 18 to 31 volts DC. Reverse polarity protection provided on all standard units.

Delay Time Tolerance: ±10%. Tolerances to ±5% are available on special order.

Recycle Time: 0.5% (nominal delay time) — recycle time maximum @ 25°C.

Recovery Time: 0.1 second maximum up to 20 seconds delay. 0.5 second maximum up to 100 seconds.

Reset Time: 10 milliseconds maximum.

ENVIRONMENTAL CHARACTERISTICS

Temperature Range: −55°C to +85°C, or −55°C to +125°C.

Vibration: 20G, 10 to 2000 Hz.

Shock: 50G, 11 ±1 milliseconds duration.

Insulation Resistance: 1000 megohms at 500 volts DC.

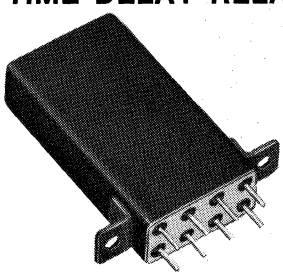
Dielectric Strength: Contacts to case: 1000 volts rms, 60 Hz; mutually insulated terminals: 500 V rms.

Sealing: Hermetic to 72,000′.

Life: 100,000 operations minimum.

UNLESS OTHERWISE SPECIFIED

TIME DELAY RELAYS — SERIES 2400 Product Bulletin 167B



FEATURES

The Series 2400 Time Delay Relay combines a solid-state timing circuit and a half-size Hi-G relay in a package only slightly longer than a standard crystal-case housing. This combination provides the current-carrying capacity and the environmental immunity of Hi-G's electro-mechanical relays with the long life and quick response of hybrid circuits.

Delay Times: 50 milliseconds to 100 seconds Delay-on-make.

Contact Rating: 2 amperes resistive at 30 volts DC. 1 ampere at 115V, 400 Hz.

Contact Arrangement: DPDT.

Weight: 1.2 oz. maximum.

Dimensions: Base .4 x .8 inches max. Height 1.5 inch max.

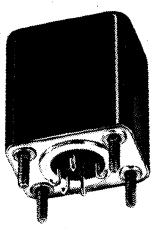
SPECIFY:

Series 2401: for operation in the −55°C to +85°C temperature range.

Series 2402: for operation in the −55°C to +125°C temperature range.

DELAY-ON-MAKE TIMERS, AC or DC TYPES, 1 to 4 POLES — SERIES 1600/1700

Product Bulletin 164



FEATURES: Hi-G Delay-on-Make Timers are available with either fixed or adjustable delays. Each adjustable relay covers one decade, e.g., 62 ms to 620 ms. You may select the decade that best suits your application within the range from 50 milliseconds to 180 seconds.

Delay Times: Fixed: 50 ms to 180 sec Adjustable: See tables below.

10 Amp Types: Standard contact rating 10 amperes resistive at 30 volts DC or 115 volts, 400 Hz; 5 amperes inductive at 28 volts DC.

Dimensions: Base: 1.25 x 1.75 inches. Height: 2.3 inches.

4 Amp Types: Standard contact rating 4 amperes resistive at 30 volts DC.

Input Voltages: DC units: 18 to 31 volts. AC units: 105 to 125 volts, 400 Hz.

Dimensions: Base: 1.0 x 1.25 inches max. Height: See Tabulation.

Type	Function	Contact Arrangement	Range (seconds)	Timing Code
1610	Fixed	SPDT	optional	XXXX
1611	Fixed	DPDT	optional	XXXX

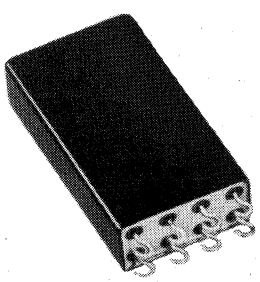
SOLID STATE TIMING MODULE — SERIES 1800/1900 Product Bulletin 168



FEATURES: The Hi-G Timing Module is an all solid-state timer that offers excellent reliability over a useful life well in excess of one million operations. It has a fast reset time, is remarkably stable over a wide temperature range, and can provide delays as short as 10 milliseconds.

Delay Times: Refer to Timing Module Types Table.

Reset Time: 100 microseconds.

Output: Single pole, normally open. Rated at 1 ampere at 25°C derating to 250 ma at 125°C; inductive loads require an external diode. Maximum forward leakage 2 ma at 31 volts DC.

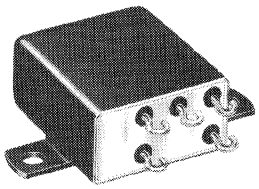
Dimensions: Base: .4 x .8 inch max. Height: See Tabulation.

TIMING MODULE TYPES

Series	Type	Timing Range	Temperature Range	Housing Height
1801	fixed	1 ms to 60 sec	−55° to +85°C	1.275 inches
1802	fixed	60 to 120 sec	−55° to +85°C	1.45 inches
1851	fixed	1 ms to 40 sec	−65° to +125°C	1.275 inches
1852	fixed	40 to 80 sec	−65° to +125°C	1.45 inches
1901	adjustable	1 ms to 45 sec	−55° to +85°C	1.275 inches
1902	adjustable	45 to 90 sec	−55° to +85°C	1.45 inches
1951	adjustable	1 ms to 30 sec	−65° to +125°C	1.275 inches
1952	adjustable	30 to 60 sec	−65° to +125°C	1.45 inches

ELECTRONIC TIME DELAY RELAYS, VOLTAGE & PHASE SENSORS

SOLID STATE TIMING MODULE — SERIES 1860 Product Bulletin 169



This Hi-G Timing Module is a solid-state timer hermetically sealed and encapsulated in a standard crystal-case housing which results in an extremely rugged, high performance assembly. All the standard relay headers are available for the timing module, making it directly interchangeable with most relay mounting hardware. (See 2B Relay.)

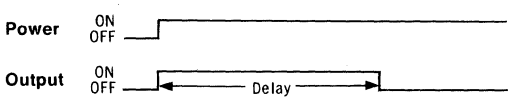
Delay Times: 10 milliseconds to 20 seconds.

Output: Single pole, normally open. Rated at 250 ma at 25°C. Derating linearly to 75 ma at 125°C. Inductive loads require an external diode. Typical leakage current 15 μa (in non-conducting state) at 85°C.

INTERVAL TIMERS — SERIES 4600/4700/4800 Product Bulletin 161

FUNCTION

Apply power and the output will energize immediately. After timeout, the output will revert to deenergized state. Remove and reapply power to recycle.



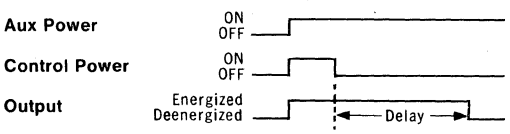
The function of an interval timer is to provide a defined time period. This time period or pulse is considered to be the conducting state of a solid state timing module, or the energized state when utilizing an electromechanical relay for output.

The Hi-G approach uses precise circuit designs in compact simplicity to meet the need for a sound balance between reliability and economy. Standard devices include both solid state and electromechanical output configurations. The Series 4800 represents the solid state timing module. For electromechanical relay output the 4600 Series offers fixed delay times, while the 4700 is an adjustable version.

DELAY-ON-RELEASE TIMERS — SERIES 5600/5700/5800 Product Bulletin 162

FUNCTION

Apply auxiliary power. Upon application of control power, the output will energize immediately. When control power is removed the delay begins. At the end of the delay period, the timer will deenergize.

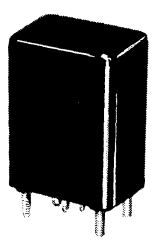


The time period of a delay-on-release timer begins with removal of control power. Prior to this the unit is energized and remains so until control power is removed and the delay period completed. In some cases, this logic is referred to as delay-on-release, dropout, or deenergization. There are many variations. However, Hi-G takes the most common approach as defined by the timing diagram.

Hi-G offers the Series 5600 in fixed delay times and the Series 5700 as adjustable with external resistor, both with electromechanical relay output. The series 5800 is all solid state and capable of driving most crystal can relays.

VOLTAGE SENSING RELAY / DC VOLTAGE LEVEL MONITOR — SERIES 1310

Product Bulletin 181



FEATURES

The Hi-G 1310 Series Voltage Sensor is essentially a voltage monitoring circuit operating on a snap-action transistor circuit with low drift and inherent temperature compensation. This device will either open or close a circuit when a predetermined voltage is present at its input.

Pull-in Voltage: 17 to 33 volts DC. Other voltage levels available on special order. Please specify voltage level to the nearest tenth of a volt when ordering.

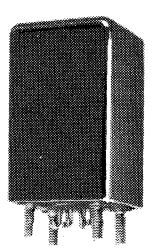
Accuracy: $\pm 2^1/_2$ percent of specified value over the temperature range. -65°C to $+125$°C.

Drop-Out Voltage: 0.5 volt maximum under actual pull-in voltage at any given point throughout the temperature range.

Maximum Allowable Applied Voltage: 150 percent of specified pull-in voltage.

AC Sensors: Single and 3 phase AC voltage detectors are available on special order. The 3 phase sensors can be provided in combination with Series 1400 phase sequence detectors.

PHASE SENSING RELAY 3ø POWER SYSTEM MONITOR — SERIES 1400 Product Bulletin 180



FEATURES

Hi-G Phase Sensors monitor three-phase power systems.

Two types of Phase Sensors are available as standard items, the P-type and the Q-type. P-type units will energize only when all three phases are in the proper sequence. They will deenergize only when power is removed. The P-type unit is best suited to applications where static loads are used and where regenerated voltage will not be present if a phase opens.

Q-type units perform the same functions as the P-type and, in addition, they will also deenergize if any phase is disconnected or grounded. The voltage of the faulted phase or the regenerated voltage must be below 70 percent of the nominal phase-to-phase voltage. Q-type units are suitable for motor loads where a regenerated voltage is produced.

Neither P nor Q-type units require connection to a neutral leg.

For heavy-current applications Phase Sensing Relays are used with slave relays having heavy-duty contact ratings.

Standard Phase Sensor Types

Type	Voltage ±10%	Frequency ±10%	Max Power Required	Mountings	Operating Characteristics
1407	115 V	60 Hz	4 Watts	A, B, C	P
1408	115 V	400 Hz	4 Watts	A, B, C	P
1409	208 V	60 Hz	6 Watts	A, B, C	P
1410	208 V	400 Hz	6 Watts	A, B, C	P
1437	115 V	60 Hz	6 Watts	A, B	Q
1438	115 V	400 Hz	6 Watts	A, B	Q
1439	208 V	60 Hz	9 Watts	B	Q
1440	208 V	400 Hz	9 Watts	B	Q

CONTACTS: SPDT.

CONTACT RATING:

2 amperes resistive at 30 volts DC.
0.5 ampere inductive at 30 volts DC.
1 ampere inductive at 115 volts, 60 or 400 Hz.
0.25 ampere inductive at 115 volts, 60 or 400 Hz.
0.25 ampere resistive at 208 volts, 60 or 400 Hz.
0.1 ampere inductive at 28 volts, 60 or 400 Hz.

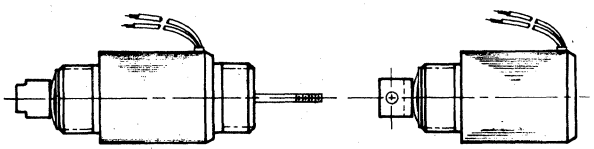
TEC-SOL STANDARD LINE

TEC • MAGNETICS "Tec-Sol" Solenoids offer the widest, most complete line of solenoids ever produced for industrial, and military applications, and are available in push or pull type, pressurized & non-pressurized, five different duty cycles, attachable mounting brackets, adjustable stroke, and captivated plunger.

STANDARD NON-PRESSURIZED

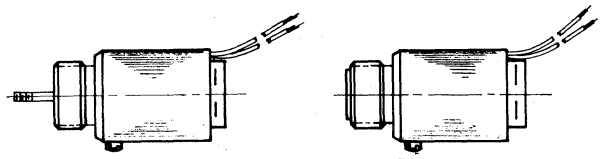


PUSH TYPE PULL TYPE

Available in two lengths:

Sizes	O.D.		Short Length	Long Length
8	½	X	⅝	1.00
10	⅝	X	¾	1¾
12	¾	X	15/16	1½
14	⅞	X	1⅛	1¾
16	1.00	X	1¼	2.00
18	1⅛	X	1⅜	2¼
20	1¼	X	1½	2½
22	1⅜	X	1⅝	2¾
24	1½	X	1¾	3.00
26	1⅝	X	1 15/16	3¼

STANDARD PRESSURIZED



PUSH TYPE PULL TYPE

Available in following lengths:

Sizes	O.D.		Length
12	¾	X	1 3/16
14	⅞	X	1⅜
16	1.00	X	1 9/16
18	1⅛	X	1¾
20	1⅛	X	1 15/16
22	1⅜	X	2⅛
24	1½	X	2 5/16

Internal springs available on all standards

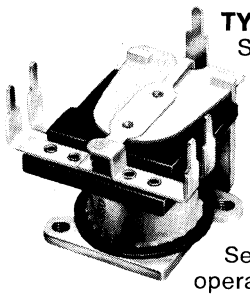
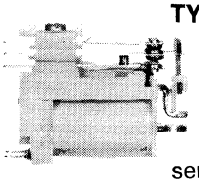
Quality Performers from ITT Jennings.

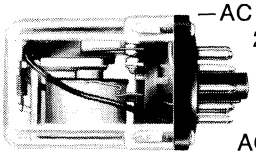
Here are some proven performers from one of the broadest lines of electro-mechanical relays ever offered. All quality-tested and available now with off-the-shelf delivery.



TYPE JAA
Small general purpose ac or dc relays. 1 or 2 Form C contacts.
Contact ratings:
Silver or palladium 0.3A
100 VDC or 115 VAC 30 W
silver cadmium oxide.
1 amp 28 VDC or 115 VAC 50 W
Available in following versions:
Sensitive, power, latching, slow operate and precision adjust.



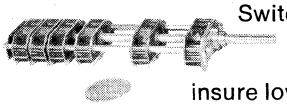
TYPE JBJA
2 or 4 Form C
Contact rating:
10 amp 380 VAC or 200 VDC
Coil power nominal 1.6W
spade type terminals chassis mount
sensitive, low cost, high current relay.

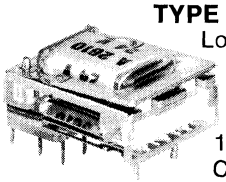


TYPE JBGA
—AC OR DC operated
2 or 3 Form C
Contact Rating:
Silver: 5 amp 250 VAC or
250 VDC 1000 VA or 250 watts
AG/CDo: 10 amp 120 VAC or 26 VDC
Coil power nominal 1.5 or 1.8 VA Plug-in type with dust cover. Also available in open types.

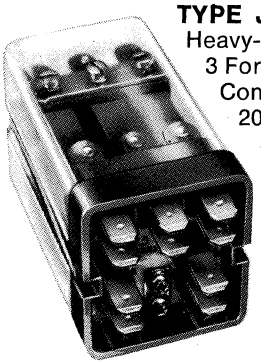
TYPE JWFA
One Form D contact arrangement.
(5A rating). Mercury wetted.
Operates on approx. 800 mW.
Plugs in to standard octal socket.
Encapsulated inside metal can.
Switched power 250 VA
Switched voltage 500 V a.c. or d.c.

TYPE JSR-325
Miniature low profile rotary switch
Up to 5 switching sections available.
Low .44 in height, detent angle 30° 1 to 6 poles.
1 - 12 positions. Solder directly to PC board
Switched current: 50 ma
Switched power: 3 W
Enclosed sections insure low contact resistance.

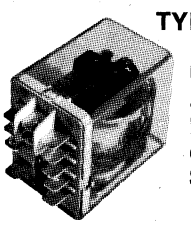




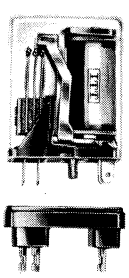
TYPE JAEA/B/C
Low profile printed circuit board relay
2, 4 or 6 Form C bifurcated contacts only. Contact ratings: .4 @ 30 VDC
Max. voltage 100 VDC or VAC
12 W or 12 VA
Coils 6 to 48 VDC, 0.68 W @ 24 V
printed circuit board mounting
plastic protective cage.



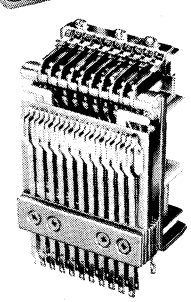
TYPE JCTA
Heavy-duty industrial relay
3 Form C heavy-duty contacts
Contact ratings:
20A, 440 V ac or 250 V dc
3600 VA or 360 W dc
Operates on approx. 5.8 VA ac or 2.3 dc. Single-stud or four-hole chassis mounting.
AMP Faston connections.
Fitted with plastic dust cover.
.157 in. electrical clearances throughout. Exceptionally long life.



TYPE JBNC
Medium duty appliance relay
Up to 3 Form C Contacts
ac or dc coils
Max. switched power: 2200 VA or 500 W per contact.
Switched current (max): 15A



TYPE JAKB/C/D/F/G/H/J/4M
Small plug-in dc relay up to 6 Form C contacts, silver or gold.
Contact ratings (max):
To 3 amp 100 VDC 56W
operates on approx. 125 mW dc
Chassis or plug-in mounting
Fitted with plastic dust cover.



TYPE JKAA
Counting relay. 10 Form A twin precious metal, light duty contacts.
Contact ratings:
0.3A 30 VDC 10W plug-in or chassis mounting. Dust cover on contacts.
Exceptionally long life.
Solder or wire wrap connections.
Extreme reliability.

There are many more relay types in production at ITT... some newly developed and others matching industry standard types. Vacuum relays, contactors and telephone specialties such as stepping switches and cross bar switches are among the proven performers. Contact us for any of your relay needs, including the services of a highly qualified engineering group to solve specific problems. ITT Jennings, a division of International Telephone and Telegraph Corporation, 970 McLaughlin Ave., San Jose, California 95108. Telephone: (408) 292-4025

JENNINGS ITT

Vacuum Relays mean Reliability

ki'lo·vac *n.* (F. *kilo*, thousand. L. *vacuus*)
1. That technology which offers reliable performance in high voltage relays resulting from operation at kilovolt levels in a vacuum dielectric.
2. *adj.*, pertaining to short contact travel, low contact mass, contacts free of oxides/pitting, and minimum contact bounce.

KILOVAC vacuum relays (ceramic or glass) are specified by design engineers for performance and reliability not available in conventional relays:

HIGH VOLTAGE ISOLATION: 2000 volts per mil of contact gap with predictable, repeatable isolation well in excess of rated values.

LOW AND STABLE CONTACT RESISTANCE: 0.015 ohms typical, with no contact oxidation or maintenance.

FAST SWITCHING TIME: 10 ms typical, due to small contact gap and short armature travel.

LONG LIFE: Millions of cycles with minimum degradation in electrical performance.

Any one of these standard features will justify your selection of KILOVAC vacuum relays. KILOVAC design and years of production experience permits immediate off-the-shelf delivery from a broad product line with voltages up to 50 KV. Special modifications provided in extremely short order.

...Reliability means KILOVAC

High vacuum technology has made high voltage switching practical with considerable savings in space and weight. KILOVAC uses the latest in vacuum pumping techniques, utilizing the "ion" type pump and achieving, in production, hard vacuums to 10^{-8} mm of mercury or better. Special manufacturing techniques include kovar-to-glass seals, final assembly in a dust and contaminant free area, specially selected glass and specially developed KILOVAC high voltage aging techniques.

KILOVAC relays are widely used in ECM, communications, sonar, radar, pulse-forming networks, medical electronics, and other high voltage equipment, or low voltage equipment where extreme reliability is a must. Many KILOVAC models are interchangeable with other manufacturers' types.

KILOVAC's broad line and "Quick Reaction Time" is geared to your most critical delivery schedule.

For complete technical information call your nearest KILOVAC sales-engineering representative or write directly to us.

KILOVAC, a company small enough to be responsive, large enough to be responsible.

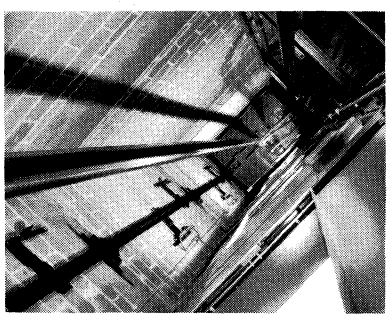
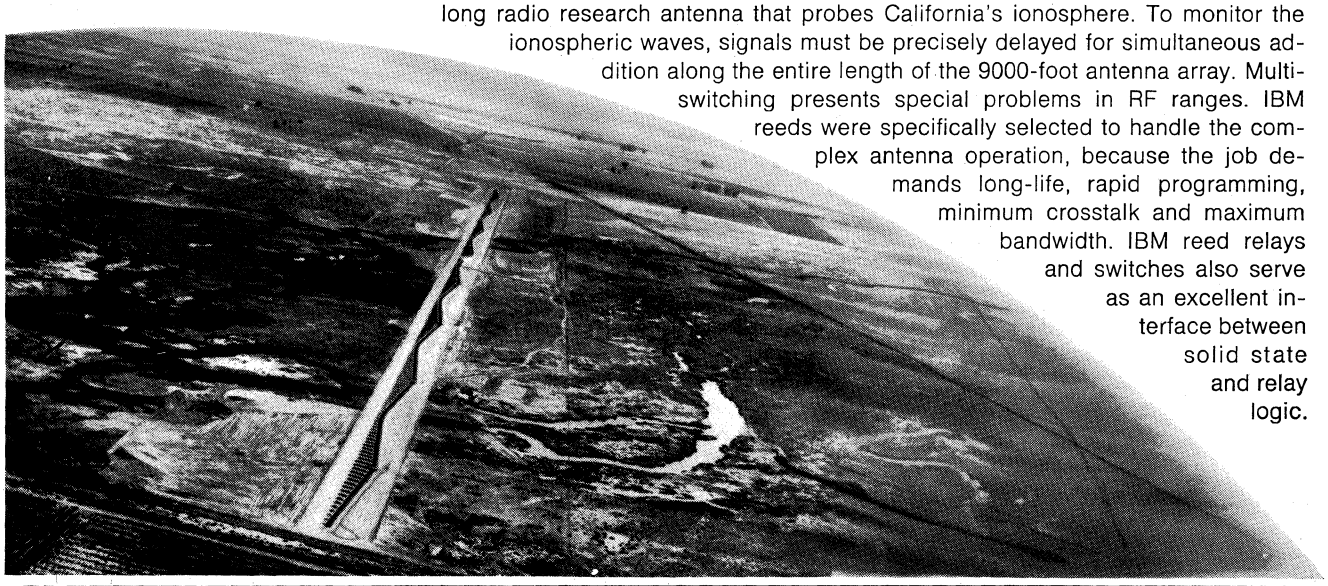
#H-24, same spec as H-23, except H-24 is SPST, N.O.

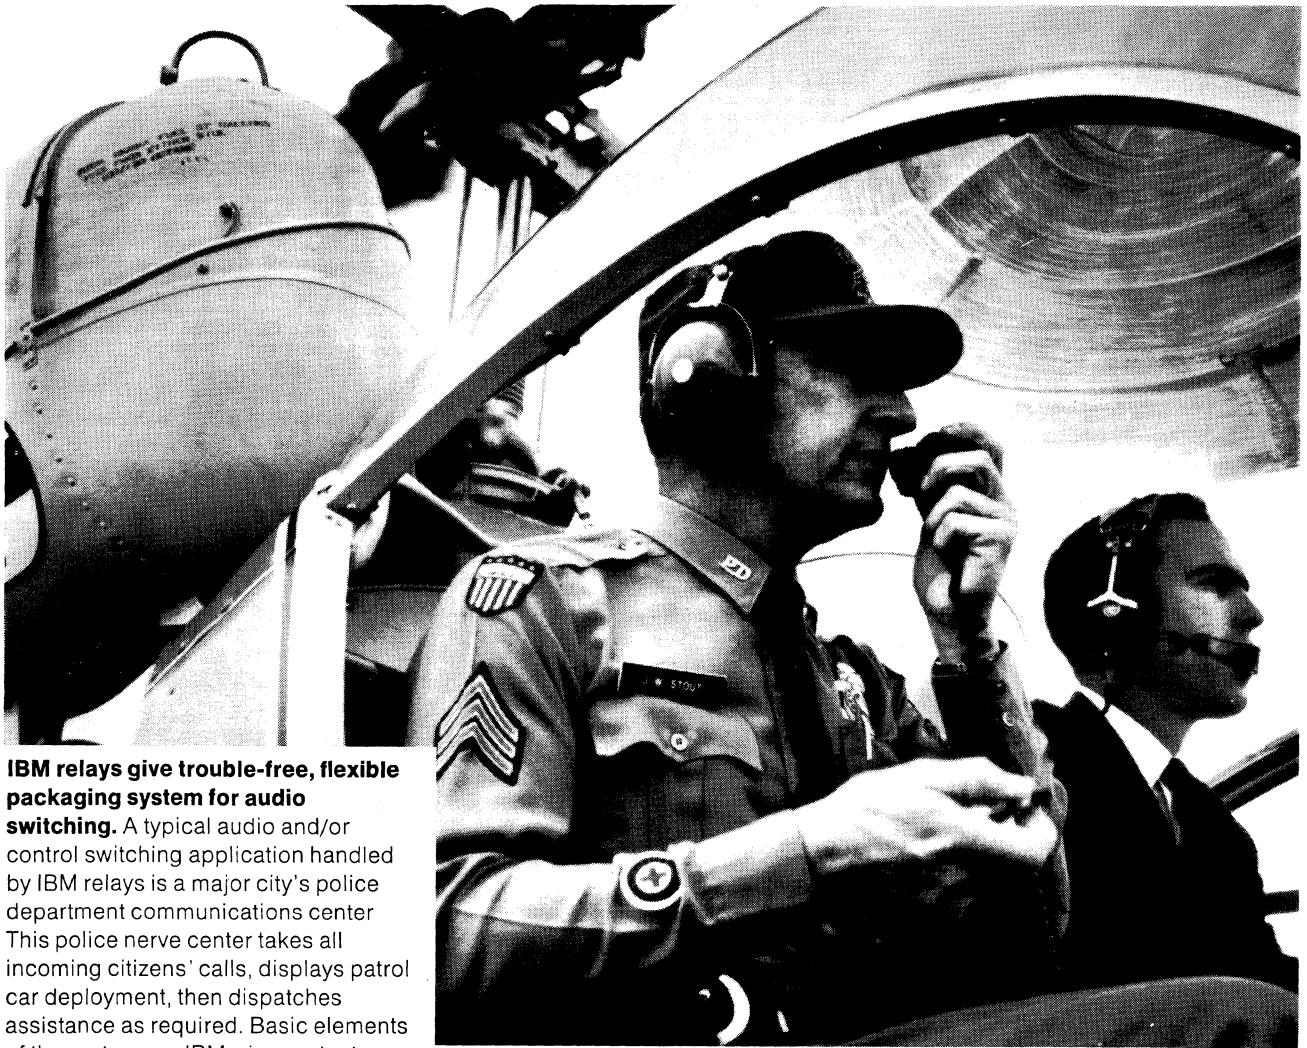
Some new switching applications for IBM relays you may want to think about.

IBM relays reduce size and cost of elevator control switching. IBM relays now help elevator manufacturers reduce the size of increasingly complex control systems without sacrificing reliability. Because IBM's long-life wire contact relays allow very dense packaging, manufacturers can cut elevator control unit size by over 75%. This also means substantial production savings plus economies in shipping and installation. IBM relays cost less per contact and their multi-pole design reduces the number of relays needed. Further flexibility is provided by the relay's plug-in insertion and taper-pin wiring of receptacles which allow for expansion. Long life, ease of maintenance as well as compact pluggability make IBM relays an ideal solution to new elevator control system design.



IBM reeds deliver high reliability in switching low-level RF signals. For applications requiring fast, ultra-reliable, low-level switching IBM offers a line of reed relays and switches. These reeds are particularly suited for complex products where trouble-free, remote control dependability is critical. Take, for example, the huge 1.6-mile-long radio research antenna that probes California's ionosphere. To monitor the ionospheric waves, signals must be precisely delayed for simultaneous addition along the entire length of the 9000-foot antenna array. Multi-switching presents special problems in RF ranges. IBM reeds were specifically selected to handle the complex antenna operation, because the job demands long-life, rapid programming, minimum crosstalk and maximum bandwidth. IBM reed relays and switches also serve as an excellent interface between solid state and relay logic.





IBM relays give trouble-free, flexible packaging system for audio switching. A typical audio and/or control switching application handled by IBM relays is a major city's police department communications center This police nerve center takes all incoming citizens' calls, displays patrol car deployment, then dispatches assistance as required. Basic elements of the system are IBM wire contact relays, which after more than 10,000 hours of continuous duty have proven 100% reliable. This is expected, however, since IBM relays offer normal life of 200-million-plus operations. The relays are in critical circuits where overall operation of the system is affected. Since the same IBM relay handles both an audio function and a control (DC) mode circuit, design and service are also greatly simplified. The dual-purpose single component also speeds access for any diagnostic analysis of the switching modules.

IBM components help solve control switching problems. IBM offers a wide range of switching componentry and associated packaging hardware for a variety of design problems. These products cover all sorts of unexpected design applications from communications centers to automatic elevators, baggage information displays to gigantic electric signs. Time-tested and field-proven, IBM components deliver ultra-long-life, compact packaging and significant cost savings.

Send for full information on: ☐ Wire contact relays; ☐ Reed relays and switches; ☐ Circuit packaging systems. Write: IBM Industrial Products Dept. EEM, 1271 Avenue of the Americas, New York, N. Y. 10020.

GENERAL PURPOSE RELAYS from KURMAN STOCK

SERIES 26

Series 26 Relays are stocked in dc and ac coil voltages with contacts to 4pdt in the open type and to 3pdt in the dust covered type. Standard contact rating at 28 vdc or 115 vac for open type is 20 amps to 3pdt, 10 amps for 4pdt; 10 amps for all dust covered plug in relays. Series 26 relays are rated for 15 g's shock, 10 g's vibration from 10 to 500 Hz. Series 26D relays (dust covered plug in) are available with indicator lights across the coil.

SENSITIVE RELAYS from KURMAN STOCK

SERIES 5

Series 5 Relays are current sensitive with 10 milliwatts sensitivity for the spdt and 100 mw per pole sensitivity for multipole types. Standard contact ratings at 28 vdc or 115 vac are 2 amps for spdt, 5 amps for multipole relays. Series 5 relays are available from stock in open and dust covered plug-in versions.

ULTRA SENSITIVE RELAYS from KURMAN STOCK

SERIES 300

Series 300 Ultra-Sensitive relays operate on only 2 milliwatts of power and yet can switch ½ amp at 28 vdc or 1 amp at 115 vac. They are ideal in low power input circuits where available power is at a minimum. They provide extremely low drain in battery operated equipment.

GENERAL PURPOSE CRYSTAL CAN RELAYS from KURMAN STOCK

SERIES KX

Series KX1 (2pdt) and KX4 (4pdt) Relays feature 2 amp contacts, 50 g's shock, and 20 g's vibration from 10 to 2000 Hz. KX1 relays have pins on 0.2" grid, KX4 on 0.1" grid. Both types available from stock with hook, or pin style headers.

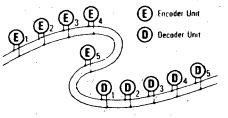
(1) Units with extended timing ranges and greater accuracy are available on special order.

RESONANT REED RELAYS REMOTE CONTROL SWITCHING WITH AUDIO SIGNALS

An audio tone can be generated by an electronic oscillator or resonant reed encoder circuit, then transmitted by wire or radio. The tone activates a resonant reed relay to perform a control function.

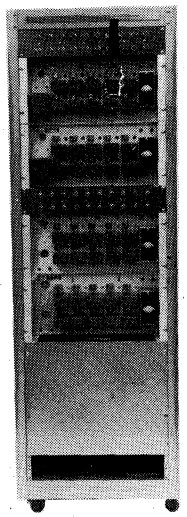
Bramco reeds permit over 60 selective control frequencies within the 67 to 3000 Hz spectrum. This is assured by: (1) the narrow response bandwidth of about 1% for decoders and (2) the high accuracy of Bramco reed encoders (1/10 of 1% of design frequency).

Shown here is a partial list of Bramco components and modules stocked for immediate shipment. Temperature stability of most Bramco reed products is .002% per °C.



A single pair of wires, or a leased telephone line, can carry the audio signals for a complete control system.

For inaccessible areas or mobile installations, a radio transmitter and receiver system can carry the signals.



BRAMCO 20/20 AM TONE TELEMETRY SYSTEM—

Just one of several readily available standard packages.

The Bramco tone transmitters and receivers are mounted onto standard 19″ chassis. All components, including the tone transmitters, tone receivers, amplifiers, power supplies, and relays, plug into the factory-wired chassis. This building block concept permits the user to begin with a partial complement of tone channels, then add modules as the system expands.

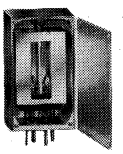
Price is approximately $150 per channel, compared to $250 per channel for the most popular LC type AM tone channels.

ALSO IN STOCK:

MA25C Solid State Linear Amplifier, 600 ohm input, adjustable gain 0 to 47 db. For up to 20 simultaneous tones. 1-9 qty., $69.

MPS1C Power Supply, 24 VDC at 800 ma, regulated and filtered, 1-9 qty., $59.

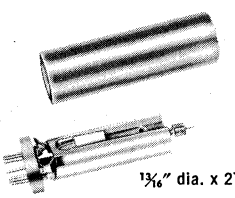
If the product you need isn't shown please contact factory or local representative for details on other stock models. We also custom design components, modules and systems to solve specific control problems. For Bramco LC Filters see sec. 2700.



.395″ x .620″ x 1.10″

RF20 CONTACTLESS RESONANT REED FILTER

Works as audio tone filter with sharp selectivity or as frequency source for stable audio tone generator. ***Frequency range:** 80 to 3000 Hz. **Frequency tolerance:** ±0.15%. **Impedance:** approx. 1000 ohms at resonance (input and output). **Input signal:** 0.1 VRMS. **Transfer ratio:** 30 to 60% at resonance (varies inversely to frequency). **Bandpass (typical):** ±0.35% at −12 db. ±2.5% at −18 db. **Price:** 1-9 qty., $20. A major state-of-the-art advance. Contactless concept makes it ideal for continuous tone fail-safe applications. Twin coil design with isolated input and output. Ideal for use as either encoder or decoder. Internally shock mounted, plug-in design.



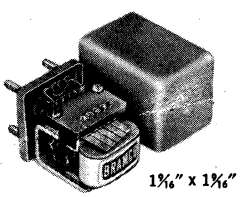
$1\frac{3}{16}$″ dia. x $2\frac{19}{32}$″

RE1 SINGLE CHANNEL RESONANT REED OSCILLATOR STABILIZER

***Frequency range:** 300 to 1600 Hz. **Frequency tolerance:** ±.1%. **Coil resistance:** 600 ohms. **Output:** Sine wave 2 VRMS in Bramco circuit. **Price:** 1-9 qty., $15. Hermetically sealed, internally shock mounted, 7 pin miniature tube base.

RD1 SINGLE CHANNEL FREQUENCY SENSING RESONANT REED RELAY

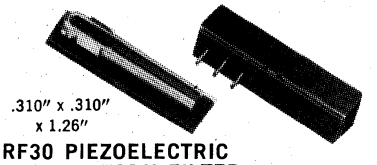
***Frequency range:** 300 to 1600 Hz. **Nominal bandwidth:** ±0.75% at 5 VRMS. **Coil resistance:** 600 ohms. **Contact rating:** 100 ma peak at 12 VDC. **Price:** 1-9 qty., $15. Hermetically sealed, internally shock mounted, 7 pin miniature tube base.



$1\frac{9}{16}$″ x $1\frac{9}{16}$″ x $2\frac{1}{4}$″

RD5S MULTI-CHANNEL FREQUENCY SENSING RESONANT REED RELAY

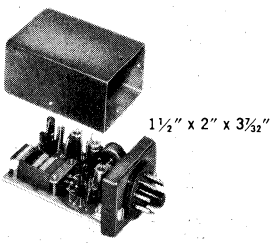
***Frequency range:** 200 to 600 Hz. **Nominal bandwidth:** ±1% at 6 VRMS. **Coil resistance:** 530 ohms. **Contact rating:** 100 ma peak at 50 VDC. **Price:** RD5S (housed) 1-9 qty., $21. RD5 (open) 1-9 qty., $12.50. Compact low cost, multi-frequency relay. It controls five switching circuits, individually or simultaneously.



.310″ x .310″ x 1.26″

RF30 PIEZOELECTRIC TUNING FORK FILTER

Smallest, most economical of Bramco audio tone family. **Frequency Range:** 300 to 3000 Hz. **Impedance:** approx. 300K (input and output). **Drive Level:** 2 VRMS. **Temperature Stability:** approx. 0.0035% per °C. Ideal when shock and mounting characteristics of RF20 are not required.



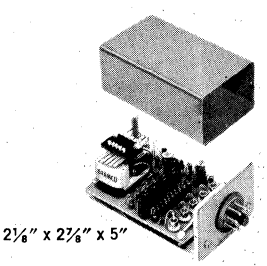
$1\frac{1}{2}$″ x 2″ x $3\frac{3}{32}$″

ME201C SINGLE CHANNEL RESONANT REED ENCODER MODULE

***Frequency range:** 80 to 3000 Hz. **Frequency tolerance:** ±0.15%. **Output:** Sine wave, adjustable to 2 VRMS into 600 ohms. **Power required:** 15 ma at 12 or 24 VDC. **Price:** 1-9 qty., $59. A complete transistorized fixed frequency oscillator circuit with plug-in, dual coil, RF20 resonant reed. Features independent feedback and output level adjustments. Standard octal tube base.

MD201C SINGLE CHANNEL RESONANT REED DECODER MODULE

***Frequency range:** 80 to 3000 Hz. **Nominal bandwidth:** ±0.75%. **Input signal:** 0.1 to 2.0 VRMS. **Output function:** 50 ma maximum. **Power required:** 15 ma at 12 VDC or 24 VDC plus external load. **Price:** 1-9 qty., $59. A complete transistorized high gain amplifier, contactless RF20 reed filter and secondary switching circuit. Standard octal tube base. Designed for continuous tone fail-safe applications. Ideal for systems with up to 10 simultaneous tones over phone lines.



$2\frac{1}{8}$″ x $2\frac{7}{8}$″ x 5″

MD5C FIVE CHANNEL RESONANT REED DECODER MODULE

***Frequency range:** 200 to 600 Hz. **Nominal bandwidth:** ±1% (constant above 2.0 VRMS input). **Input signal:** 1.5 to 5.0 VRMS (into 0.2 megohms). **Output functions:** 5 with 50 ma at 24 VDC. **Power required:** 30 ma at 24 VDC plus external loads. **Price:** 1-9 qty., $79. A complete transistorized high gain, constant output amplifier, multi-channel decoder with 5 secondary transistor switching circuits. Standard octal tube base. Designed for non-simultaneous tone systems.

LOGITEK ELECTRONIC SENSORS & CONTROLS

DIVISION. GENERAL DEVICES. INC.

Logitek's comprehensive line of time-delay and voltage-, frequency- and phase-sensitive relays utilize the most advanced design and manufacturing techniques for long-term reliability—provide uncompromising performance in rigorous military, aerospace and industrial systems. All units are hermetically sealed, meet applicable requirements of MIL-I-6181D, MIL-R-5757D, MIL-R-6106C, and MIL-Std-704A. Contact ratings 2A and 10A resistive, 1A and 5A inductive, operating life 100,000 cycles minimum.

PHASE ROTATION SENSORS

Protect rotating components and other three-phase loads from damage that could occur from phase reversals or absence of any phase. Contacts may be used to disconnect load or operate alarms.

Operating Voltage	120/208 vac, 400 Hz, 3 Ø, wye
Phase Displacement	120 ±5 degrees max.
Permissible Distortion	total 8%, any harmonic 5%
Response Time	20 msec max.
Case Style	A, B, C, D

For data, request Bulletin 201

SOLID STATE FLASHERS

Up to 10 channels; conform to MIL specs for airborne applications. Cordwood packaging for maximum density, hard mounted and encapsulated.

Input	18-31 vdc
Load Current	up to 2.5 A
Flash Rate	up to 120 per min
Flash/Off Ratio	up to 2.4:1
Case Style	A, B, C, D

For data, request Bulletins 701 thru 704

DC VOLTAGE SENSING RELAYS

Provide alarm or disconnect signals when DC line voltage departs from normal. Insensitive to normal transients. Available with factory-set or adjustable bandwidth and time delays to pickup and drop-out.

Sense Band	18-32 vdc
Accuracy	±0.6 vdc
Hysteresis	0.5 ±0.2 vdc max.
Case Styles	A, B, C, D

For data, request Bulletin 401

AC VOLTAGE SENSING RELAYS

Provide alarm, indication or disconnect signals for single—or 3—phase lines when voltage exceeds high or low limits. Available with time delays to prevent dropout due to transients.

Input Power	115 vac, 400 Hz nominal
Sense Bands	96 to 140 vac
Time Delays	10 ms to 10 sec.
Case Style	A, B, C, D

For data, request Bulletins 801, 802, 803 and 804

FREQUENCY SENSING RELAYS

Time-delayed, band frequency sensing relays, for applications where systems must be de-energized or alarms actuated when line frequency departs from normal. For single-phase or wye-wired systems.

Line Voltage	100-130 vrms
Nominal Line Frequency	60 or 400 Hz
Accuracy	up to ±3% of nominal
Delay	20 ms to 10 sec
Case Style	A, B, C, D

For data, request Bulletin 501

AC SOLID STATE RELAYS

Contactless relays for long life and high reliability. Normally-open and normally-closed configurations with complete isolation between switching and coil terminals.

Operating Voltage	12-32 vdc
Control Signal	Ground
Switched Signal	2-150 vac, 40-400 Hz
Pull-In Time	100 usec max
Drop-Out Time	½ cycle max
Case Style	E, F, G, H

For data, request Bulletin 901

TIME DELAY RELAYS

Delay on drop-out, pull-in, true delay on drop-out and controlled-delay on drop-out. Timing ranges from 50 msec to 300 sec, factory-set or externally adjustable. Standard and crystal can sizes.

Operating Voltage	18-31 vdc
Accuracy	10%, 5%, 2%
Repeatability	±1%, any voltage and temperature
Reset Time	5 msec max.
Case Style	A, B, C, D

For data, request Bulletins 601, 602, 603, 604, 605, 606

POWER MONITORS

Provide time-delayed alarm or shutdown signals when voltage, frequency or phase rotation characteristics of power line depart from specified limits.

Voltage	120/280 vac, 3 Ø, 4-wire, wye
Voltage Sense Band	100-150 vrms
Frequency Sense Band	300-500 Hz
Pickup and Dropout Delay	50 ms to 10 sec.
Case Styles	A, D

For data, request Bulletin 1001

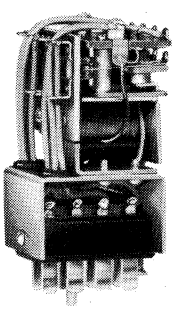
15-AMP CONTACTS

Rated at 15 Amps
120V 60HZ Resistive Gold Plated Silver Contacts

The 630 relay is a heavy duty multi-purpose, multi-contact relay. Varied contact combinations and high dielectric phenolic insulation afford great versatility and utility. The 630 relay is widely used in such applications as industrial controls, elevator controls, communications equipment and electronic measuring devices. Rugged, heavy duty construction and large gold plated silver contacts make this a relay to provide long trouble free life. Available for AC or DC operation.

PLUG-INS



633 SERIES

633 Series available with 8 Pin, 12 Pin, and 18 Pin Jones Plugs

634 Series available with 8 Pin, 12 Pin, and 20 Pin Octal Type Plugs

LIBERTY CONTROLS

DIV. OF LIBERTY LEASING CO., INC.

(FORMERLY MOSSMAN-ELLIOTT CORP.)

RELAYS, TELEPHONE TYPE • POWER RELAYS • SOLENOIDS • TIMERS • ELECTRO-MECHANICAL DEVICES

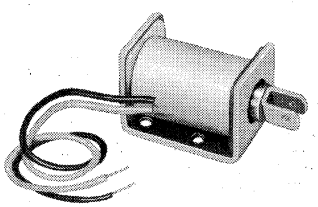
SOLENOIDS

Efficient, useful and simple, Liberty Controls solenoids are designed with the same thoroughness and manufactured with the same integrity that characterizes all Liberty Controls products.

The heavy one piece U-shaped frame and the end plate are made of pure magnetic ingot iron — properly annealed to obtain maximum magnetic efficiency. The dove-tailed frame and end plate are securely staked together, forming an assembly that is permanently tight and inherently efficient. Coils of top-grade magnet wire are precision wound on specially treated bobbins. For high temperature applications, special magnetic wire is used and coils are impregnated with a tough, inorganic electrical varnish. Available for either AC or DC

TYPE 61

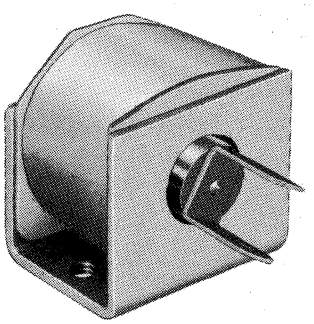


Size: .750″ x .813″ x 1 3/16″ Long

Mounting: 3 — #6-32 Holes

Termination: Wire Leads, Solder Terminals, .187 & .250 Quick Disconnects

TYPE 62

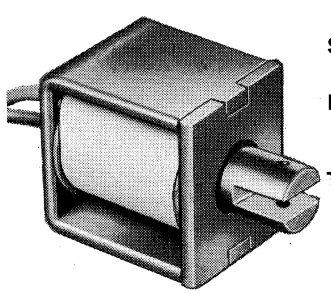


Size: 1.076″ x 1.375″ x 1.156″ Long

Mounting: 2 — #10-32 Holes on 1″ Centers

Termination: Wire Leads, Solder Terminals, .187 & .250 Quick Disconnects

TYPE 81

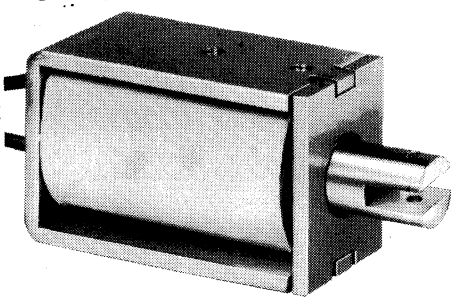


Size: 1″ x 1 1/4″ x 1 3/32″ Long

Mounting: 4 — #8-32 Holes on 5/8″ Centers

Termination: Wire Leads, Solder Terminals, .187 & .250 Quick Disconnects

TYPE 82

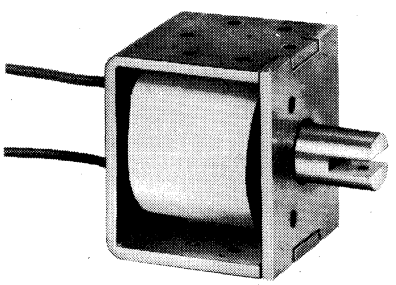


Size: 1″ x 1 1/4″ x 2″ Long

Mounting: 4 — #8-32 Holes on 5/8″ Centers

Termination: Wire Leads, Solder Terminals, .187 & .250 Quick Disconnects

TYPE 88

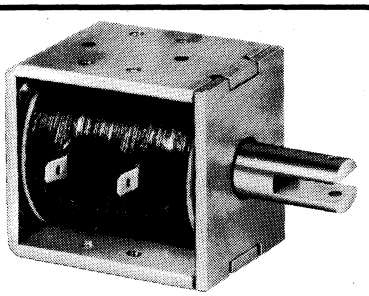


Size: 1.562″ x 1.882″ x 1 5/8″ Long

Mounting: 4 — #8-32 Holes on 1/2″ x 15/16″ Centers

Termination: Wire Leads, Solder Terminals, .187 & .250 Quick Disconnects

TYPE 89

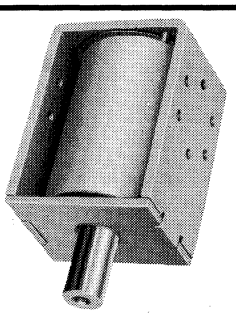


Size: 1 9/16″ x 1 3/4″ x 2 1/8″ Long

Mounting: 4 — #8-32 Holes on 1/2″ x 15/16″ Centers

Termination: Wire Leads, Solder Terminals, .187 & .250 Quick Disconnects

TYPE 90



Size: 1.562″ x 1.818″ x x 2 5/8″ Long

Mounting: 4 — #8-32 Holes on 1/2″ x 15/16″ Centers

Termination: Wire Leads, Solder Terminals, .187 & .250 Quick Disconnects

NOTICE: Special Arrangements of Frame, Mounting & Plunger Styles are Available.

Magnecraft® Relays

for all applications!

You'll find on these pages just a few of the many types and sizes of relays we make. In our extensive stock relay line are:

General Purpose	Time Delay
Telephone Type	Industrial Power
Coaxial	Hermetically Sealed

Reed and Mercury Wetted Relays

In addition, we can furnish specially designed relays to fit any specific design or unusual application you require.

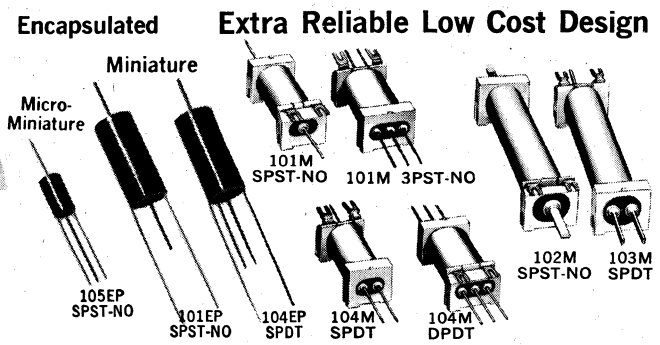
Since relays are our only business, we have an extensive knowledge and experience in this field, which we wish to share with you. That's why we prepared an informative "Designer's Handbook on Reed and Mercury Wetted Relays." It's yours for the asking as well as a copy of our latest stock catalog.

Magnecraft Relays available in many countries

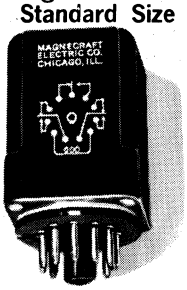
Magnecraft Relays are available from sales representatives at low factory prices throughout the United States, Canada and Western Europe. Whatever the relay application, your local Magnecraft sales representative is the man to see. His phone number is shown at right.

Dry Reed Relays with Axial Leads

Encapsulated — Extra Reliable Low Cost Design

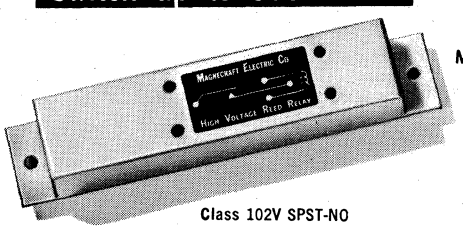


Plug-in Mounted Standard Size



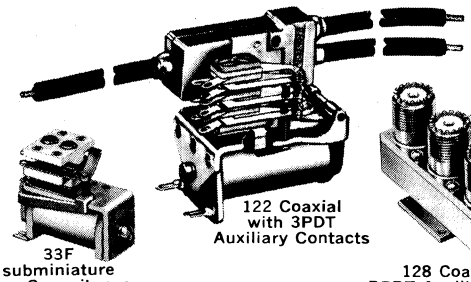
103CP DPDT, 3PDT

High Voltage Reed Relays Switch up to 5000 Volts



Class 102V SPST-NO

Coaxial and other RF Switching Relays



33F subminiature Low Capacitance

122 Coaxial with 3PDT Auxiliary Contacts

*NPE Dry Reed Switches are also available with diffused gold contacts. Physical Characteristics, Contact Ratings and Operating Parameters for gold contact switches available on request.

NPE REED SWITCHES are manufactured from basic quality components on automatic equipment in white-room facilities, free from dust and moisture to guarantee flawless contacts and reliable operation. Standard precision wound coils are available for testing all NPE reed switches.

NPE REED RELAYS contain certain inherent advantages, because we manufacture all of the components used in these products, including reed switches and coils. Furthermore, NPE also fabricates other more sophisticated electronic equipment, such as logic cards, matrices, and control systems, which incorporate NPE reed relays. Thus we maintain complete control of the entire process of our reed relays, in addition to having a working knowledge of their end use.

TIME DELAY RELAYS

Time delay relays produced by E. V. NAYBOR LABORATORIES are available for both delay on operate and delay on release of coil power.

The TO and TQ Series are OPERATE DELAY relays using solid state circuitry integral with an electromagnetic relay.

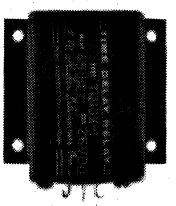
The TD, TDS and TLC Series are RELEASE DELAY relays and provide delay with a power-off condition. The TD uses an air dashpot to provide delay, the TDS makes use of a copper slug in the magnetic circuit for delay of flux and the TLC provides delay period by use of a solid state electronic-magnetic circuit.

All time delay relays manufactured by E. V. NAYBOR LABORATORIES are available as both open and hermetically sealed (suffix H) units and can meet the most severe environmental conditions. Recycle time (except TDS) is less than .025 seconds on all units.

TO, TQ SERIES

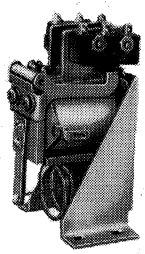
TO - 1 Dia. x 2½ Max.

SPECIFICATIONS:
CONTACT ARRANGEMENT — Type TO 1, 2, 3 & 4 pole, double-throw. Type TQ 1 and 2 pole, double-throw.
DELAY AVAILABLE — To 500 seconds. External adjustment and longer delays available.
CONTACTS — Rated at 2 amps. resistive load for TO and 5 amps resistive load for TQ at 26.5 VDC or 115 VAC.
COIL — Standard for 26.5 VDC. Other voltages available.
TEMPERATURE RANGE — Standard at −55 degrees C. to +85 degrees C.
VIBRATION — 15 G. to 2,000 cycles for TO, 10 G., 10 to 55 cycles for TQ.
SHOCK — 50 G. for 11 milliseconds for TO. Mechanical resistance for TO and TQ, 100 G.
DIELECTRIC — Test at 1,000 volts RMS.
ACCURACY — ±4% for TO, ±10% for TQ.
REPEATABILITY — ±1% for TO, ±2% for TQ.



TQ - 2⅝ x 1⅝ x 1

TD SERIES

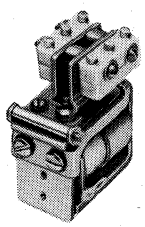


· 2⅝H x 1⅝ x 1⅝

SPECIFICATIONS:
CONTACT ARRANGEMENT — 1, 2 and 3 pole double throw.
DELAY AVAILABLE — Standard range — to 4 seconds for 3 pole — to 6 seconds for 2 pole and to 8 seconds for single pole units. Recycle time less than .025 seconds.
CONTACTS — Rated at 5 amperes resistive load at 125 or 250 VAC for 100,000 operations.
COIL — Standard coil resistance for 26.5 VDC operation, 425 ±10% ohms. Other values available to 12,000 ohms. Coil operation from .5 watt to 3 watts depending upon operating conditions. Also available for AC.
TEMPERATURE RANGE — Standard at −55 degrees C. to +85 degrees C.
VIBRATION — Ten G. from 10 to 500 cycles.
SHOCK — Operating to 50 G. — mechanical resistance to 100 G.
DIELECTRIC — Test 1,000 volts RMS.
WEIGHT — 4.5 ounces.
ACCURACY — Above 1.0 second ±20%. Below 1.0 second ±40%.

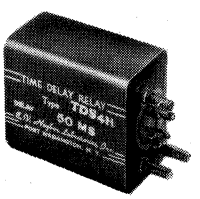
2⅝H x 1⅝ x 1 1/16

TDS SERIES



1¾H x 1⅜ x 1⅛

SPECIFICATIONS:
CONTACT ARRANGEMENT — Single pole — double throw (TDS3H), and double pole — double throw (TDS6H).
DELAY AVAILABLE — Standard range to 200 milliseconds. Under certain conditions to 300 milliseconds.
CONTACTS — Rated at 5 amperes resistive load at 125 or 250 VAC to 100,000 operations. Rated at 4 amperes resistive load at 30 VDC for 50,000 operations.
COIL — Standard coil resistance for 26.5 VDC operation, 425 ±10% ohms. Other values available to 10,000 ohms.
TEMPERATURE RANGE — Standard at −55 degrees C. to +85 degrees C.
ALTITUDE — To 70,000 feet. **WEIGHT** — 5 ounces.
DIELECTRIC — Test at 1,000 volt RMS.
ACCURACY — ±10% at rated voltage and 25 degrees C.



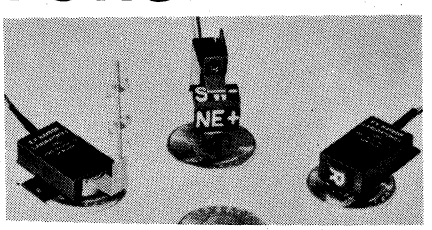
2⅛H x 1⅝ x 1

SYMBOL INDICATORS

The F Series indicators are subminiature electromagnetic devices which provide highly dependable display under all environmental conditions.

Operation is accomplished in a new magnetic circuit which surrounds a permanent magnet rotor. Energization of a dual coil D.C. electromagnet, causes rotation of the permanent magnet rotor. Magnetic latching is also available, with reversal of polarity to return to reset position. Basic case size of this unit is 1 x 5/16 x .270. Mounting and indicating configuration is to customer requirements.

A fault indicator is also available in a basic case size .700 x .400 x .200. This unit is magnetically latched on fault signal. Resetting is accomplished by polarity reversal, or pulse fault or reset.

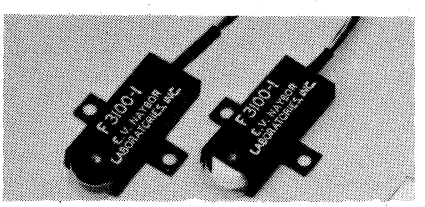


THE E. V. NAYBOR LABORATORIES, INC., "High Reliability" Electro-magnetic Fault Indicator involves an astute and new design which provides exceptional sensitivity without the use of "solid state" amplification.

A two-coil unit, this device is basically intended to provide pulse fault and pulse reset indication.

Life expectancy is high and should be considered exceeding 100 million operations and continuous duty in excess of 100,000 hours. Shelf life can be conservatively rated at a minimum of five years.

This small-sized unit (1.000 x .375 x .200) has basic application for use in "BITE" Systems. Such units have the inherent ability to sense and indicate faults visually and hold this indication in a magnetically latched condition. Reset is accomplished by application of an equivalent pulse on the reset terminals of this device. **Solid state high sensitivity model also available.**



ALL UNITS BUILT IN ACCORDANCE WITH MILITARY SPECIFICATIONS

E. V. NAYBOR LABORATORIES, INC.

RELAYS . . . TELEPHONE QUALITY

RAF TYPE

SPECIFICATIONS

Ambient Temperature Range
0°C to + 85°C.
Insulation Resistance
1000 megohms minimum.
Dielectric Strength
500 VAC or 750 VDC.

Contact Resistance
50 milliohms maximum at a closed circuit current of 2 amps and an open circuit voltage of 6 VDC (Norloy Silver).
Contact Rating
.4 amp resistive at 50 VDC (Bifurcated Norloy Silver).
Mechanical Life
100 million operations under normal conditions.
Finish
Zinc plate, chromate treated to MIL-F-14072, is used to ensure maximum resistance to corrosion.
Operating Speed
Fast operate 12 to 18 MS Slow operate 30 to 40 MS
Fast release 10 to 15 MS Slow release 100 to 150 MS
Military Specifications
Military type versions designed to meet MIL-R-5757D.

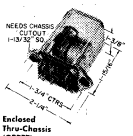
TYPE 10,000 part number — 308004 relay. . . list price $4.28

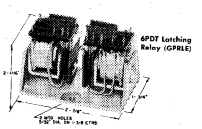
The 10,000 series relay is completely dependable for critical switching and control circuit applications where maximum reliability, long life and high efficiency are prime factors. Occupying only one cubic inch of volume, the 10,000 type relay also offers the optimum utilization of space coupled with ease of mounting. This relay is used in all relay telephone switching systems manufactured by North with minimum maintenance. Unvarying long life fit this relay for intricate counting, memorizing, sequencing, switching, controlling and many other various applications in industry where fail and safe performance is essential.

NORTH ELECTRIC Electronetics Division/Galion, Ohio 44833/419-468-8100
A subsidiary of United Utilities, Incorporated

OHMITE has the answer in general purpose, latching and solid state relays

GPR GENERAL PURPOSE RELAYS — Includes Indicator, Plate, Thyratron & Latching Versions in Unenclosed & Enclosed Types





Simple, rugged, low cost relays handling substantial power for small size. Uncomplicated design provides unusual flexibility for making and changing connections and mounting. Stock includes relays in versatile enclosures, some with indicator light, also plate, thyratron and latching versions. Wide commercial and industrial use where economy and versatility are important. **BASIC (Unenclosed) RELAY:** All connections terminate on barrier-type terminal panel on combination solder—quick-connect (push-on) lugs which accept AMP 110 female connectors.

ENCLOSED RELAYS (GPRTA-, GPRTT-, GPRTS-, GPRTP-). Four types of clear plastic enclosures as follows:

"GPRTA" — ("Terminals-Above-Chassis" type).
"GPRTT" — ("Terminals-Through-Chassis"type).
"GPRTS" — type ("Terminals for Socket Use") for plug-in mounting in Ohmite socket "SOGPR".
"GPRTP" — ("Plug Base" type).

Contact Ratings: Two ratings — fine silver contacts, 5 amps at 115 VAC or 32 VDC; silver-cadmium contacts, 10 amps.

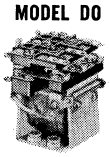
Insulation: Tested at 1500 VAC.

Coil Wattage: 1.4 watts DC operation;; 1.6 watts (2.0 volt-amps) AC except 2.4 watts (3.70 volt-amps) for 4-pole AC and AC latching relays.

Latching Relay: Consists of two GPR relays with armatures linked so that the n.o. contacts of one are mechanically latched in closed position when, and after, this relay is energized. When 2nd relay is energized, first relay restores and latches 2nd. Permits switching of twice the number of circuits and holding without coil current. Unenclosed type "GPRLE". Enclosed type "GPRLETP" in clear plastic case with Jones plug P-324-SB fitting S-324-AB socket.

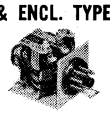
DO SERIES ALL PURPOSE RELAYS

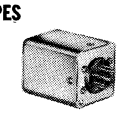
MODEL DO RELAY AC or DC OPERATION



Ideal for mobile equipment applications where severe shock and vibration are encountered. Coil drain: 3-watts DC, 6 watts 60 cycle AC. Contact ratings: 10 amps. at 115 v. AC; 32 volt DC resistive load. Insulation tested at 1500 v. AC. Size, (4 pole) 2¼ x 2¹⁄₁₆ x 1¹³⁄₁₆"; (3 pole) 2¼ x 1⅝ x 1¹³⁄₁₆".

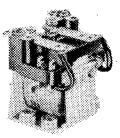
MODEL DOS PLUG-IN & ENCL. TYPES





Model DOS, DPDT relay with standard octal plug base, unenclosed or enclosed types. Enclosed dust-proof type has drawn aluminum cover. Overall dimensions, exclusive of plug: DOSPX-1T — 1⅝ x 2 x 1¹⁵⁄₁₆"; DOSEPX-5T — 2⅛ x 2½ x 2⅛". Contacts — 15 amps.

MODEL DOS RELAY AC or DC OPERATION



Quality, general-purpose relays originally designed to meet rigorous aircraft specs. Extremely compact yet rugged. Coil drain: 2.5 watts DC, 3 watts at 60 cycles AC. ontact ratings: DP, 15 amps. at 115 v. AC or 32 v. DC resistive load; SP, 25 amps. Molded phenolic insulation; tested at 1500 v. AC. 1⅞ x 1⅝ x 1³³⁄₃₂".

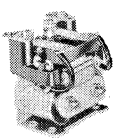
DOS RELAYS IN HERMETIC ENCLOSURES

Hermetic Enclosures with 8 Terminaals
DOSHX-39T, 115VDC
DOSHX-40T, 115VAC

Hermetic Enclosures with Octal Plugs
DOSHPX-46T, 115VDC
DOSHPX-47T, 115VAC

Hermetically Sealed non-removable enclosures, filled with dry nitrogen, are also available to provide protection under adverse ambient conditions. DOS relays with 115 volt AC or DC coils are provided in these enclosures with either octal plug (DOSHPX-) or solder-terminal (DOSHX-) connectors as illustarted. **Weights:** 8 oz. each approx.

MODEL DOSY RELAY FOR PLATE CIRCUIT OPERATION



The high operating sensitivity makes the DOSY relay adaptable to a wide range of electronic control circuits, such as plate circuit controls, etc.

The insulation is of high grade, molded phenolic material. At 115 v. AC or 32 v. DC, resistive load. Model DOSY relay has a contact rating of 15 amperes.

There are two DPDT types, one having 10,000 ohms coil resistance (maximum pull-in current of 8 ma. DC); the other having 5,000 ohms coil resistance. Dimensions are same as for Model DOS next column.

DO RELAYS IN HERMETIC ENCLOSURES

DOHPX-16T, 3PDT, 11 Prongs
DOHPX-15T, 4PDT, 20 Prongs

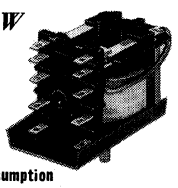
DOHX-22T, 3PDT 14 Terminals
DOHX-23T, 4PDT 14 Terminals

Stock DO relays with 115 volt coil in hermetically sealed metal enclosures, filled with dry nitrogen. Both 3 and 4-pole DO relays are supplied in these enclosures with plug (DOHPX-) or solder terminal (DOHX-) connectors as illustrated. **Weights:** 3-pole hermetic relay approx. 14 oz.; 4-pole approx. 15 oz.

LATCHING RELAYS

NEW

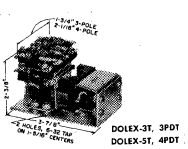
GPRM Magnetic Latching Relay



The new Series GPRM magnetic latching relays have no mechanical latching levers. Unlike conventional latching arrangements, magnetic latching relays do not have critical lever adjustments which limit mechanical life and are less susceptible to shock and vibration.

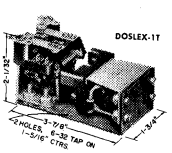
Small Size
Long Life
Reliability
Positive Action
Low Power Consumption
Economical Price

MODEL DO LATCHING RELAY (DOLEX)



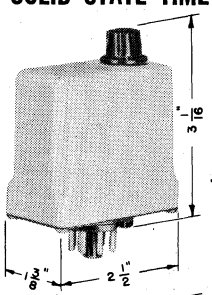
Consists of Model DO relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to normal position when the reset coil is pulsed. Permits "holding" of circuits without continuous coil current. Coils of stock units (both relays and reset coils) are 115VAC. Available with 3 or 4-pole relays. **Weights:** 3-pole — 16.5 oz.; 4-pole — 17 oz.

MODEL DOS LATCHING RELAY (DOSLEX-1T)



Consists of Model DOS relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to normal position when the reset coil is pulsed. Permits "holding" of circuits without continuous coil current. Coils of stock units (both relay and reset magnet) are 115VAC. **Weight:** 14.2 oz.

SOLID STATE TIME DELAY RELAYS



INTERNAL OR EXTERNAL RELAY

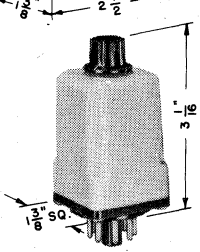
Ohmite Time Delay Relays consist of a solid state timing network and an electromechanical relay which is energized by the timing network. For the "Delay on Operate" type of relay, the electro-mechanical relay can be supplied in the same enclosure as the timing network or can be external to it. The internal electromechanical relay has DPDT contacts rated at 10 amperes. Where an external relay is required, Ohmite GPR, DOS or DO relays can be used.

DELAY AND DELAY ADJUSTMENTS

Variable — The Variable Ohmite Time Delay Relay offers three variable ranges:

0.1 to 10 seconds
0.6 to 60 seconds
1.8 to 180 seconds

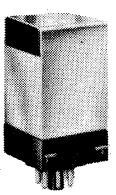
Fixed Maximum and Remote — Is supplied with a factory set time delay. However, incorporates provisions for connecting an external resistor to reduce time delay from the max. A variable resistance may be used to adjust the delay from nearly the max. to the min.

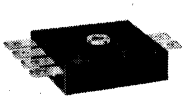


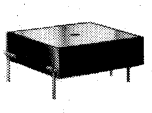
Operating Voltage Ratings:
AC: 24, 115 **DC: 24, 48, 110**

Contacts and Rating of Internal Relay: DPDT, 10 amperes at 115 VA, 32VDC resistive.

MODEL SSA SOLID STATE RELAYS *NEW*







- **No Moving Parts — No Contact Bounce or Wear**
- **Extraordinary Life, Reliability, Sensitivity, Speed**
- **Universal "Coil"**
- **Switches up to 10 amps at 40°C (on metal panel)**
- **Transient Protected — No False Actuation**

Model SSA relays are completely solid state. No moving parts and are not subject to the difficulties as with electromechanical relays. Excellent performance under severe shock and vibration.

Provide the ultimate in reliability, long life and trouble free service. They can replace electromechanical relays in critical applications where exceptional life and reliability are paramount or where reduction of maintenance is desired.

The Model SSA relay, a completely solid state device, is a true relay in the functional sense since its input ("coil") is completely isolated from its switching ("contact") elements. In the case of two-pole relays, one pole is isolated from the other.

WIDE RANGE CAPABILITY
Universal "Coil" Input, High Sensitivity

Universal "Coil" Input: Broad capability due to the universal input. Accepts a wide range of both AC and DC voltages to high frequencies:

AC — 3 to 140 volts, (to 25,000 cps) and
DC — 3 to 200 volts

High Sensitivity: Model SSA relays will operate on as little as 6 milliwatts. Capable of operating directly from integrated circuits (IC's) and serve as ideal interface between linear or digital systems and power circuits.

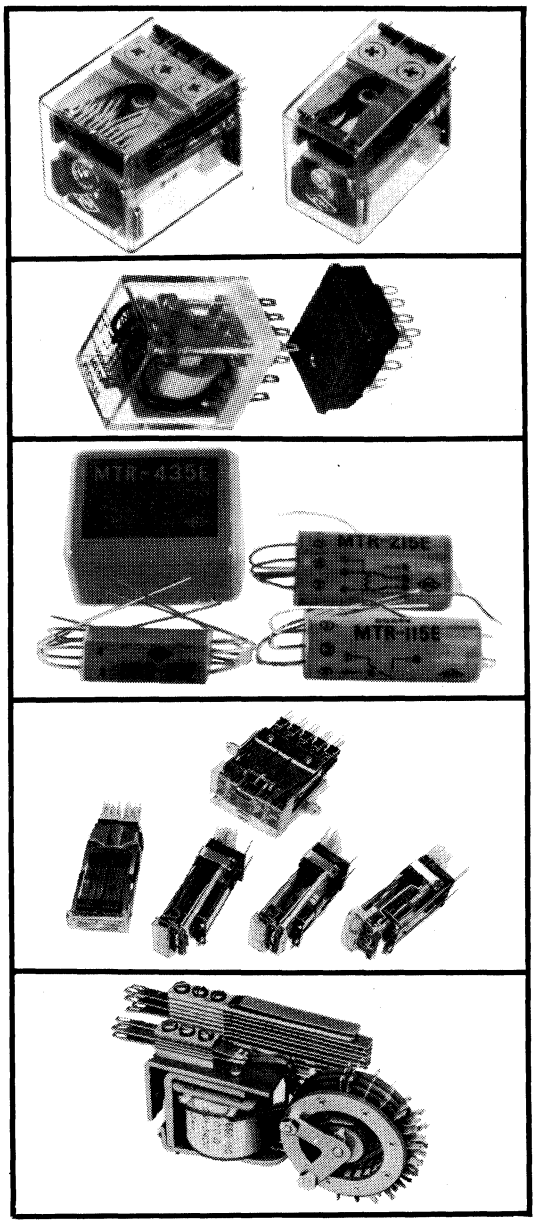
OHMITE MFG. CO., a NORTH AMERICAN PHILIPS company • 3635 HOWARD STREET, SKOKIE, ILLINOIS 60076 • PHONE (312) 675-2600 • TWX 910-223-0805

Relay Products

Since 1881
PROVEN QUALITY

TELEPHONE TYPE and GENERAL PURPOSE RELAYS



REC/RED SERIES (Equivalent to WECO MA/MB Types) Multi-contact — Small DC Relays — 4 or 6 Form C Twin Silver Palladium alloy with gold overlay contacts. Printed Circuit Board or Plug-in Mounting — Clear plastic dust cover. Life 100 million operations.

REE SERIES (4 PDT AC or DC General Purpose Plug-in Type) Gold-flashed silver contacts. Rated: 3 AMPS. @ 30V DC or 120V AC resistive. Solder terminals — W/mating socket available with PC or solder terminals. Life 50 million operations.

MRD/MTR/URD SERIES (Reed Contact Types) No adjustment or maintenance problem, high efficiency, extremely long life, and high speed switching operation.

WA, WG, WJ, WK, WM SERIES (High Reliability Wire Spring Types) up to 30 Form C Twin Palladium Alloy Light Duty Contact Springs, very efficient reliable operation. Life up to one billion operations.

OD SERIES (Rotary Type Stepping Switches) Compact — Lightweight — Low Power Consumption — Varied Applications. Equipped with multi-level contacts and wipers for automatic selection and counting mechanisms. Life up to 2 million or more operations.

ALSO AVAILABLE — Power, Latching, Frequency, Coaxial, Flat Type, Mercury Relays and Cross-Bar Switches, plus many other telephone components.

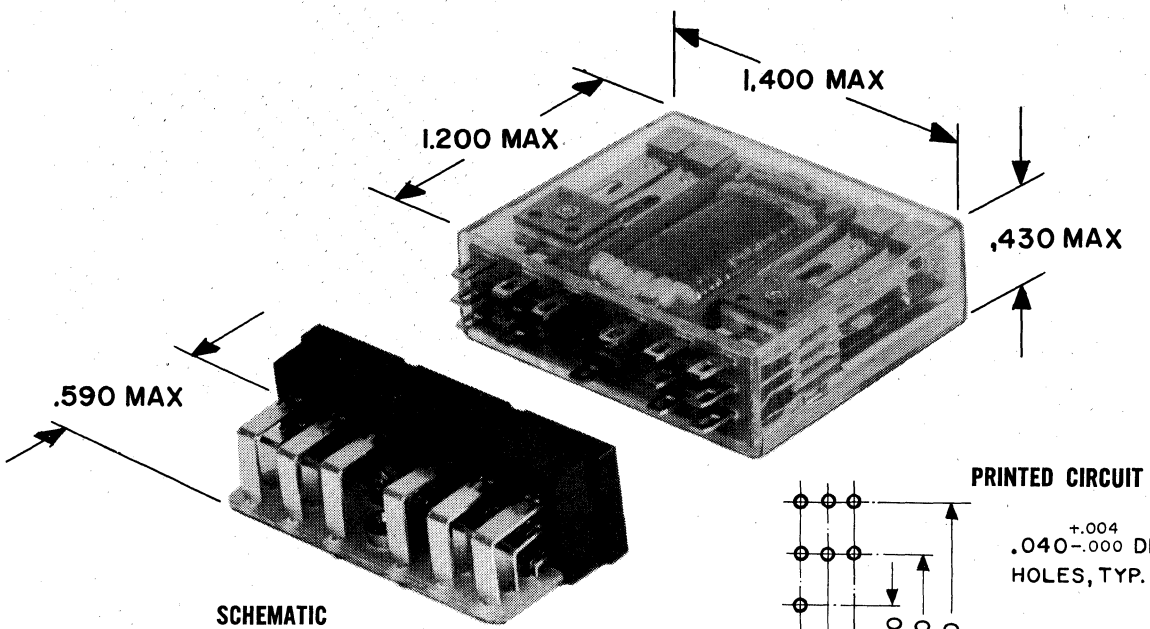
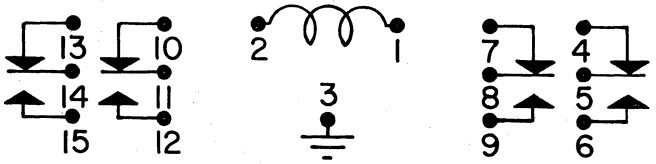
MODEL R40 SLIMLINE® DC OPERATED RELAY

THE PARELCO SLIMLINE FOUR POLE RELAY OFFERS YOU THE BENEFITS OF:

- Flat Slimline package for printed circuit board use. Allows .6" board mounting centers.
- A variety of contacts for loads from true dry circuit to 10 amps.
- Wide range of coil voltages — 3.0 VDC for IC applications to 115.0 VDC.

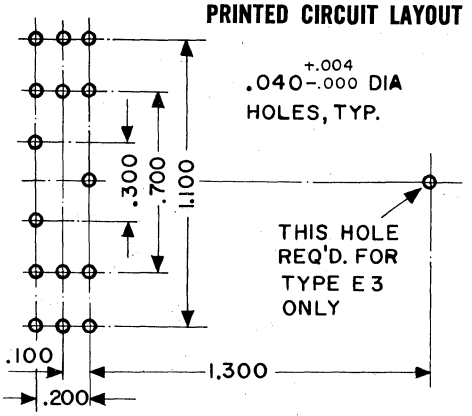


SCHEMATIC

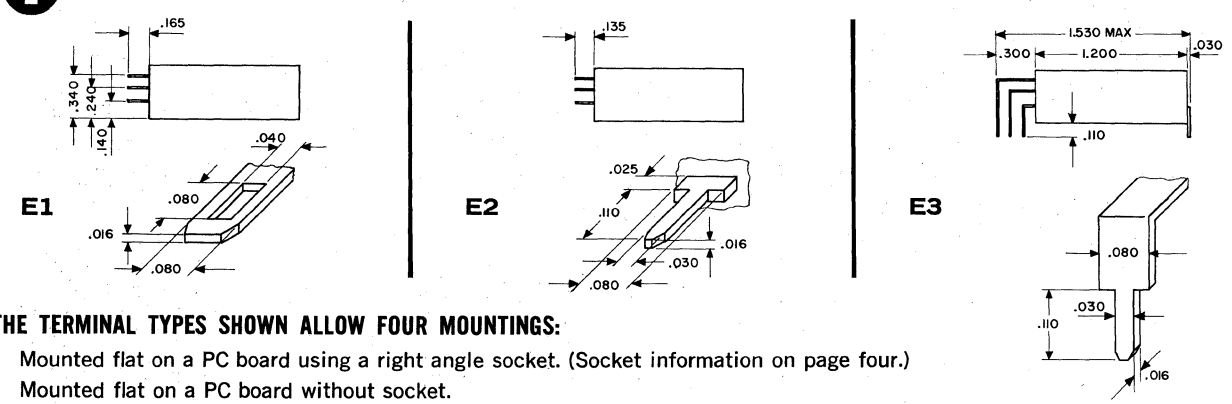


NOTE: POSITIONS 4, 5, 6, 13, 14, 15 ARE VACANT FOR 2 POLE UNITS

PRINTED CIRCUIT LAYOUT



1 RELAY TERMINAL CONFIGURATIONS



THE TERMINAL TYPES SHOWN ALLOW FOUR MOUNTINGS:

Mounted flat on a PC board using a right angle socket. (Socket information on page four.)
Mounted flat on a PC board without socket.
Vertically mounted on a PC board using a socket.
Vertically mounted on a PC board without socket.
Chassis mounted with direct solder connections or socket optional.

TO SELECT YOUR SLIMLINE:

1. Choose your required terminals.
2. Select the correct contacts.
3. Specify the proper coil value.

PART NUMBER EXAMPLE:

Slimline Model **R40 — E1 — L4 — V800**

1. Plug-in Terminals
2. Dry Circuit Crossbar Type Contact 4 Form C
3. Coil Value — 700 for 24 VDC Nominal

Special coil values and contact arrangements are available. Call PARELCO application engineering.

GENERAL SPECIFICATIONS

CONTACT AND LIFE DATA:

Actuator Displacement (V. Adj.) ..... .040 min.
Overtravel (V. Adj.) ..... .010 min.
Contact Material .....Codes W, X — Silver cadmium oxide, gold bonded
Codes Y, Z — Fine silver, gold bonded
Code L — Gold-platinum-silver alloy
Life, Mechanical .....100,000,000 operations
Life, Electrical .....See table
Contact Resistance .....50 milliohms maximum initially
200 milliohms maximum after life

COIL DATA

Max. coil dissipation at 25° C .....1.6 watts
Coil temperature rise .....28° C per watt
Maximum coil temperature .....105° C (221° F)

OPERATING AND ELECTRICAL DATA

Drop out .....10% minimum of pull-in voltage or current
Dielectric strength ....1000 vrms; 500 vrms across Z & L code contact gaps
Insulation Resistance .....10,000 megohms at 25° C and 50% R.H.
Typical capacitance .....Contact-contact ..... 3 picofarads
Coil-frame .....30 picofarads
Coil-contacts ..... 5 picofarads

ENVIRONMENTAL CHARACTERISTICS

Operating Temperature Range ....−55 to +72 degree C (−67 to+162°F)
Vibration .....0.06" DA, 5-55 Hz Operating with no contact chatter
Shock .....15 g operating, 30 g mechanical

WEIGHT .....25 to 30 grams, depending on configuration

TYPICAL LIFE EXPECTANCY FOR SWITCHING RESISTICE LOADS AT 25° C

Current	Voltage	Contacts	Life (Operations)
10.0 Amp	115 vac, 60 Hz	W	2×10^5
10.0 Amp	28 vdc	W	4×10^5
5.0 Amp	115 vac, 60 Hz	X	2×10^5
5.0 Amp	28 vdc	X	6×10^5
2.0 Amp	28 vdc	Y, Z	1.5×10^6
2.0 Amp	28 vdc	Y, Z	6×10^5
1.0 Amp	28 vdc	Y, Z	12×10^6

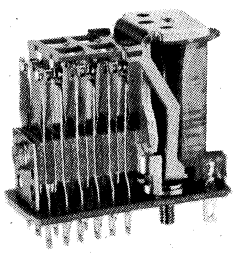
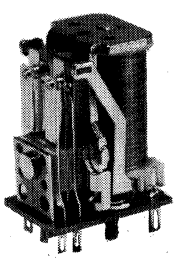
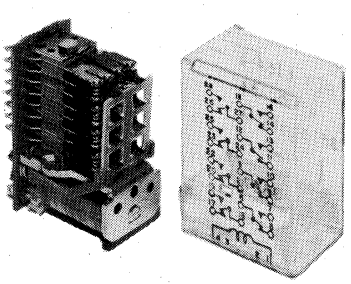
VB — BIFILAR WINDING

Bifilar coils protect relay drive transistors. The transient voltage spike is limited to 150% of the normal coil voltage. To specify simply change "V" to "VB". Available in "V" adjustment only. (To 48 V. nom.)

4 ADD MATCHING SOCKET







Special Relays

PARELCO regularly manufactures a wide variety of special relays, custom designed to meet individual circuit requirements. Our Engineering department, experienced in circuit analysis, will gladly assist you in specifying your relay. Coil impedance and relay sensitivity can be varied over wide limits. Unusual contact configurations, such as Form B, D, etc., are available. Relays with mixed contact current ratings are easily made. There is no charge for the required engineering or for a sample relay meeting your specifications. Just let us know your requirements.

PARELCO, INC.

26181 AVENIDA AEROPUORTO, SAN JUAN CAPISTRANO, CALIFORNIA 92675
PHONE: 714 - 493-4507 • TWX: 910-596-1412

TO SELECT YOUR PARELCO R10 RELAY

1. Decide on type of terminal and mounting.
2. Select rating and number of contacts.
3. Choose the proper coil resistance.
4. Pick the mating socket (from back of this page).
5. Order from Parelco representative (see back cover for name and location).

EXAMPLE:

R10-E1	Y-4	V-700	A10-2 SOCKET
R10 Type Relay with Transparent Enclosure, Solder Terminals and Mounting Stud	4 Form C Contacts Rated at 2 amps	700 ohm Coil for 24v Operation	Chassis Mount Socket For A Four Form C Relay

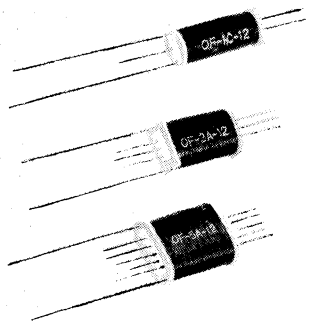
PHIPPS PRECISION PRODUCTS

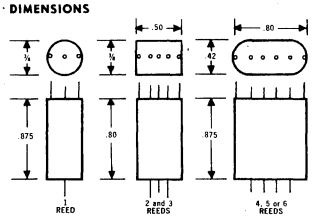
7641 DENSMORE AVENUE
VAN NUYS, CALIFORNIA 91406
TELEPHONE: (213) 785-3109

MINIATURE REED RELAY AND RELAY ASSEMBLIES

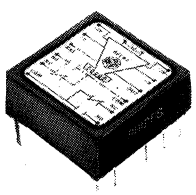


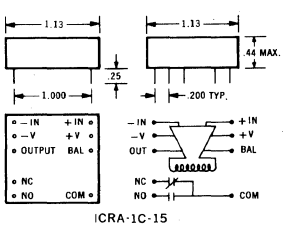
PHIPPS PRECISION PRODUCTS manufactures all types of reed relay assemblies. The most popular is the open frame (OF) series; however, other popular series include printed circuit board (PC) series and relay assemblies packaged in vector cans (VC series) for plug-in socket mounting. In addition to these standard types, PHIPPS designs and manufactures special purpose reed relay assemblies to meet any specific customer application. These include latching relays in single or multiple contact configurations; multiple contact reed relays up to 100 contacts per relay; special mounting, coil resistance, pull-in and drop-out characteristics per customer specifications; mercury wetted relays in any configuration; and time delay relays using reeds. PHIPPS PRECISION PRODUCTS engineers will give your specialized requirements in reed relay and reed matrix applications immediate attention.

DIMENSIONS



"ICR" SERIES COMPARATOR RELAYS AND WINDOW COMPARATORS





ICRA-1C-15

COMPARATOR RELAYS

The "ICR" series is a completely new family of differential comparator relays that combine the most advanced integrated circuit technology with reed relay life, speed, and reliability. Sizes of these units are less than half that of existing operational amplifier/relay assemblies. Self-contained in one integral package, "ICR" units consist of an integrated circuit operational amplifier precisely matched to a reed relay. Applications include: temperature controllers, precision analog gates, sample and hold circuits, overvoltage protection circuits, sorter/classifiers, alarm devices, differential threshold comparators, process controls, go/no-go controls and limit controls.

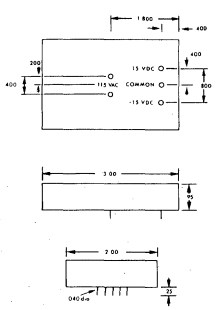
PROGRAMMABLE HYSTERESIS

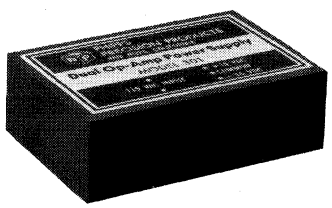
In applications where the input signal varies gradually through the comparator trip level or where noise is present on the input signal, it is desirable to introduce hysteresis in a comparator circuit. The programmable hysteresis option to the "ICR" comparator relay permits the desired hysteresis (voltage difference between relay pull-in and drop-out) to be programmed by connecting the appropriate resistance between the hysteresis terminals on the "ICR" module. Trip level and input impedance are unaffected, and design of sophisticated positive-feedback networks is eliminated.

WINDOW COMPARATOR

The window comparator consists of two ICR type relays packaged together driving either a common relay, SPDT, DPDT, or two separate relays with SPST, DPST, SPDT or DPDT contacts. SPST contacts can be either normally open (A FORM) or normally closed (B FORM) reeds. Single pole contacts are available with either dry or mercury wetted reed contacts. The window comparator can sense the input signal to a high reference level and a low reference level. This level range is limited by the differential input signal capability of the integrated circuit. Programmable hysteresis is an added feature which allows the designer to eliminate chatter caused by noise on the input signal voltage.

DUAL OP-AMP POWER SUPPLY





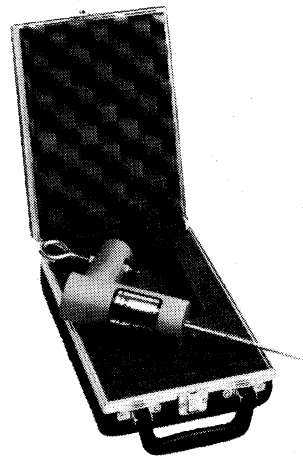
50MA and 100MA OUTPUTS

Phipps Models 301 and 301A are completely self-contained dual output power supplies designed to power circuit modules such as operational amplifiers, comparators, etc., requiring dual +15VDC and −15VDC inputs or single 30VDC input. Designed to operate directly off a 115VAC input, Models 301 and 301A are epoxy cast into modules designed to be soldered directly onto printed circuit boards or plugged into special sockets.

Other outstanding features include small size (only 0.95 x 2 x 3 inches for Model 301), lightweight (only 8 ounces for Model 301), ±0.1VDC output accuracy, less than 1 millivolt RMS ripple, and complete short circuit protection.

Other power supplies including dual voltages are also available.

PI (SAFETY) METER



This new series of PI-Meters incorporate a complete re-design which increases sensitivity and reliability. Capable of detecting voltages from 100 VRMS to an infinite AC voltage, the meter incorporates a self test feature which verifys unit operation prior to each use. The rugged case incorporates an eye bolt to connect to a hot stick for checking for high voltages in dangerous and in-accessible areas. A single 9 VDC battery provides approximately 4000 hours of intermittent operation.

The meter was originally designed as a safety tool to determine whether or not an underground transformer was turned off prior to a lineman entering the transformer area. However, unit features make it ideally suited for any application involving high voltage.

ultDELAY® TIME DELAY RELAYS

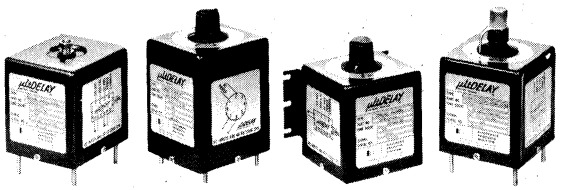
Three lines offering combinations of accuracy, features, size, and cost to meet all requirements. All models are solid-state and have been "value-engineered" to deliver ultra-reliable performance.

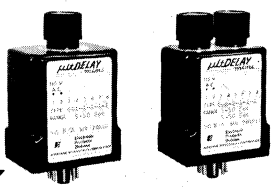
REPRESENTATIVE APPLICATIONS:

SEQUENCE TIMER
BATCH PROGRAMMER
COMPUTER INTERFACING
CONVEYOR SEQUENCING
INJECTION MOLDING

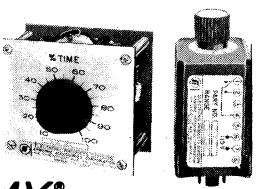
ultDELAY®

—the ultimate in accuracy and adaptability





ultDELAY® mini —budget-priced companion to ultDELAY



ultDELAY®-ECONOmini —switch mode 1 or 2 in an economical design

SPECIFICATIONS

	ultDELAY	ultDELAY—mini	ultDELAY-ECONOmini
TIMING RANGES, ADJ.	Ten standard ranges from .05 seconds minimum to 60 minutes maximum. Other ranges or pre-set times are available as options.		
REPEATABILITY (OF SET-POINT VALUE, AT CONSTANT VOLT. AND TEMP.)	±1% of Set Point	±2% of Set Point	±4% of Set Point
RESET TIME, MAX	30 ms	30 ms	50 ms
SWITCH CONTACTS*	SPDT, DPDT, 3PDT, 10A, 120 VAC or 28 VDC	SPDT, 10A, 120 VAC or 28 VDC	SPDT, or DPDT 10A, 120 VAC
AMBIENT LIMITS: COMPENSATED OPERATIONAL OR STORAGE	—5° to 150°F —67° to 257°F	32° to 125°F —67° to 257°F	—5° to 150°F —5° to 150°F
OPERATING VOLTAGES	90-140 or 200-240 VAC, 40-5,000 Hz; or 21-36 VDC	100-130 or 220 VAC, 50/60 Hz; or 23-33 VDC	100-130 VAC, 50-60 Hz or 24-32 VDC
MOUNTING	Stud, flange, or panel	Plug-in or panel adapter	Plug-in or panel
TERMINALS	Octal plug or two 8-screw terminal strips	Octal plug or terminal adapter	Octal plug or terminal board
SWITCH MODES	1 through 8	1-3 and 5-8	1 (with standby power) or 2
OPTION	Remote set point adjustment		

*Solid State output switching available.

ORDERING: *State model no., voltage, range, and options. Descriptive literature on request.*

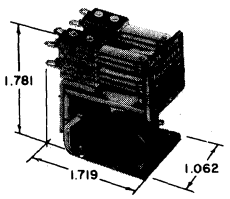
GENERAL PURPOSE RELAYS

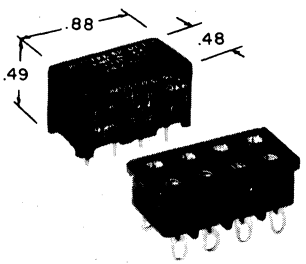
GA SERIES Low cost, all purpose, multiple contact, voltage switching relay. Used for many industrial control applications. Tinned, pierced solder type terminals. Contacts: 3/16" dia. silver, designed for maximum self-cleaning action. Mounting: No. 8-32 tapped core with locating boss. Weight: 3½ ozs. See GF series for similar relays having 10 amp ratings.



HP SERIES This commercial microminiature relay is recommended for applications requiring high performance in minimum space, such as TV cameras, dictating machines, desk top computers, copying machines and others. For circuit board or socket mounting and encased in a high impact dust cover, the HP is a half crystal case size relay with terminals on a .200" grid.

9HP1 solder terminal socket and retainer for HP relay. Box of 10 **NET $4.75**

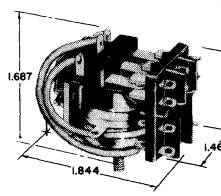
Additional specifications of HP series.



KA AND KAP SERIES Small, low cost, highly efficient general purpose relays for handling light power loads such as small motors, solenoids and other relays, and general automation work. All KA and KAP relays with "Y" suffix bear CSA* listing and carry U/L component recognition (File No. E22575). Mechanical life expectancy: 10 million operations. Duty: Continuous. Contacts: Movable, 1/8" dia. gold-flashed silver; stationary, 5/32" dia. wide silver overlay.

The KA is the open version of this series. Mounting: One No. 6-32 threaded stud and locating tab on 7/16" centers. Weight: 2 ozs. The KAP is the enclosed model and is protected by a clear, high impact plastic dust cover. Terminals: 8 or 11-pin plug. Weight: 3 ozs.

"G" suffix indicates silver-cadmium-oxide contacts on movables rated 10 amps.

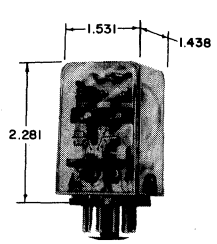


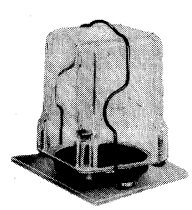
HOLD DOWN SPRINGS Designed to insure secure mounting of relays in any position. Will accommodate machine screws or rivets.

For KAP relays: (shown above)
9KA1 50 per box **NET $5.80**

For KCP and KRP relays (pages 6 and 3)
9KR15 50 per box **NET $5.80**

For KUP plain case relays (page 3)
9KU3 50 per box **NET $5.25**





KL SERIES Multiple contact relay. Varied contact combinations and high dielectric phenolic insulation affords extreme versatility and utility. Widely used in such applications as industrial controls, elevator controls, communications equipment and electronic measuring devices. Mounting: All models — Two No. 6-32 tapped holes on 1 7/16" centers. Contacts: 1/8" dia. gold-flashed silver. Weight: 5 ozs.

POTTER & BRUMFIELD

Division of American Machine & Foundry Company, Princeton, Indiana 47570

GENERAL PURPOSE RELAYS (CONTINUED)

KHU/KHP/KHS SERIES Small, rugged, 4PDT, available for AC or DC operation. Only KHU relays carry Underwriters' Laboratories component recognition. KHU and KHP have nylon dust covers; KHS is hermetically sealed in metal enclosure. These relays are designed to meet the exacting requirements of data processing, computer and process control applications. Contacts are 3/32" gold-flashed silver and are rated 3 amps @ 30V DC or 120V AC resistive for 100,000 operations. "12" suffix indicates silver-cadmium-oxide contacts. Mounting: Solder terminals with a No. 3-48 5/16" long. Adaptable to sockets (below) with printed circuit or solder lug terminals. Weights without sockets; KHU or KHP 1⅛ ozs.; KHS 1⅝ ozs.

KHU/KHP hold down spring (similar to KCP-KRP, above.)

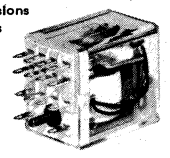
9KH3 50 per box, weight 3 ozs. Net $5.50

9KH1 Solder terminal sockets and retainers. Box of 10 Net $6.60

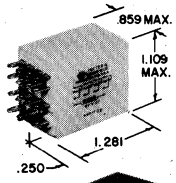
9KH2 Printed circuit terminal sockets. Box of 10 Net $6.60

Weight per box: 4 ozs.

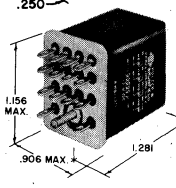
Dimensions same as KHP



KHU

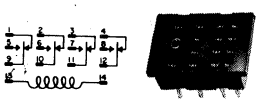


KHP



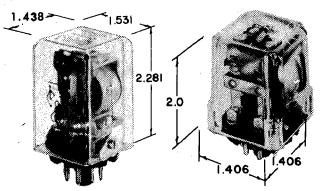
KHS

KRP SERIES Versatile, multi-contact arrangement. Enclosed in a clear high impact plastic dust cover. Standard 8-pin octal-type plug for KRP5 and KRP11, 11-pin for KRP-14. Weight: Approx. 3 ozs. Contacts: 5 amp, 3/16" dia. gold-flashed silver, 10 amp 3/16" dia. silver cadmium-oxide. See KCP-KRP hold down spring for special mounting applications. See KRP-N indicator lamp relay for current monitoring applications.

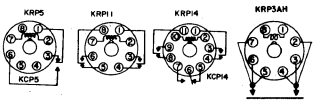


KRP-N INDICATOR LAMP RELAY A general purpose relay incorporating a lamp to indicate current or voltage availability in power circuit. Contacts: 3/16" dia. silver cadmium-oxide. Enclosure: Clear, high impact plastic dust cover. Mounting: Standard octal plug. Weight: Approx. 3 ozs.

Hold down spring (Please see page 2).



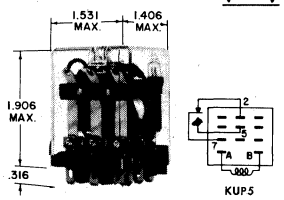
"P" — CASE A clear high impact plastic case for mounting rectifiers, capacitors, resistors or a combination of these. Available with octal-type plug with 8 or 11-pins. Comes complete with four screws. Weight: .5 ozs. each. See KCP-KRP Hold Down Spring for special mounting applications.



35D070 Case (8-pin plug) NET $ .65

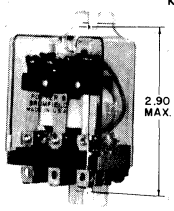
35D072 Case (11-pin plug) NET $ .80

KUP SERIES This reliable 10-ampere relay for industrial control is available with a socket that is also rated 10 amperes. The .187" terminals of the relay are of the quick-connect/solder type. Sockets are priced separately and their terminals are of the pierced solder type. The KUP is enclosed in a clear, high impact plastic dust cover. Silver-cadmium-oxide contacts assure long contact life. Operation: Continuous.



KUP5

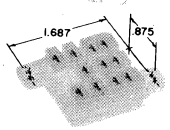
KUP SERIES with slotted flange for direct-to-chassis mounting. Identical in both electrical and mechanical specifications as the KUP described above, except that they are not suitable for socket mounting. The .187" terminals are of the quick-connect/solder type. Slot width: .156". Weight: 3 ozs.



All models carry U/L Component Recognition.

9KU1 pierced solder terminals sockets and retainers for KUP plain case relays. Rated 10 amperes; molded nylon. Mounting hole .165" dia.
Box of 5 NET $3.95

9KU5 sockets with .187" quick-connect terminals. Mounting hole .165" dia.
Box of 5 NET $6.30



9KU2 printed circuit pin terminal sockets for KUP relays. Will accept .187" terminals of KUP in plain case. Molded nylon. Mounting hole .165" dia.
Box of 5 NET $4.75

9KU4 screw terminal socket for KUP plain case relays to 2 Form C. The nylon socket (accepts .187" terminals) is riveted to the bakelite frame that provides screw terminals.
Box of 5 NET $13.15

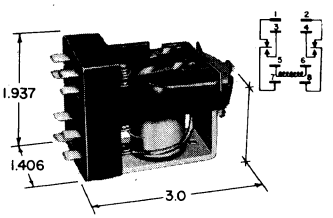
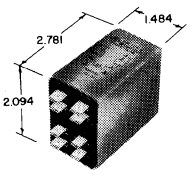
POWER RELAYS

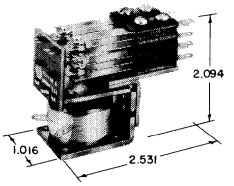
AB SERIES For appliance and general purpose applications where rugged construction, long life and quiet operation are required. All equipped with terminals to fit snap-on connectors and may also be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models carry U/L component recognition (File No. E29244) and CSA* listing. Mounting: Two No. 8-32 tapped holes, on 1¼" centers. Silver contacts. Weight: Approx. 5 ozs.



ABC SERIES Medium duty power relay with dust cover. For small motors, industrial control and similar applications. All equipped with terminals to fit snap-on connectors and may also be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models carry U/L component recognition (File No. E292-44) and CSA* listing. Mounting: One No. 8-32 threaded stud ⅜" long and locating tab on 5/16" centers. Contacts: ¼" dia. silver. Weight: Approx. 7 ozs.



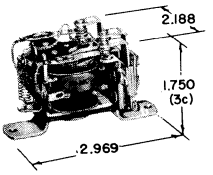
GF SERIES Medium duty power relay for industrial control applications. Long contact arms have ¼" dia. silver contacts rated at 10 amps at 120V AC or 28V DC resistive. Contacts have excellent wipe or self-cleaning action. Tinned, pierced solder terminals. Mounting: 8-32 tapped core with locating boss. Weight: 4.75 ozs. (See GA series, page 1, for similar voltage actuated relays.)



MR SERIES A medium duty power relay that can handle small motors, transmitters, and general purpose applications. Mounting: Two 5/32" dia. holes on 2¼" centers for MR3 and 11, 2⅝" centers for MR2, 5 and 14. Contacts: 7/32" dia. silver. Weight: 4 ozs.

MS/MR Metal dust cover similar to PM/PR shown below. 3⅝" x 2⅜" x 2 21/32". Weight: 7.5 ozs.

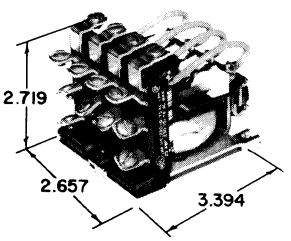
35D130 fits MS/MR **NET $2.20**



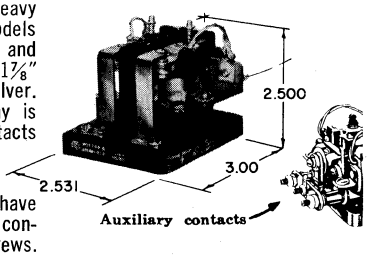
PM SERIES A compact heavy duty 4PDT power relay for polyphase and heavy duty switching applications. Screw terminals. Has ¼" silver-cadmium-oxide contacts rated at 25 amps at 120V., 25 amps at 240V. 50/60 Hz resistive AC, 1HP per movable arm at 120V. or 240V. AC single phase, U/L (File No. E22575) and CSA* listed, except 480V. Mounts by one front keyhole and two rear channel slots for 8-32 screws on 2" x 2½" triangular centers. Weight: 14 ozs.

9PM1 Adaptor plates for mounting PM on PR mounting holes. Box of 10 **NET $1.75**

Enclosures for PM relay — see below.



PR SERIES Heavy duty relay for industrial control applications requiring long life and fast action. Heavy duty screw type terminals. All AC and DC models except PR-11AL5 carry U/L (File No. E22575) and CSA* listing. Mounting: Two 3/16" dia. holes on 1⅞" centers. Weight: 11 ozs. max. Contacts: 5/16" dia. silver. Enclosure: See "PR" cover. The PR11AL5 relay is equipped with 3/16" dia. silver SPDT auxiliary contacts rated at 5 amps.



PM and PR DUST COVERS These dust covers have a sheet metal base with knockouts for ½" dia. conduit and an aluminum cover fitted with two screws. Finished in gray hammertone. Mounting: Three No. 10 holes on 1⅞" x 4⅛" centers. Approx. weight: 1 lb.

35D227 Metal cover for PM only **NET $3.45**

9PM2 Plastic dust cover for PM only. Box of 4 **NET $1.90**

35D013 Metal cover for PR only **NET $3.45**

POTTER & BRUMFIELD
Division of American Machine & Foundry Company, Princeton, Indiana 47570

SPECIAL PURPOSE RELAYS

AP SERIES RATCHET, IMPULSE A reliable compact unit for applications requiring on-off or reversing action on alternate operations. Positive ratchet operation at all speeds on impulses as short as 60 ms. Intermittent operation only. Mounting: Three 5/32" dia. holes on 3 3/8" x 7/8" triangular centers. Contacts: 3/16" dia. silver. Weight: 7 ozs. Coils for intermittent duty only.

BU BUZZER AC operated coil with a spring steel armature which buzzes when coil is energized. Used extensively in test equipment, laboratories and a host of other applications where a small light weight, dependable buzzer is required. Weight: 1 5/8 ozs. Mounting: No. 6-32 tapped core.

GM SERIES Unusually versatile switching makes this impulse/sequencing relay especially suitable for single coil latching. The 2 Form C contact arrangement is switched alternately by cam action during drop-out of the armature. It can also be furnished with additional 2 Form C auxiliary contacts (designated by "L"). AC version operates on a 50% coil duty cycle (5 Min. max.). Mounting: 8-32 tapped core with locating boss. Weights: With aux. contacts 4 3/4 ozs. Without aux. contacts 4 ozs.

The GM1N10 and GM1N12 AC or DC use the basic GM structure with uni-directional printed circuit boards with 10 or 12-steps, respectively. The board is attached to an extension of the ratchet shaft. The movable contact arm advances one position each time the armature **drops out.** Contact rating: .25 amps. Contact arrangement: SP-10 pos. and SP-12 pos. Size: 2.312" x 1.875" x 2".

KB SERIES LATCHING RELAY Both release and trip coils must be for the same voltage. One coil operates relay to set latch and other coil releases it. Ideal for memory work and overload applications. Operates on momentary impulse to either coil. Mounting: Two 5/32" dia. holes on 1 3/8" centers. Weight: 6 ozs. Contacts: 1/8" dia. silver rated 5 amps; "G" suffix indicates silver-cadmium-oxide contacts on movables rated 10 amps. AC relays with 5 amp. Contacts carry U/L component recognition (File No. 29244) and are CSA* listed. AC coil for intermittent duty only.

KBP SERIES LATCHING RELAY Enclosed in a translucent polypropylene dust cover, the KBP is furnished with 20-pin octal type plugs for socket mounting. Contact arrangements of 4PDT and 5PDT are available. Otherwise all specifications are identical to the KB series described above. U/L component recognition does not apply to the KBP series. Weight: 8 ozs.

KM SERIES Subminiature relay for applications requiring unusually small relays with up to 3-poles 3/32" dia. silver contacts. Withstands 30g mechanical shock and .06" excursion 10 to 55 Hz mechanical vibration. Used extensively in small business machines, alarm systems, automatic toys and communications systems. Mounting: One 2-56 tapped core and locating .062" dia. half-punch on .187" centers. Solder terminals. Weight: .58 ozs.

PLATE CIRCUIT AND SENSITIVE RELAYS

KCP SERIES Low cost plate circuit relay enclosed in clear high impact plastic cover. Sensitivity 125 mw single pole; 250 mw double pole; 375 mw three pole. Mounting: Standard octal plug-in type. Eight pin for KCP5 and KCP11. Eleven pin for KCP14. Contacts: 1/8" dia. gold-flashed silver. Weight: Approximately 3 ozs. Use KCP-KRP hold down spring when vibration is a factor or when using inverted or horizontal mounting.

LB SERIES Designed for top performance, long life at an unusually low cost. Each coil is wound with a given coil resistance and factory adjusted to operate on minimum current requirements. Mounting: Two 3/16" dia. holes on 2 7/32" centers. Contacts: 1/8" dia. silver. Weight: Approximately 2 ozs.

* Canadian Standards Assoc. File No. LR-15734

PLATE CIRCUIT RELAYS (CONTINUED)

LM SERIES (See KL page 2 for similar voltage actuated relays.) Sensitivity: 100 milliwatts for single pole and 200 milliwatts for double pole. Medium cost, high quality relay with 7/32" dia. gold-flashed silver contacts. Pick-up adjustable by tail spring adjusting screw. Mounting: Two No. 6-32 tapped holes on 1 13/16" centers. Weight: Approximately 5 ozs. DC Coils only.

PW SERIES (In both voltage and current actuated models.) Sensitivity: 40 mw for current actuated models, 180 mw for voltage actuated models. Precision, light weight, hermetically sealed relay for aircraft and missile applications. Will withstand 10g vibration to 500 Hz. Mounting: Standard 7-pin miniature tube base. Weight: Approx. 1 oz.

RS SERIES (In both voltage and current actuated models.) 60 mw. sensitivity. Low-cost, small, light weight, sensitive relay for radio-sonde, light dimmer and model applications. Mounting: Two No. 4-40 tapped holes on diagonal 3/4" x 3/8" centers. Contacts: Bar palladium. Weight: 1½ ozs.

SM SERIES (In both voltage and current actuated models.) Sensitivity 75 mw for current actuated models. Medium cost, light weight, dust covered (right) or hermetically sealed (left) relay for light contact loads found in computers, model airplanes and similar applications. Extremely long mechanical life because of reed armature. Mounting: Sealed, standard 7-pin miniature tube socket; dust cover, two 3/32" dia. holes on 17/32" centers. Contacts: Stationary silver; movable rhodium. Weight: 1 oz. max.

TELEPHONE TYPE RELAYS

LS SERIES Short springs and light weight armature provide fast action without sacrificing reliability and long life. Stainless steel hinge bearing designed to give 100 million operations. Tinned, pierced solder terminals. Mounting: Two No. 6-32 tapped holes on ¾" centers. Bifurcated contact arms with 1/16" dia. twin palladium contacts. Weight: Approximately 4 ozs.

The LSP version has identical specifications as the LS, except that it is enclosed in a high impact, clear plastic cover and is provided with a rectangular socket with combination taper tab or solder terminations. Enables plug-in like any other plug-in component. Two sizes of sockets and covers are available: 16-pin for 4 Form C (4PDT) or 28-pin for 6 Form C (6PDT). Dimensions: LSP17D: 1.71" x 1.39" x 2.52" seated; weight: 4 ozs. LSP23D: 2.11"x1.39"x2.52" seated; weight: 4½ ozs.

MH SERIES MINIATURE TYPE Ideal for applications where space and weight are factors. Mounting: Open model, MH11L, one No. 6-32 threaded stud 17/32" long plus locating boss. All other open models have four No. 3-48 holes on 3/8" x 3/8" centers. Sealed models, M enclosures, three 6-32 NC 2 threaded studs on 1¼" x ½" centers. D enclosures, three 6-32 threaded studs on 1 3/16" x 1 3/16" centers. All sealed models have hook end solder terminals. All models have 1/8" dia. gold-flashed silver contacts. Weight: Open models 2½ oz. max. Sealed models 5 ozs. max.

ML SERIES A small telephone type relay having excellent sensitivity and outstanding switching capabilities. Ideal for transistorized computer networks, telephone systems and battery powered communications equipment. Single contact arms have 1/8" dia. gold-flashed silver contacts rated at 3 amps for 100,000 operations. Pierced solder terminals. Mounting: Four 3-48 holes on 3/8" centers. Weight: 2.5 ozs.

HIGH PERFORMANCE RELAYS

FC SERIES Conventional micro-miniature relay lies flat on printed circuit board. Withstands 150g shock, 400g linear acceleration, 30g vibration to 2000 Hz. Ambient temperature range: —65° to +125°C. Hermetically welded. Bifurcated contacts. Plugs in on .2" grid. Meets applicable sections of MIL-R-5757D, and MSFC-SPEC-339. Weight: .75 oz.

FL SERIES Dual-coil latching relay has same specs as above, except operates by pulsing each coil alternately (observing coil polarity); or connecting the coils in series from a reversing (polarized) source. Remains latched without coil power.

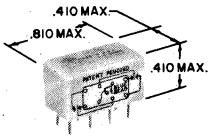
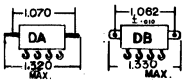
HIGH PERFORMANCE RELAYS (CONTINUED)

HC SERIES A micro-miniature, non-polarized, non-latching half-size crystal case relay for high reliability performance. Its high-torque motor structure and bifurcated, gold-plated silver DPDT contacts, rated dry circuit to 2 amps @ 28V DC resistive, provide positive performance in low level applications. Temperature range: —65°C to +125°C. Hermetically welded. HC11D has plug-in, plain case; HC11DA has hook-end solder terminals and shoulder brackets; HC11DB has hook-end solder terminals and flat mounting plate with 2 holes. The HC series meets or exceeds all applicable sections of MIL-R-5757D/9, and complies with MSFC-SPEC-339. Size: Plain case .8" x .4" x .4" (seated). Weight: ¼ oz.



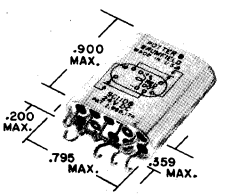


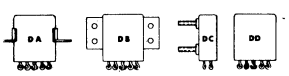
HL SERIES A companion micro-miniature relay with identical specifications as the HC described above, except that it is a dual-coil latching relay. The HL can be operated: by (1) pulsing each coil alternately, observing coil polarity; or (2) from a reversing (polarized) power source by connecting like polarities. Approximately 150 milliwatts @ 25°C coil temperature are required for each coil. Coils will operate in less than 3 milliseconds at nominal voltage @ 25°C.

Dimensions same as HC

SC SERIES Micro-miniature permanent magnet relay for low power, high shock/vibration applications. 200g shock, 30g vibration to 2000 Hz with no contact openings. Ambient temperature range: —65°C to +125°C. Features single coil action and conforms to standard micro-miniature coil operation except polarized connections because of magnetic circuit. Positive terminal marked with red dot. Mounting: SC11D**, —DA, —DB, DC and DD correspond to similarly designed SL mountings. SCG11D has rectangular header with terminals on .2" grid. Weight: ¾ oz.

**Armel No. HRK-1, 8-pin receptacles available from distributors for plug-in applications.





SL SERIES Dual coil micro-miniature magnetic latching relay with same shock/vibration, resistance and ambient temperature range as SC. Coils may be connected in series for polar operation. Mounting: SL11D* for plug-in applications: —DA has shoulder flanges with two .104" x .136" holes on a 1.062" center; —DB has a welded bracket with four .125" dia. holes on 1.062" x .281" centers; —DC has two No. 4-40 NC 2A threaded studs on .488" x .220" diagonal centers; —DD has plain case with hook end solder terminals. SLG11D has plug-in terminals on .2" grid.

*Viking No. P/N VBO/3DV 1 10-pin receptacles available from distributor for plug-in applications.

SPECIFY COIL VOLTAGE OR RESISTANCE WHEN ORDERING

VOLTAGE SENSORS

CS SERIES Two types of accurate, low cost solid state voltage sensors are available. First, an adjustable pick-up and drop-out series for 24V DC and 120V AC voltage sources. Second, a series with factory-fixed pick-up and adjustable drop-out, also for 24V DC and 120V AC voltage sources. All are provided with standard octal plugs for socket mounting and are enclosed in a nylon dust cover. Please see the tables for ranges of voltage adjustments.

SPECIFICATIONS

Sensing Current Drain: Maximum of 3 ma.

Maximum Current Drain: After sensing: 30 ma.

Accuracy of Set Point: 1% after initial setting.

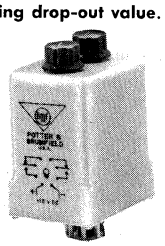
Reverse Polarity Protection: Yes, on DC types.

Operating Temperature: —40°C to +55°C.

Load Switching Relay Contacts:
2 Form C (DPDT). Rating: 3 amps 28V DC resistive; 120V AC resistive.

Expected Life:
Mechanical: 10 million operations.
Electrical: 100,000 operations minimum @ rated load.

Fixed pick-up and adjustable drop-out. One knob for setting drop-out value.



Adjustable pick-up and drop-out. Two knobs for setting desired values.

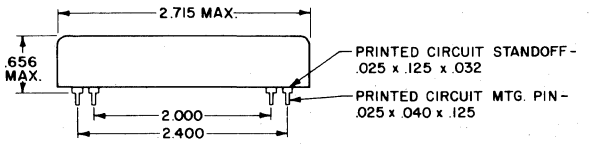
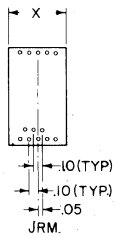
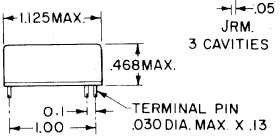
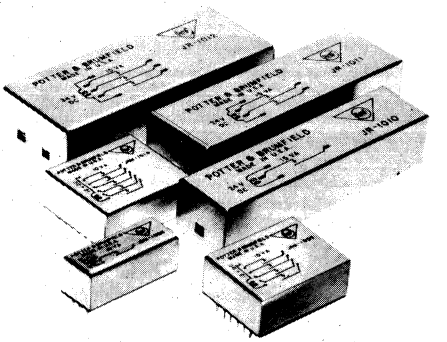
DRY REED RELAYS

OUTLINE DIMENSIONS









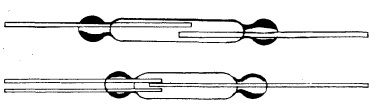
JR (STANDARD) SERIES

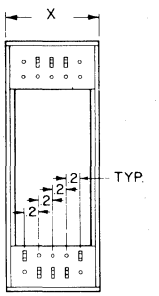
JRM (MINIATURE) SERIES

Fast response, reliable performance, high sensitivity, and long life make JR standard and JRM miniature series relays especially suited for data processing applications, computer equipment, logic circuitry and various other sophisticated control circuits.

TWO TYPES OF BASIC CAPSULES

Both JR and JRM relays employ dry reed glass capsules with two basic types of contact arrangements, Form A (SPST-NO) or Form C (SPDT). Biasing with a permanent magnet changes Form A to a Form B (SPST-NC). This arrangement requires that coil polarity be observed. It uses a two-cavity bobbin. Combining one Form A with one Form B results in a single Form C (SPDT) break-before-make; this uses a three-cavity bobbin. A "true" Form C (SPDT) uses a reed switch with two stationary and one movable contact. The movable contact is normally closed until the coil is energized, causing a "true" Form C (SPDT) break-before-make; it uses a single-cavity bobbin.





SPECIFICATIONS

Pick-up: 75% of nominal @ 25°C.

Operate Time: At nom. voltage @ 25°C.: JR: 3ms. JRM: 1ms.

Release Time: At 25°C.: JR: .5ms. JRM: .05ms.

Coil Power: Based upon nom. voltage and resistance.

JR: 1 capsule — 240 mw; 2 capsules — 360 mw; 3 capsules — 720 mw; 4 capsules — 960 mw; 5 capsules 1.5 w.

JRM: 1 capsule — 180 mw; 2 capsules — 275 mw; 3 capsules — 420 mw; 4 capsules — 540 mw; 5 capsules — 720 mw.

For additional specifications see columnar listings and drawings.

MERCURY-WETTED CONTACT RELAYS

JM SERIES Rare long life, high speed, and unvarying dependability — all are the result of the basic component of these relays: a hermetically sealed glass capsule. It contains the contact arrangement and a small reservoir of mercury sealed in a high pressure hydrogen atmosphere. A film of mercury is renewed for every operation — that's why you can think in terms of billions of operations without contact bounce, pits or welds.

TWO TYPES OF CAPSULES The capsules used in JMF and JMF2 (with 2 capsules) modules and JML relays has a SPDT, break-before-make (Form C), non-bridging contact arrangement. Each capsule used in JMP, and JM1 to JM4 relays has a SPDT, make-before-break (Form D), bridging contact arrangement. JMF, JMF2, JML and JMP series achieve a high rate of sensitivity by factory-adjusted magnet biasing.

MOUNTING POSITION: Upright mounting required, but deviation from upright up to 30° causes only minor deviation in operating characteristics.

CONTACT RATINGS

JMF, JMF2 and JML: 500V max., and 2 amps max., 100 VA max.*

JMP and JM1 to JM4: 500V max., and 5 amps max., 250 VA max.

*With contact protection unless in a low level circuit. Details of a simple protection circuit consisting of resistor and capacitor in series are packed with each relay.

SOLID STATE TIME DELAY RELAYS

A wide selection of three separate series of solid state time delay controls are represented by Potter & Brumfield time delay relays, the CD series, the CH series, and the CU series. The differences between the three types consist in their degree of accuracy, the variety available in each series, and their cost.

BASIC TIMING CIRCUIT The basic timing circuit of all three series consists of a resistor in series with a capacitor. When the input voltage is applied to the resistor-capacitor circuit, the voltage across the capacitor slowly increases. When the firing level is reached a solid state trigger circuit acts to turn on a solid state output switch that energizes a switching relay or external electrical load. The solid state design eliminates cams, clutches and motors. Using no moving parts, the timing circuit can have no mechanical wear, an advantage that is especially desirable when accurate recycling is required.

CU SERIES An outstanding value in a solid state time delay relay at low cost, the CU series is designed for delay on operate applications in machine tool controls, copiers, office equipment, coin-operated machines, process controls and many others. It is available in two types: Fixed time delay that is set at the factory and cannot be modified. Second, adjustable with an external resistor. For minimum time two terminals, 2 and 5, must be shorted; for maximum time the listed external resistor between terminals 2 and 5 must be added. For intermediate times select a lesser value resistor, or a potentiometer. Either model can be furnished in two types of enclosures with the relay in the same enclosure as the solid state unit. The CU series is offered with delay on operate only.

CUA and CUC are fixed time delays. **CUF and CUH** are resistor adjustable delays. All with internal DPDT 10 amp contact relay.

CUA 41-70010	**CUF 41-70010**
CUA 41-70120	**CUF 41-70120**
CUC 41-30010	**CUH 41-30010**
CUC 41-30120	**CUH 41-30120**
CUA 41-30010	**CUF 41-30010**
CUA 42-70010	**CUF 42-70010**
CUA 42-70120	**CUF 42-70120**
CUC 42-30010	**CUH 42-30010**
CUC 42-30120	**CUH 42-30120**
CUA 42-30010	**CUF 42-30010**

CU-41 is a plain case relay, **CU-42** has a slotted flange case. Diagram A is for fixed delays, diagram B for resistor adjustable delays.

CH SERIES The CH series is intended for a wide range of industrial applications where economy is of greater interest than highly critical performance. It is available in two types: Knob-adjustable with the relay in the same enclosure as the solid state unit. The second type has a fixed time delay period that is set at the factory and cannot be modified; its case has no knob. The CH series is available for time delay on operate and on release.

CH-38 and CD-38. Knob-adjustable delay "on operate" wtih internally mounted DP-DT relay. Contacts rated to 10 amps. Diagram A.

CHA-38-70001	**CHD-38-30003**
CHB-38-30001	**CDB-38-70003**
CHB-38-30003	**CDB-38-70004**
CHB-38-70001	**CDB-38-70005**
CHB-38-70003	**CDD-38-30003**
CHB-38-80001	**CDD-38-30004**
CHD-38-30001	**CDD-38-30005**

Delay "on release" CH requires auxiliary SPDT switch or relay contacts: CBH-38-70011, CHB-38-70013, CHD-38-30011, CHD-38-30013: Diagram B. CD "release" occurs when "Control" circuit is de-energized; supply circuit must be on continuously:

CDB-38-70012, CDD-38-30012: Diagram C.

CDD38-30012	0.6—60	24V DC	1 & 7	49.50

*External resistor (not furnished) for maximum time.

CD SERIES Remarkably dependable, accurate and flexible, the CD series offers an unusually wide selection of operational configurations, all with accurate time delay values, fast reset time and excellent repeatability. It is available in two types: Knob-adjustable in two versions, one with the relay in the same enclosure as the solid state unit, the other with an auxiliary relay. A second type is adjustable with an external resistor. The CD series is available for time delay on operate or on release.

CD-21. Knob-adjustable. Use with P&B KRP relays (see page 3) as listed under Note 2.

CDB-21-70003	**CDD-21-30003**
CDB-21-70001	**CDD-21-30001**

CD-31. Adjustable with external resistor (not furnished). Use with KHP relay (see page 2), Note 4.

CDH-31-30005

CD-45. Knob-adjustable. For heavy duty when used with PR power relay (see page 4) as listed under Note 6.

CDB-45-70002

NOTES

1. Has internal relay with DPDT contacts rated at 10 amperes, 120V AC.
2. Use with Potter & Brumfield relay KRP5AG-120V AC, KRP11AG— 120V or KRP14AG— 120V AC or KRP14AG— 120V AC.
3. Use with Potter & Brumfield KRP5DG— 24V DC, KRP11DG— 24V DC or KRP-14DG— 24V DC relay.
4. Use with Potter & Brumfield KHP-17D11— 24V DC relay.
5. Supplied with 180 seconds delay; adjustable to 1.8 seconds with external resistor (not furnished).
6. Use with Potter & Brumfield PR11AY— 120V AC relay.
7. Provides delay on release; all others have delay on operate.

Relays? Go no further.

Here, considerably abbreviated, are the Price Electric relays — the most complete line of industrial and military relays available from a single source. Naturally, we show only the most popular types and sizes. You'll find the rest, and all the information you need to select the right relay, in our catalog. Write for your copy.

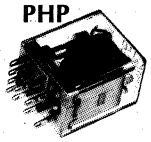
A North American Phillips Corporation

Industrial Relays

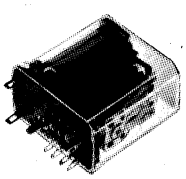
PHP



4PDT—3 amp, 28 VDC/115 VAC res. Coil —up to 115 VAC and DC. Dust cover with plug-in and socket available.

Coil VDC	Part No.	Coil VAC	Part No.
6	PHP-17D- 6	6	PHP-17A- 6
12	PHP-17D-12	24	PHP-17A- 24
24	PHP-17D-24	115	PHP-17A-115

GP



2, 4, and 6 pole, 2 amp, 28 VDC/115 VAC res. Coil—up to 115 VDC, sensitivity as low as 50 mw for DPDT. Dust cover with plug-in and socket available. Also relays with twin contacts.

Some standard relays:

Coil VDC	Part No. DPDT	Part No. 4DPT	Part No. 6PDT
6	GP-2C- 6	GP-4C- 6	GP-6C- 6
12	GP-2C-12	GP-4C-12	GP-6C-12
24	GP-2C-24	GP-4C-24	GP-6C-24
48	GP-2C-48	GP-4C-48	GP-6C-48

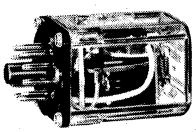
VK

3 pole, 10 amp, 28 VDC/115 VAC res. Coil —up to 115 VAC and DC. Dust cover with plug-in and sockets available.

Some standard relays:

Coil VDC	Part No.	Coil VAC	Part No.
12	VK-14D-12	24	VK-14A- 24
24	VK-14D-24	115	VK-14A-115

L



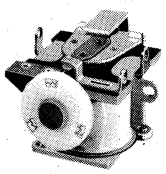
Up to 4PDT 5 or 10 amp, 28 VDC/115 VAC res.

Coil: Typical: 12 VDC 120 ohms
115 VAC 2250 ohms

Open or completely dust covered with 8/11 pin octal plug.

Contact	Coil Volts	Part No. Open Style	Part No. Dust Covered
3 PDT 5 Amp	12 DC	LK-14D- 12	LKP-14D- 12
3 PDT 5 Amp	115 AC	LK-14A-115	LKP-14A-115
3 PDT 10 Amp	12 DC	LH-14D- 12	LKP-14D- 12
3 PDT 10 Amp	115 AC	LH-14A-115	LKP-14A-115

31



SP—3 amp, 28 VDC/115 VAC res. Coil—176 MW. Typical—12 VDC 440 ohms. Stabilized Memory Relay—every other pulse to relay coil closes the contact. Open or completely dust covered with 8 pin octal plug.

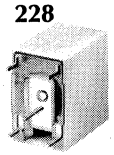
Coil VDC	Part No. Solder Terminals	Part No. Printed Circuit Terminals
6	31A112AC	31A111AC
12	31A112AE	31A111AE
24	31A112AG	31A111AG

220

DPDT—2 amp, 28 VDC/115 VAC res. Coil—572 MW. Typical—12 VDC 110 ohms. Completely dust covered, for direct PC mount.

Coil VDC	Part No.
6	22E121DA
12	22E121DD
24	22E121DG

228



SPDT—2 amp, 28 VDC/115 VAC res. Coil —50 MW. Typical—12 VDC 1760 ohms. Completely dust covered, for direct PC mount.

Coil VDC	Part No.
6	28A111CE
12	28A111CG
24	28A111CI

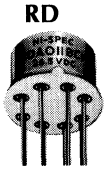
1000

SPDT—3 amp, 28 VDC/115 VAC res. Coil —44 MW. Typical—12 VDC 1760 ohms. Dust covers for contact area, solder or PC terminals.

Coil VDC	Solder Terminals	Part No.
6	10F211CE	10F211CE
12	10F212CG	10F211CG
24	10F212CI	10F211CI

Military Relays

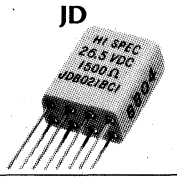
RD



DPDT—1 amp, 28 VDC res. Coil—130 MW. Typical—26.5 VDC 1500 ohms. Ambient Temp.— −65 to +125°C. Vibr.—30 G up to 3000 H_z. Shock—80 G, 11 msec. Mil-Spec.—MIL-R-5757.

Coil VDC	Part No. Wire Lead Terminals
26.5	RDA011BC1

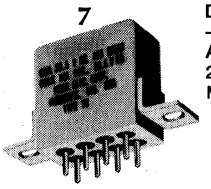
JD



DPDT—1 amp, 28 VDC res. Coil—150 MW. Typical—26.5 VDC 1500 ohms. Ambient Temp.— −65 to +125°C. Vibr.—20 G up to 2000 H_z. Shock: 50 G, 11 msec. Mil-Spec.—MIL-R-5757.

Coil VDC	Part No. Wire Lead Terminals
26.5	JDBO23DF1

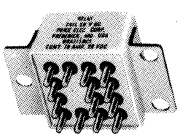
7



DPDT—10 amp, 28 VDC/115 VAC res. Coil —565 MW. Typical—26.5 VDC 300 ohms. Ambient Temp.— −65 to +125°C. Vibr.—20 G up to 2000 H_z. Shock—50 G, 11 msec. Mil-Spec.—MIL-R-5757 & MIL-R-6106.

Coil VDC	Part No. Plug-In Terminals	Part No. Solder Hook Terminals
26.5	BO7D111BC3	BO7D112BC3

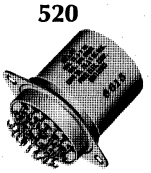
8



4PDT—10 amp, 28 VDC/115 VAC res. Coil —565 MW. Typical—26.5 VDC 300 ohms. Ambient Temp.— −65 to +125°C. Vibr.—30 G up to 3000 H_z. Shock—100 G, 10 msec. Mil-Spec.—MIL-R-5757 & MIL-R-6106.

Coil VDC	Part No. Plug-In Terminals	Part No. Solder Hook Terminals
26.5	AO8B111CC3	AO8B112CC3

520



6PDT—2 amp, 28 VDC/115 VAC res. Coil —700 MW. Typical—26.5 VDC 240 ohms. Ambient Temp.— −65 to +125°C. Vibr.—15 G up to 2000 H_z. Shock—50 G, 11 msec. Mil-Spec.—MIL-R-5757.

Coil VDC	Part No. Plug-In Terminals	Part No. Solder Hook Terminals
26.5	03C111DC1	03C112DC1

8200

DPNO—100 amp, 28 VDC/115 VAC res. DPNO—25 amp, 28 VDC/115 VAC res. Coil —3 W. Typical—24 VDC 50 ohms. Ambient Temp.— −70 to +125°C. Vibr.—15 G up to 500 H_z. Shock—70 G. Mil-Spec.—MIL-R-6106.

Coil VDC	Part No. Dust Covered	Part No. Hermetically Sealed
28 VDC	82CO11BD3	82C342DD3

All relays shown here, and more, are available from our local distributor. Ask him for a Price Electric Relay Catalog, or write us: Price Electric Corporation, Frederick, Maryland 21701

REMVAC COMPONENTS, INC.

37-55 61st Street Woodside, New York 11377 (212) TW 9-6100

HP-RELAYS

- UL Approval
- Two types: solder type (S-terminal) and plug-in (R-terminal).
- Both types available for 6V, 12V, 24V, 48V, and 110V DC applications, and 6V, 12V, 24V, 48V, 115V, 220V, and 240V AC applications.
- Both AC & DC high power applications at all voltage levels.
- Contact arrangements: DPDT, 3PDT, and 4PDT available in all types at all voltages.
- Mech. life: over 10,000,000
- Long life, excellent reliability, and superior contact performance up to 10A 250V AC
- Complete standardization and simplification allows minimized sizes and lowest prices.
- Totally interchangeable with U.S. components, including pin configurations.

Max. switch-off current	10A AC
Max. switch-on current	20A AC
Max. contact current	10A
Max. contact voltage	250V AC
Max. contact power	120W
Shock resistance	10G

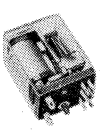
R-SERIES
Can only be used for plug-in into standard sockets. Panel & surface mounting sockets are available for HP relays.

S-SERIES
Can be used without alteration with direct solder tab connection or with AMP-connectors, type Faston 205. For plug-in or printed circuit applications.

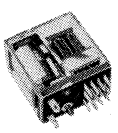
K-RELAYS

- UL Approval
- 10P twin contact force
- Mech life: 10^8
- Low operating force
- Negligible contact bounce
- Interchangeable
- 20 μ gold-plated mercury contacts
- Long life expectancy
- Low price

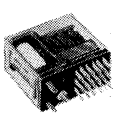
Max. switching capacity	2A; for type K2F—5A
Max. switching voltage	220V
Max. switching power	50W (120VA); for type K2F—100W (500VA)
Max. contact current	4A; for K2F—6A
Vibration resistance	10G to 55Hz



Type K2 DPDT



Type K4 4PDT



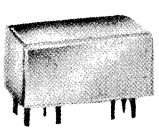
Type K6 6PDT

Type	Current	Contacts	Voltages 3	6	12	24	28	42	48	60	110	220
K2	DC	DPDT	x	x	x	x		x	x	x	x	
K2A	50Hz	DPDT		x	x	x			x		x	x
K2A	60Hz	DPDT		x	x	x			x		x	x
K2F	DC with 5A contact	DPDT		x	x	x	x	x		x	x	
K4	DC	4PDT	x	x	x	x			x	x	x	
K6	DC	6PDT		x	x	x			x	x	x	

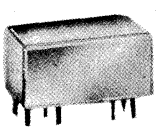
R-RELAYS

New type of high speed, SPDT, reed contact relay

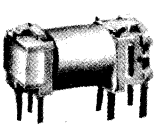
- 5P rhodium twin contacts
- 60 megohm contact resistance
- High reliability
- Low operating power
- Up to 500Hz operating frequency
- Temperature compensation
- Mechanical life: 10^9
- Low price



Type RS Shielded Hermetically sealed



Type RH Hermetically sealed



Type RO Unsealed

Max. switching load	1A
Max. switching voltage	110V
Max. switching power	20W
Switch-on/contact current	1.5/1
Shock resistance	30G

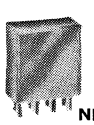
TWO BASIC TYPES:

Single side stable SPDT contacts—to be used as a neutral nonpolarized relay.

Bistable (latching) SPDT contacts—to be operated by either single wound coil (chopper) or double wound coil.

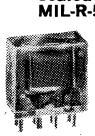
N-RELAYS

- For RF and dry circuit applications
- Suitable for DC operation
- SPDT and DPDT
- High reliability
- Long life expectancy
- Low contact resistance
- NH, NDH, N, and ND types available at following voltages: 3V, 6V, 12V, 24V, 28V, 42V, 60V, 100V



NH and NDH

Hermetically sealed MIL-R-5757D



N and ND

Plastic cover

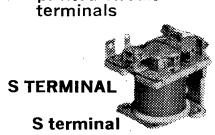
HM-RELAYS

- SPDT
- Both P and S types available at following voltages: 3V, 6V, 9V, 12V, 18V, 24V, 35V, 42V, and 60V.
- Minimum 15P contact pressure
- High life
- Low price
- Mechanical life: 20,000,000

Max. switch off current	3A
Max. switch on current	10A
Max. contact current	6A
Max. contact voltage	250V
Max. contact power	90W/1 KVA

P TERMINAL

P terminal
Mounting by printed circuit terminals



S TERMINAL

S terminal
Mounting by two mounting screws to an insulating plate.

REMVAC COMPONENTS, INC.

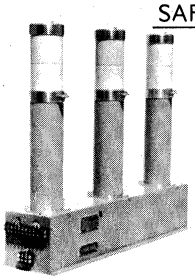
Sole agents for components manufactured by Matsushita Electric Works, Ltd.

ROSS ENGINEERING CORPORATION

HIGH VOLTAGE DEVICES

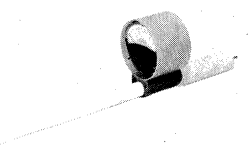
SWITCHES, RELAYS, MEASUREMENT, CONTROL, ENERGY STORAGE SYSTEMS, SAFETY, AND ACCESSORIES.

DC, 60 CYCLES, RF, PULSE, FOR ELECTRONIC AND POWER. 1,000 VOLTS TO 600,000 VOLTS.



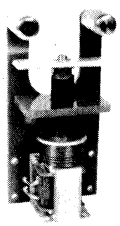
VACUUM POWER INTERRUPTING CONTACTORS AND CIRCUIT BREAKERS

5 to 38 KV RMS operate
50 to 600 amps continuous
2,000 to 12,000 amps interrupt



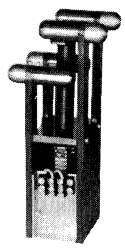
HI-Z™ HIGH VOLTAGE VOLTMETER

High Impedance
Portable
Instrumentation
.001V to 120KV



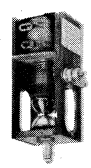
HV RELAYS
MODEL E

Open style
50 to 100 amps
12 to 120 KV PK
12 KV $54.00
40 KV $79.00
150 KV $480.00



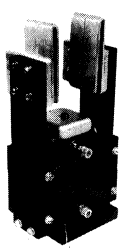
SPDT RELAYS
MODEL E-DT

Economical
Open Style
12 to 70 KV
50 to 100 amps
12 KV $71.00
25 KV $94.00



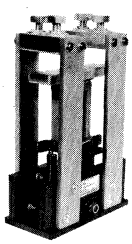
SPHERE GAP RELAYS
MODEL EE

Small Size
Gravity operated
12 to 100 KV
15 to 50 amps
Adjustable
Sphere Gap contacts
0-15 KV to 20-120 KV PK
25 KV $82.00



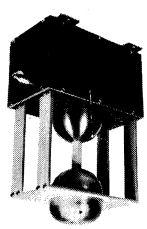
HIGH CURRENT SWITCH
MODEL GB

100 to 4,000 amps
Continuous
Small size
to 100 KV, PK test
Air solenoid operated
27 KV 600 A $190.00



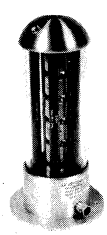
RF RELAYS
MODEL GA

High Current
Air operated to 100 KV PK
10 to 600 amps



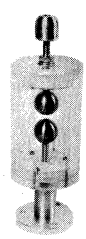
GROUNDING RELAYS
MODEL D

Gravity operated
to 600 KV, 100 amps
Low corona
50 KV $180.00
120 KV $390.00



VOLTAGE DIVIDERS
MODEL VD

Compensated
DC to RF
to 450 KV, PK
30 KV $180.00
120 KV $425.00



SPHERE GAPS
MODEL SG

Enclosed
Adjustable
to 600 KV, PK
2 to 40 KV $49.00
6 to 88 KV $98.00

HV SAFETY GROUNDING INTERLOCKS, SAFETY DEVICES, SPECIALTIES. Models pictured are examples of a related series. Currents are RMS continuous ratings. Voltages listed are Peak 60 Cycle Test values. Operating values are generally 1/3 to 2/3 that of peak test values. Spark-over is generally 10% to 30% higher than peak test listed. Let us quote on specific items since most models are available NO, NC, SPDT, and latching, with 115 AC actuators. Many items are not listed and prices and models can change without notice.

microminiature | lightweight | low power | high speed | indefinitely long life
rugged | inertialess | low level | high efficiency | temperature stable

SOLID STATE & REED RELAYS

DESCRIPTION

Solid state and reed relays provide the most reliable types of isolated switching presently available. Solid state relays are the most rugged and fastest (2 microsecond switching through 2000 G's). The Models 98 and 1285-5050 are DC contact types (to 50 ma) whereas the 2828-3504 (4 amps) and 2850-40020 (20 amps) are AC types. Reed relays are the fastest, most rugged and reliable of the electromechanical types (3 amps within 1 millisecond through 50 G's). They have very high isolation between drive and glass enclosed contacts. The 7001, 8001, 8021 Microreed Relays are the smallest, lowest drive power units made. The 7031 and 8031 are dual-in-line plug-in units designed for transistors and integrated circuits (3 volts, 25 ma drive). The 7051 and 8051 latching reed relays are logical binary types with non-volatile memory (each contact remembers the last command). Series 10 are power type reed relays. The 651 and 671 types are light actuated relays (high isolation and solid state contacts). The Models 471 and 476 are under/over and bandpass frequency detectors for remote monitoring, control and decoding. The 2825-50200 and the C2835-28500 are time-delay relays having solid state and reed output contacts respectively. These units are now being used for many applications. They are virtually immune to shock and vibration making them ideally suited for aerospace, military, industrial, R & D usage where miniaturization, power conservation and elimination of maintenance are prime requisites. Microfilm data sheets and application notes will be found in VSMF or the Thomas Supplementary File.

Phone, wire or write our engineering department for an immediate reply, recommendation or catalog. Many shipments are same day, if you call early.

COMPARATIVE TABLE OF SPECIFICATIONS FOR SOLID STATE & REED RELAYS

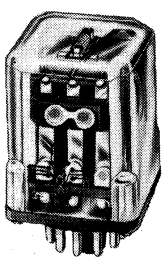
Relay Type	CAD5A10	CAD11A10	CAD14A10
6 volts a.c. 12 volts a.c. 24 volts a.c. 115 volts a.c.	$4.95	$5.55	$6.75
230 volts a.c.	$5.50	$5.95	$7.15
Relay Type	CAD5D10	CAD11D10	CAD14D10
6 volts d.c. 12 volts d.c. 24 volts d.c.	$4.95	$5.55	$6.75
110 volts d.c.	$5.50	$5.95	$7.15

5 AMP ALSO AVAILABLE

Same basic design as CA series; however, with clear plastic dust cover and octal-type plug-in base. Case is secured firmly to base by 4 "upset" plastic studs. Contact carrier plate is self-centering. Contact carrier is made of "KERIPOLE," a polyester material with glass fibre filling.

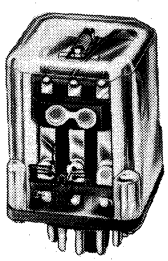
CSD SERIES



A plate circuit relay, similar to the CAD Type; however with increased sensitivity (125 MW per movable arm).

Contacts	2 Amp. Rating SPDT	DPDT	3PDT
Relay Type	CSD5	CSD11	CSD14
2500 ohms	$5.20	$5.60	$6.80
5000 ohms	$5.30	$5.70	$6.90
10,000 ohms	$5.70	$6.10	$7.30

SENSITIVE RELAY — CMD SERIES



In this series there are eleven types in three classifications.

No.	Coil	List Price
CMD-5D	600Ω	$4.95
CMD-5D	2400Ω	4.95
CMD-5D	9600Ω	5.20
CMD-11D	450Ω	6.10
CMD-11D	1890Ω	6.10
CMD-11D	7300Ω	6.10
CMD-5A	540Ω	5.00
CMD-5A	234Ω	4.75
CMD-5A	1000Ω	4.75
CMD-5A	3850Ω	4.75
CMD-5A	6900Ω	5.30

1. D.C. Relays with one form C contact Type CMD 5D—Pull-in sensitivity 40 mw; Coil Windings — 600 ohm, 2400 ohm, 9600 ohm

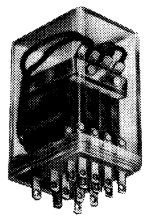
2. D.C. Relays with two form C contacts Type CMD 11D — Pull-in sensitivity 60 mw; Coil Windings — 450 ohm, 1890 ohm, 7300 ohm

3. A.C. Relays with one form C contact Type CMD 5A — Pull-In sensitivity 80 MVA; Coil Windings — 540 ohm, 234 ohm, 1000 ohm, 3850 ohm, and 6900 ohm

Contact ratings are 2 amps at 115 VAC.
Contact points are gold-flashed silver.

NEW MINIATURE UNIVERSAL TYPE RA

A precision piece of equipment at a commercial price —



1.515" high, 0.847" wide with dust cover

designed for use in computers, data processing equipment, communications equipment, process control applications, and other equally important systems.

Type RA is a four pole universal type relay for 4 PDT or double-make, double-break (DPDT-DB) action. 3/32" contacts rated at 3A — normally supplied in gold-flashed silver. Also available in silver cadmium oxide, gold nickel, silver palladium, etc.

STANDARD COIL DATA — **Sockets Available**

DC Voltage	Resistance in Ohms ± 10% at 25° C	List Prices	AC Voltage	Average AC current in MA (relay closed)	List Prices

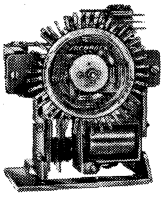
24	650	3.50	24	52	4.10
48	2,600	4.20	48	25	4.80
90	9,000	4.20	115	10.5	4.80
110	11,000	4.20			

Printed Circuit Terminals at Same Prices

TYPE RR REMANENCE RELAYS

Magnetic Latching for miniaturized circuitry. Same physical characteristics as RA. Voltages from 24-220 AC and 12-110 DC. Same electrical characteristics as CRD and CRF on opposite page. Prices range from $4.50-$5.30 list.

ROTARY STEPPING SWITCH TYPE RT



The SCHRACK Rotary Stepping Switch is a combination of three reliable components:

1. Standard Relay with 1 Form C heavy-duty contact.
2. Ratchet driven Rotary Switch consisting of four banks of twelve or ten points each with sliding bifurcated wipers.
3. Ratchet driven Stepping Relay with two cams which actuate one Form C contact each.

Schrack Rotary Stepping Switches have a highly efficient magnetic circuit and a driving mechanism designed for maximum operating safety. All components are mounted on a rigid die-cast light metal frame and contacts are permanently molded in a sturdy melamine plastic.

ROTARY SWITCH terminals are arranged in a circular pattern with four groups of twelve points each. A conversion can make it operate with 3 groups of 16 each. An alternate version with 4 x 10 points is available for applications requiring decimal counting. Each group occupies a quadrant of the circle and contains a common bus which is connected to the twelve or ten insulated points in sequence by means of a sliding wiper as the switch is operated.

TYPE RT 304 — 4 x 12 Contact Points $19.00 ea.
TYPE RT 404 — 4 x 10 Contact Points $19.00 ea.

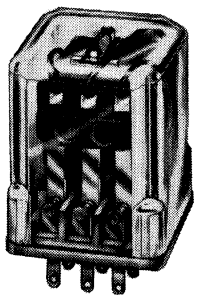
SCHRACK RELAYS

SINGLE COIL MAGNETIC LATCHING RELAYS — TYPES CRD & CRF



This is a bi-stable power relay held in operated position by a strong residual magnetism of the coil core after the coil is de-energized. The coil core is of a special alloy having sufficient remnant magnetic force to hold the armature locked-in for an indefinite period of time after being energized momentarily.

In design, these magnetic latching relays are identical, except for the base, with the Schrack Type CAD plug-in relay. Contacts are rated at 5 or 10 amps depending on materials used. DPDT (2 form C) or 3 DPDT (3 form C) versions are available.

LATCHING RELAY — TYPE CBT

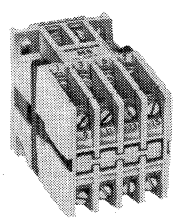
A dual coil mechanical latching relay. Each relay operates on a momentary impulse on either coil and is held in the set position until released by an impulse on the other coil. Both coils must be for the same voltage and are continuously rated.

Contact rating: 10 amps. (Based on 600 operations per hour at 115 volts AC 60 cy. resistive load).

May be operated continuously at 1000 cycles per hour.

The CBT relays have a transparent dust cover and a sturdy base plate of insulating material. Screw-type terminals are provided for all contact and coil connections. Available in voltages from 6-230 AC and 6-110 DC.

MULTI-POLE CONTACTORS TYPES M4, M6, M8, M10



Small, low-cost units

Versatile — with auxiliary contacts.

These are compact 8-pole air-break contactors. Principal applications for the M4 type are control circuits (pilot duty), but also may be used for switching of small single-phase or threephase motors. Type M8 has 4 contacts with increased rating and 4 contacts identical with M4. Types M6 and M10 have same features as M4 and M8, but have 3 main contacts and 1 auxiliary contact — intended for industrial applications.

NEW **LIST PRICES:**

M4 — $12.00
M6 — 15.00
M8 — 12.00
M10 — 15.00

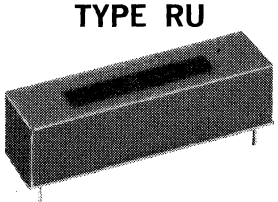
A robust and dependable open-type relay, equipped with lugs suitable for soldering and for mounting of AMP-FASTON Connectors, Series 110. Contact rating: 5 amps or 10 amps; according to contact material. Standard coils available: 6, 12, 24, 115, 230 volts a.c.; 6, 12, 24, 110 volts d.c. **Standard versions include 1, 2, or 3 Form C contacts. Optional: solder lugs for printed circuit boards, and .187 Faston Connectors.**

DRY REED RELAYS TYPE RU



May be incorporated into printed circuits as easily as other components. These are rugged, compact, high-power units available in a wide range of voltages and contact arrangements featuring long mechanical life (100 mill. operations). They are not influenced by mounting position and are fully protected against corrosive atmospheres.

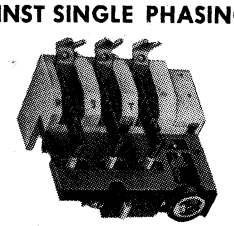
LOW COST PROTECTION AGAINST SINGLE PHASING IN A THREE WAY SYSTEM



Operates by the use of bi-metallic strips and dissimilar coefficients of expansion under temperature changes.
When temperature increases due to overload, a microswitch is activated in any leg of a three phase circuit.
Microswitch is normally placed in series with the solenoid of any switching device in the 3 phase line. Reset button may be manually or automatically operated.

TELEDYNE TRANSISTOR CASE RELAYS

All welded construction
TO-5 transistor type enclosure
Contacts — gold plated for dry circuit requirements.
Hermetically sealed
Excellent for high isolation switching
Capable of withstanding high shock and vibration

Insulation Resistance — 10,000 megohms min between mutually insulated terminals
Terminal Strength — Each terminal will withstand a 1 lb. pull in any direction
Temperature Range — —65°C to +125°C (for 415 series —55°C to +125°C)
Enclosure — All welded. Hermetically sealed.
Weight — 0.08 ounce to 0.15 ounce
Applicable Specification — Meets or exceeds MIL-R-5757D
Rated Duty — Continuous
Contact Resistance — 0.1 ohm max before life 0.2 ohm max after life at max rated current
Most configurations available from local distributors Other characteristics available

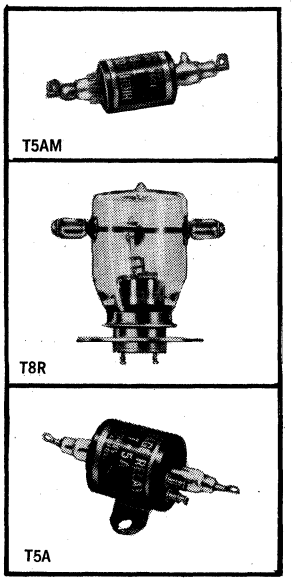
TORR LABORATORIES, INC.

high reliability

VACUUM RELAYS



Torr Laboratories is a leading producer of high voltage relays, vacuum capacitors and associated devices in the high voltage, high vacuum electronics field.

By means of very high vacuum it is possible to miniaturize high voltage components to a degree not possible by conventional methods. The near absence of air and gasses means high standoff voltages, freedom from electrode contamination, minimum arcing and rapid recovery in case of overloads. Vacuum components are also independent of temperature and atmospheric conditions and are ideally suited for applications where long life and reliability are essential.

Send for our complete catalogue.

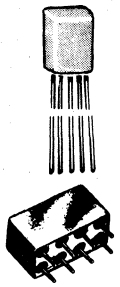
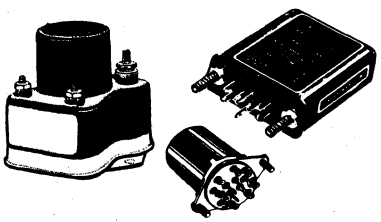
CRYSTAL CAN MICROMINIATURE

Extremely small, lightweight sealed units. Meet requirements of MIL-R-6106 and 5757. Single, double and 4 pole; half size; transistor size and standard; all sensitivities and mounting types up to 10 amp. contact ratings.



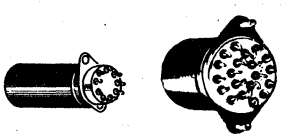
AN, MS, RY and AIRCRAFT

One of the largest stocks in the world.



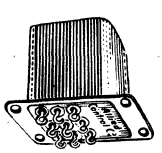
SUBMINIATURE – MINIATURE

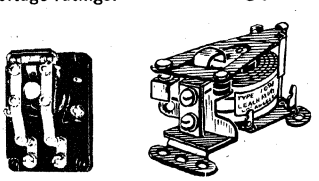
Compact, highly efficient relays, particularly for dry circuitry. Developed to meet Spec. MIL-R-5757. Up to 6 PDT. Hermetically sealed. Up to 10 amp contacts; all voltage ratings. Open frame miniature types in wide variety of units in SPDT and DPDT.



POWER

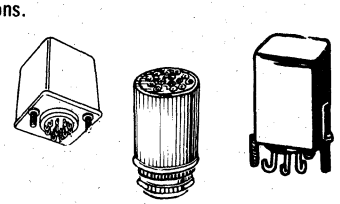
Open frame and sealed types up to 30 amps in all voltage ratings.





HERMETICALLY SEALED

Standard and special types with solder lug or plug-in headers in almost all configurations.



Universal RELAYS

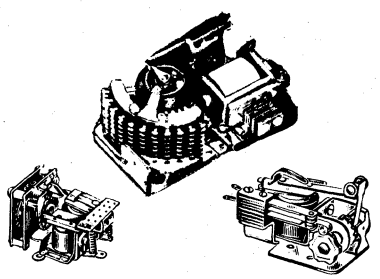
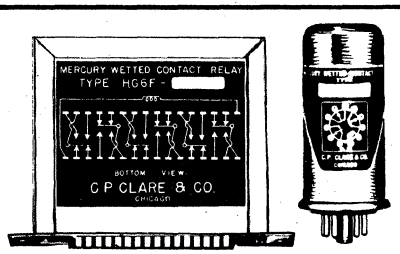
TWX No. 710-581-4461



STEPPING and IMPULSE

An almost unlimited variety of standard and special types in all rated voltages up to 22 levels—up to 50 positions.

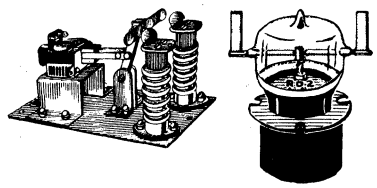


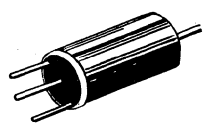
MERCURY WETTED

High speed, hermetically sealed relays, capable of a billion operations without failure. Up to 6 PDT in plug-in, solder lug and printed circuit types both polarized and non-polarized in all voltage ratings.

HIGH VOLTAGE and VACUUM

A wide variety of both vacuum and open frame types up to 60 KV in single and multiple pole types.



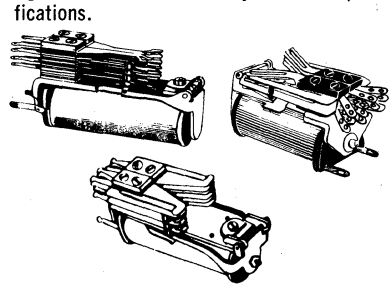


REED

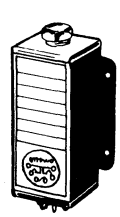
An almost unlimited variety of standard and special types in single and multiple arrangements at all rated voltages.

TELEPHONE

Versatile, multi-pole relays in all popular styles and every voltage and contact configuration. Made to industry standard specifications.



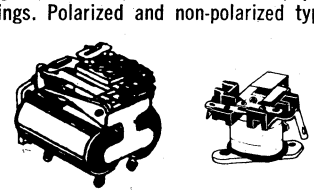
SOLID STATE and OTHER TIMING DEVICES



Timers with accurate repeat cycle mechanism. Available in single and multiple contact configurations with ranges from milliseconds to 15 minutes and more.

SENSITIVE TYPES

Single and multipole units in all popular ratings. Polarized and non-polarized types.



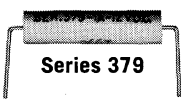
MANY OTHER TYPES IN STOCK

Latching • Thermal • Choppers • Snap-Action Switches

THE Wheelock FAMILY OF REED RELAYS

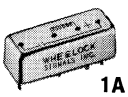
ULTRA-MINIATURE REED RELAYS

Series 372



Series 379

- Occupies only 0.02 cu. in.
- Operates on only 50 mw of power
- Operate time 300 microseconds (typical)
- Insulation resistance as high as 1 x $10^{14}\Omega$
- Contacts rated at a full 7 watts



1A

Series 442

- Smallest Multi-Pole Relays in Industry
- Occupies 0.055 cu. in. per pole
- Operates on 90 mw
- P.C. board mount
- Contacts rated at full 7 watts

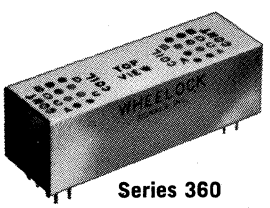
MICRO-MINIATURE REED RELAYS

- Contact rating: 10W, 500 ma
- Coil voltages: 6, 12 or 24 VDC
- Insulation resistance: 5 x $10^{10}\Omega$

PRINTED CIRCUIT BOARD MODEL

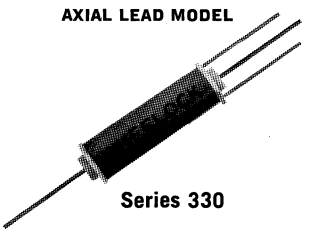
Series 3421

HIGH DENSITY MODEL



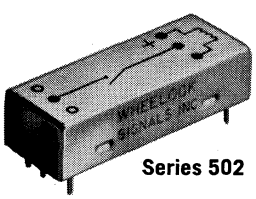
Series 360

AXIAL LEAD MODEL



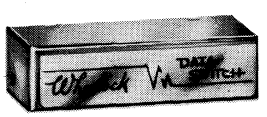
Series 330

MINIATURE REED RELAYS



Series 502

- All contact configurations available
- Coil voltages: 6-48 VDC
- Contact rating: 10 watts
- Standard 1″ grid spacing



Series 262

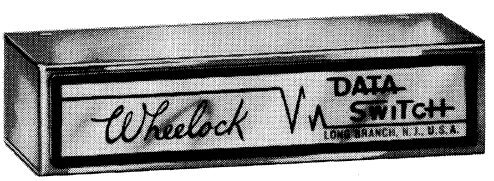
- Contact arrangements, single pole to 6 pole models
- Coil voltages: 6 to 48 VDC
- Coil ratings: 125 to 600 mw
- Contact rating: 10W

STANDARD REED RELAYS

- Coil ratings: 200 to 1500 mw
- Contact ratings to 50W
- Operating time: 2.5 ms (typical)
- Coil voltages: 6 to 120 VDC

MERCURY WETTED REED RELAYS

- Contacts: 1 to 5 pole
- Coil ratings: 200 mw for 1 pole, to 1500 mw for 5 poles
- Coil voltages: 6 to 120 VDC
- Contact rating: 3 amp up to 50W



Series 3002 & Series 3002 Hg

Wheelock

For complete details on how Wheelock can help solve problems involving space, weight and environmental limitations, write for the NEW Wheelock Reed Relay Catalog. It features the latest test data on reed relay life and reliability, dynamic characteristics and static characteristics.

RELAYS FOR AEROSPACE & INDUSTRIAL APPLICATION

This series of crystal case relays is produced with meticulous care under controlled conditions. The relays are designed to meet advanced circuit requirements of high-density packaging and printed circuit boards, and feature a balanced, rotary type armature to provide maximum immunity to severe shock, vibration and acceleration forces.

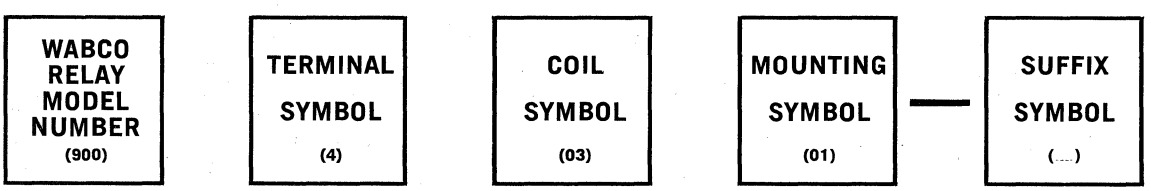
All relays meet or exceed the rigorous requirements of MIL-R-5757. Temperature ratings — from −65 degrees C to +125 degrees C. Vibration — 20 G from 10 to 2000 cps. Shock — 50 G for 11 milliseconds. Life expectancy — 100,000 operations at maximum rated loads. Special dry circuit misstest available for all relays upon request.

The following tables list only a few of the most popular combinations of relays, mountings, header terminals, coils and contact ratings that are available. Inquiries concerning specific applications and special requirements are welcomed. See the Representative listing in this catalog or write our Pittsburgh office directly.

HOW TO ORDER

CRYSTAL CASE RELAYS

As a convenience to our customers, a catalog numbering system has been incorporated in this brochure to permit the selection of the proper relay for a specific application. The Catalog Number consists of five parts as referenced in the diagram below. The first three-digit Symbol always is used initially in the Catalog Number to identify WABCO Model Number. Explanation of the remaining parts is contained as follows:



Citing Catalog Number 90040301 as an example, it can be determined that the ordering number is constructed in the following manner:

Symbol 900 indicates the Model 900 One-Sixth Size Crystal Case SPDT Relay.

The Terminal Symbol 4 refers to the type of terminals used in this specific relay. As described on Model 900 Relay Section, under header terminals, Symbol 4 denotes a terminal header with half-inch leads.

Coil Symbol 03 denotes a 2000-ohm coil for 20 to 30 volts D.C. operation. Information pertaining to this reference is found within the Coil Performance Table.

Symbol 01 refers to the mounting arrangement for this particular relay, and this information is found in Model 900 Relay Section, under mounting styles. The Symbol 01 mounting style features a relay without mounting brackets for direct application to printed circuit boards.

Space is reserved at the end of the Catalog Number for a two-digit Suffix Symbol. If the standard dry circuit miss-test is required, Symbol 01 should be added as a suffix. Catalog Number 90040301-01 is the relay described above with a dry circuit miss-test applied.

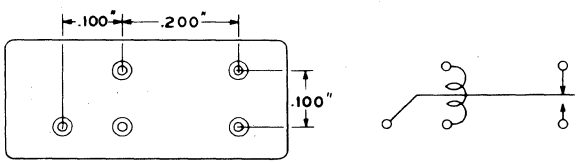
WABCO

MODEL 900—ONE SIXTH SIZE CRYSTAL CASE RELAY SPDT

- Meets or exceeds MIL-R-5757D.
- Ideally suited for high density packaging.
- Volume is less than 0.050 cubic inch.
- The 0.1 inch grid-spaced terminals make it ideal fo use in standard P.C. boads.
- Low power requirement.
- Heavy magnetic structure.
- Rugged reliability and operating characteristics.
- Designed for application in aircraft, missiles, spacecaft or ship-board or ground-support equipment.

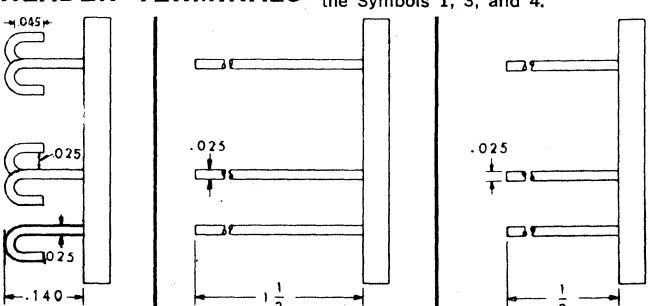
CIRCUIT DIAGRAM

The Model 900 One-Sixth Size Crystal Case SPDT Relay features a 0.1-inch grid-spaced terminal configuration which ideally permits its use in standard printed circuit boards utilized by the aerospace and electronics industries.



HEADER TERMINALS

Terminal types are identified by the Symbols 1, 3, and 4.



Symbol 1
Hook-type solder terminals

Symbol 3
1½-inch leads

Symbol 4
Half-inch leads

SPECIFICATIONS

GENERAL DATA

Description — A hermetically sealed rotary type microminiature general purpose relay which meets the requirements of MIL-R-5757D
Weight — 0.15 ounce maximum
Terminals — Solder-hook, half-inch leads, and 1½-inch leads
Mountings — A variety of standard mountings is available. See Section C
Contacts — SPDT-Form C (break before make)

ELECTRICAL DATA

Coil voltage — 26.5 volts D.C. nominal with 2000-ohm coil. See Coil Performance Table for additional coil voltages
Contact resistance — 0.05 ohm maximum at rated current, 0.1 ohm after life tests at rated current
Contact ratings — Low level dry circuit loads up to a maximum of 1.0 ampere, 26.5 volts D.C. resistive load
Dielectric strength — 500 volts RMS at 60 Hz (sea level), and 300 volts RMS at 70,000 feet
Operate time — 4 milliseconds maximum including bounce at rated coil voltage and 25°C
Release time — 4 milliseconds maximum including bounce at rated coil voltage and 25°C
Insulation resistance — Coil to case 500 megohms minimum. All other points 1000 megohms minimum

ENVIRONMENTAL DATA

Temperature rating — 65°C to +125°C
Vibration — 0.1" D.A. or 20G peak from 10 to 2000 Hz
Shock — 50G for 11 milliseconds
Life — 100,000 operations at maximum rated load

COIL PERFORMANCE TABLE

Coil Symbol	01	02	03	04	05
Rated Voltage	6	12	26.5	48	76

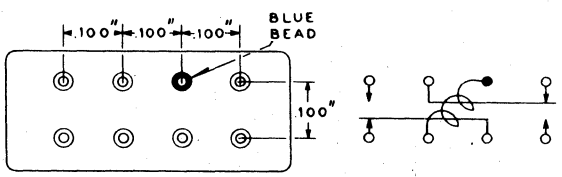
MODEL 901—ONE SIXTH SIZE CRYSTAL CASE RELAY 2PDT

- Meets or exceeds MIL-R-5757D and MIL-R-5757/19 and MIL-5757/30. Refer to latest issue of QPL5757.

CIRCUIT DIAGRAM

The Model 901 One-Sixth Size Crystal Case 2PDT Relay features a 0.1-inch grid-spaced terminal configuration which ideally permits its use in standard printed circuit boards utilized by the aerospace and electronics industries.



SPECIFICATIONS

GENERAL DATA

Description — A hermetically sealed rotary type microminiature general purpose relay which meets the requirements of MIL-R-5757D, and MIL-R-5757/19
Weight — 0.15 ounce maximum
Terminals — Solder-hook, half-inch leads, and 1½-inch leads
Mountings — A variety of standard mountings is available. See Section C
Contacts — 2PDT — Form C (break before make)

ELECTRICAL DATA

Coil voltage — 26.5 volts D.C. nominal with 1500-ohm coil (See Coil Performance Table for additional coil voltages)
Contact resistance — 0.05 ohm maximum at rated current, 0.1 ohm after life test at rated current
Contact ratings — Low level dry circuit loads up to a maximum of 1.0 ampere, 26.5 volts D.C. resistive load
Dielectric strength — 350 volts RMS at 60 Hz across open contacts, 500 volts RMS all other points at sea level; 300 volts RMS all points at 70,000 feet
Operate time — 4 milliseconds maximum including bounce at rated coil voltage and 25°C
Release time — 4 milliseconds maximum including bounce at rated coil voltage and 25°C
Insulation resistance — Coil to case 500 megohms minimum. All other points 1000 megohms minimum

ENVIRONMENTAL DATA

Temperature rating — —65°C to +125°C
Vibration — 0.1" D.A. or 20G peak from 10 to 2000 Hz
Shock — 50G for 11 milliseconds
Life — 150,000 operations at maximum rated load

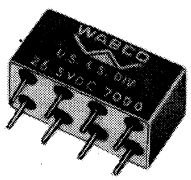
WABCO

MODEL 902—HALF SIZE CRYSTAL CASE RELAY 2PDT



- Small size, fast response, reliable and efficient operation.
- For use in aircraft, guided missiles, spacecraft, shipboard and ground support equipment.
- One-half height and weight of standard crystal case relay.
- Ideally suited for P.C. board application.
- The 0.2 inch grid-paced header permits interchangeability with standard crystal case.
- Can be mounted in a variety of positions without affecting operational performance.
- Designed to MIL-R-5757.

CIRCUIT DIAGRAM

The Model 902 General Purpose Half-Size Crystal Case Relay features a 0.2-inch grid-spaced terminal configuration which ideally permits its use in standard printed circuit boards utilized by the aerospace and electronics industries.

MODEL 903—CRYSTAL CASE RELAY 2PDT

- Meets or exceeds MIL-R-5757D and MIL-R-5757/10. Refer to latest issue of QPL-5757.
- Designed to meet advanced circuitry requirements.
- Features the "S" type header.
- Ideally suited for use in control and data handling systems, missiles, aircraft, space vehicles, and shipboard and ground support equipment.
- Many combinations of mountings, header terminals, coils for use with low and high level switching.

GENERAL DATA

Description — Hermetically sealed General Purpose Crystal Case rotary-type relay with "S" type header designed to meet the requirements of MIL-5757D and MIL-R-5757/10

Weight — 0.6 ounce maximum
Terminals — Solder-hook, plug-in, and three-inch leads
Mountings — Various for "S" type
Contacts — 2PDT Form C (break before make)

ELECTRICAL DATA

Coil voltage — Standard operating voltages and coil resistances listed in Coil Performance Table

Contact resistance — 0.05 ohm maximum at rated load, 0.1 ohm maximum after life
Contact ratings — Low level dry circuit loads up to a maximum of 2 amperes, 28 volts D.C. resistive load
Dielectric strength — (At sea level) 1000 volts RMS except 500 volts RMS from coil to case and across open contacts
Operate time — 6 milliseconds maximum, including bounce, at rated coil voltage and 25°C (increases slightly for high resistance coils)
Release time — 6 milliseconds maximum, including bounce, at rated coil voltage and 25°C
Insulation resistance — Coil to case 500 megohms minimum. All other points 1000 megohms minimum

ENVIRONMENTAL DATA

Temperature rating — —65°C to +125°C
Vibration — 0.1" D.A. or 20G peak from 10 to 2000 Hz
Shock — 50G for 11 milliseconds
Life — 100,000 operations at maximum rated loads

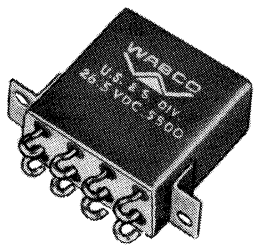
MODEL 904—CRYSTAL CASE RELAY 2PDT

(Same as Model 903, except 0.2-inch grid space header)



GENERAL DATA

Description — Hermetically sealed General Purpose Crystal Case rotary-type relay with 0.2-inch grid-spaced header designed to meet the requirements of MIL-R-5757D and MIL-R-5757/10
MIL-R-5757D and MIL-R-5757/10
Weight — 0.6 ounce maximum
Terminals — Solder-hook, plug-in, and three-inch leads
Mountings — Various for 0.2-inch grid-spaced header
Contacts — 2PDT Form C (break before make)

ELECTRICAL DATA

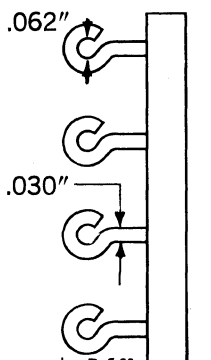
Coil voltage — Standard operating voltages and coil resistances listed in Coil Performance Table
Contact resistance — 0.05 ohm maximum at rated load, 0.1 ohm maximum after life
Contact ratings — Low level dry circuit loads up to a maximum of 2 amperes, 28 volts D.C. resistive load
Dielectric strength — (At sea level) 1000 volts RMS except 500 volts RMS from coil to case and across open contacts
Operate time — 6 milliseconds maximum, including bounce, at rated coil voltage and 25°C (increases slightly for high resistance coils)
Release time — 6 milliseconds maximum, including bounce, at rated coil voltage and 25°C
Insulation resistance — Coil to case 500 megohms minimum. All other points 1000 megohms minimum

ENVIRONMENTAL DATA

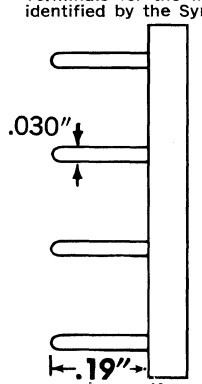
Temperature rating — —65°C to +125°C
Vibration — 0.1" D.A. or 20G peak from 10 to 2000 Hz
Shock — 50G for 11 milliseconds
Life — 100,000 operations at maximum rated loads

HEADER TERMINALS

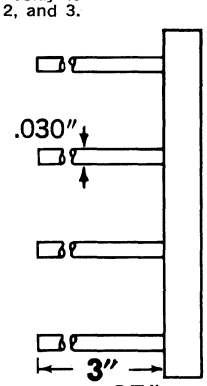
Terminals for the Model 904 relay is identified by the Symbols 1, 2, and 3.



Symbol 1
Hook-type solder terminals



Symbol 2
Plug-in terminals



Symbol 3
Three-inch leads

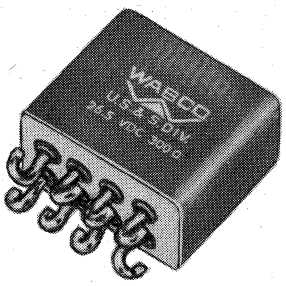
MODEL 925 2PDT-10 AMPERE CRYSTAL CASE RELAYS



- Small size and light weight
- For Aircraft, Missiles, Space Vehicles, Shipboard and Ground Support Equipment
- Ideally suited for Aircraft and Missile Power Control Systems
- Many mountings, operating voltages and terminals available

GENERAL DATA

Description — A 2PDT, 10 Ampere, hermetically sealed general purpose rotary crystal case relay
Weight — 1.28 ounces, maximum
Terminals — Solder-lug and plug-in types
Mountings — A variety of standard mountings available
Contacts — 2PDT, Form C (break before make)

ELECTRICAL DATA

Coil Voltage — See Coil Performance Table for standard operating voltages and coil resistances
Contact Rating — 10 amperes resistive, 6 amperes inductive, 3 amperes motor, or 2 amperes lamp load at 28 vdc or 115 vac/400 Hz, single phase
Dielectric Strength — 1250 v RMS at sea level, 350 v RMS at 80,000 feet
Operate Time — 0.010 seconds maximum
Release Time — 0.010 seconds maximum
Contact Bounce Time — 0.005 seconds maximum (normally closed contacts)
0.002 seconds maximum (normally open contacts)
Insulation Resistance — 1000 megohms minimum; coil-to-case, 500 megohms minimum

ENVIRONMENTAL DATA

Temperature Rating — —70°C to +125°C
Vibration — 0.1" D.A. or 20G from 10 to 2000 Hz
Shock — 50G
Life — 100,000 operations minimum at rated loads except 20,000 operations minimum at rated inductive load

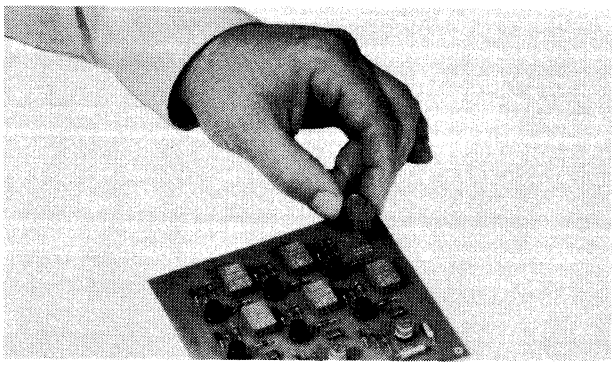
MODEL 910 SPDT — MODEL 911 DPDT FLAT-PACK RELAY



LOW PROFILE SPDT AND DPDT HERMETICALLY SEALED

ROTARY ARMATURE TYPE RELAYS FOR DIRECT PC BOARD MOUNTING

ALLOW PC BOARDS TO BE SPACED CLOSER TOGETHER
¼" maximum relay height

REDUCES COST OF RELAY ASSEMBLY TO PC BOARD
Self-mounted when plugged directly into PC Board holes and solder dipped
No free leads to fish through PC Board holes
No additional mounting bracket screws or rivets required

IMPROVED RELIABILITY
No exposed flexible leads extending from Relay to PC Board
Rigid ¼" length x .025 dia. terminals

TRIED AND PROVEN RELAYS WHICH MEET MIL-R-5757D
Utilizes the Proven WABCO ⅛ size Crystal Case Relays which meet MIL-R-5757/19

AVAILABLE IN SPDT MODEL 910 RELAY OR DPDT MODEL 911 RELAY

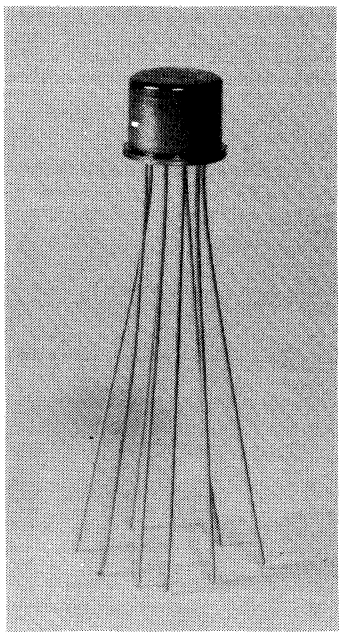
MODEL 914 TRANSISTOR TO-5 RELAYS DPDT



- Transistor TO-5 type enclosure
- All welded construction
- Hermetically sealed
- Contacts — gold plated for dry circuit requirements.
- Capable of withstanding high shock and vibration.

SPECIFICATIONS

PHYSICAL

Weight — 0.1 ounce
Enclosure — Hermetically sealed. All welded.
Case Material — Nickel Silver
Mounting Style — No mount — for printed circuit boards.
Terminals — 1.5 inch leads.
Contact Arrangement — DPDT-(2 Form C).

ENVIRONMENTAL

Temperature Range — 65°C to +125°C.
Vibration — 30G to 3,000 Hz.
Shock — 80Gs for 11 milliseconds.
Terminal Strength — 1 lb pull in any direction.

ELECTRICAL

Operating Voltages — 6, 9, 12, 18, 26.5 (See coil operating characteristics.)
Pull-in Sensitivity — 130 MW max.
Contact Rating — 1.0 Amp. at 28V DC Resistive Load.
Contact Life — 1,000,000 operations at low level.
100,000 operations at rated load.
100 operations at 2.0 amp.

CONTACT RESISTANCE

0.1 ohm max before life.
0.2 ohm max after life at max rated current (measured 1/8" from header).
Operate Time — 2.0 Milliseconds max. at rated coil voltage.
Release Time — 1.5 Milliseconds max.
Contact Bounce — 1.5 Milliseconds max.

INSULATION RESISTANCE

5,000 megohms min. between mutually insulated terminals.

DIELECTRIC STRENGTH

500 V RMS 60Hz at sea level; 125 V RMS 60Hz at 70,000 feet.

ORDERING INFORMATION

For a 26.5 V relay with 1.5 inch leads for printed circuit board use order 91430301. For other coil voltages see Coil Operating Characteristics Table.

WABCO

MINIATURE RELAYS

WABCO miniature relays, as manufactured by Aerospace Department of Westinghouse Air Brake Company, are rugged, hermetically sealed rotary type balanced armature relays designed to meet or exceed the requirements of MIL-R-5757 and MSFC-SPEC-333. Temperature rating — from −65°C to +125°C for both a-c and d-c relays. Vibration — 20G from 10 to 2000 Hz. Shock — 50G for 11 milliseconds. Life — 100,000 operations at rated loads. Sockets for plug-in relays are available on request. Special dry circuit miss-test available for all relays on request.

TWO TYPES OF RELAYS H, J

GENERAL DESCRIPTION

(General purpose & Sensitive in ½" Longer Case)

The WABCO Miniature Relay is a rugged relay featuring exceptionally sturdy terminals and husky contacts for high current applications. It is designed to meet the rigid requirements of MIL-R-5757D. The rugged qualities of this relay permit its use in airborne and guided missile electronic equipment and similar vital applications where efficient and reliable operation under extreme environmental conditions is mandatory. Although the Type H Relay operates basically on D.C., operation on A.C., when required, is provided by the incorporation of rectifiers within the relay.

A balanced, rotary-type armature is used to provide maximum immunity to severe shock, vibration and acceleration forces. Glass-coated cylindrical contact actuators attached to the rotary armature assure square mating of the contact surfaces. The WABCO Type H Relay is the smallest 4PDT, 10-Ampere rotary-type relay currently available. It occupies no more space than the popular WABCO 6PDT, 2-Ampere miniature relays.

The special techniques employed in manufacturing the complete line of reliable WABCO A.C. and D.C. miniature relays are utilized to produce the new Type H Relay in large quantities.

This precision relay is designed to meet or exceed the requirements of MIL-R-5757D and MSFC-339.

Prominent among the design features in the Type J Relay is the use of inorganic materials in the contact chamber, a new mechanical damping mechanism to maintain a minimum of contact bounce, and a new contact structure to insure miss-free operation at low level or high level contact loads. This relay is physically interchangeable with the well-known WABCO Type M 6PDT Relay which has been used extensively by the aerospace and electronics industries for many years.

The Aerospace Department of Westinghouse Air Brake Company welcomes customer inquiries concerning specific applications and special requirements.

ORDERING INFORMATION

The catalog numbering system incorporated in this brochure will enable our customers to select the proper WABCO Type H Relay for their particular application with relative ease. A sample catalog number is referenced in the diagram below to illustrate the method of building such numbers. Symbol "H" is always used as the first character in the catalog number to identify the WABCO Type H 4PDT, 10-Ampere Miniature Relay. Explanation of the remaining parts is contained as follows:

WABCO RELAY SYMBOL	COIL INDICATOR	MOUNTING STYLE	CONTACT IDENTIFICATION	FORM "C" CONTACTS	HEADER TERMINAL
H	35	H	K	4	H

Citing Catalog Number H35HK4H as an example, it can be determined that the catalog number is constructed in the following manner:

Letter "H," as stated above, immediately identifies the WABCO Type H Relay.

The number "35" is a Coil Indicator and information pertaining to this reference will be found in the Coil Resistance Table I. Within Coil Resistance Table I, it is stated that this relay will operate over a range of 20 to 30 volts with a nominal coil resistance of 200 ohms. Other pertinent performance data are also found in Table I.

The second letter "H" refers to the Mounting Style for this particular relay. The H-type mounting features a 2-hole mounting flange at the terminal end of the relay.

The letter "K" refers to the Contact Type. It denotes contacts for resistive loads up to ten amperes to 26.5 volts D.C.

The number "4" indicates the number of Form C (break-before-make) contacts.

The final letter "H" indicates the terminal type as described by item, header terminal. The "H" denotes a hook-type terminal for solder connections.

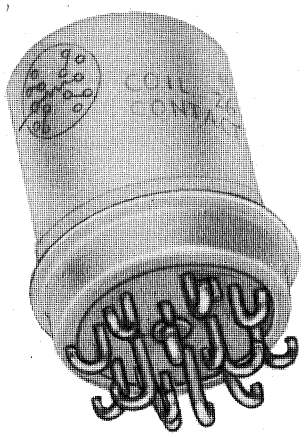
TYPE H 4PDT MINIATURE RELAY 4 POLE 10 AMP

The new WABCO Type 4PDT, 10-Ampere Miniature Relay is a rugged relay featuring exceptionally sturdy terminals and husky contacts for high current applications. It is designed to meet the rigid requirements of MIL-R-5757D and MSFC 339. The rugged qualities of this relay permit its use in airborne and guided missile electronic equipment and similar vital applications where efficient and reliable operation under extreme environmental conditions is mandatory. Although the Type H Relay operates basically on D.C., operation on A.C., when required, is provided by the incorporation of rectifiers within the relay.

A balanced, rotary-type armature is used to provide maximum immunity to severe shock, vibration and acceleration forces. Glass-coated cylindrical contact actuators attached to the rotary armature assure square mating of the contact surfaces. The WABCO Type H relay is the smallest 4PDT, 10-Ampere rotary-type relay currently available. It occupies no more space than the popular WABCO 6PDT, 2-Ampere miniature relays.

The special techniques employed in manufacturing the complete line of reliable Aerospace Department A.C. and D.C. miniature relays are utilized to produce the new Type H relay in large quantities. Aerospace Department of Westinghouse Air Brake Company welcomes customer inquiries concerning applications and special requirements.



COIL PERFORMANCE TABLE

The A.C. operated Type H relay is made in the long case only and is identified by the Coil Indicator "A.C." It incorporates a full-wave silicon rectifier circuit for the —65°C to +125°C temperature range.

Operating Voltage	115 volts A.C., 60 to 400 Hz	
Operating Current	.025	
Maximum Pick-up Volts	at 25°C	75 volts
	at 85°C	93 volts
	at 125°C	104 volts
Maximum Drop-out Volts	at 25°C	54 volts
	at 85°C	67 volts
	at 125°C	75 volts
Minimum Drop-out Volts	at 25°C	9 volts
	at 85°C	11 volts
	at 125°C	12 volts
Operating Time	25 milliseconds nominal pick-up and 50 milliseconds nominal drop-out	

SPECIFICATIONS

GENERAL DATA

Description — A hermetically sealed miniature rotary-type relay designed to meet the requirements of MIL-R-5757D and MSFC 339.

Weight — 3.75 ozs. in the standard case; 5.0 ozs in the long case

Terminals — Solder lug

Mountings — Various flange mountings available

ELECTRICAL DATA

Coil voltage — Voltage range, coil resistance, pick-up voltage, drop-out voltage and other data shown in Coil Performance Table I for standard case D.C. relays' Table II for long case D.C. relays, and Table III for A.C. relays. **Maximum contact voltage drop** — 175 millivolts

Contact ratings — 10 amperes, 26.5 volts, D.C. resistive load

Contact bounce — 2.0 milliseconds maximum

Dielectric strength — 1000 volts rms at all points

Operate time — 17 milliseconds maximum pick-up time and 7 milliseconds maximum drop-out time at 26.5 volts and 25°C for 26.5 volt, 200-ohm coil D.C. relays. Operating time increases for higher coil resistances

Insulation resistance — 1000 megohms minimum at 500 volts D.C.

ENVIRONMENTAL DATA

Temperature rating — —65°C to +125°C

Vibration — 20G to 2000 Hz

Shock — 50G

Life — 100,000 operations at rated load

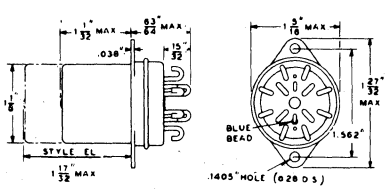
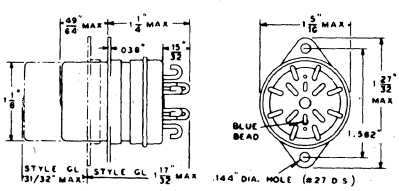
MOUNTING STYLES

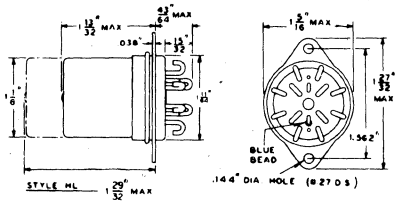
The Mounting Style references are identified by the letters E, G, H, T, and P. To indicate long case mounting styles, the letter 'L' is added to each of the listed letters.



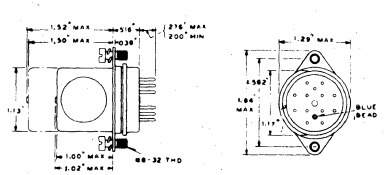
E — Body flange mount



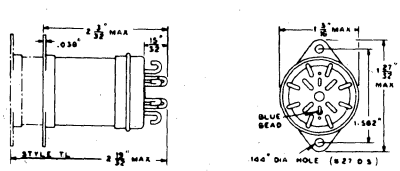
G — Center-of-gravity flange mount



H — Header flange mount



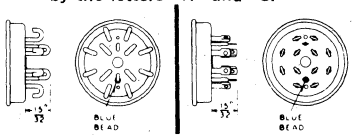
P — Plug-in



T — Top flange mount

HEADER TERMINALS

Terminal types are identified by the letters "H" and "S."



CONTACT IDENTIFICATION

The contact identification for the 10-ampere, 26.5 volts D.C. resistive load contacts is designated by the letter "K."

NUMBER OF FORM C CONTACTS

This relay has a 4-pole, double-throw contact arrangement which is identified by the number "4" in the catalog number.

WESTINGHOUSE AIR BRAKE COMPANY
AEROSPACE DEPARTMENT
Swissvale Post Office, Pittsburgh, Pa. 15218

WABCO

TYPE J 6PDT MINIATURE RELAY 6 POLE AC & DC

The Aerospace Department of Westinghouse Air Brake Company announces the Type J 6PDT Miniature Relay, a highly reliable miniature relay. This precision relay is designed to meet or exceed the requirements of MIL-R-5757D and MSFC-339.

Prominent among the design features in the Type J Relay is the use of inorganic materials in the contact chamber, a mechanical damping mechanism to maintain a minimum of contact bounce, and a contact structure to insure miss-free operation at low level or high level contact loads. This relay is physically interchangeable with the well-known WABCO Type M 6PDT Relay which is in use extensively by the aerospace and electronics industries.

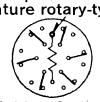
SPECIFICATIONS

A.C. AND D.C. TYPE J MINIATURE RELAYS

GENERAL DATA

Description — A hermetically sealed, miniature rotary-type relay, designed to meet the requirements of MIL-R-5757D and MSFC-339.



Contact arrangement —

Weight — 3.75 ounces — standard case
5.00 ounces — long case

Terminals — Solder-hook or plug-in

Finish — Tin Plate over Cadmium Plate

Sockets — Information on sockets for the plug-in mounting can be found on the next page

ELECTRICAL DATA

Voltage range, coil resistance, pick-up voltage, drop-out voltage, and other data are shown in Tables I or II.

Contact ratings — See Contact Identification

Contact bounce — 2.0 milliseconds standard, consult factory for other available limits

Dielectric strength — 1000 volts RMS except across open contacts
750 volts RMS across open contacts

Insulation resistance — 1000 megohms minimum, all points

Operate and release time — D.C. Relays — 17 milliseconds maximum operate time and 7 milliseconds maximum release time at rated voltage and 25°C for 26.5-volt and 200-ohm relay. Operate and release times increase for higher coil resistances.
A.C. Relays — 115 volts A.C. relays, operate time 25 milliseconds maximum, release time 50 milliseconds maximum at 115 volts A.C. and 25°C

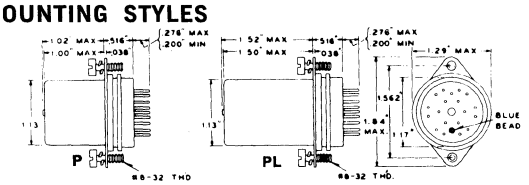
Temperature rating — All Type J Relays are rated at —65°C to 125°C (MIL-R-5757D — Class B)

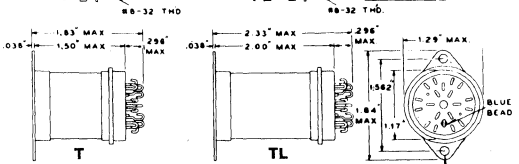
Vibration — Mounting Styles E, H, and G recommended for 10 to 2000 Hz at .06" D.A. or 20G (MIL-R-5757D — Symbol 4). All other mountings rated at 10 to 2000 Hz at .06" D.A. or 15G (MIL-R-5757D — Symbol 3)

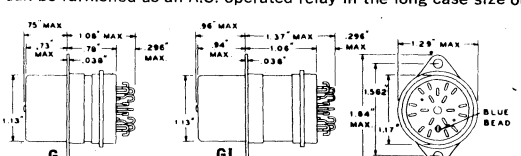
Shock — 50G — 11 milliseconds (MIL-R-5757D — Symbol 3)

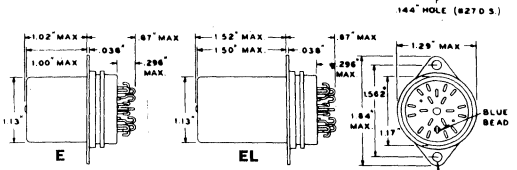
A.C. Relays — The Type J Relay can be furnished as an A.C. operated relay in the long case size only

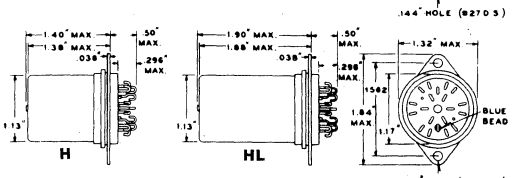
MOUNTING STYLES





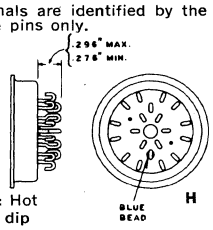




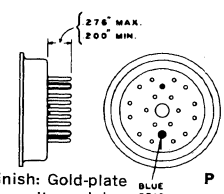


HEADER TERMINALS

Terminals are identified by the letters H or P. The finish shown is on the pins only.



Finish: Hot solder dip



Finish: Gold-plate over silver plate

NUMBER OF FORM C CONTACTS

The number 6 shown in this location indicates the number of form C contacts in the standard Type J relay.

CONTACT IDENTIFICATION

P — 100,000 operations — low level to 5.0 amperes, 26.5 volts D.C. resistive load. 2.5 ampere maximum 26.5 volts D.C. inductive load.

D — "P" contacts with a 5000 operation miss-test performed at a low level load. Standard level is 16 millivolts open-circuit voltage with 8 microamperes short-circuit current. Reject point 750 ohms per contact.

H — "P" contacts with a 5000 operation miss-test performed at a high-level load. Standard load is 0.5 ampere at 28 volts with reject point at 2 ohms plus 0.03 ohm per contact.

NOTE: The mountings shown are for standard relays. Other mounting styles and variations to these standards are available. Consult factory for additional information.

WABCO RELAY SOCKETS

SOCKETS FOR J PLUG-IN RELAYS

WABCO miniature relays can be supplied as plug-in units with mating sockets. All general specification information referenced previously and coil resistance variations can be incorporated in the plug-in relay.

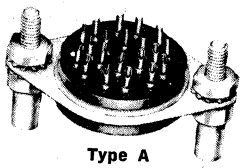
The insertion of the letter "P" or "PL" as the mounting catalog indicator in the catalog number designates a plug-in relay.

The mating sockets are available in two types of insulation material and terminals for top or bottom chassis mounting.

SOCKET TYPE A

Specification

Molded asbestos filled melamine insulation material, gold plated contacts and solder pot terminals as shown.

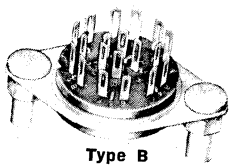


Type A

SOCKET TYPE B

Specification

Mica filled phenol formaldehyde insulation material, gold plated contacts and pierced terminals as shown.

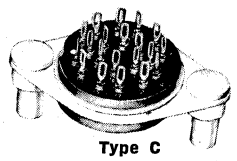


Type B

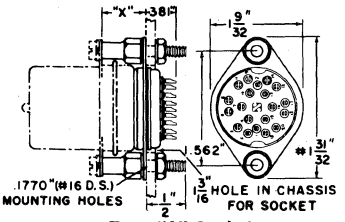
SOCKET TYPE C

Specification

Molded asbestos filled melamine insulation material, gold plated contacts and eyelet terminals as shown.

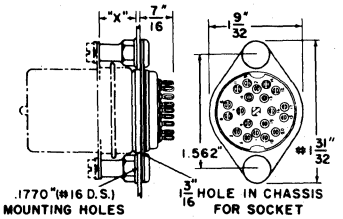


Type C



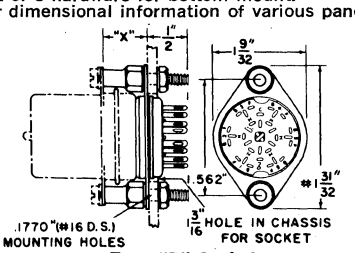
Type "A" Socket

with class 1 hardware for top mount on any size panel.



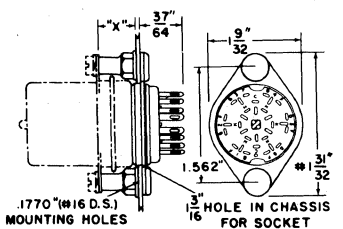
Type "C" Socket

with class 2 or 3 hardware for bottom mount.
See table for dimensional information of various panel thicknesses.



Type "B" Socket

with class 1 hardware for top mount on any size panel.



Type "B" Socket

with class 2 or 3 hardware for bottom mount.
See table for dimensional information of various panel thicknesses.

* Denotes maximum dimension.

DIMENSIONAL TABLE

Hardware Class	X dimension	Panel Thickness
1	1 1/16"	1/16" to 1/4"
2	9/16"	1/16" to 7/64"
3	1/2"	1/8" to 5/32"

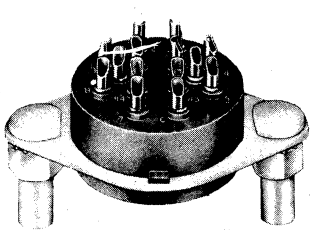
Socket catalog ordering information is as follows:

WABCO Socket Symbol	Contact Form	Socket Type	Hardware Class
S	6-6PDT	Type A, B or C	1, 2 or 3 as shown above

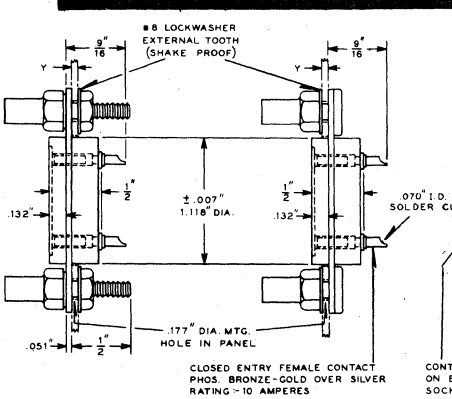
Example: S6A2 — WABCO socket 6PDT Melamine insulation material, solder pot terminals, bottom mount on 1/16" to 7/64" chassis.

SOCKETS FOR H PLUG-IN RELAYS

A socket for use with the Plug-in relay is available from AirBorn Connectors Division, 2618 Manana Drive, Dallas, Texas 75220. These sockets are available with the mounting hardware classes shown below.



Ordering Reference From AirBorn Connectors Div.	Panel Mounting Location	Panel Thickness Dim. Y
CRB12-2SA1	Top	1/64 to 1/4
CRB12-2SA2	Bottom	1/16 to 7/64
CRB12-2SA3	Bottom	1/8 to 5/32



Type A Socket
Top mount

Type A Socket
Bottom mount

Amperex Resistors LINEAR NON-LINEAR

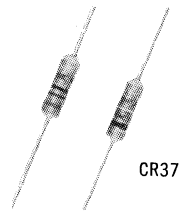
CARBON FILM

These resistors offer high stability, low noise and long life. For applications requiring steady low power drop. Accuracy and consistency are relatively unaffected by adverse climatic conditions. Range from 1Ω to 10M. Pure carbon or nickel film deposited on a high grade ceramic body.

	1/10W	1/4W	1/2W
P_{nom} $T_A \leq 70°C$	0.1W	0.25W	0.5W
Max. voltage AC or DC	150V	250V	350V
Permissible RMS applied for 1 sec. across insulation	300V	500V	700V
Insulation resistance	10^4MΩ	10^4MΩ	10^6MΩ

Amb. temp. (all types) **−55 to + 155°C**

Style	Range	Tolerance (±)
CR16 (1/10W)	10Ω to 220k	5%
	270k to 1M	10%
CR25 (1/4W)	1Ω to 3.9Ω	10%
	4.3Ω to 1M	5%
	10Ω to 1M	2%
	1.2M to 10M	10%
CR37 (1/2W)	1Ω to 10M	10%
	4.3Ω to 1M	5%
	10Ω to 1M	2%



CARBON POTENTIOMETER

Reliable trimmers, despite small size and low cost, for tube or transistorized PCs. Consist of annular carbon track riveted to base plate of resin bonded paper. Screw driver slot or plastic knob for readjustment. Available in seven mechanical types.

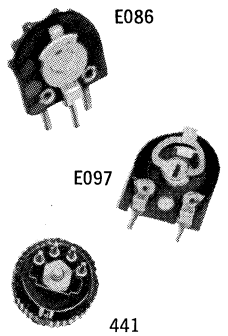
Dimensions

Type	Length	Width	Depth
E097	0.787	0.709	0.177
E086	0.394	0.394	0.150
	Diameter		**Depth**
440	.488 ± .002		.205 ± .008

Type E086: Linear Resistance Range: 100Ω to 1M ±20%: 13 ranges
Effective angle of rotation ..... 240 ±5°
Maximum permissible power dissipation (of total resistance) at an ambient temperature of 40°C 0.1W
Permissible ambient temperature range ..... −30° to +70°C

Type E097: Linear Resistance Range: 100Ω to 4.7M ±20%: 15 ranges
Effective angle of rotation ..... 220 ±5°
Maximum permissible power dissipation (of total resistance) at ambient temperature of 40°C 0.25W
Permissible ambient temperature range ..... −30° to +70°C

Type 440: Linear Resistance Range: 4700Ω, 10KΩ, 22KΩ, ±20%
Nominal resistance values 4.7K, 10K, 22K
Resistance law ..... linear and logarithmic
Working temperature range ..... −10° to +70°C
Life expectancy ..... in excess of 15,000 cycles
(Available with ON-OFF switch as Type 441)

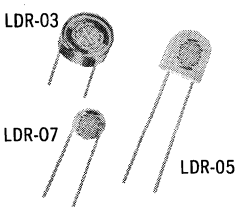


LIGHT DEPENDENT

LDRs, made from cadmium sulfide, are semiconductors whose conductivity increases when irradiated by wave lengths within a certain range of the spectrum. Made in specific versions with relevant electrical characteristics for control, counting, measuring, alarm and switching applications.

Type	Description	Diameter (")	Thickness (")
LDR-03	Makrolon case and epoxy resin	0.55 ± 0.196	0.35 ± 0.06
LDR-05	Plastic case and epoxy resin	0.43 ± 0.006	0.14 ± 0.004
LDR-07	Lacquered protective coating	0.34 ± 0.16	0.071 ± 0.002

Applications: Auto Parking & Headlight Dimmers, TV Brightness Control, Exposure Meters, Flame Control in Oil Burners, Magnetic Tape Controls, etc.

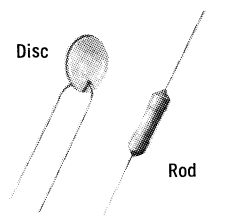


VOLTAGE DEPENDENT

Most important property is the non-linearity between their resistance and the applied voltage. Voltage dependency is due to contact resistance between the silicon carbide crystals. Crystal contacts form a network of series and parallel resistors which determine the electrical characteristics.

Available Types
Disc types available: 0.8W to 3W
Rod types available: 0.7W

Applications
VDRs can be used in spark suppression and contact-protection applications, as well as in series with a resistor for voltage stabilization. Although the stabilizing circuit with a VDR cannot compete with more elaborate circuits, it has vital advantages of simplicity and small space adaptability.

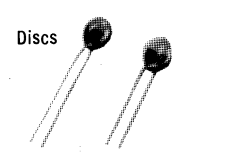


POSITIVE TEMPERATURE COEFFICIENT THERMISTORS

PTC Thermistors increase in resistance as the temperature increases. PTCs are disc shaped with connecting leads and are lacquer coated for protection against atmospheric influences.

Available Types
Standard Discs 1W 40 to 50V series
Standard Discs 0.5W 25V series

Applications
Resistance changes of 10%/°C or better permit the use of PTCs wherever any of the following factors are decisive: ambient temperature; dissipated power; inertia of PTC and positive temperature coefficient.



NEGATIVE TEMPERATURE COEFFICIENT THERMISTORS

NTC thermistors are resistors which exhibit a high negative temperature coefficient of resistivity. They are made of semiconducting oxidic materials. The resistance of the oxides decreases rapidly when the temperature rises.

Available Types
Rod Type
Disc Type
Miniature Bead Type
Special Types for Automobiles
Special Types for Radio and TV

Applications
Resistance changes of 3% to 6% per °C permit the use of NTCs in applications such as: ambient temperature measurement and control; resistance determined by dissipation and time delays.

SPEER RELIABLE FIXED COMPOSITION RESISTORS

- Complete line of ¼, ½, 1 and 2 watt composition resistors that meet or exceed all of the requirements specified by MIL-R-11 and RS 172.
- Established Reliability style RCR 07 and RCR 20 and RCR 32 resistors per MIL-R-39008.
- Integration of core and insulating shell into a uniform solid structure.
- Lead wire design that provides tight anchorage within the resistor core.
- Heavy coating of 100% pure tin on lead wires for superior soldering characteristics even after extended storage.
- Weldable ETP copper leads.
- Operation at full wattage rating at 70°C without derating.
- Prompt delivery—usually from stock.

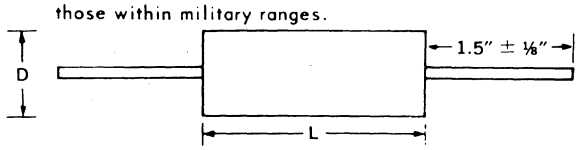
JEFFERS JXP PRECISION METAL FILM RESISTORS

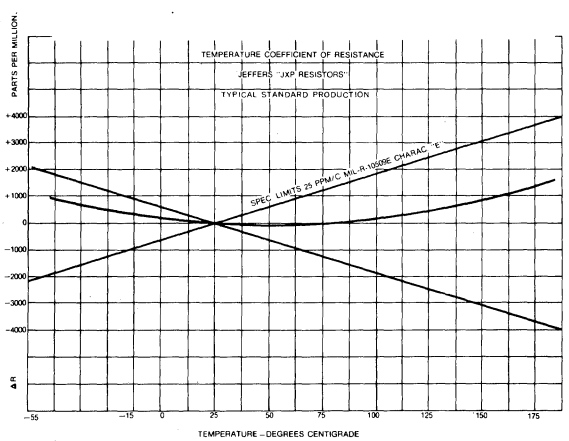
All JXP resistors meet or exceed the requirements for Characteristic E (± 25 ppm/°C) metal film resistors as set forth in MIL-R-10509.
Resistors of any resistance value within the ranges specified in the accompanying table are available for short time delivery. The resistance ranges specified for the commercial listings below are extended beyond standard military ranges. Performance within these ranges, however, is considered to be equivalent to those within military ranges.



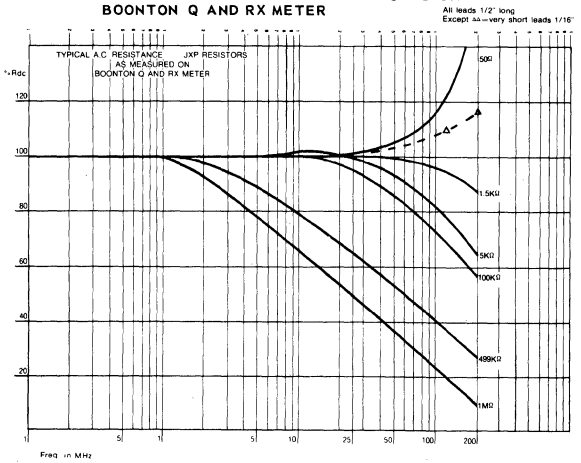
Wattage at 125°C	Military		Commercial		Length A Max.	Diameter B Max.	Axial Lead # Size
	Style	Range	Style	Range			
1/10	RN55E	49.9Ω - 100K	JXP55	25Ω - 150K*	0.260	0.115	#22 AWG
1/8	RN60E	49.9Ω - 499K	JXP60	35Ω - 500K*	0.400	0.136	#22 AWG
1/4	RN65E	49.9Ω - 1M	JXP65	30Ω - 1.5M*	0.590	0.210	#22 AWG
1/2	RN70E	49.9Ω - 1M	JXP70	35Ω - 2.0M*	0.730	0.250	#20 AWG

Special tolerances to ±0.02%. Standard TC: 0 ± 25 ppm/°C (−55°C + 175C). Special TC's to ±5 ppm°C over limited temperature spans.
*Extended ranges may be supplied on special order.
Standard lead material is 100% tin coated low oxygen content copper with a non-borated gold interface.
Other lead materials can be supplied as special order items.

TEMPERATURE COEFFICIENT OF RESISTANCE FOR TYPICAL STANDARD PRODUCTION JXP RESISTORS



TYPICAL A.C. RESISTANCE AS MEASURED ON BOONTON Q AND RX METER



Airco Speer capability as a leading producer of low temperature coefficient, precision resistors is derived from significant proprietary advances in metal film technology and the establishment of a manufacturing facility and product philosophy that is devoted exclusively to production of only the highest grade of precision resistors. This concentration of effort has eliminated the necessary compromises in equipment and processes and reduced the diversion of skills which would otherwise be necessary for the accommodation of a multi-grade product line.

In other words, Airco Speer makes all its parts to a T C of 25 **ppm** or less. It does not "sort" to find production lots which will hopefully contain a large percentage of 25 **ppm** units.

This product plan has resulted in some important contributions to quality and economical precision resistor manufacture. For example:

All operations in the manufacture of JXP precision resistors are carried out under qualified white room conditions, an important factor in statistical reliability.

Shortest delivery available for precision resistors is a natural result of the efficiencies of a manufacturing operation that deals with only one grade of product.

In addition to manufacturing facilities, Airco Speer has complete environmental test facilities, instrument calibration and certified measurement ability for precision resistor evaluation.

You can order standard or custom-tailored JXPs, matched sets —even networks and packaged assemblies. Write:

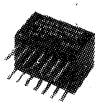
ANGSTROHM PRECISION LADDER NETWORKS

Angstrohm offers a complete product line of standard Ladder Network circuits and encasements designed to accommodate a broad field of applications.

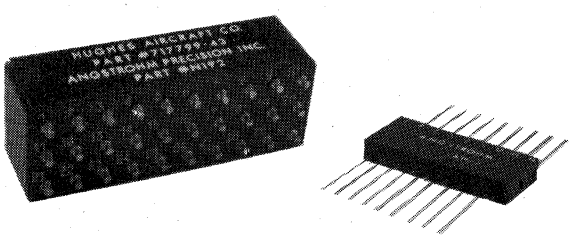
Circuits: R-2R type binary voltage ladders
R-2R type binary current ladders
Current summing networks
4-2-2-1 and 8-4-2-1 type BCD ladders
Related dividers within the same case

Encasements: LB series, molded flatpacks 1/10" thick
LN series, molded flatpacks 3/16" thick
QV series, encapsulated modules—for minimal circuit board space consumption
QH series, low profile encapsulated modules

• Discrete, Monolithic, and Hybrid construction • Standard and interchangeable techniques • Optimized designs for requirements of precision, stability, reliability, cost, and quantity.



Accuracy to ±.005% and ±1 ppm/°C tracking Manned Space, Mil, Industrial applications.



ANGSTROHM PRECISION METAL FILM RESISTORS

C series

Conformally coated epoxy insulated.

Manufactured to exceed the requirements of MIL-R-10509 and MIL-R-55182.

Style	MIL-R-10509	MIL-R-55182	Power 75°C	Rating 125°C	Resistance Range		Max. Dia.	Max. Length
					Standard	Extended		
C50	RN50	RNR50	1/8 w	1/20 w	49.9Ω-100K	10Ω-200K	.078	.170

C60	RN60	RNR60	5/16 w	1/8 w	49.9Ω-499K	10Ω-1.0 meg	.145	.430
C65	RN65	RNR65	1/2 w	1/4 w	49.9Ω-1.0 meg	1.0Ω-3.0 meg	.190	.605

FEATURES:

- Power ratings 1/20 watt to 1/2 watt at 125°C
- Resistance ranges 1.0Ω to 2 megohms
- Resistance tolerances ±1% to ±.05%
- Temp. coeff. from ±10 ppm/°C to ±100 ppm/°C
- Stability levels of ±.5% max. change at 2,000 hrs. load life. Available to ±.25%/yr. load life stability spec.
- Military grade moisture protection
- Leads: tinned copper, gold dumet, nickel, others as specified. All leads per Mil Std. 1276.
- Full conformance to NASA traceability specification NPC 200-3

SPECIAL FEATURES: Specific 100% acceptance testing and lot sampling tests are often applied to C series resistors to verify conformance to customer specifications and/or military specifications.

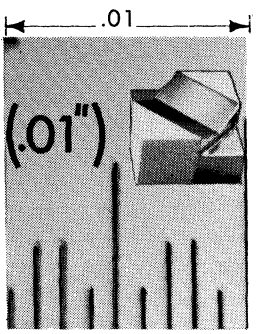
RC Networks

STATE OF THE ART RESISTANCE-CAPACITANCE (RC) NETWORKS

- Conventional size and micro-miniature networks for aerospace, military and computer applications.
- Precision matched for: Filters, Twin T Filter Networks, Loss pass RF Filters, Time Constant Charging Circuits, etc.
- Special form factor resistors to track and match capacitors within ±10 ppm/°C over the temperature range of −55°C to ±125°C.

V series

TYPE V2 — FLIP-TRIM FIXED OR ADJUSTABLE METAL FILM CHIP RESISTOR.



Available either as a fixed or adjustable resistor without moving parts. Flip-Trim (Pat. Pend.) may be supplied factory adjusted or user adjusted before or after installation to up to five times its base value.

CHARACTERISTICS:

- Size: .040" x .040" x .020"
- Ranges available from 10Ω to 4600Ω
- Factory or user adjusted to .02%
- Temperature coefficients to 25 ppm/°C
- Temperature range from −55°C to +175°C
- Power rating is 25 milliwatts at 125°C
- Mounting and electrical connection by means of solder pads on bottom surface.

APPLICATIONS INCLUDE:

- Miniature discrete trimmer chip resistor
- Integrated circuits
- Precision hybrid chip

ANGSTROHM PRECISION MOLDED METAL FILM RESISTORS

S series:

Manufactured to exceed the requirements of MIL-R-55182, specification for established reliability fixed film precision resistors. Their most usual applications are in space equipments and high-reliability weapons, navigational and data systems.

Capabilities and Features:

- 100% acceptance tested (minimum standard process)
  - Short time overload at 6¼ times the 125°C rated power for 5 seconds at 25°C. Maximum ΔR allowed is ±.1% (MIL-R-10509 allows ±.25%).
  - Burn-in 3 hours at 4 times the 125°C rated power at 25°C. Maximum ΔR allowed is ±.1%.
- Vacuum transfer molded epoxy cases
- Operating stabilities to 100 ppm/yr
- Resistance tolerances down to ±.02%
- Resistance values from 1.0Ω to 5.0 megohms
- Temperature coefficient tolerances to ±5 ppm/°C
- Specific nominal temperature coefficients other than zero may be specified
- Matched sets to ±.01% and ±1 ppm/°C tracking
- Traceable factory serialization and data documentation
- 100% acceptance testing for load life, temperature cycling, thermal shock, X-ray, microscopic visual inspection, etc.
- Minimum standard Lot Quality Assurance in accordance with MIL-R-55182 monthly, quarterly and semi-annual requirements for level R (.01%) failure rate; (proved better than .002%)
- Full conformance to NASA specification NPC 200-3
- Choice of weldable and/or solderable leads

Style	MIL-R 55182	Power Rating 75°C	Power Rating 125°C	Resistance Range Standard	Resistance Range Extended	Max. Diameter	Max. Body Length

J series:

- Qualified for manned space flight applications. Qualification and 10,000 hrs life tested by NASA Contractor's Laboratories.
- Provides 100% Contractor's yield to Reliability Screening tests
- Individually traceable Serial Numbered parts and test data; data shipped with parts.

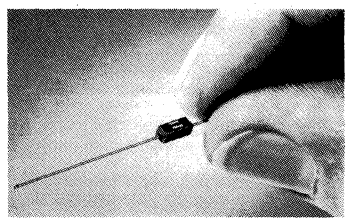
J SERIES resistors are basically the S series product with the concept of 100% reliability screening extended to include several and combined full rated and overstress tests, and unit traceable documentation. Tests include Short Time Overload, Six hours Burn-in, Temperature Cycling, 168 hours Load Life, Temperature Coefficient, and Microscopic Visual Inspection. Refer to J series detail bulletin.

- Sizes and Power Ratings: same as available in S series
- Resistance Values: 5.0Ω to 5.0 megohms, refer to detail catalog
- Resistance Tolerances (after testing): ±1%, ±.5%, ±.25%, and ±.1%
- Temperature Coefficients: from ±100 ppm/°C to ±5 ppm/°C.

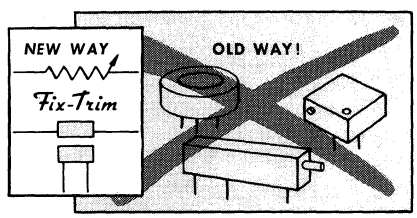
Fix-Trim™... the ONE-for-MANY RESISTOR

for Development or Production

• Adjustable • Subminiature • Molded

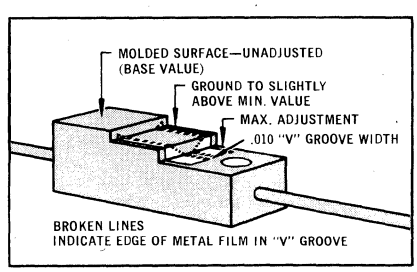


Unequalled flexibility. Metal Film stability. Unique internal construction.



Fix-Trims can replace trimming pots, and are ideal for *precision* hybrid circuits. Each Fix-Trim provides wide range adjustability. Only 3 base ranges are needed to replace 96 fixed resistor 1% values or 192 .25% standard values per decade.

Simple, easy adjustment even in active circuits—with infinite resolution, and accuracies to ±0.02%.



Above: Grinding removes molded top surface first; then portions of "V" groove resistance element from high alumina substrate, increasing length: width ratio —and resistance value proportionately. Epoxy mold material covering remainder of metal film element provides mechanical and environmental protection, which may be improved by overcoating or potting.

Meet MIL-R-55182 & 10509 performance requirements. Base ranges cover 10Ω to 50,000Ω. .05 Watt at 125°C. Size .090" x .085" x .200" with 1" leads. Temp. coefficient 100, 50 and 25 ppm/°C. Weight .25 grams. Un-molded, leadless, solderable Fix-Trim "chip" elements and molded radial lead Fix-Trims are also available.

Fix-Trim "Starter Kits," laboratory and production adjusting systems now available.

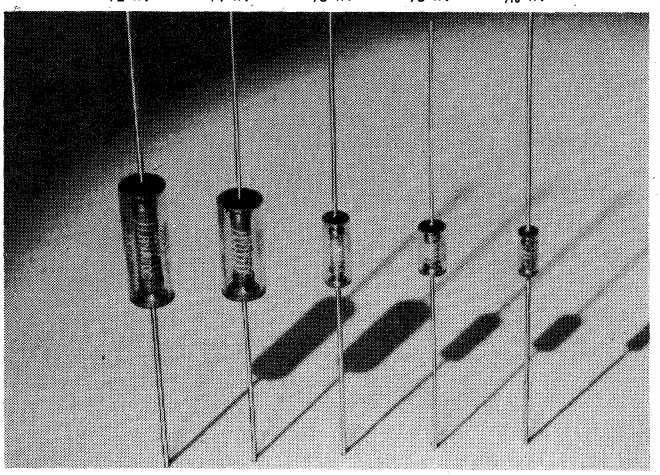
WARD LEONARD ELECTRONIC COMPONENTS

HERMETIC SEAL METAL FILM RESISTORS per MIL-R-55182

WLH70 RNR70 ½ w. | WLH65 RNR65 ¼ w. | WLH60 RNR60 ⅛ w. | WLH57 RNR57 ⅛ w. | WLH55 RNR55 1/10 w.



Features

- Hermetic enclosure
- Inert gas environment
- To MIL-R-55182 specs, styles RNR and RNN
- Ultimate in extended life and reliability
- 1/10, ⅛, ¼, ½ watt sizes (5 case sizes)

For today's sophisticated aerospace, military and oceanography programs ... wherever the application or environment demands the ultimate in resistor reliability, Ward Leonard's hermetically sealed metal film resistors are unquestionably first-choice. The WLH glass-to-metal hermetic seal protects the resistance element from virtually any adverse environmental influence.

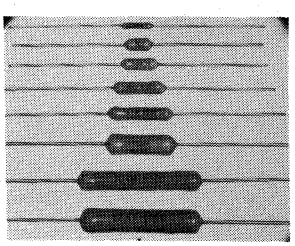
POWER RESISTORS

Wire-Wound Enamel and Silicone Coated

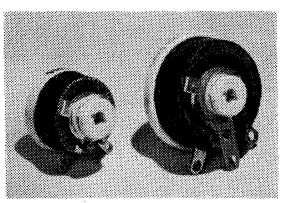


- Fixed, adjustable and non-inductive styles
- Axial lead 1 to 12.5 w.
- Tab Type 5 to 550 w.
- Wide ohmic range
- Broad selection of terminals, mountings and enclosures

Ward Leonard offers an extensive line of power resistors for MIL and industrial use both stock and made-to-order. High quality ceramic cores, vitreous enamel or silicone protective coatings and low TC resistance wire afford high stability and overload capacity. Axial lead MIL-R-26 resistors to 14 w.; tab terminal to 210 w. Send for RESISTOR catalog.

POWER RHEOSTATS

Features



- **Vitreous enamel bonded**
- **Molded high density ceramic base and ring**
- **Uniform resistance winding**
- **12.5 to 300 w. in six sizes**
- **Designed to MIL-R-22 specs**

Ward Leonard's top quality vitreous enamel wire-wound power rheostats belong in your specs for ground support and test equipment, process controls and a broad variety of electronic and industrial uses ... when performance must be reliable. Stocked in over 39 popular resistance values, they are available with a broad selection of accessories and special features. Short delivery cycle on manufactured items. Write for catalog.

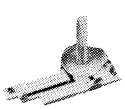
POTENTIOMETER-RESISTOR NETWORK

670 SERIES



A potentiometer-resistor network for high voltage circuits where an adjustable pick-off is desired.

Resistance Range:
R1—1-50 Megohms
R2—1-30 Megohms
R3—1-25 Megohms
R4—1-10 Megohms

Standard Resistance Tolerance: ±30%

Minimum Resistance Tolerance:
R1, R3 & R4—±10%
R2 —±25%

Max. Voltage Rating—8000 V

Power Rating—3 watts @ 55°C

Mfg. at Elkhart

HIGH VOLTAGE RESISTOR

680 SERIES

High resistance, high voltage Cermide resistor available with and without taps. It is designed for bleeder resistor, voltage divider networks and other high voltage applications.

Resistance Range:
20K Ohms to 1,000 Megohms

Standard Resistance Tolerance—±30%

Minimum Resistance Tolerance—±10%

Max. Voltage Rating—30,000 V

Power Rating—3.5 watts @ 55°C

Mfg. at Elkhart

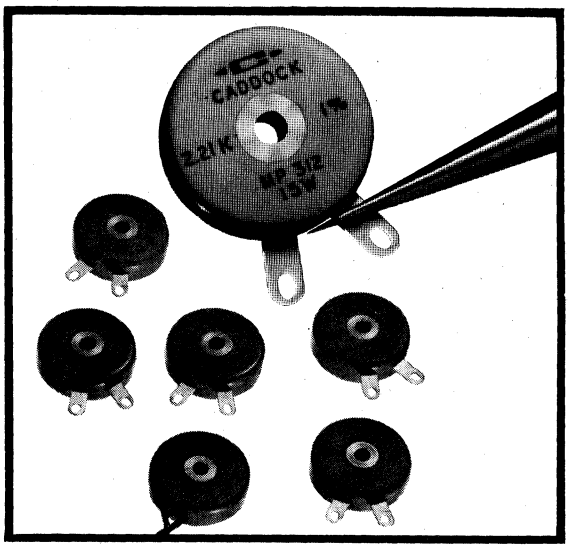
NEW TYPE MP POWER FILM RESISTORS*
CHASSIS MOUNTED



Features: High Stability Micronox Film Element ■ Non-Inductive ■ Higher Resistance Range ■ Lower Cost ■ Low Profile—Smaller Size—Lighter Weight

Micronox film is fired on high strength ceramic substrate; then mounted on anodized aluminum base. This construction gives vastly improved efficiency in heat transfer from resistor element to chassis. Molded silicone encases the electrical elements for high environmental performance.

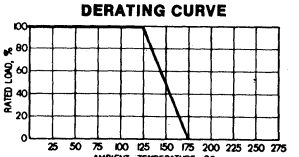
R shift .2%, or .5Ω, whichever is greater. **Vibration:** Per Mil Std 202, Method 204, test condition B, max. R shift .2% or .5Ω, whichever is greater. **Loadlife:** 1000 hrs., per Mil R 18546-D, chassis mounted, max. R shift 1% or .5Ω, whichever is greater.

NEW TYPE MC PRECISION CHIP RESISTORS
(10Ω to 7.5 Megohm) for Hybrid Circuit Application

DERATING CURVE



Now the precision and stability of discrete Micronox film components is available for hybrid circuit application. Film is fired on alumina substrate. Terminations are gold alloy, suitable for gold ball bonding (thermo-compression or ultrasonic) and for aluminum wire bonding (ultrasonic). MC625 can be tinned for solder reflow connections. Back side of chip is metalized with gold alloy for ultrasonic bonding or soldering to header or substrate.

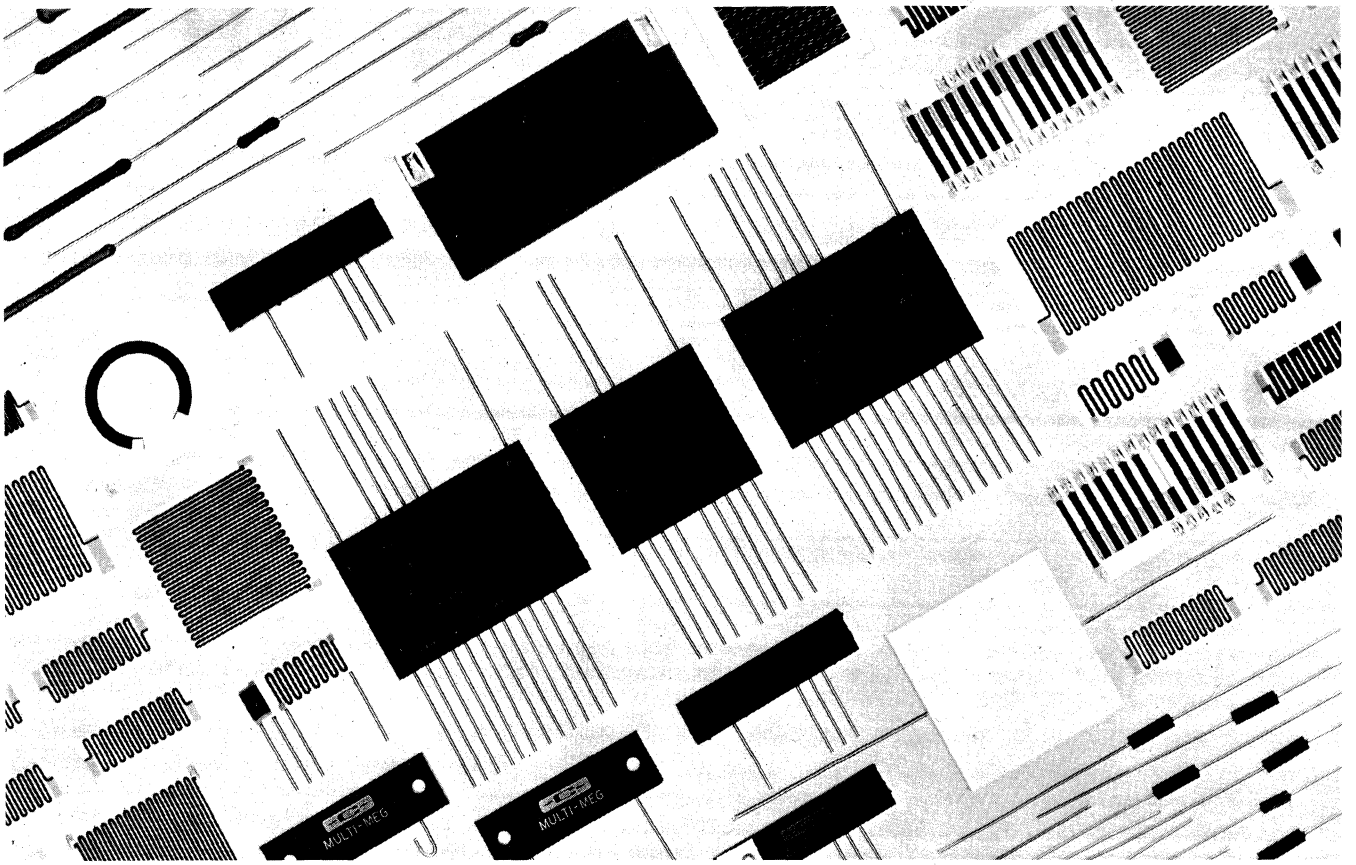
Coefficient Referenced to 25°C, ΔR at —15°C and +105°C. **Resistance Tolerance:** ±1% standard (other tolerances available on special order). **Insulation Resistance:** 10,000Meg (dry, 100V) **Temperature Cycling:** Mil Std 202, Method 102, Test Condition C, max. R shift .5%, or .5Ω whichever is greater. **Overload:** 5x rated power for 5 seconds, max. R shift .5%, or .5Ω, whichever is greater. **Over Voltage:** 1.5x max. voltage for 5 seconds, max. R shift .5% or .5Ω whichever is greater. **Loadlife:** 1000 hrs. at rated power, max. R shift .5%, or.5Ω, whichever is greater.

CADDOCK ELECTRONICS

3127 Chicago Avenue, Riverside, California 92507 • Telephone: (714) 683-5361

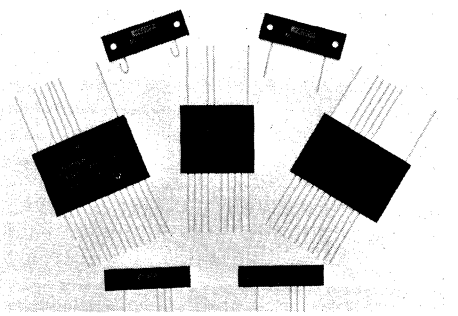


SPECIAL RESISTIVE DEVICES

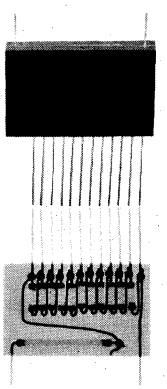
Caddock produces miniature wirewound and film resistors, as well as networks on ceramic substrate. We can combine the best of these techniques in producing your special resistor or network requirement.

- **HIGH RESISTANCE RESISTORS to 5000 megs, 1%, 80 PPM/°C**
- **PRECISION VOLTAGE DIVIDERS with tracking as close as 2 PPM/°C**
- **DAC LADDER NETWORKS to 12 bits, and DECADE NETWORKS to your specs**

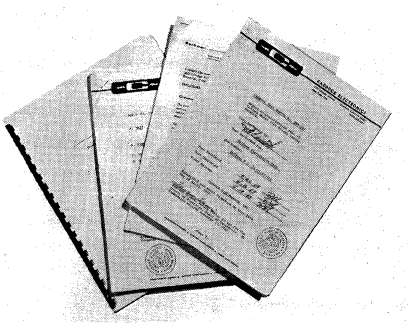
Send us prints or sketches on your specific requirement for a prompt design and cost proposal.



MOLDING FACILITIES equipped to produce your package design, or mold your networks in available package configurations.



X-RAY FACILITIES available to verify and assure integrity and soundness of package—up to 100% inspection.



TESTING FACILITIES to supply output and performance data under actual operating temperature extremes. Qualifying test data available to satisfy qualification requirement on similar devices.

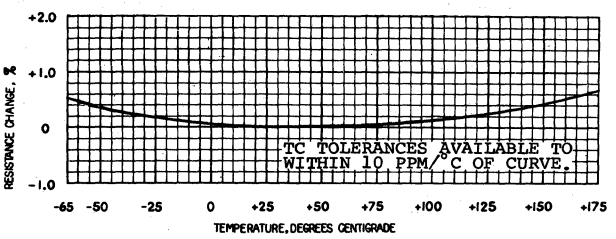
CADDOCK ADVANCED STATE OF THE ART

MICRONOX* Resistance Films

Micronox resistance films are produced exclusively by Caddock Electronics. They are composed of complex oxides fired in air at temperatures above 1400°F. The resulting films are relatively insensitive to high ambient temperatures and thermal shock. Precision resistors, useable to 1000°F. can be made with these films. The films show negligible effect from moisture.

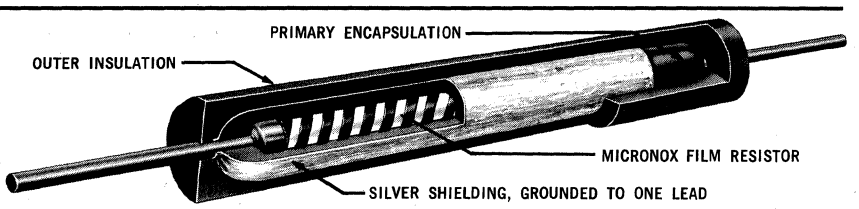
This totally new approach to precision resistors and networks opens new design possibilities because of the wide resistance range, precise temperature characteristics, and high temperature and power capability. Temperature coefficient can be accurately reproduced (±10ppm/°C. if required). The typical curve shown will vary slightly with resistivity of the film and configuration of the substrate.

Micronox oxide systems provide an almost continuous range of resistivity from 5 ohms per square to 25,000 ohms per square, without degradation of electrical characteristics throughout this range.

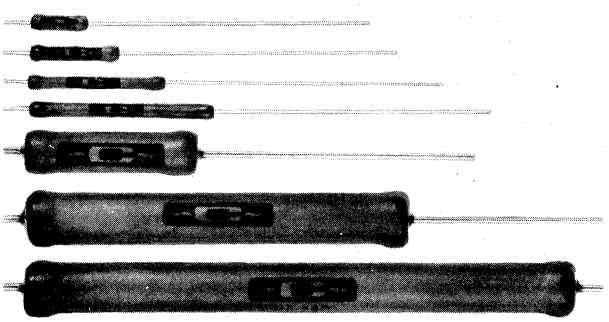


TYPE MG & MH Miniature Megohm Resistors

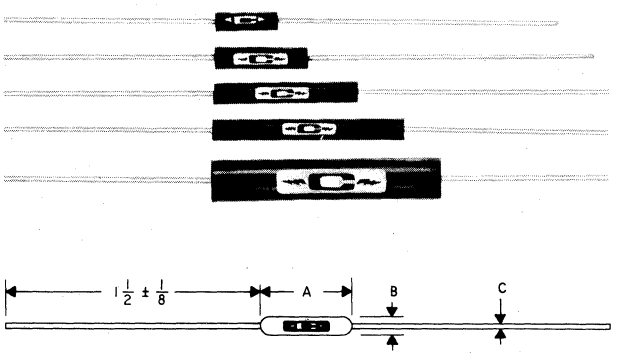
EXCLUSIVE SHIELDED RESISTOR MODEL MH711, designed for extremely high voltage applications, in very high resistance strings. Unit remains exceptionally stable since shielding prevents film degradation from corona developed in high voltage fields.



TYPE MG



TYPE MH



Miniaturized to one-fifth the size of conventional types, covering the 1 to 220 megohm range. Micronox film sintered on high strength core. End cap construction.

Resistance Tolerance: ±1% (tolerances to .2% on special order). **Insulation Resistance:** 100 megohms, minimum. **Overvoltage:** 1.5 times working voltage for 5 seconds, R shift .8% max. **Thermal Shock:** MIL-STD-202, method 107, cond. C, R shift .5% max. **Moisture Resistance:** MIL-STD-202, method 106, R shift .8% max. **Loadlife:** 1000 hours at rated power, R shift .8% max.

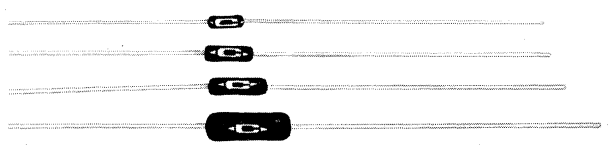
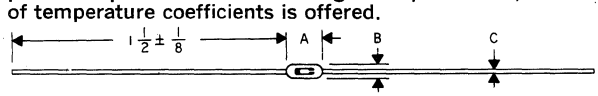
TYPE MR & MS Power Film Resistors



Micronox film on high strength core. End cap construction. Featuring smallest size for given power ratings. Specially designed with a wide range of resistance values for high temperature operation. For less stringent requirements, a choice of temperature coefficients is offered.



Resistance Tolerance: ±1% (tolerances to .1% on special order). **Insulation Resistance:** 100 megohms, minimum. **Overload:** 5 times rated power for 5 seconds, R shift .5% max., or .5 ohms max., whichever is greater. **Overvoltage:** 1.5 times max. voltage for 5 seconds, R shift .5% max., or .5 ohms max., whichever is greater. **Thermal Shock:** MIL-STD-202, method 107, cond. C, R shift .5% max., or .5 ohms max., whichever is greater. **Moisture Resistance:** MIL-STD-202, method 106, R shift .5% max., or .5 ohms max., whichever is greater. **Loadlife:** 1000 hours at rated power, R shift .5% max., or .5 ohms max., whichever is greater.

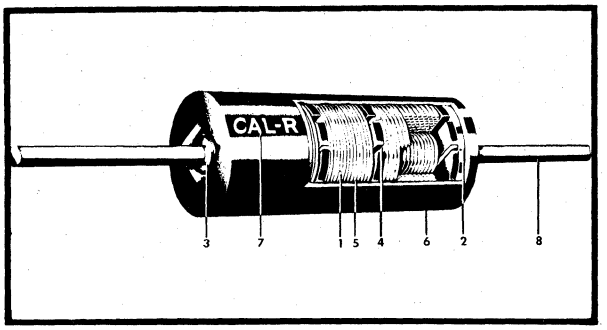
CADDOCK ELECTRONICS
3127 Chicago Avenue, Riverside, California 92507 • Telephone: (714) 683-5361

CAL-R, INC.

CALIFORNIA RESISTOR DIVISION

CAL–R Precision Wire Wound Resistors are manufactured to the most exacting specifications insuring compliance with the stringent requirements of both military and commercial applications. All **CAL–R** resistor products are produced using unique proprietary methods of construction resulting in highly reliable performance characteristics. Selections can be made from standard and customized miniature wire wound bobbin styles, silicone coated axial lead power and deep finned metal clad chassis mount power resistors as well as precision resistor networks.

wire wound bobbin resistors – miniature



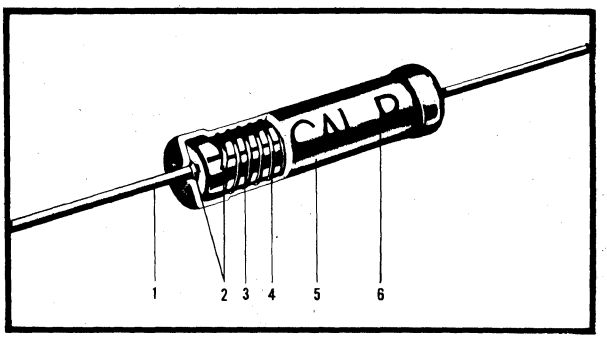
OUTSTANDING FEATURES

1. All pies filled for maximum heat dissipation.
2. Unique recessed end cap designed to isolate winding termination from all lead stress.
3. Terminals welded to end cap for maximum strength.
4. Double slots tangent to mandrel to prevent shorting between pie windings.
5. Protective overcoating covering entire resistor before molding.
6. Resistor element encased in non-burning epoxy by transfer molding techniques.
7. Marking ink of catalyzed epoxy will withstand all standard printed circuit board solvents.
8. Standard lead . . . 50 micro inch gold plate over annealed Dumet.

ELECTRICAL CHARACTERISTICS

- **Tolerance:** 1 to 0.005% absolute. To 0.002% matching tolerance for matched sets.
- **Temperature Coefficient:** 10 ppm/°C is standard. Special TC's in ranges from +6000ppm to 2ppm/°C available.
- **Windings:** Multiple pie reversed type to minimized inductance.
- **Resistance:** Ranges .1 ohm to 10 megohms.
- **Environmental:** Meets or exceeds all requirements of MIL-R-93D.

precision power resistors



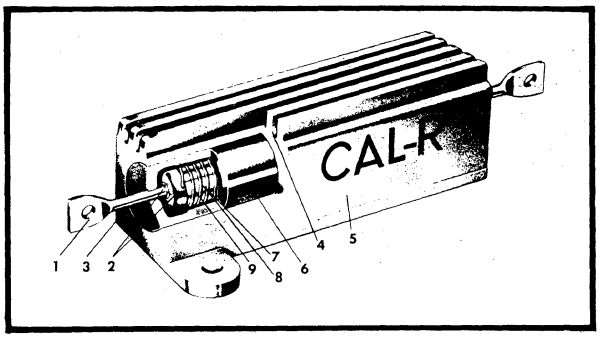
OUTSTANDING FEATURES

1. Tinned copperweld leads are standard. Nickel A or Alloy 180 available.
2. Completely welded construction . . . terminal to terminal.
3. Core alumina and steatite ceramics, centerless ground for uniformity, chemically treated for utmost purity of winding surface.
4. Resistance wire . . . procured to exacting specifications.
5. Tough silicone coating to give maximum wire protection and extra high resistance to moisture.
6. Marking ink of catalyzed epoxy will withstand most printed circuit solvents.

ELECTRICAL CHARACTERISTICS

- **Tolerances:** 5.0% to .01% . . . 1% standard for off-shelf delivery.
- **Temperature Coefficient:** 20 ppm/°C standard. Special TC's to 5 ppm/°C available.
- **Dielectric strength:** Greater than 1000 V.A.C.
- **Thermal Shock:** SA & SAX Types from 275°C to −55°C. SAV & SAVX Types from 350°C to −55°C.
- **Resistance Range:** From 0.05 ohms to 250K ohms.
- **Inductive Types (SA & SAV):** Single layer space wound with largest wire permissible.
- **Non-Inductive Types (SAX & SAVX):** Dual balanced windings for minimum inductance.
- **Environmental:** Meets or exceeds requirements of MIL-R-26E.

power resistors – metal clad chassis mount

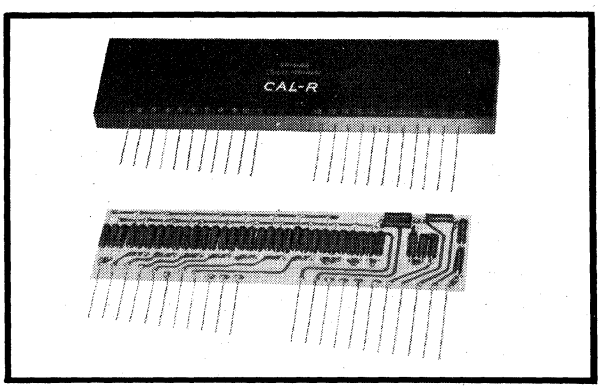


OUTSTANDING FEATURES

1. Tinned copperweld leads standard.
2. Completely welded construction . . . terminal to terminal.
3. High density extruded aluminum housing provides superior heat conduction.
4. Housing deep finned for maximum heat dissipation.
5. Distinctive gold anodized finish for maximum resistance to extreme environmental conditions.
6. Special molding compound with high thermal conductivity of $25/cal/sec/cm^2/degree\ C/cm \times 10^{-4}$.
7. Windings . . . High uniformity single layer space wound, designed to give maximum core coverage for even heat dissipation.
8. Resistance wire . . . Procured to exacting specifications.
9. Core . . . Steatite ceramic, centerless ground for uniformity, chemically treated for utmost purity of winding surface.

ELECTRICAL CHARACTERISTICS

- **Tolerances:** 5.0% to .05% . . . 1% standard for off-shelf delivery.
- **Temperature Coefficient:** 30 ppm/°C standard. Special TC's to 5 ppm/°C available.
- **Dielectric Strength:** Greater than 500 V.A.C. on MC–80. 1000 V.A.C. on MC–100 and MC–250, and greater than 2000 V.A.C. on MC–500.
- **Environmental:** Meets or exceeds all requirements of MIL-R-18546D including "N" characteristic.



precision resistor networks

Cal-R engineers, specialists in advanced network design, offer precision assemblies, packaged to meet the most exacting specifications.

OUTSTANDING FEATURES: ■ Precision resistors used exclusively ■ All circuits assembled on printed circuit boards ■ Pins cut on an angle for easy P.C. board insertion ■ Epoxy encapsulated ■ Meets or exceeds all requirements of MIL-R-93 & MIL-R-26

GENERAL SPECIFICATIONS:

Resistor values: From 1 ohm thru 5 megohms
Full scale accuracy: to .005%
Temp. coefficient tracking: to 1 PPM/°C
Temp. coefficient absolute: to 2 PPM/°C
Ambient temp. range: −55°C to +125°C
Standard temp. coefficient: 0 to ±10 PPM
Stability: to 10 PPM per year
Fast Recovery time: to within .02% of final value within 100ns.

Call CAL-R on your next network application . . . our application engineering department is at your service.

For additional information please contact factory . . .

CAL–R California Resistor delivers special resistors to solve unique packaging problems. For more information about special resistor designs contact your local representative or **CAL–R** California Resistor directly.

PRECISION FILM RESISTORS, WIRE-WOUND POTENTIOMETERS AND AUTOMOTIVE SPARK SUPPRESSORS

Precision Metal Film Resistors

PRODUCT REFERENCE CHART — MIL R 10509

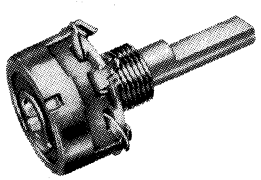
GENERAL SPECIFICATIONS

SERIES	DESCRIPTION	CW Type	MIL Style	MIL Char.	Wattage Rating 70°C	Wattage Rating 125°C	Resistance Min. - Max.
 X	Vacuumette type "X" series are conformal coated, evaporated metal film resistors designed for higher performance and stability, identified by a reddish-brown color of E-coating. In addition to standard temperature coefficients per MIL characteristics, they are available with T.C. of ±100 PPM (EIA Code T1).	X54/X55	RN55	D, C, E	⅛	1/10	10Ω - 301K
		X60	RN60	D, C, E	¼	⅛	10Ω - 1 Meg.
		X65	RN65	D, C, E	½	¼	10Ω - 2 Meg.
 VFM	VFM series are molded resistors, with more types in the higher wattages than Series "X," and made by the same rigid manufacturing methods. They are identified by a tan color molded jacket providing greater mechanical protection and will sustain rough handling.	VFM05	RN60	D, C, E	¼	⅛	10Ω - 1 Meg.
		VFM10	RN65	D, C, E	½	¼	10Ω - 2 Meg.
		VFM15	RN70	D, C, E	¾	½	10Ω - 2.49 Meg.
		VFM25	RN75	B, C, E	1	1	10Ω - 5.11 Meg.
 VF*	VF series trim line resistors are offered as a multi-rated, multi-purpose conformally coated metal film. Smaller than MIL type, they provide the same maximum performance capabilities at a lower cost. Units are coded similar to "X" series, but are identified by standard commercial marking.	VF05	—	—	⅛	⅛	10Ω - 1 Meg.
		VF11	—	—	¼	¼	10Ω - 2 Meg.
		VF15	RN20	X	½	½	10Ω - 2.5 Meg.
		VF25	RN25	X	1	1	10Ω - 5 Meg.
 NA	Noblette type NA series are metal film resistors with the advantage of extreme high and low resistance values in varying wattages. Values are obtained by application of "noble" metals through a C-W developed pyro-chemic process. Film is protected by a layer of vitreous enamel and a rubberized, charcoal gray enamel paint. Axial lead construction.	NA15	—	—	½w @ 40°C		0.5Ω - 3 Meg.
		NA20	—	—	½w @ 40°C		0.5Ω - 3 Meg.
		NA25	—	—	1w @ 40°C		0.5Ω - 5 Meg.
		NA30	—	—	2w @ 40°C		1.0Ω - 10 Meg.
 NR	Nobeloy type NR resistors are similar in composition and appearance to NA series, except that they have radial lead construction. Resistor body is in tube form, permitting additional mounting by means of a thru-bolt. They also offer higher and lower resistance value in varying wattages from ½W to 5W.	NR20	—	—	½w @ 40°C		0.5Ω - 3 Meg.
		NR25	—	—	1w @ 40°C		0.5Ω - 5 Meg.
		NR30	—	—	2w @ 40°C		1.0Ω - 10 Meg.
		NR50	—	—	5w @ 40°C		2.0Ω - 10 Meg.

NOTE: *Available 1N, T.C., T1, T2, T9.

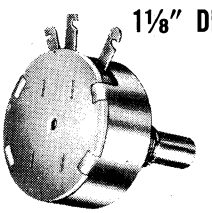
MIL CHAR. **D** = T.C. ±100 PPM (T1) **E** = T.C. ± 25 PPM (T9)
C = T.C. ± 50 PPM (T2) **B** = T.C. ±150 PPM

1½" DIAMETER WIRE-WOUND CONTROLS



Electrical circuit choice of potentiometer, rheostat, or fader up to 10,000 ohms resistance. Power dissipation to 3.0 watts with anticipated life of 10,000 cycles. Available with grounded or insulated rotor and plastic or metal shafts. Choice of mounting style: bushing (illustrated), eyelet-to-chassis, twist tab, or snap-in ears to printed circuit board. Request Bulletin No. 2080-67.

1⅛" DIAMETER WIRE-WOUND CONTROLS



Resistance range to 25,000 ohms. Available as potentiometer, rheostat, or "L" pad. Up to 5.0 watts power dissipation with anticipated life to 25,000 cycles. Available with insulated rotor and choice of bushing or twist-tab mount. Bushing and shaft dimensions available to meet your specific requirements. Request Bulletin No. 2060.

AUTOMOTIVE and OIL BURNER SPARK SUPPRESSORS

For suppression of radio and television noise interference due to ignition spark discharge at plugs and high tension distributor; and due to ignition discharge action of oil burner igniting coil. Complete line of resistive type suppressors. Request Bulletin 125.

C-W products assure high reliability at reasonable prices. Full cooperation on custom engineering, field service, emergency stocking and special models.

See Sec. 5100 for complete line of C-W Slide-Switches.

GLASS AND METAL OXIDE FILM RESISTORS

Perfect combination to handle resistor jobs

Dependable resistor performance, tailored to specific circuit requirements results from CORNING® Materials and process skills.

High resistivity tin oxide film is combined with optical quality glass substrate yielding exceptionally strong, uniform resistance components.

This construction is the basic reason for the proven stability and reliability demonstrated in the 80,000 hour test data summarized at right.

80,610 TOTAL TEST HOUR DATA DEMONSTRATES LONG TERM STABILITY RESULTING FROM THIS UNIQUE CONSTRUCTION.

Extended load life performance, 150 CORNING N-20 Style Resistors, 10K, 0.3 watts

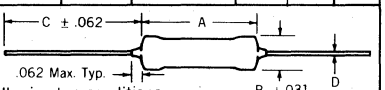
Tolerance: All established reliability resistors have a standard resistance tolerance of 1%.



POWER RATING

Dale ARS and AGS power ratings are based on the following two conditions:

1. 1% maximum ΔR in 1000 hours load life.
2. 275°C maximum operating temperature.

■ TYPE AGS*

Miniature version of ARS Series with BeO core for optimum thermal conductivity, operational stability and increased reliability. Significantly smaller size. Failure rate .000054% per 1000 hours at 50% rated power, 25°C ambient (60% confidence level). Failure defined as ΔR > 0.5%.

*Available with solderable and weldable leads.

■ TYPE ARH

Advanced design housed power wirewounds made on the same line and under the same high reliability standards as the ARS and AGS. Failure rate of .1% at 100% rated power.

DALE TYPE	MIL-R-39009A TYPE	POWER RATING (watts) MTD.	POWER RATING (watts) FREE AIR	RESISTANCE RANGES (ohms) MIN.	RESISTANCE RANGES (ohms) MAX.	MAX. WORKING VOLTAGE	MAX. WT. GRAMS

Tolerance: All established reliability resistors have a standard resistance tolerance of 1%. Non-inductive versions also available.

DIMENSIONS: See section on RH resistors. Types ARH-5 thru 50 will correspond with RH-5 thru 50.

POWER RATING

Dale ARH resistor ratings are based on the following requirements:

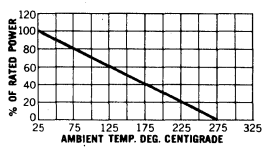
1. 275° maximum internal hotspot temperature
2. 1% maximum ΔR in 2000 hour load life
3. Proper heat sink

   4x6x2x.040 aluminum chassis = ARH-5 and ARH-10

   5x7x2x.040 aluminum chassis = ARH-25 and ARH-50

DERATING
ARS, AGS, ARH

Established reliability data is based on operation at 50% rated power at 25°C. At high ambient temperatures, the derating curve at right applies:



■ TYPE AWA

Established reliability epoxy-molded precision bobbin wirewound resistor with high stability and low T.C.; offers excellent moisture protection and low noise. Quality verified by acceptance testing.

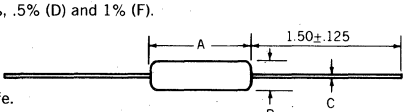
Standard Resistance Tolerances: .1% (B), .25%, .5% (D) and 1% (F).

POWER RATING

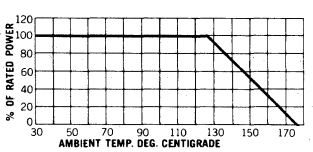
Dale EMF power ratings are based on the following two conditions:

1. 0.5% maximum ΔR in 2000 hours load life.
2. 175°C maximum operating temperature.



DERATING

Dale EMF resistors have an operating temperature range of −65°C to +175°C. They must be derated according to the curve at right.



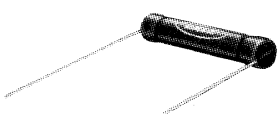
DALE® for Optimum Value in Wirewound Resistors

WIREWOUND PRECISION RESISTORS, SILICONE COATED *(Available with Weldable Leads)*

■ TYPE RS

Meets applicable requirements of MIL-R-39007, MIL-R-26E, MIL-R-26C and MIL-R-23379. Non-inductive styles available.

■ TYPE RLS



Radial leads for printed circuit board mounting. Meets applicable requirements of MIL-R-26E. Non-inductive styles available.

POWER RATINGS RS, RLS, G SERIES

These Series have two power ratings, depending on operating temperature and stability requirements.

CHARACTERISTIC U: 1. 275°C maximum hotspot temperature
2. .5% maximum ΔR in 2000 hour load life

CHARACTERISTIC V: 1. 350°C maximum hotspot temperature
2. 3% maximum ΔR in 2000 hour load life

DERATING RS, RLS, G

RS, RLS and G coated resistors have an operating temperature range of −55°C to +350°C. Dale RS molded resistors have an operating temperature range of −55°C to +275°C. They must be derated at high ambient temperatures according to the curves below.

POWER RATING
Power ratings of Dale G resistors are 1.4 to 4 times higher than those of conventional wirewound resistors of equivalent size.

Stability When Dale G resistors are operated at the same ratings (Char. U) as conventional Dale RS resistors of equivalent size, the shift in resistance is 50% or less than that of the RS.

For additional power and derating information, see section on RS resistors.

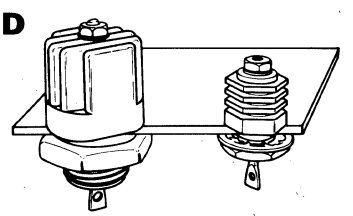
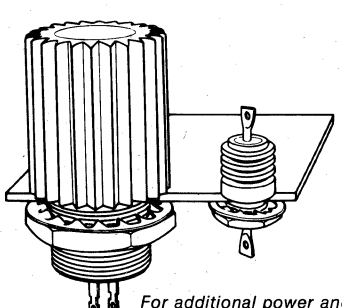
WIREWOUND POWER RESISTORS, HEAT SINK ENCASED

■ TYPE PH

TWO TERMINAL CONFIGURATIONS (PH-10-1, PH-25, PH-50 and PH-100). Thru chassis mounting—two connections required on one or both sides of panel. Meet electrical and environmental requirements of MIL-R-18546.

SINGLE TERMINATION, CHASSIS GROUND (PH-10-5 and PH-25-8). Speeds assembly time as only one connection is required. Often utilized as a drive line resistor in a high speed core memory system using a series termination technique. Non-inductive windings have low reactance properties giving exceptionally fast cycle time.





For additional power and derating information, see section on RH resistors

DALE® for Optimum Value in Housed Wirewound Resistors

WIREWOUND POWER RESISTORS, HEAT SINK ENCASED

Patented design. Mount to the chassis. Provide high power and precision tolerance in a variety of sizes, mounting and terminal configurations. RH and HG types exceed MIL-R-18546. Non-inductive styles available.

■ TYPE RH

5 through 250 watts. Bonus power dissipation ability within MIL-R-18546 size.

■ TYPE HG

Beryllium oxide core for optimum heat dissipation. Doubles Mil. Spec. power at no increase in size. Exceptional stability at mil. levels.

*Rating is based on chassis mounting area and stability. For MIL-R-39009 ratings, see section on ARH resistors.

**NOTE: Figures in parentheses on RH-5 and RH-10 indicate wattage printed on these resistors. New construction allows them to be rated at 7.5 and 12.5 watts – but they will be printed with these higher ratings only upon customer request.

†A weight increase of 10% should be allowed for non-inductive styles.

††Consult factory for values below 1 ohm and for special T.C. requirements.

POWER RATING RH, HG, PH TYPES

Dale housed resistor ratings are based on the following requirements:

1. 275°C maximum internal hotspot temperature
2. 1% maximum ΔR in 1000 hour load life for RH-5, 10, 25, 50; PH-10, 25, 50. 3% maximum ΔR in 1000 hour load life for RH-100, 250; PH-100.
3. Proper heat sink.
   4x6x2x.040 aluminum chassis = RH-5, 10; HG-5, 10; PH-10
   5x7x2x.040 aluminum chassis = RH-25; HG-25, 50; PH-25
   12x12x.059 aluminum panel = RH-50
   12x12x.125 aluminum panel = RH-100, 250; PH-50, 100

DERATING

Dale housed resistors have an operating temperature range of –55°C to +275°C. Derating is required for reduced chassis mounting area and for high ambient temperatures. The following curves apply to operation of unmounted resistors:

A = RH-5, 10
B = RH-25; PH-10, 25
C = RH-50, 100, 250; PH-50, 100; HG-5, 10, 25, 50

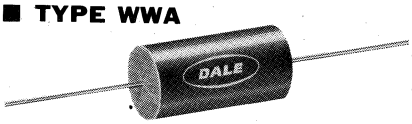
DALE® for Optimum Value in Bobbin Wirewound Resistors

WIREWOUND PRECISION RESISTORS, BOBBIN TYPE *(Available with Weldable Leads)*

Non-inductive precision resistors. Epoxy molded for high dielectric strength and complete environmental protection. Meet applicable requirements of MIL-R-39005 and MIL-R-93D.

■ TYPE WWA



Patented design insures high stability. Special tolerances and matching available.

■ TYPE MWA

Subminiature size retains Dale's unique bobbin-type design and high protection molding coating.

*Consult factory for tolerances below .05%.

†Although there is no direct mil. model of the same physical size, the Dale type will meet the electrical and environmental requirements of MIL-R-93.

SPECIAL MODIFICATIONS

- Special tolerances are available to as low as .005%.
- Resistors can be matched to a tolerance of .001%.
- Special T.C.'s are available to ±2 ppm/° C over a limited temperature range.
- T.C.'s can be matched to an accuracy of 1 ppm/° C.

POWER RATING

MWA, WWA and WWP power ratings correspond to MIL-R-93 ratings and are based on .5% maximum ΔR in 1500 hours load life. For commercial applications, power ratings may be doubled.

DERATING

Dale MWA, WWA and WWP resistors have an operating temperature range of −55° C to +145° C. Derating is required for temperatures above 125° C. The curve at right applies.

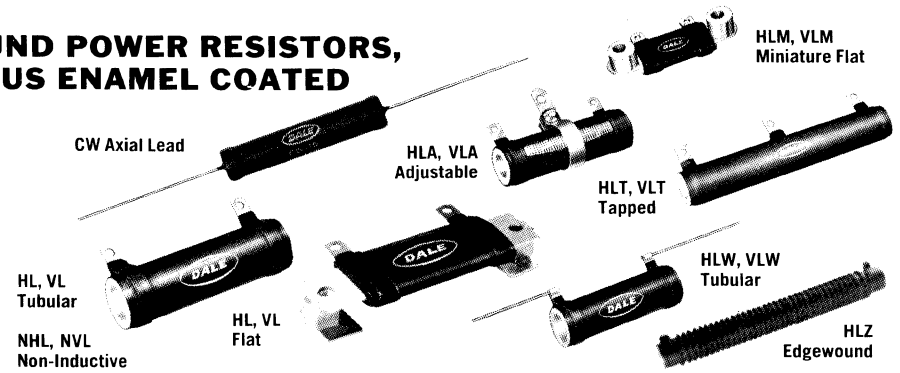
DALE® for Optimum Value in Wirewound Resistors

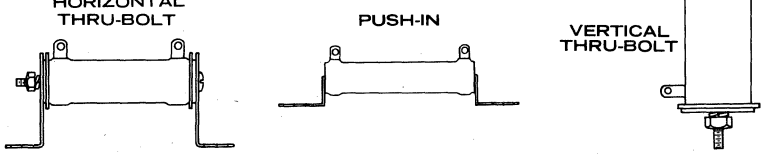
INDUSTRIAL WIREWOUND POWER RESISTORS, SILICONE AND VITREOUS ENAMEL COATED

Dale's expanded industrial wirewound line provides both silicone and vitreous coated models. Silicone models are recommended where maintenance of tolerance and T.C. is of primary concern. Vitreous models are recommended where maximum resistance to chemical action is required.

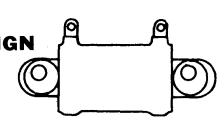


TYPE	APPLICATION	APPLICABLE MIL SPEC AND TYPES	WATTAGE RATING	RESISTANCE RANGE	CORE SIZES	TERMINALS	MOUNTINGS	TOLERANCE
CW Axial Lead	Axial leads. For applications requiring high performance at low cost	MIL-R-26 RW-67, 68, 69	2.5-13 watts	.1 ohm to 100K ohms	Body Dia. .188 to .375" Body Length .500 to 1.781" Leads 1.5 to 2"	Leads	Terminals	±5% (10% below 1 ohm)
HL, VL Tubular	General purpose wirewound resistors with a broad power range.	MIL-R-26 RW-29, 30, 31, 32, 33, 35, 36, 37, 38, 47	5-225 watts	.1 ohm to 1.3 Megohms	O.D. 1/4 to 1-1/8" Length 1-10½"	Lugs	Push-in bracket or thru-bolt	±5% (10% below 1 ohm)
NHL, NVL Non-Inductive	High frequency circuits and applications requiring low inductive effect and minimum distributed capacity	None	5-225 watts	1 ohm to 90K ohms	O.D. 1/4 to 1-1/8" Length 1-10½"	Lugs or Leads	Push-in bracket or thru bolt	±5%
HL, VL Flat	For limited space requiring high power-to-size ratio. Vertical or horizontal stacking.	MIL-R-26 RW-20 thru RW-24	24-95 watts	.1 ohm to 150K ohms	Length 1¼ to 6"	Lugs	Spring push-in	±5% (10% below 1 ohm)
HLM, VLM Miniature Flat	For limited space, high power-to-size requirements particularly in high vibration areas.	None	10-20 watts	.1 ohm to 51K ohms	Length 3/4 to 2-1/16"	Lugs	Thru mount with spacers	±5% (10% below 1 ohm)
HLA, VLA Adjustable	For resistance or voltage adjustment	MIL-R-19365C RX-29, 32, 33, 35, 36 37, 38, 47	12-225 watts	1 ohm to 100K ohms	O.D. 5/16 to 1-1/8" Length 1½ to 10½"	Lugs	Push-in bracket or thru bolt	±5%
HLT, VLT Tapped	For voltage divider networks	MIL-R-26 RW-22, 23, 24, 33, 35, 36, 37, 38, 47	11-225 watts	.1 ohm to 1.1 Megohms	O.D. 5/16 to 1-1/8" Length 1½ to 10½"	Lugs	Push-in bracket or thru bolt	±10% each section (±10% total)
HLW, VLW Tubular	General application where terminal wires are required for direct electrical connection	None	3-20 watts	.1 ohm to 80K ohms	O.D. 13/64 to 7/16" Length 1" to 2"	Lugs with terminal wires	Terminals, thru bolt or push-in bracket	±5% (10% below 1ohm)
HLZ Edge-wound	For heavy duty requirements where space is at a premium. High thermal capacity.	None	35-375 watts	.05 ohm to 32 ohms	O.D. 1/4 to 1-1/8" Length 1 to 10-1/2"	Lugs	Push-in bracket or thru bolt	±10%

MOUNTING BRACKETS for TUBULAR STYLES



EXCLUSIVE BRACKET DESIGN FOR MINIATURE FLAT STYLE



Mounting strap fits snugly through core and is bound tightly against unit by two eccentric spacers. Eliminates expensive cements and improves heat transfer and power handling capabilities.

DALE® for Optimum Value in Metal Film Resistors

PRECISION METAL FILM RESISTORS *(Available with Weldable Leads)*

Vacuum-deposited metal film resistors. Meet both MIL-R-10509 and MIL-R-22684.
Good R.F. characteristics. Low noise level. Wide choice of tolerances and T.C.'s.

■ TYPE MF

Epoxy molded. Meets MIL-R-10509 and MIL-R-22684.

■ TYPE MFF

Epoxy conformal coated. Meets electrical and environmental characteristics of MIL-R-10509F, but is dimensionally smaller.

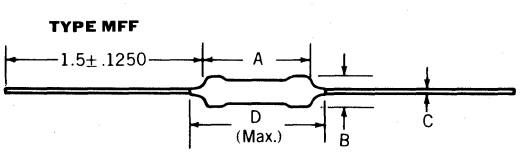
*1.00 ± .125 for MF-50 only.

TYPE MFF



POWER RATING

Dale MF resistors have two power ratings, depending on operating temperatures of 70° C and 125° C. MFF resistor power ratings are based on full power at 125° C. All are based on a maximum ΔR of .5% in 1000 hour load life.

DERATING

Dale MF resistors have an operating temperature range of −65° C to +175° C. They must be derated according to the curves at right.

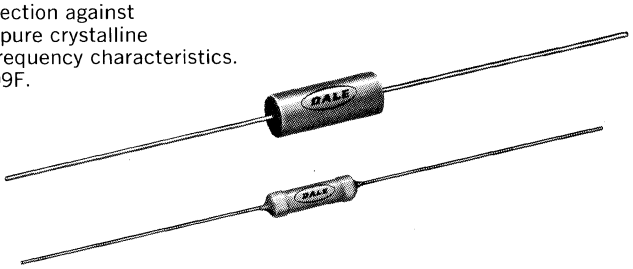
11 standard T.C.'s available in −55° C to +175° C range.

DALE® for Optimum Value in Carbon Film Resistors

DEPOSITED CARBON RESISTORS *(Available with Weldable Leads)*

Designed for inherent stability, long load life and excellent protection against environmental factors in a wide range of applications. Made of pure crystalline carbon film bonded to selected ceramic cores. Excellent high frequency characteristics. Types DC and MC meet functional requirements of MIL-R-10509F.



■ TYPE MC

Molded housing. Completely insulated and protected against environmental or mechanical damage. Specially formulated molding compound gives best humidity protection available.

■ TYPE DC

Specially coated for complete insulation against moisture, salt spray and other severe environmental factors. Miniature size.

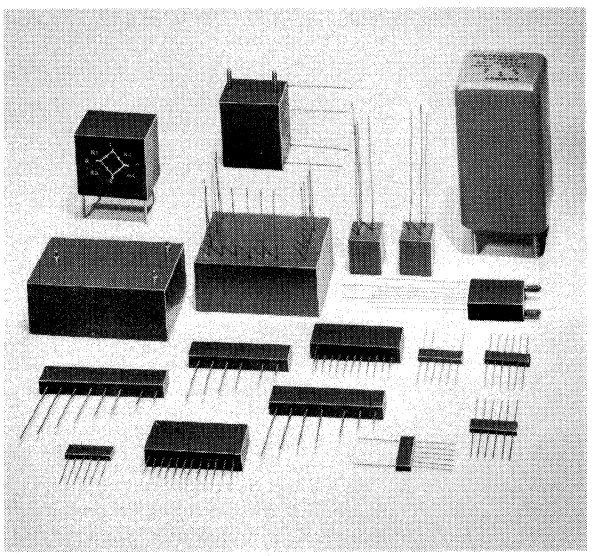
DALE® for Optimum Value in Packaged Networks

WIREWOUND FILM and CERMET PACKAGED NETWORKS

FEATURES

- Choice of linear wirewound, bobbin wirewound, metal film, carbon film or cermet elements
- Less components to stock or handle
- Reduced inspection time
- Ease of assembly
- Matched resistors cannot be mixed or lost
- Complete environmental protection
- Dale networks meet or exceed requirements of MIL-R-26, MIL-R-93 or MIL-R-10509, depending on type of element used.
- Packaged to meet your requirements



GENERAL RESISTOR ELECTRICAL CAPABILITIES WIREWOUND AND FILM NETWORKS

	WIREWOUND	FILM (Carbon & Metal)

RESISTANCE STABILITY:	.005%/yr.	.03%/yr.
OPERATING TEMPERATURE:	−65°C to +145°C	−55° C to +175° C

LADDER NETWORKS

- **OUTPUT ACCURACY:** ±.05% full scale accuracy or ± 1/2 least significant bit, whichever is less.
- **OUTPUT VARIATION WITH TEMP.:** ±.1% full scale accuracy or ±1 least significant bit, whichever is less.
- **OPERATING TEMP. RANGE** (For Accuracies Specified Above): −55°C to +70°C (Film Type) −55°C to +125°C (Wirewound Type)
- **INPUT RESISTANCE** (All inputs connected): 1KΩ to 500KΩ
- **OUTPUT RESISTANCE** (All inputs grounded): 250Ω to 125KΩ
- **INSULATION RESISTANCE:** 100 Megohms Minimum
- **TERMINALS:** Solderable or weldable wire leads
- **PACKAGING:** Epoxy or Silicone resin potting, Transfer molded, Can encapsulated. Other types of special packaging available to meet your requirements.

BINARY DIGITAL-TO-ANALOG LADDER NETWORKS:

Resistor Parameters for meeting 4 and 8 bit dimensional requirements

	WIREWOUND	FILM
POWER RATING:	⅛ watt from −55° C to +125° C, derated linearly to 0 at +145° C	½ watt from −55° C to +70° C, derated linearly to 0 at +145° C
TEMPERATURE COEFFICIENT:	0 ± 20 PPM/° C, from −55° C to +125° C. Lower TC's available upon request.	400 PPM/° C max. TC's available down to 25 PPM/° C
HEAT RISE:	20° C max. at rated power	60° C max. at rated power

GENERAL RESISTOR ELECTRICAL CAPABILITIES CERMET NETWORKS

Resistor Tolerance: 1%-10% depending on design requirements

Temperature Coefficient: ± 300 PPM/° C from −55° C to +150° C. Special T.C.'s as low as ±50 PPM/° C can be provided over limited temperature ranges. T.C. tracking within ±30 PPM is possible.

Power Loading: Up to 100 watts/square inch (with suitable heat sink).

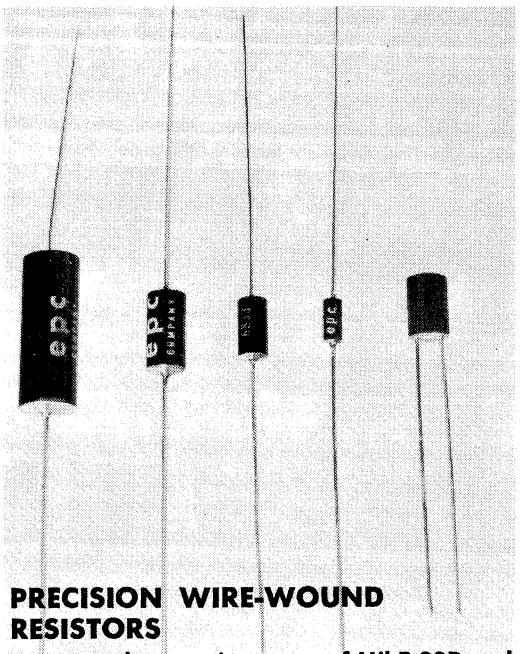
Load Life: Δ R < 0.5% per 1,000 hours (room temperature) at 16 watts/square inch loading.

Moisture Changes: per MIL-STD-202, Method 103.

In addition to the networks described, Dale can design and produce special units to your specifications for circuit designs that do not fall into standard sizes or configurations. If your circuit design requires a network which does not fall into the standard sizes and configurations shown here, contact the Sales Department of Dale Electronics, Inc., Box 609, Columbus, Nebr. Phone: 402-564-3131.

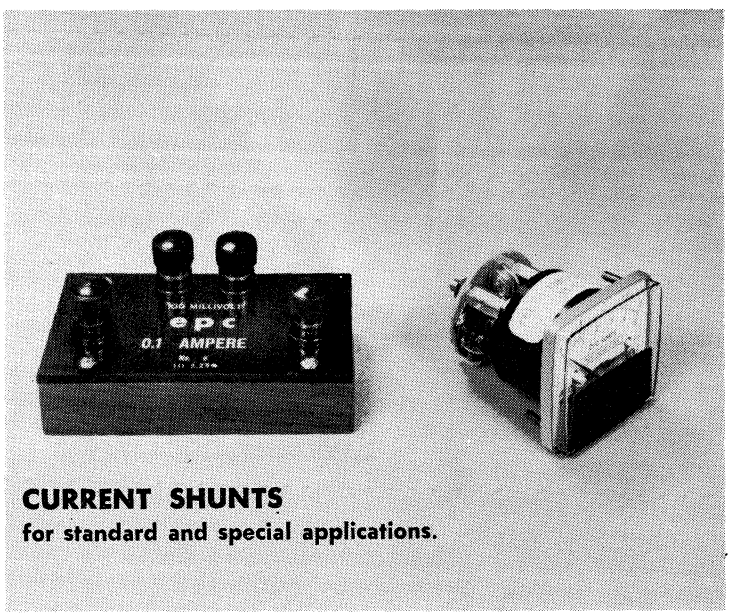
epc CORPORATION

MANUFACTURERS OF PRECISION WIRE-WOUND RESISTORS • RESISTOR NETWORKS CURRENT SHUNTS AND HIGH VOLTAGE DIVIDERS • NO ORDER TOO SMALL OR LARGE



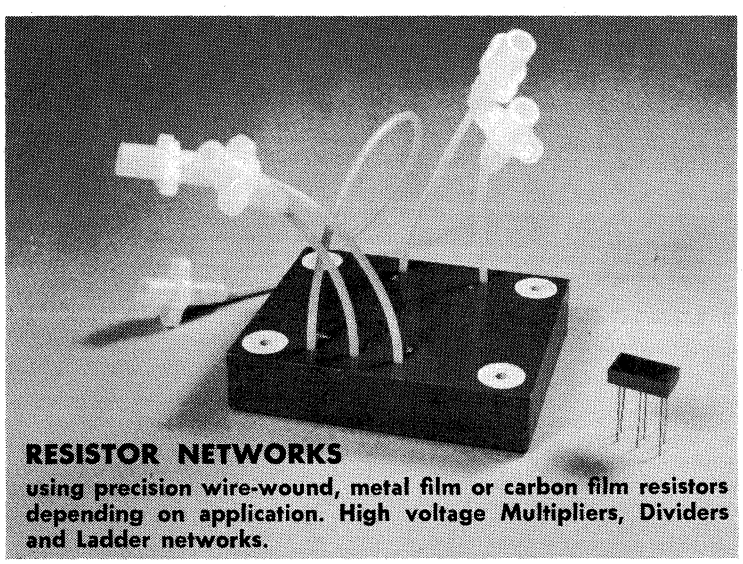
PRECISION WIRE-WOUND RESISTORS

to meet the requirements of Mil-R-93D and special applications. Standard T.C. ±10 ppm/°C. Tolerances to.005% on most types.



CURRENT SHUNTS

for standard and special applications.



RESISTOR NETWORKS

using precision wire-wound, metal film or carbon film resistors depending on application. High voltage Multipliers, Dividers and Ladder networks.

HIGH VOLTAGE DIVIDERS

shielded 100 KV high voltage standards with ratio accuracy of .05%. Other Dividers available to 300KV.

(5) Tolerance Code: B = 0.10%, C = 0.25%, D = 0.50%, F = 1.0%, G = 2.0%, J = 5.0%
(6) MF35 Maximum Value 100K

CURRENT LIMITING FUSE

The Current Limiting Fuse provides unexcelled performance for critical circuit protection by opening at extremely fast, predictable current-time overloads. It offers timed protection required in circuits with predictable starting and load surge currents yet require fast protection against damaging spikes or overloads.

This is a one-shot device employing a low resistance Electra cermet fired junction onto a non-conducting glass subtrate. No arc, plasma, or vapor may escape the package.

To order specify Type Number followed by current rating. Example: Type P200L-32 1/8 amp Would be ordered as P200L-32-1/8

DISCRETE MICRO RESISTOR CHIP TF50P

This discrete micro resistor chip, 50 mils by 50 mils, offers versatility for micro circuit designers. Electra cermet is used with glass as a passivation material. It has gold terminations for mounting. The back of the chip is gold screened to provide substrate mounting (heat sink).

Resistance Range 10 ohms to 100k ohms (standard decade values)	TC of R ±100 PPM/°C MAX.	Matching	to ±0.25% available
Tolerance	±5% standard (J) ±1% available (F)	Power Rating	.01 watt @ 125°C ambient, chip mounted in free air. Gold backing is provided for heat sinking.

Charles T. Gamble Industries

PRECISION WIRE WOUND RESISTORS & NETWORKS

Charles T. Gamble Industries has engineered and designed non-inductive precision wire wound resistors to meet the requirements of Mil-R-93D. These resistors are completely sealed against the effects of high humidity and salt water immersion cycling. The material used in the manufacture of our resistors has a very high dielectric strength. The bobbin material used in winding the resistors is one and the same as the encapsulating material. All resistors use resistance wire with very low thermal E.M.F. to the copper leads. Where thermal effects can be disregarded, welded construction with nickel alloy leads may be specified.

Standard temperature coeficient is ±10 PPM/°C. Lower T.C.'s, and T.C.'s as high as 6000 PPM/°C can be supplied.

Tolerance available (non power styles): 1%, 0.5%, 0.1%, 0.05%, 0.025%, 0.02% and 0.01%. Resistors with tolerances of 0.1% and below are stabilized by artificial aging and temperature cycling.

NETWORKS: RC NETWORKS, LADDER NETWORKS, VOLTAGE DIVIDERS, BINARY NETWORKS

Sub-miniature Axial lead Precision resistors have been designed for applications where space is a prime factor.

Encapsulated printed circuit resistors are designed for printed circuit board application, where space is a factor.

Radial lug type resistors have been designed to meet the requirements of Mil-R-93D.

All resistors are hermetically sealed with epoxy resin to protect the windings against the effects of high humidity and salt water immersion cycling. Resistors can either be inductive or non-inductive wound.

The materials used in the construction of radial lug type resistors are identical to those used in the construction of axial lead types.

These resistors are supplied with a thru hole for mounting to the chassis by means of a #6 thru bolt.

HEAT SINK MOUNTED PRECISION WIREWOUND POWER RESISTORS

	T-7	0 to −50PPM/°C	−55°C to +165°C
	T-8	0 ±25PPM/°C	+25°C to +165°C
		0 ±35PPM/°C	−55°C to +25°C

*Standard types. All others are special.
**Parts Per Million per degree centigrade (100PPM equals 0.01%).
T.C. code marking is combined with the code for the date of manufacture.

RESISTANCE RANGE

The maximum extended ranges shown above are also available with a TC of +100PPM/°C, −250PPM/°C—Code TR or +100PPM/°C, −500PPM/°C—Code TE ±1.0% tol. only.

TOLERANCES

Metal film resistors are supplied in standard tolerances of ±1.0%, ±0.5%, and ±0.25%. In addition, tolerances of ±0.1% and ±0.05% are available on special order.

VOLTAGE COEFFICIENT

Voltage coefficient when measured between 1/10 and full rated voltage is less than 5PPM/Volt, for all values. On low and medium value resistors, the voltage coefficient is essentially zero.

*These high resistance values, being above the highest MIL-R-10509 top values, have higher temperature coefficients, but otherwise are designed to meet the requirements of the specification (see Temperature Coefficient Curves). These high resistance values must be measured carefully under controlled conditions of humidity and temperature, to reduce possible variations due to test conditions and temperature coefficients. Due to higher temperature coefficient, value above approximately two times MIL maximum will be supplied with a standard tolerance of ±2.0%.

TOLERANCE. Standard tolerance is ±1%. ±0.5% tolerance is available at a slight additional cost.

VOLTAGE COEFFICIENT. This factor is negligible. Statistically, the voltage coefficient is less than 20 ppm/v.

SHELF LIFE. Shelf life tests show average resistance change of less than 0.25%.

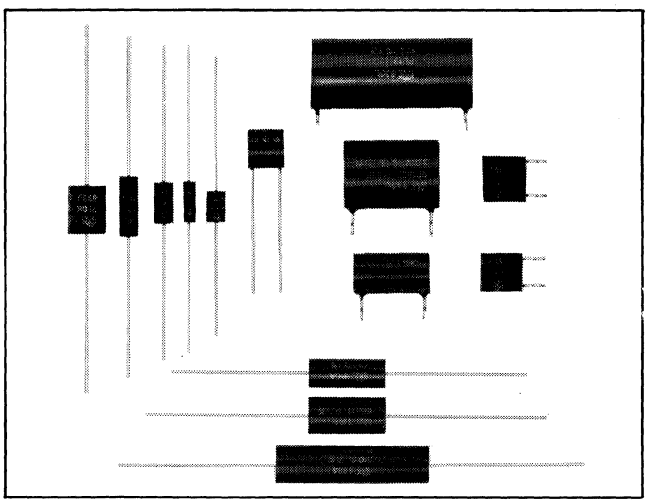
ENCAPSULATED PRECISION WIREWOUND RESISTORS

TRW INC.

FOR RELIABLE PERFORMANCE IN DEMANDING APPLICATIONS



- ACCURACY TO ±.005%
- LONG-TERM STABILITY TO 10 PPM/YR
- TEMPERATURE COEFFICIENTS TO ±1 PPM/°C
- VOLTAGE COEFFICIENT, .01 PPM/Volt
- NOISE FREE PER MIL-STD-202 TESTS
- MIL-R-39005 PERFORMANCE

ACCURACY—Standard IRC resistors are manufactured to tolerances as close as ±.01% in values of 100 ohms or more. Special resistors can be made to ±.005%. Resistors can be supplied in sets matched in value or ratio to ±.001%.

OPERATING TEMPERATURE/POWER RATING—Normal operating temperature range is −55°C to +145°C. The wattages shown in the resistor tables are rated at 125°C.

LEAD MATERIAL — Unless otherwise specified, PH resistors are supplied with tin-coated copper leads. Gold plated nickel, plain nickel, and 180 alloy leads are stocked and can be supplied when specified at small additional cost.

TEMPERATURE COEFFICIENT — Precision wirewound resistors provide the closest temperature coefficients of any resistor type available. Unless otherwise specified, the standard IRC temperature coefficient will be supplied over the temperature range of −55°C to +145°C. All temperature coefficients are referenced to 25°C.

STANDARD

0 ±10 PPM/°C 100 ohm and greater
0 ±15 PPM/°C 10 ohm to 100 ohm
0 ±30 PPM/°C 1.0 ohm to 10 ohm
0 ±90 PPM/°C Less than 1.0 ohm

Closer and special temperature coefficients are available on request.

PRECISION & SEMI-PRECISION METAL GLAZE RESISTORS

TRW INC.

IRC's new molded Metal Glaze resistors provide stability, reliability and precision unmatched anywhere for the price.

They meet or exceed all MIL-R-22684 and MIL-R-39017 requirements. Load life stability, for instance is four times better than MIL allowance. Typical △R is 0.5% after 1000 hours, full load at 70°C. Even at higher temperatures, △R is still typically under MIL limits. Tested for over 16.2 million hours under MIL-R-39017 conditions. The maximum estimated failure rate at 60% confidence is .0058% per 1000 hours.

The Metal Glaze resistance element is extremely rugged. It is 100 times thicker than conventional films and is impervious to environmental extremes. The tough, uniform molded body resists solvents and the mechanical abuse of automatic handling equipment.

Minimum Dielectric Withstanding Voltage:	
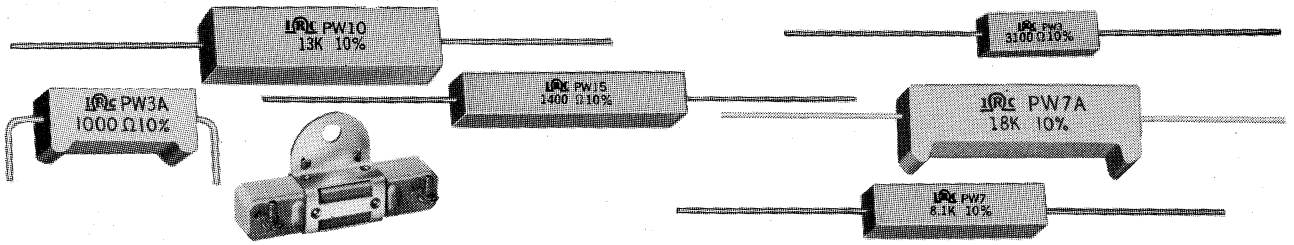
Atmospheric Pressure	1,000 Volts, R.M.S.
Reduced Pressure	625 Volts, R.M.S.
Hot Spot Temperature Rise at 2 Watts	115°C
Current Noise	Negligible
Marking	Standard EIA/MIL Color Code (double width first band)

PACKAGING AND CUT & FORMED LEADS

IRC general purpose resistors are packaged in a variety of styles. Cut and formed leads are also available. Consult TRW with your specific requirements.

HIGH TEMPERATURE POWER RESISTORS

TRW INC.



FEATURING FIREPROOF INORGANIC CONSTRUCTION
for temperature compensation • circuit protection

IRC Type PW Wirewound Resistors are available in nine ratings: 2, 3, 5, 7, 10, 15, 20, 22 and 50 watts.

DESIGN AND CONSTRUCTION: The resistance elements of PW resistors are rigorously quality controlled for resistance, temperature coefficient, diameter and elongation. The wire is wound on a fiberglass core, which forms a smooth, uniform surface. The fill is the same inorganic fireproof material used in premium IRC resistors. The husky, oxygen-free copper lead wires are held by 1/4 hard brass terminals. The whole assembly is then sealed in a crackfree steatite ceramic case. Special PW resistors are also available for circuit protection and temperature compensation. Optional construction is available for printed circuit board applications.

TOLERANCE: ±5% and ±10% (standard) tolerances on Standard Temperature Coefficient Resistors.

IRC TYPE FRW

TOLERANCES

Standard tolerance for single section, flat power wirewound resistors is ±5% above 1 ohm, and ±10% between 1 ohm.

Standard tolerance on tapped and adjustable FRW resistors is ±10%.

Wattage rating based on 350°C hot spot at 40°C ambient with resistor mounted horizontally on a 10" x 10" x .040" steel plate in free air using standard mounting brackets.

ADJUSTABLE FLAT TYPE FRWA

The adjustable feature of Tubular Type Resistors is also available on Flat Type FRWA Resistors. Adjustable FRWA's come in four sizes.

The general characteristics of Tubular Type Resistors also pertain to FRWA units. However, the compact design of these resistors provides a much higher power-space ratio than that of standard tubular resistors. Non-magnetic mounting brackets extend into the resistor. These aid in heat distribution along the entire length of the unit and serve as conductors to transfer internal heat to the chassis. Mounting bracket design prevents the resistor from rotating and loosening.

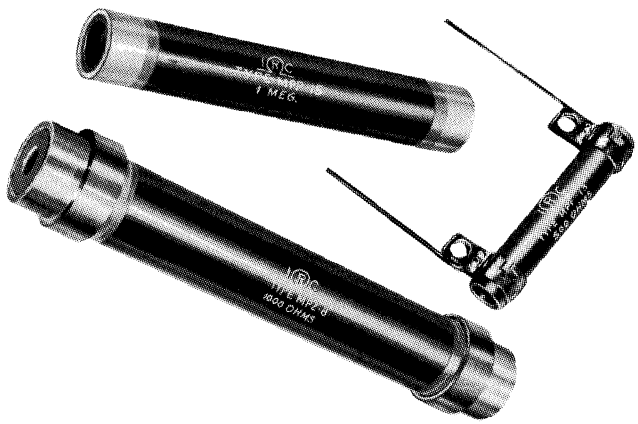
HIGH FREQUENCY, HIGH VOLTAGE RESISTORS

TRW INC.



TYPE MP

IRC type MP resistors have a specially designed resistance film which provides optimum performance in all characteristics while operating at high frequencies. The cross-sectional area of this exclusive film is held to less than 0.001" thickness to assure low inherent capacity and freedom from skin-effect.

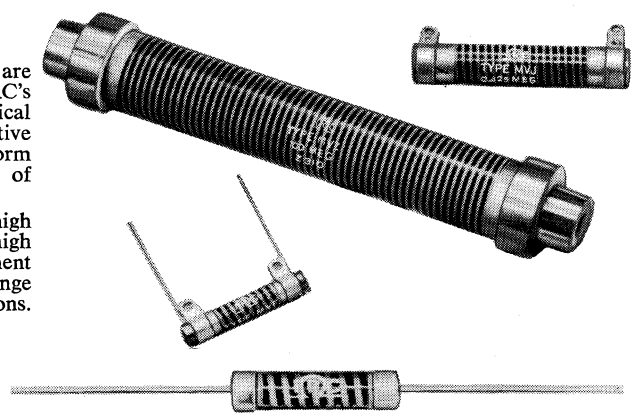
Terminal bands of colloidal silver are applied to each end of the resistor to form a permanent low resistance contact to the resistance film. Lug, axial lead or ferrule terminals, when required, are secured to the silver end-bands. A protective coating is baked on the entire resistor film.

Type MP Resistors are used extensively for applications such as broad band RF amplifiers, RF probes, rhombic antenna terminating resistors, dummy loads for transmitters and dielectric heating equipment, television side-band filters, surge generator and other circuits involving high frequency measuring circuits and radar pulse equipment.

TYPE MV

For high voltage requirements where high resistance and power are needed, IRC Type MV Resistors offer exceptional stability. IRC's exclusive composition film type resistance coating is applied in helical form on a ceramic tube to provide a conducting path of long, effective length. The mechanical spacing of the helical turns gives a uniform pitch, and allows uniform voltage gradient throughout the length of the resistor.

MV Resistors are particularly suited for voltmeter multipliers, high resistance standards, bleeders, grid leaks, voltage dividers, TV high voltage circuits, cathode ray tube circuits. Also, protective equipment for high voltage circuits, photoelectric cell applications, high range bridge circuits, ionization chambers and similar electronic applications.



HIGH OHMIC—TYPE MVX

Type MVX meets the requirements for a small, high-range resistor with axial leads. It can be mounted through a hole in a panel or terminal board of insulating material without terminal interference. Construction corresponds to that of other MV types except for the terminal and method of terminal attachment.

TERMINALS. MVX Resistors can be furnished with or without end caps and axial leads. When furnished without leads, contact must be made to .25-inch silvered ends by pressure clips, since they cannot be soldered.

TOLERANCE. Standard tolerance for MVX Resistors is ±20%. ±5% and ±10% are available as shown in the table at right, at extra cost.

Power Rating

Type	Power Rating in Watts at 25°C ambient	Power Rating in Watts at 40°C ambient
DRT	0.06	0.03
DRU	0.07	0.03
DRX	0.10	0.05
DRB	0.12	0.06
DRD	0.14	0.08
DRF	0.16	0.09
DRJ	0.45	0.25
DRN	1.30	0.70

Discs should not be operated at a maximum surface temperature exceeding 80°C.

VOLTAGE RATING

. Maximum rated voltage is 500 volts per inch of current path, but not to exceed power ratings shown above.

RESISTANCE PER SQUARE

While Concentric Disc Resistors should not be ordered in terms of ohms/square it may be desirable for other purposes to determine this value. Following is the formula:

$$\text{resistance/square} = \left[\frac{2.73}{\log_{10}\frac{B}{C}}\right]\left[\text{total resistance}\right]$$

Where B and C are as shown in the figure under DIMENSIONS above.

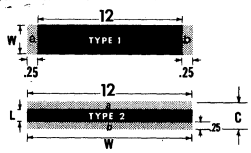
HOW TO ORDER

Standard Concentric Disc Resistors should be ordered by the disc type, total resistance between silver terminals and resistance tolerance. Special concentric discs should give all dimensions indicated above, total resistance between silver terminals and resistance tolerance.

RESISTANCE STRIPS

DIMENSIONS AND TYPES

IRC Standard Resistance Strips are available in two types as shown in the figure and table below.



DIMENSIONS IN INCHES
Note: a and b areas are silver terminations

TYPE 1

Length Between Terminals ±.06	Total Strip Width (W) ±.03	Thickness (±.005)
12	0.88	.027
12	1.19	.027
12	1.38	.027
12	1.50	.027
12	1.75	.027
12	2.75	.027

TYPE 2

Width W ±.06	L ±.03	C ±.03	Thickness (±.005)
12	.38	0.88	.027
12	.69	1.19	.027
12	.88	1.38	.027
12	1.00	1.50	.027
12	1.25	1.75	.027
12	2.25	2.75	.027

Special lengths, widths, and thicknesses are available. Consult TRW, P.O. Box 393, Boone, N.C. 28607.

TOLERANCE

Standard tolerance is ±20%. Special Tolerances of ±15% and ±10% are available on special order.

RESISTANCE VALUES

19 ohms/square to 1.0 megohm/square.

COATING

IRC resistance strips consist of a high grade paper base phenolic laminate with IRC resistance material permanently bonded. They can be supplied with a low resistance colloidal silver contact coating over any portion of the surface where a low resistance positive contact is desired. Mechanical pressure type contacts must be used rather than soldered connections.

JULIE RESISTORS — PRIMARY STANDARD RESISTORS AND RESISTOR SETS

RESISTORS • RATIO SETS • DECADES • NETWORKS

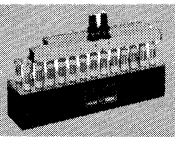
PRIMARY STANDARD RESISTANCE OVENS PRO-106

- From .001 ohms to 1 megohm
- to .0008% absolute (depending on value)
- Temperature coefficient less than .05 PPM/°C to 28°C
- NBS traceability

The Model PRO-106 is a Primary Standard Resistance Oven comprising a multivalued, temperature regulated set of extremely precise and stable resistance standards. The model is suitable for use as a central primary standard resistance facility for the test and calibration of all secondary standards and for the calibration of non-temperature-regulated primary standards.

Model PRO-106 contains resistors in decade steps from 10 ohms to 1 megohm.
Model PRO-106L contains resistors in decade steps from .001 ohms to 10 ohms.

DECADE TRANSFER RESISTANCE SERIES, DTR SERIES



- Stability .0001%/year depending on value
- Ratios of 1:1, 1:9 and 1:10 easily and quickly obtained through use of plug-in bars
- Bootstrap standards from 1 ohm to 10 megohms

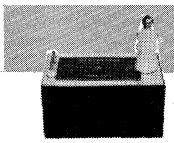
The Decade Transfer Resistance Series is the newest addition to the Julie line of high accuracy, high stability resistor networks. It consists of eleven resistors connected in such a way that absolute ratios of 1:1, 1:9 and 1:10 can be obtained by merely plugging in a set of connecting bars. Its use extends from checking resistance standards by a bootstrapping technique, to volt-box and sensing resistors.

Accessories

TS-10 bars to place ten resistors in parallel
TS-10/9 bars to place nine resistors in parallel
TS-1 bars to place nine resistors in three sets of three parallel resistors

The DTR series is also available for rack mounting.

KV VOLTAGE DIVIDER KV SERIES



- Minimal Leakage
- No Corona
- From 10,000 Volts to 100,000 Volts

The Model KV Voltage Divider Series is a compact, accurate and highly stable, high voltage resistance set hermetically sealed in an oil reservoir to provide reduction in transient current-temperature effects. Its carefully engineered internal construction and its high voltage terminal mounted on a specially designed ceramic standoff insulator minimizes leakage and corona.

Ranges available:

KV-10	10,000V : 10V : 1V	
KV-25	25,000V : 10V : 1V	
KV-50	50,000V : 10V : 1V	
HV-85	85,000V : 10V : 1V	
HV-100	100,000V : 10V : 1V	

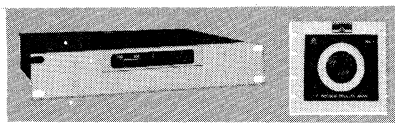
(Other ranges and taps available on special request)

Stability: .0015%/year
Power Coefficient: .0001% per watt
Temperature Coefficient: .00005%/°C
Resistance: 1000 ohms/volt
Accuracy: .01%; ±.05% above 50KV

SYNCHRO/RESOLVER BRIDGES 0.002%

These instruments permit checking synchro transmitters, receivers, differential transformers or 4-wire induction resolvers for electrical error every 5° or every 10° of angular rotation to very high accuracy.

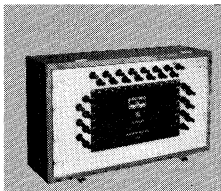
Accuracy: ± 0.002% (4 seconds of arc)
Frequency: 800 cps standard
2 KHz and 10 KHz on request
Harmonic distortion: zero



5° Steps	10° Steps
PSB-5	PSB-10
PRB-4	PRB-10
MSB-5	MSB-10
MRB-5	MRB-10

RATIO AND VOLT BOX SETS 0.001%

Precision DV-series volt-box sets permit the extension of potentiometer ranges without compromise of accuracy. Use uniquely stable Julie primary standard resistors in a compact configuration. NBS-Certifiable.



DV-1500/25

Model	Max input	Output	Max ranges
DV-1500	1500 v	1/1.5 v	11
DV-1500/25	1500 v	1.5/0.75 v	25
DV-1000	1000 v	1/1.5 v	7
DV-750	750 v	1.5 v	10
DV-500	500 v	1.5 v	6
DV-300	300 v	1.5 v	9

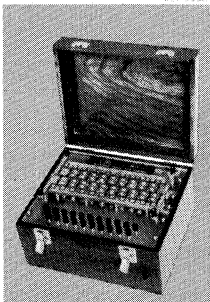
Other ranges available on request. See also Julie resistor networks page in this catalog — Type BMR, BDR, DMR.

Accuracy: 0.001%
Source loading: 1000 ohms/volt
Temp coeff: less than 1.5 ppm/°C

RESISTANCE, CONDUCTANCE AND RATIO STANDARDS

The RCS-105/7 is a primary standard for resistance, conductance and ratio. It is made up of 10 Type NB-1 standard resistors which may be connected in series, parallel, and series-parallel for complete flexibility of resistance and conductance synthesis. The elimination of leakage and interconnection uncertainties makes the RCS-105/7 a virtually error-free transfer standard. NBS-Certifiable.

RCS-105/7
0.00001% (Ratio) 0.0015% (Res/cond)



RCS-105/7	Resistor Val. (ohms)	RANGE Resistance (ohms)	RANGE Conductance (mhos)
A	1	.1 to 10	10^{-1} to 10
B	10	1 to 10^2	10^{-2} to 1
C	10^2	10 to 10^3	10^{-3} to 10^{-1}
D	10^3	10^2 to 10^4	10^{-4} to 10^{-2}
E	10^4	10^3 to 10^5	10^{-5} to 10^{-3}
F	10^5	10^4 to 10^6	10^{-6} to 10^{-4}
G	10^6	10^5 to 10^7	10^{-7} to 10^{-5}
H	10^7	10^6 to 10^8	10^{-8} to 10^{-6}

ALL MODELS: **Accuracy:** ratio 0.00001%, transfer 0.2 ppm per decade, resistance or conductance 0.0015%; **Stability:** 0.0005% absolute per year; **Temp coeff:** 5.0 ppm/°C abs, 1.5 ppm/°C rel.

Other resistance and conductance standards include the MRS-106 which is a plug-in multiple resistance standard containing 5 NB-1 resistors in oil-filled, hermetically-sealed enclosure.

See also types DMR, BMR, BDR

OVENIZED RESISTANCE, CONDUCTANCE AND RATIO STANDARDS

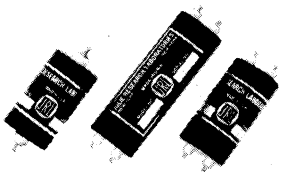
Temperature coefficient .05 PPM/°C. Model RCO-105/7 differs from the RCS-105/7 in that a temperature controlled environment encloses the various resistors so that resistance changes due to temperature variation are kept to .05 PPM/°C from 15°C to 25°C.

JULIE RESISTORS — PRIMARY STANDARD RESISTORS AND RESISTOR SETS

RESISTORS • RATIO SETS • DECADES • NETWORKS

NB-1 RESISTORS AND RESISTANCE RATIOS —

Absolute Accuracy: 0.0015%;
Ratio Accuracy: 0.0005%
NBS Certifiable



These ultra-stable, oil-immersed, primary standard resistors and ratio sets provide unequalled absolute accuracy and stability. This exceptional performance is attained through the application of special manufacturing techniques to a unique design* that makes possible efficient large-scale production of resistors to primary-standard accuracy and stability.

Individual resistors are made with accuracies up to 0.0015%, while ratio accuracy is as high as 0.0005%. Special design techniques minimize temperature coefficients, and the effects of power dissipation as well as electrically and thermally induced transients. Differential expansion and winding strains are compensated.

Up to 3 resistors may be provided in a single can. Low ohmic values are available as 4-terminal resistors.

* Covered by U.S. and Canadian patents.

SPECIFICATIONS

	Resistors	Ratios
Range:	0.1 ohm-10 megohms	up to 10^6:1
Accuracy:	0.0015% 1K-1 Meg	0.0005% (near 1:1)
Stability:	0.0015%/year	0.0005%/year
Temp. Coeff.:	5 ppm/°C (2.5 ppm/°C available)	2 ppm/°C (0.5 ppm/°C available)
Self-heating:	10 ppm/watt	Depends on individual coeff.
Voltage:	200V between term.	200V across set
Thermal Transients:	Less than 0.0005% at rated current	
Power:	Allow for temp. rise of 10°C/watt	
Construction:	Hermetically sealed in oil in metal case	

RESISTANCE — STANDARD SETS

DECADE — BINARY — BINARY-DECIMAL — 0.0015% Accuracy

These exceptionally-economical, compact and accurate resistance sets consist of appropriately proportioned groups of NB-1 Primary Standard Resistors, oil-immersed in hermetically-sealed steel cases for maximum shielding and minimum thermal effects. Very wide ranges of resistance and ratio values may be synthesized by appropriate interconnection of terminals on the top of the case.

DMR models contain 12 identical resistors; BDR models contain 21 resistors with values proportioned 1, 2, 2, 4 by decades; BMR models contain 17 resistors in a binary-coded sequence for digital-analog conversion (BMR-104S contains two identical sets of 13). In most cases, absolute accuracy of 0.0015%, **ratio accuracy of five parts per million,** are standard.

OPERATIONAL AMPLIFIER SUMMING NETWORKS

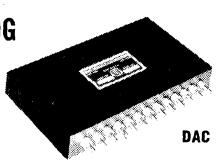
SUM

0.005% Accuracy from —55°C to +85°C

Precision high-stability input and/or feedback networks, whose components share a common design-fabrication-stabilization-test sequence, as well as a common housing medium, offering maximum practical uniformity of characteristics under wide ambient temperature swings.

Accuracy: To 0.0015% over limited temp. range
Tracking: To 0.005%, —55° to +85°C Low and/or matched phase shift—to 1/20 milliradian at 1 megohm impedance level

DIGITAL/ANALOG CONVERTER NETWORKS



DAC

0.0015% Accuracy

For high-speed, high accuracy conversion under stringent environmental conditions. Two to 36 resistors per network, hermetically sealed in metal case for full performance in military environments. Variations for specific networks, any desired code, readily available.

Accuracy: 0.0015% (isothermal); 0.005% —55° to +85°C
Range: 0 to 10 megohms
Temp. Coeff.: as low as 2.5 ppm/°C relative
Self-Heating: to 10 ppm/Watt
Speed: 0.02μsec

MIL-ENVIRONMENT RESISTOR NETWORKS

MTR

0.0015% Accuracy

High precision, maintained over the entire Military temperature range by matching coefficients. Special trimming to non-standard temperature and/or power levels, and extremely low and/or matched phase shift, readily provided.

Accuracy: to 0.0015% isothermal.
Tracking: 0.005% over MIL temperature range.
Temp. Coeff.: 2.5 ppm/°C relative.

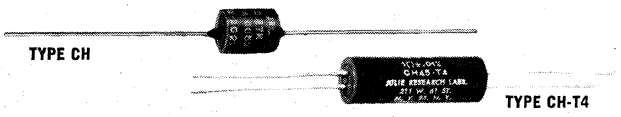
JULIE RESISTORS — PRODUCTION STYLE RESISTORS

COMPACT OIL-FILLED PRECISION RESISTORS



TYPE CH

TYPE CH-T4

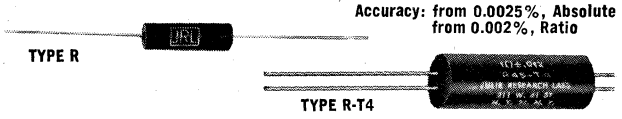
Absolute Accuracy from 0.002% • **Ratio Accuracy from 0.0015%**

An outgrowth of the proprietary techniques established by JRL in developing the now-widely-known NB-1 Primary Standard Resistor, these economical, compact, oil-filled, hermetically-sealed units make it possible for the first time to incorporate standards-laboratory accuracy and stability into commercial and militarized equipment intended for operation over extremes of environmental stress. Operating reliably over the ambient temperature range from —45°C to +85°C, essentially immune to aging, drift, or deterioration from influences such as humidity, salt spray, fungus, or dust, CH resistors bring a new degree of freedom, with economy, to today's critical equipment designs. The CH-T4 further incorporates four-terminal construction, permitting use of extremely low resistance values with complete elimination of lead resistance uncertainties. Low-reactance type HCH also available, for carrier-frequency or high-speed pulse applications.

Range: 0.1 ohm - 5 megohms. (Ratio sets, 1:1 to 10^6:1). 4- terminal construction recommended whenever R x % tolerance is 1 milliohm or less.
Standard Accuracy: 0.005%. Ratio sets, 0.0025% for ratios near 1:1 Accuracies from 0.002% to 0.1% also available, at corresponding prices.
Stability: 0.002% (2-terminal), 0.003% (4-terminal) per year.
MIL Conditions: —45°C to +85°C: ±0.02% Accuracy, ±0.005% Matching, ±0.002% Retrace.
Temp. Coeff.: Resistors, 5 ppm/°C (1.0 ppm/°C available)
Ratios 2.5 ppm/°C (0.7 ppm/°C available)
Current: Up to 2 amperes
Voltage: 300V across terminals, 500V to case
Reactance: Style HCH offers minimum and/or matched-phase shift.
Sizes: ⅜" or ½" diam., ½ to 2" long.

AXIAL-LEAD, COMPACT ENCAPSULATED PRECISION RESISTORS

Accuracy: from 0.0025%, Absolute from 0.002%, Ratio



TYPE R

TYPE R-T4

Unique basic design, special manufacturing techniques, make possible the efficient, large-scale production of these encapsulated resistors with reliabilty and uniformity previously attained only by individual selection and calibration. Their high accuracy and stability, wide range, low cost, enable significant improvement in equipment reliability and performance, plus savings in size, weight, complexity, man-hours, and material. Special characteristics are readily provided —low or matched reactance, arbitrary or matched coefficients, intermediate accuracies of 0.05% and better. Four terminal Type R-T4 provides extremely low resistance values, eliminates lead resistance uncertainties.

Range: 0.1 ohm - 10 megohms (Ratios, 1:1 to 10^6:1)
Standard Accuracy: 0.01%, 1 ohm to 5 megohms (Ratios, 0.005% for ratios near 1:1) Accuracies from 0.0025% to 0.05% also available, at corresponding prices.
Stability: 0.003% per year for standard ranges.
MIL Conditions: —45°C to +85°C: 0.02% Accuracy, 0.005% matching, 0.003% Retrace.
Temp. Coeff.: Resistors, 5 ppm/°C (1.0 ppm/°C available)
Ratios, 2.5 ppm/°C (0.7 ppm/°C available)
Power Ratings: To 250 volts (1000V on special order), to 2 amperes, to 2 watts.
Sizes: ¼" to ½" diam., 5/16" to 2" long.

TOP-HAT ENCAPSULATED PRECISIOIN RESISTORS, FOR PRINTED CIRCUIT BOARDS

Absolute Accuracies from 0.0025%

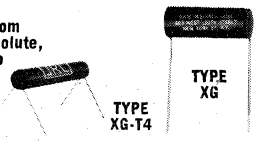
Ratio Accuracies from 0.002%

TYPE RS

Julie Type RS resistors offer still another configuration in which the high accuracy, high stability, and broad range of values of JRL encapsulated premium resistors are made available for efficient economical incorporation into your equipment designs. Ratings are the same as listed for Type XG above, with a range from 1 ohm to 750K ohms, and a ¼ watt power rating, packaged in the familiar top hat form shown above. With a diameter of 13/32" and a ½" length.

RADIAL-LEAD, ENCAPSULATED PRECISION RESISTORS

Accuracies from 0.0025% Absolute, 0.002% Ratio



TYPE XG

TYPE XG-T4

Mass-produced radial-lead encapsulated resistors, offering a reliability and uniformity heretofore available only in individually selected and calibrated units. Material control and processing methods minimize aging, drift, and environmental influences such as humidity, salt spray, shock, and vibration. Their unusual reliability in MIL environments particularly recommends these resistors for use in critical military equipment. High accuracy and stability, wide range, and low cost, are standard; special characteristics — low or matched reactance, arbitrary or matched coefficients, intermediate accuracies, are readily provided. 4-terminal (XG-T4) units offer very low resistances, without lead resistance uncertainties.

Range: 0.1 ohm to 10 megohms (Ratios, 1:1 to 10^6:1)
Standard Accuracy: 0.01% (1 ohm to 5 megohms). Ratios, 0.005% for ratios near 1:1. Accuracies from 0.05% up available at correspondingly lower costs.
Stability: 0.003% per year for standard ranges.
MIL Conditions: —45°C to +85°C: 0.02% accuracy, 0.005% matching, 0.003% Retrace.
Temp. Coeff.: 5 ppm/°C (1.0 ppm/°C available)
Ratios, 2.5 ppm/°C (0.7 ppm/°C available)
Power Ratings: To 250V (1000V on special order), to 2 amperes, to 2 watts.
Sizes: ⅜" to 5/8" diameter, 5/16" to 2 1/16" long.

LOW REACTANCE ENCAPSULATED PRECISION RESISTORS

Accuracies: from 0.0025%, Absolute from 0.002%, Ratio

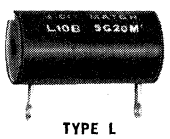
TYPE H

Type H resistors feature a unique low-reactance construction, markedly superior to conventional "Ayrton-Perry" designs. It facilitates extremely tight control of both the inherent inductance and shunt capacitance, as well as the internal geometry of the resistor, so that quadrature-error specifications of ±0.01% can easily be met without resorting to trimming adjustments. Minimum phase shift, or matched phase shift, applications at carrier frequencies, and high-speed pulse applications, are particular provinces of the Type H.

Range: 1 ohm - 5 megohms. Ratios, 1:1 to 10^6:1.
Standard Accuracy: 0.01%, 100 ohms - 5 megohms. Ratios, 0.005% for ratios near 1:1. Intermediate accuracies of 0.05% available, at correspondingly lower costs.
Stability: 0.003% per year, for standard ranges.
MIL Conditions: —45°C to +85°C: 0.02% accuracy, 0.005% matching, 0.003% Retrace.
Temp. Coeff.: 5 ppm/°C (1.0 ppm/°C available)
Ratios, 2.5 ppm/°C (0.7 ppm/°C available)
Power Ratings: to 1000 volts, to 2 amperes, to 2 watts.
Sizes: ⅜" to ½" diameter, ½" to 2" long. Axial wire leads.

RADIAL LUG ENCAPSULATED PRECISION RESISTORS

Absolute Accuracy from 0.0025%
Ratio Accuracy from 0.002%



TYPE L

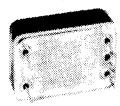
Equivalent to MIL resistor sizes RB 16, 17, 18 and 19 (per MIL-R-93). Julie Type L encapsulated resistors feature radial lug construction, and uniquely-high performance standards under military environmental conditions. Humidity, salt spray, shock, vibration, aging, drift, and other influences are drastically minimized by JRL processing and manufacturing techniques. The unusual reliability exhibited by Type L resistors over the ambient temperature range from —45°C to +85°C makes them particularly well-suited for use in military equipment, and their low cost makes it practical to undertake new orders of precision in quantity-production of instrumentation and equipment for rigorous field use.

Range: 1 ohm to 10 megohms (See Julie Type GL for ratios).
Standard Accuracy: 0.01%, 100 ohms to 5 megohms. Intermediate accuracies, 0.05% and up, and higher accuracies available at corresponding prices.
Stability: 0.003% per year, for standard range.
MIL Conditions: —45°C to +85°C: 0.02% Accuracy, 0.005% Matching, 0.003% Retrace.
Temp. Coeff.: 5 ppm/°C (1.0 ppm/°C available)
Power Ratings: To 300V, to 2 amperes, to 2 watts
Sizes: 5/8" to 1" diameter, 5/16" to 2 1/32" long

JULIE RESISTORS — SPECIAL PURPOSE RESISTORS AND CURRENT SHUNTS

PREMIUM RESISTORS • RESISTOR NETWORKS

MINIATURE (LOW-PROFILE) OIL FILLED PRECISION RESISTORS FOR PRINTED CIRCUITS



TYPE PC

Absolute Accuracy from 0.002%
Stability per Year from 0.0015%

Developed specifically for printed circuit applications, the Type PC network represents another advancement in the state-of-the-art of precision resistance manufacture. These economical, miniature oil-filled, hermetically-sealed units, intended for direct manual or automatic insertion into standard-grid terminal arrangements on printed-circuit boards, are an ideal means of incorporating standards-laboratory accuracy into commercial and militarized equipment using plug-in, modular construction, and intended for operation over extremes of environmental stress.

The materials and manufacturing processes used ensure a unit essentially immune to aging, drift, and environmental deterioration. The metal shell of the PC permits mounting on an appropriate heat sink, thus increasing its power-dissipating ability, decreasing its thermal time constant, and yielding a self-heating coefficient as low as 0.0025% per watt. Its performance over the Military temperature range, and its freedom from the effects of humidity, altitude, salt-spray, fungus, dust, as well as its resistance to shock and vibration, recommend it for the toughest military assignments. Sealed-in-glass terminals provide connection to 4-terminal or two 2-terminal resistors, and to the case (which may thus be grounded, guarded or floated). Low reactance type HPC also available, for low and/or matched phase shift applications, and high-speed pulse use.

Range: 0.1 to 2 megohms. Ratio sets 1:1 to 10^6 to 1.
Standard Accuracy: 0.005%, 1000 ohms to 1 megohm. Ratios, 0.0025% for ratios near 1:1. Accuracies from 0.002% to 0.01% also available, at corresponding prices.
Stability: 0.002% per year.
MIL Conditions: —45°C to +85°C: 0.02% Accuracy, 0.005% Matching, 0.002% Retrace.
Temp. Coeff.: 5 ppm/°C (1.0 ppm/°C available)
Ratios, 2.5 ppm/°C (0.5 ppm/°C available)
Power Ratings: To 300 volts, to 2 amperes, to 1 watt
Size: 1¾₄" long, 5⁷⁄₆₄" wide. Seated height, ½".

RC INTEGRATING NETWORKS

0.01% Accuracy

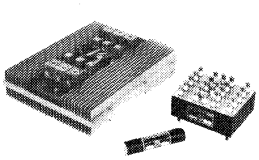
RC NETWORK

JRL fabrication processes, in effect, permit utilizing all of the stability and accuracy performance advantages of Julie resistors so as to produce RC products having higher inherent precision and reliability than can be obtained with the finest capacitors.

A selected, aged, trimmed capacitor is measured for acceptably-low temperature retrace, voltage retrace, leakage and dielectric absorption; appropriate resistors are then wound, trimmed, and stabilized so as to produce an essentially equal and opposite temperature coefficient, and the exact RC product required. No trimming adjustments whatsoever are required in use, to achieve specified performance. (If the customer wishes to specify a trimming rheostat, for setting the RC product after assembly, allowance can be made in the network resistance, to accommodate that facility.)

Absolute Time Constant Accuracy, 25°C: ±0.01%
Max. Temp. Coeff. of RC Product: ±15 PPM/°C
Max. Voltage Retrace: (5 cycles of 150 volts for 30 minutes): ±0.0005%
Max. Temp. Retrace: (Five 4-hr. cycles, —10°C to +71°C): ±0.01%
Max. 1-yr. drift in RC product: ±0.01%

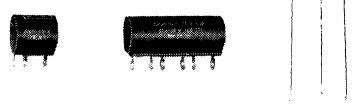
PRECISION HIGH CURRENT SHUNTS MODEL CS-106



Three configurations of precision compact high current shunts are offered in values of .001 to 1.0 ohms and cover a range from 0 to 50 amps. When used in conjunction with nanovolt potentiometer PVP-1001J and Direct Reading ratio set DRRS-108, these shunts permit up to .0025% DC measurements at 10 amps. The temperature coefficient is 5ppm and power coefficients are in the range of .05 ppm to 5 ppm/watt.

GROUP-ENCAPSULATED PRECISION RESISTORS RADIAL-LEAD OR RADIAL-LUG TERMINALS

Absolute Accuracy from 0.002%

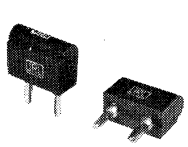


TYPE GL

The proprietary construction techniques responsible for the uniquely-accurate JRL wire-wound resistor lend themselves equally well to the production of group-encapsulated units. The Type GL offers distinct advantages in applications that demand not only a high absolute accuracy in resistance or resistance-ratio values, but also a high degree of uniformity in long-term performance under varying environmental conditions. Simultaneously manufactured and processed, the individual resistors exhibit a high degree of intrinsic uniformity; simultaneously encapsulated in a common medium, their uniformity is perpetuated throughout the encapsulation curing, and conditioning processes, and persists during installation and extended operation in the end equipment, since all environmental influences are experienced to the same degrees, under identical conditions. In most instances, the accuracy and stability of these combinations eliminate the need for "trimming" potentiometers, with appreciable savings in total material cost, labor cost, size, and complexity, besides a significant improvement in reliability and equipment performance. The Type GL is available in radial-lug and radial-wire-lead configurations, as well as in low-reactance (Type HGL) form for carrier-frequency or high-speed-pulse applications.

Range: 1 ohm to 5 megohms. Ratios, 1:1 to 10^6:1
Standard Accuracy: 0.01%, 100 ohms to 5 megohms (available to 0.0025%) Ratios, 0.005% for ratios near 1:1 (available to 0.002%)
Stability: 0.003% per year. Ratios, 0.002% for ratios near 1:1 (Higher stabilities available on order)
MIL Conditions: —45°C to +85°C: 0.02% Accuracy, 0.002% Retrace. Ratios, 0.01% Accuracy, 0.001% Retrace.
Temp. Coeff: 5 ppm/°C (1 ppm/°C available)
Ratios, 2.5 ppm/°C (0.7 ppm/°C available)
No. Resistors Per String: 2 to 10, depending on resistances required.
Power Ratings: (per Section): to 300 Volts, to 2 amperes, to 1 watt
Sizes: 5⁄₁₆" to 5⁄₈" diameter, length according to resistance required.

PLUG-IN STANDARD RESISTORS



A complete line of precision encapsulated standard resistors with banana plug termination on ¾" centers is available at values from one ohm to 2 megohms.

Encapsulated in high temperature epoxy. Designed for use as standards, bridge resistors and as very accurate and very stable components for high precision test and measurement instruments and production equipment.

The units are designed to fit any standard insulated double connector having binding posts at ¾" spacing between center lines. Overall dimensions are 1¹¹⁄₁₆"h x 1⁵⁄₁₆"w x 2¹⁄₃₂"d. The resistor housing measures ³¹⁄₃₂"h x 1⁵⁄₁₆"w x 2¹⁄₃₂"d.

See Type L for performance specifications.

Shock	±.01	.0008	.0010
Vibration	±.01	.0007	.0020

HIGH RELIABILITY "HRL" SERIES

Kelvin's "HRL" Series Resistors were designed to achieve a failure rate of .005%/1000 hours at a 90% confidence level. All data is based on life tests conducted at full rated power at 125°C for a minimum of 1500 hours. No "acceleration factors" are used. Present failure rates are .006%/1000 hours at a 60% confidence level.

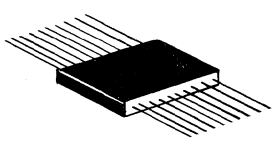
"RT" style resistors provide exceptionally high frequency performance, in addition to the other recognized advantages of wire-wound resistors. □ "RT" resistors can be supplied with rise times as low as 25 nanoseconds (from 10% to 90% of peak pulse amplitude with a 100 KC pulse input), depending on resistance values and physical configurations.



RESISTOR NETWORKS

Kelvin develops and produces, to customer requirements, packaged resistor networks for use as voltage dividers, analog to digital converters, summing and integrator networks, binary resistive networks and special configurations.

Electrical Characteristics Available:

- Nominal resistance tolerances to ±.002% (DC)
- Resistance ratio tolerances as close as .0005% (DC)
- Long term resistance stability of ±.001% per year.
- Low reactances to provide rise times as low as 25 nanoseconds.
- Temperature coefficients of resistors track as close as 0.5 ppm/°C. from —55° to +125°C.

Standard resistor networks in two series (R-2R and BCD) are available from catalog specifications. The potting, encapsulation and physical size flexibility of Kelvin resistors and case production techniques makes it possible to offer custom built units to exact customer requirements at reasonable prices. Our engineering department will review your requirements and submit price quotation and technical notes. 12-page Bulletin LN-37 available on request.

REED RELAYS

Kelvin offers a broad line of reed relays for reliable, fast switching applications. These feature 1 AMP contacts (10 watts), switching speeds to .5 MS, coil voltages to 48 VDC, and completely encapsulated printed circuit board packages.

POWER RESISTORS

Kelvin manufactures a complete line of precision power resistors in wattages from .25 to 15 watts with a "V" characteristic rating at 350° C. We also offer beryllium core subminiature power resistors and chassis mount resistors from 5 watts to 50 watts. An ultra high wattage series, to 5000 watts, is available in round or corrugated wire configurations. Ask for Catalog PR-711.

"RIB-ON-EDGE" RESISTORS

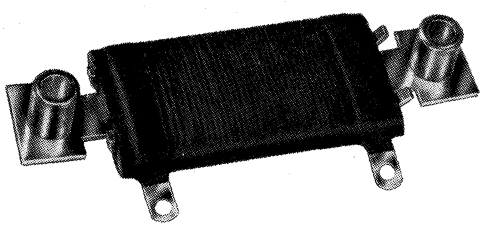
Rib-on-edge resistors are made to order for high wattage service where low resistances are required. They are also used for intermittent duty where relatively small size resistors must dissipate high wattages.

Rib-on-edge resistors are constructed of special alloy ribbon resistance wire crinkled and wound on edge around a tubular ceramic core. The resistance element is welded to a heavy terminal. The entire assembly is then secured to the ceramic tube by a special high temperature vitreous enamel. This type of resistor is classed as a "bare" resistor by NEMA and Underwriters' Standards and has a 375°C maximum operating temperature. The higher temperature rise permits the higher rating.

Rib-on-edge resistors can be made in fixed, adjustable, or tapped styles.

* Maximum resistances can be increased 25% with Lectrohm's unique full-crinkle winding.

Order by series number and resistance required.
(ROE followed by watts and ohms.)
OTHER SIZES CAN BE MADE TO FIT YOUR REQUIREMENTS.



LECTROHM OVALS

Flat- or oval-core type units have an oval cross section and are mounted by flat brackets of "stud type" for stacking, or "step brackets" for normal mounting. The mounting bracket is constructed of aluminum which acts as a heat sink and makes the higher wattage rating for the size core. They are available with ceramic silicone coating.

Miniature Oval	XOVMS Series				Core Size 3/8 x 1/8
Free Air Watts	Resistance Min.	Max.	L	A	B
10	1	15K	3/4"	1"	7/16"
15	1	25K	1"	1 1/4"	7/16"
20	1	40K	1 1/2"	1 3/4"	7/16"
25	1	50K	2"	2 5/16"	7/16"

Step bracket (push-on) is not applicable.

Standard Oval Stacking Bracket	XOVS Series				Core Size 1 x 1/4
Free Air Watts	Resistance Min.	Max.	L	A	B

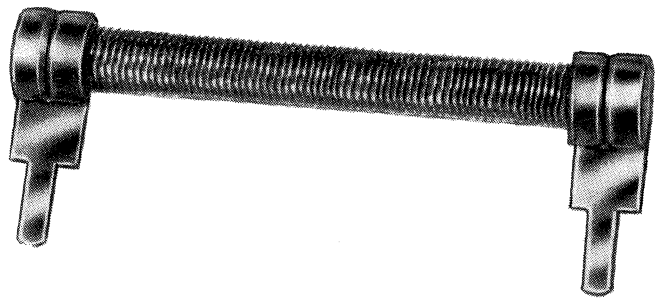
Lectrohm

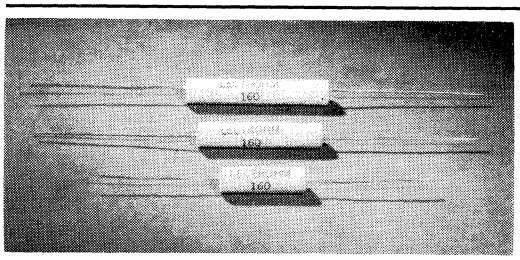
TYPE FP RESISTORS

Lectrohm type FP power resistor is one of the lowest cost power resistors available for printed circuit board applications.

The resistance element is tightly wound with premium quality resistance wire on fiberglas cores. Tinned steel terminals are clinched to the resistance element by automatic machines.

Terminals are designed to be inserted in 0.050″ or 0.070″ diameter holes. Center-to-center distance of prongs on terminals are variable from 0.5″ to 2.5″. Power rating is 4 watts per inch and resistance range is from 0.2 ohms per inch to 1,000 ohms per inch.



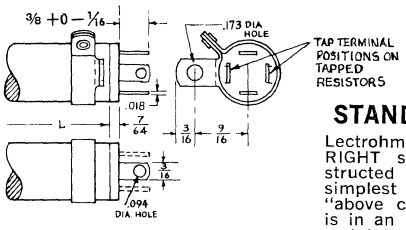


Lectrohm's SAC Series contains the patented fiberglas element from the FLU Series inclosed in a ceramic tube. The tube is then filled with quartz and the ends are sealed with humidity resistant silicone. SAC's are also available with "fuse weld" construction upon request.

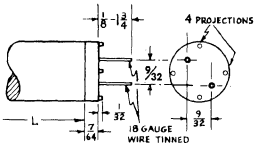
SAC SERIES

Series	Dim.	Watts	Max. Res.
SAC5	5/16 x 1	5	2,000 ohms
SAC7	5/16 x 1½	7	3,000 ohms
SAC10	5/16 x 1¾	10	4,000 ohms

SOLDER LUG TYPE

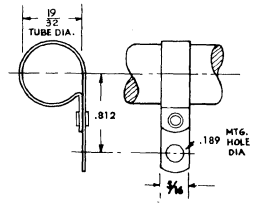


PRINTED CIRCUIT



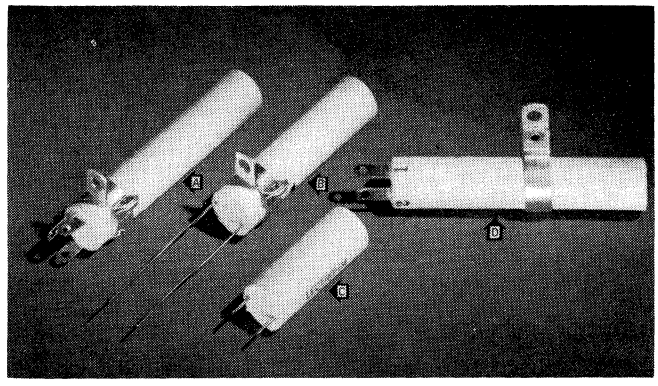
HORIZONTAL MOUNTING BRACKET

Catalog No. 53163



STANDARD UPRIGHT

Lectrohm's STANDARD UPRIGHT style resistor is constructed so as to present the simplest form of mounting for "above chassis." The element is in an insulated shell with a metal bracket having a single mounting hole. The terminals can be wire leads, solder lugs, or spaced wire leads for printed board use. Intermediate taps on the windings are available.



RESISTOR SPECIFICATIONS

Pigtail Type Series	Lug Type Series	Printed Circuit Series	Horizontal Mounting Series	Length L	Watts	Max. Res.
UC10	UE10	UP10	UM10	1½″	10	5,000 ohms

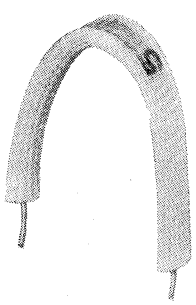
UC20	UE20	UP20	UM20	2½″	20	10,000 ohms
UC25	UE25	UP25	UM25	3″	25	12,500 ohms
UC30	UE30	UP30	UM30	3½″	30	15,000 ohms

Order by series number and resistance required.



LECTROHM FLEXIBLES

LECTROHM STANDARD FLEXIBLES (FLU Series) are fixed wirewound resistors that can be used in small, confined spaces, and, being flexible, can be bent to conform to the available space. The are wound on a specially treated flat fiberglas core and insulated by a fiberglas sleeve. Free air rating is 2 watts per inch with the surface temperature at the hottest spot not exceeding 340°F. The terminals are hot tinned brass clamped to the resistance element so securely that they will stand a 10 pound pull applied axially. Lead wires are hot tinned 18, 20 and 22 gauge, 1⅜ inches. long.

The sleeved or insulated type is the FLU Series. It is also available without sleeving (bare element) in our ELE Series.

Maximum resistance is 2000 ohms per inch of winding and minimum resistance is 0.2 ohms per inch. Fuse-weld construction is limited to 750 ohms per inch.

SPECIALISTS IN PRECISION WIRE WOUND RESISTORS AND NETWORKS

PRECISION RESISTOR HIGH DENSITY NETWORKS. Summing Networks, Voltage Dividers, RC Networks, Ladder Networks, Voltage Reference, Binary Coded Networks, Temperature compensated networks—all form factors, Hermetic seal oil filled networks, encapsulated networks.

SUBMINIATURE PRECISION WIRE WOUND RESISTORS. Axial lead resistors .093 x .188. Printed circuit resistors—down to .188 x .312.

HIGH SPEED PRECISION RESISTORS. Fast rise times in the area of 50 nanoseconds depending on size and value. Ideal for switching or pulse circuits.

MATCHED TEMPERATURE COEFFICIENTS. Similar or dissimilar values can be tracked to within 1 ppm/°C over expanded temp range.

AC MATCHING. Precision resistors networks suitable for operation at a specific frequency or frequency ranges.

LOW TEMPERATURE COEFFICIENTS. As low as 1 ppm/°C from −55°C to +125°C.

TEMPERATURE COMPENSATING RESISTORS. Resistors can be supplied with any T.C. from −45ppm to +6000ppm. Excellent for cross compensation with R.C. combinations.

HIGH STABILITY PRECISION WIRE WOUND RESISTORS. Documented stability of better than .003% per year. Specially developed loose winding techniques and cycling procedures provide a stress-free completely stable winding.

HIGH ACCURACY. .0025% available on most sizes on a production basis.

PROVEN RELIABILITY. Continuous program covering several years with accumulated life test and environmental test data.

OIL-FILLED RESISTORS. For the ultimate in stability with time and temperature. Oil-filled resistors and resistor networks are completely cushion wound and stress relieved.

- MIL-R-93D TYPES
- POPULAR MARSTAN STYLES

The full line of Marstan Precision Wire-Wound Resistors includes MIL-R-93D Military types and a wide variety having different form factors, sizes and lead types, only a few of which are shown. At no increase in cost, we will custom design a Resistor to suit your specific application. Voltage ratings can vary even within a given size. All parts are cushion wound and encapsulated to meet or exceed the most stringent environments.

All Resistor Types and Series available in tolerances of 1%, .5%, .25%, .1%, .05%, .01%, .005% and .0025%.

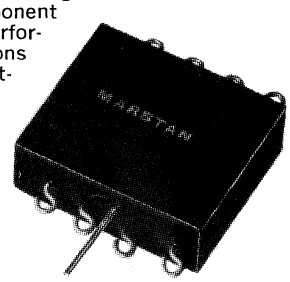
RC NETWORKS
NOW FOR THE FIRST TIME

in one facility, Balco-Marstan combines manufacturing capabilities in Precision Film Capacitors and Precision Wire-Wound Resistors.

TEMP. RANGE	NOMINAL TIME CONSTANT	CLOSEST INITIAL TOLERANCE	RC PRODUCT STABILITY AFTER TEMP. CYCLING	RC PRODUCT VARIATION WITH TEMP.
—55°c To +85°c	1.0 μ sec. to 100 sec.	±0.03%	±0.03%	0±25ppm/°c
	101 μ sec. to 1m sec.	±0.03%	±0.03%	0±15ppm/°c
	1.1 m sec. to 5 sec.	±0.02%	±0.02%	0±10ppm/°c
—55°c To +125°c	5.1 sec. to 20 sec.	±0.03%	±0.03%	0±15ppm/°c
	100 μ sec. to 1 ms	±0.04%	±0.04%	0±20ppm/°c
	1.1 m sec. to 5 sec.	±0.03%	±0.03%	0±15ppm/°c
	5.1 sec. to 20 sec.	±0.05%	±0.05%	0±30ppm/°c
	21 sec. to 200 sec.	±0.15%	±0.15%	0±50ppm/°c

It is no longer necessary to purchase separate components whose compatibility is a matter of chance. Attempting to closely match dissimilar parts is expensive and risky. AT BALCO-MARSTAN WE ARE SPECIALISTS. Your RC application will be reviewed by a staff experienced in the pitfalls of network design.

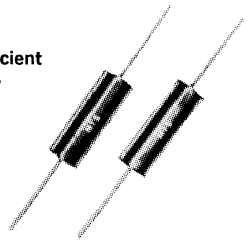
Our unique side by side processing insures the ultimate in component compatibility and over-all performance. Our files of applications include Integrators, Phase Shifters, Oscillators, Twin-T Filters, etc.

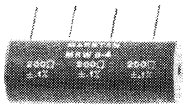


RC product accuracy and stability is dependent on practical restraints on the individual components and, to aid the circuit designer in realistically computing system accuracy, the table (at left) has been developed.

SPECIAL RESISTOR STYLES

"MTS" Series are temperature-sensitive resistors with **matched temperature coefficient characteristics** for temperature indicators, cold junction compensators for thermocouples, diode ballasts and other current limiting devices. Special linear and non-linear temperature-resistance characteristics available with Marstan techniques. Resistance temperature coefficient matches are possible within 1 ppm/°C over the temperature range.





Special Multi Tap Precision Resistors, which serve where space requirements are critical, may be ordered. Ease of installation can greatly reduce manufacturing costs.

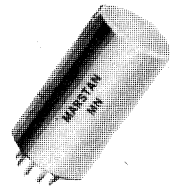
THESE ARE TWO OF THE MANY CONFIGURATIONS AND SPECIAL STYLES AVAILABLE. WE ALSO MANUFACTURE A WIDE RANGE OF HIGH SPEED AND TEMPERATURE SENSITIVE RESISTORS.

MARSTAN OIL-FILLED RESISTORS—"MOA" SERIES

Through the selection of materials and unique manufacturing techniques, Marstan Oil-Filled Resistors ("MOA" Series) are available in stabilities of .0025%, absolute accuracies of .0025% and matched tolerances of .001% are available.

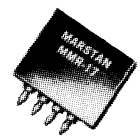
Data supplied upon request.

PRECISION NETWORK ASSEMBLIES

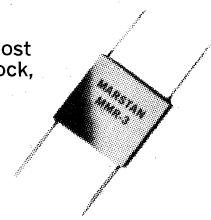


Marstan networks are manufactured in a multitude of shapes, sizes and terminal configurations.

Utilizing the most sophisticated methods of packaging and circuit design, it is possible to provide matched resistors with nominal tolerances of .0025% **matched to each other** to .001%. In addition, special techniques allow for exact tracking over wide temperature ranges.



Marstan is a specialist in the use of foams, epoxy, polyester, polyurethane or various controlled inert atmospheres. Special formulations are available to meet the most severe environmental specifications of shock, vibration, humidity, salt water immersion as well as ambient temperatures from —75°C to 250°C.



TYPICAL APPLICATION AREAS ARE —RC NETWORKS, R2R BINARY LADDERS, SUMMARY NETWORKS, VOLTAGE DIVIDERS, INTEGRATORS, BRIDGES, CONVERTERS, TIMING NETWORKS, ZENER COMPENSATION NETWORKS, ETC.

For more complete data on precision network assemblies, ask for Marstan Catalog P-7.

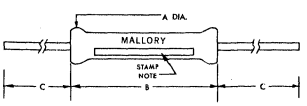
METAL OXIDE FILM RESISTORS — MOL

The MOL axial lead type resistor consists of an oxide film bonded to a ceramic base at a high temperature. Resistance spiralling of the oxide film is controlled electronically. End caps, equipped with welded axial leads, are fitted under pressure to the ceramic base.



Type	Resistance Min.	Resistance Max.	Std. Tol.	Diameter A	Length B	Length of Leads C	Power Rating Watts	Power Rating Ambient

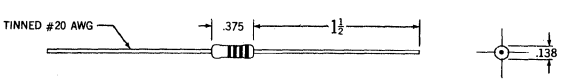
Leads Available in 17 or 20 AWG

SEMI-PRECISION METAL ALLOY RESISTORS

The Mallory MAL-20 ½ watt (70°C) is an axial lead semi-precision metal alloy film resistor designed for use in computers, industrial instrumentation, color television and other entertainment products.

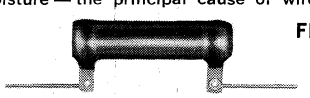
Resistance range of the MAL-20 is 47 ohms to 470 K ohms. Standard tolerance is ±2% and ±5%. The ½ watt power rating of the MAL-20 is derated linearly to 150°C. Maximum rated voltage is 350 VDC. Temperature coefficient of ±100 PPM/°C and ±150 PPM/°C. Dielectric withstanding voltage 750 volts RMS.

The MAL-20 meets or exceeds the requirements of MIL-R-22684. The unit is moisture resistant epoxy coated and color coded to industry standards. It is available in bulk packaging or with reel lead taping.



VITREOUS ENAMEL RESISTORS

The coating on Mallory wire-wound resistors is a special vitreous, non-alkaline, non-hygroscopic enamel prepared under controlled conditions, applied in uniform thickness and vitrified at carefully regulated temperatures. The core is completely sealed by a durable, glass-like coating that is impervious to moisture — the principal cause of wire corrosion.



Wattage	Style	Resistance Range (Ohms)	Dim. A
5	HHJ	1 to 5,000	1"

AXIAL LEAD FIXED STYLE AE

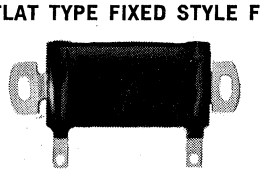
Style "AE" axial lead resistors are for application in industrial and electronic devices, including military and other special electronic equipment.

These resistors are made of the highest quality ceramic core, resistance wire and vitreous enamel coatings available.

TABLE OF MADE TO ORDER RESISTORS — AXIAL LEAD FIXED — VITREOUS ENAMELED

Free Air Watt Rating	Overall Length	Overall O.D.	Minimum Resistance	Maximum Resistance	Equivalent MIL-R-26 Style
3	9/16	¼	0.1	10,000	RW59
5	1	11/32	0.1	25,000	RW57
10	1¾	13/32	0.1	50,000	RW58

FLAT TYPE FIXED STYLE F



The flat design of the Mallory flat style vitreous enamel wire-wound resistors makes these resistors especially adaptable to design requirements where space is at a premium, for they fit well into stack-mounting requirements. A strong ceramic core is used, uniformly wound to prevent "hot-spots," and coated with a moisture resistant vitreous enamel for a dependable, longer operating unit.

There are five conservatively rated wattages available. The resistance ranges from 1 to 100K ohms.

TABLE OF MADE TO ORDER RESISTORS —FLAT FIXED TYPE

Free Air Watt Rating	Core Length	Core Width	Core Thickness	Minimum Resistance	Maximum Resistance	Equivalent MIL-R-26 Style
30	1¼	1	1/64	0.1	10,000	RW20

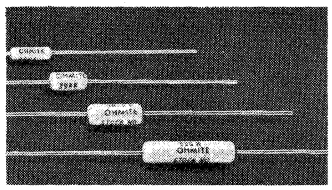
SERIES 99 MOLDED AXIAL LEAD VITREOUS ENAMELED RESISTORS

- **FIRST MOLDED, WIREWOUND, VITREOUS ENAMEL RESISTOR**
- **INSULATED! Meets 1000 VAC Test**
- **WITHSTANDS 1500°F Temperature without Distortion**
- **RESISTS Chipping, Breaking**
- **VITRIFIED MARKINGS, Resist Abrasion and Active Solvents**
- **UNIFORM SIZE Permits Clip-Mounting with Significant Heat Sink Benefits**
- **HIGH OVERLOAD CAPABILITY**

An exclusive technique (U.S. Patent No. 3,229,237) permits application of the vitreous enamel coating by **molding** instead of the conventional "dip" process. The dimensionally consistent and thicker coating that results, guarantees a 1000 VAC insulation rating plus unparalleled capability for withstanding very high temperatures, high humidity and immersion in salt solution.

These resistors are normally mounted by their axial leads. However, their consistent form also permits mounting in clips with heat sink benefits up to 100%. Resistor markings are also vitreous and will not burn off even under extreme overloads. Resistance tolerance is ±5%. Series 99 resistors meet the requirements of MIL-R-26 for "insulated" resistors. See Bulletin 103 or Catalog 50 for specific MIL types.



TYPE 994, COMMERCIAL, HIGH STABILITY

Standard Tolerance 3% • Tolerances to 0.25% Available

Type 994 units feature long term stability and the Series 99 low temperature coefficient of resistance (T.C.).

Stability: Type 994 resistors, on a 2000 hour, cyclic, load-life test (1½ hour on, ½ hour off) have less than ±2% △R.

Standard Tolerance for Type 994 resistors is ±3%. Tolerances to ±0.25% are available.

Ohmite Style	Rated Watts @ 25°C	Dimensions (inches) Lgth. ±.015	Dia. +.031 −.000	Leads 1½" AWG	Typ. Wt. (g's)	Resistance Range (Ohms)	Max. Wkg. Volts RMS

* Tolerance ±.015, −.005. † For closer tolerances than 1%, minimum value is 1 ohm. ‡ AWG 20 = .032″; AWG 24 = .020″.

TYPE 991 FOR MILITARY APPLICATIONS

Meets the requirements of MIL-R-26E, Styles RW67V, RW68V and RW69V (350°C max. hot spot). Surpass the stability requirements of ±3% ΔR on the 2000 hour cyclic load-life test. The low TC of Series 99 units far surpasses the requirements of MIL-R-26E. Standard resistance tolerance is ±5% for values 1 ohm and above; below 1 ohm, ±10%; other tolerances can be supplied.

TYPE 884 HIGH STABILITY, PRECISION-POWER TYPE

Type 884 resistors (Riteohm 88) are classified as high stability, precision-power types. They are aged and conservatively rated for maximum long term stability and exhibit superior characteristics despite relatively high operating temperature at rated wattage.

Type 884 units are available in tolerances of 0.05% and derate † to zero watts at 275°C ambient; T.C. = 0 ±ppm/°C; insulation tested at 1000 VAC except 500 volts for 1 watt size.
† For applications where maximum stability is of primary importance as may be the case with close tolerance resistors, a derating of 50% is recommended.

STANDARD TOLERANCES TO .05% AVAILABLE FOR VALUES 1 OHM AND ABOVE

TUBULAR VITREOUS ENAMELED RESISTORS

TYPE 200, BROWN DEVILS

"BROWN DEVIL" (Type 200) vitreous enameled, wirewound resistors, have been an industry byword for small rugged power resistors. Compact, with surprising overload capability. Five sizes are stocked in a broad selection of values.

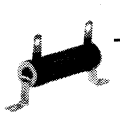
Ohmite Style	Rated Watts	Dimensions Lgth.	Dia.	Leads 1½" AWG	Resistance Range (Ohms)
200-3	3	7/16	.200	20	1.0 to 10K
200-5¼	5¼	5/8	¼	20	1.0 to 20K
200-8	8	1	5/16	18	1.0 to 25K
200-12	12	1¾	5/16	18	0.5 to 50K
200-20	20	2	7/16	18	0.5 to 100K

TYPE 270, FIXED, RADIAL LUG

Lug type resistors are wire-wound on high quality ceramic cores, protected and insulated by Ohmite vitreous enamel.

Wire of finest alloy and largest possible size is used for each resistance. Original uniform close spacing of the turns maintained by anchoring effect of the vitreous enamel. Wire securely welded to the terminal lugs. Resistance tolerance: ±5% for values 1 ohm or higher; ±10% below 1 ohm.

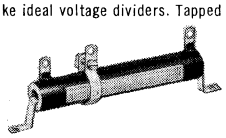
Wattage ratings are for use in free air. When mounted in closed spaces or where circulation of air is restricted, they should not be used at more than one-half rating.



Ohmite Style	Rated Watts	Core Dimensions Lgth	Dia.	Resistance Range (Ohms)
270-12	12	1¾	5/16	.51 to 51K
270-25	25	2	5/16	1 to 100K
270-50	50	4	5/16	1 to 250K
270-100	100	6½	¾	1 to 100K
270-175	175	8½	1⅛	1 to 100K
270-225	225	10½	1⅛	1 to 100K

TYPE 210, "DIVIDOHM®" ADJUSTABLE

"Dividohm" resistors make ideal voltage dividers. Tapped "bleeders" are made by using one or more adjustable lugs, as required. Also useful for obtaining odd resistance values.



"Dividohm" resistors are vitreous enameled resistors on which a narrow strip has been left uncovered to expose a portion of each turn. Contact is made by an embossed contact on the adjustable lug.

Ohmite Style	Rated Watts	Core Dimensions Lgth.	Dia.	Resistance Range (Ohms)
210-12	12	1¾	5/16	1 to 10K
210-25	25	2	5/16	1 to 25K
210-50	50	4	5/16	1 to 100K
210-75	75	6	5/16	1 to 100K
210-100	100	6½	¾	1 to 100K
210-175	175	8½	1⅛	1 to 100K
210-225	225	10½	1⅛	1 to 100K

TYPE 250, THIN RESISTORS

Ohmite Code	Rated Watts	Core Dimensions Lgth.	W.	Thk.	Range (Ohms)
250-10TA-51	10	¾	⅜	⅛	1 to 15K
250-15TA-51	15	1	⅜	⅛	1 to 25K
250-20TA-51	20	2	⅜	⅛	1 to 50K
250-25TD-51	25	1½	13/16	¼	1 to 15K
250-30TE-57	30	1¼	1	¼	1 to 10K
250-40TE-57	40	2	1	¼	1 to 25K
250-55TE-57	55	3½	1	¼	1 to 30K

Ohmite "Thin Resistors" are intended for use in equipment where space is at a premium. They are wound on flat, oval shaped ceramic cores, and covered with Ohmite's exclusive, vitreous enamel protective coating. Cores for "Standard" Thin Resistors are ¼" thick at the thickest part; for the "Miniature" group, ⅛" thick. Equipped with lug terminals. Aesistance tolerance, ±5%.

Stack-mounted "Thin" resistors

Mounting brackets, an integral part of these units, extend through the resistor core to equalize heat distribution and to conduct heat directly to the mounting surface — one reason why these units provide equivalent wattage with less bulk and in less space. Wattage ratings assume the use of a metal mounting surface. Reduce ratings 15% for non-metallic surfaces.

Can be mounted or compactly and conveniently stacked by means of bracket studs, hollow to receive assembly bolts. Total height of these resistors from bottom of mounting stud to top of resistor: 5/16" for Standard units and 1/32" for the Miniature units.

For other sizes, closer tolerances, non-stacking brackets, Dividohm adjustable or other features, consult factory.

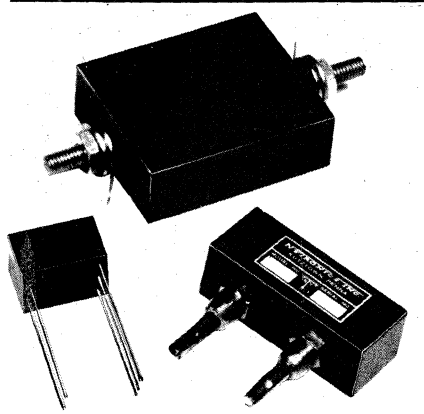
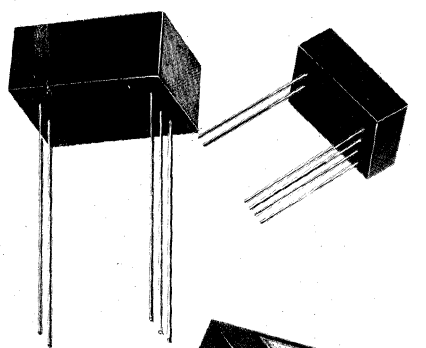
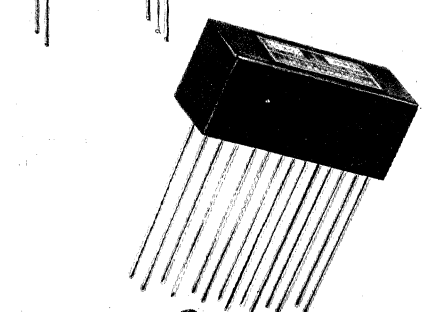
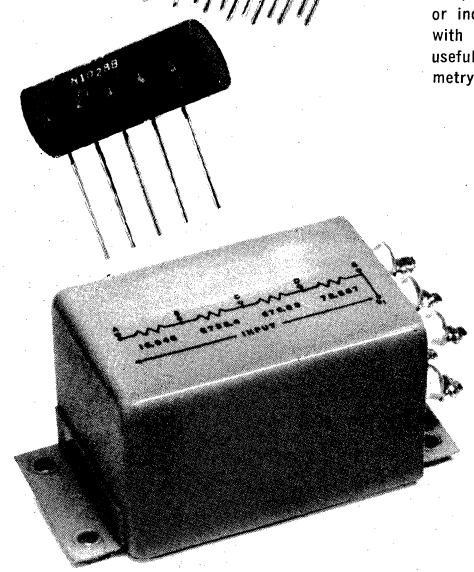
NYTRONICS, INC.
STANDARD COMPONENTS GROUP

RESISTOR NETWORKS







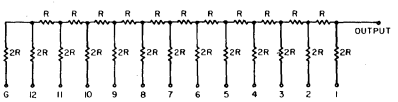


BINARY LADDER NETWORKS

The standard R-2R ladder network for A/D and D/A conversion is available practically off the shelf from Nytronics, Inc. Any desired impedance level is supplied as well as source impedance compensation if required. As in the summing networks, maximum error is less than ½ LSB under the worst case environmental conditions.

A standard 12 bit network in printed circuit configuration is 1⅝"x⅝"x⅝" high. Virtually any special considerations can be incorporated into the design of these networks, such as feedback resistors, attenuating resistors, etc.

All standard units are epoxy encapsulated and will meet the applicable requirements of MIL-R-93, MIL-E-5400, MIL-Q-9858, et al.



Typical ladder network, 12-bit input

Model Number

Basic Number: RN 10____-____-____. Describe unit as follows:

RN 10(A)-(B)-(C), where

A is the number of bits

B is the basic resistance

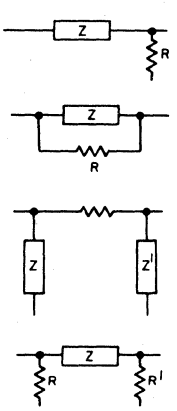
C is the code for Relay (R) or Semiconductor (S) input switching.

Therefore: An 8-bit network, 25K ohms impedance, fed through relays would have the model number: RN-1008-25K-R

PHASE SHIFT AND TIMING NETWORKS

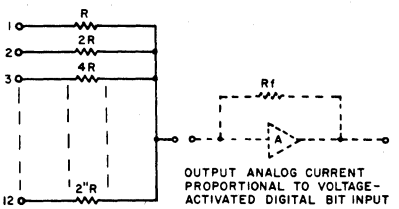
Because of the versatility of the wirewound resistor over all other types of resistors, phase shift or timing networks of great accuracy can be provided. Typically, the resistors are manufactured to compensate for the characteristics of the capacitor or inductor so as to nullify the C or L variation with environment. These networks are especially useful for phase correction in servo systems, telemetry, computors, etc.

TYPICAL NETWORKS



BINARY SUMMING NETWORKS

Input voltages, representing binary-coded numbers are automatically added to give accurate analog currents as the output of these Summing Networks. 4 bit through 12 bit modules are available in standard packages. Summation error of any module is less than ½ the least significant bit (LSB), for any conditions of environments. Standard units are epoxy encapsulated and designed for printed circuit mounting. The 12 bit package size is 2"x1"x1⅛" high. Special requirements such as feedback resistors, source compensation, shielding, form factors, etc. are available.



Binary Summing Module, Schematic, 12-bit input

Model Number

Basic Number: BN 10____-____-____. Describe the unit as follows:

BN 10(A)-(B)-(C), where

A is the number of bits

B is the basic resistance

C is the code for Relay (R) or Semiconductor (S) input switching.

Therefore: An 8-bit network, 5 Kilohms impedance, fed through relays would have the model number: BN-1008-5-R

VOLTAGE DIVIDER NETWORKS

Networks with errors of less than 1 ppm are available in many package configurations from Nytronics, Inc. Ratios from 1:1 to 100:1 and greater are supplied to your exacting specifications. All the resistors used are manufactured specifically for the particular application intended thereby assuring the proper ratios and matches for the specific environments.

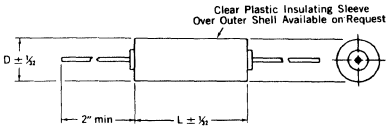
PRECISION RESISTORS

HERMETICALLY-SEALED wire-wound RESISTORS



Nytronics, Inc. Type S precision wire-wound resistors are oil-filled and hermetically sealed to reduce thermal effects and eliminate humidity and atmospheric effects (as occur in epoxy-potted or ceramic-sealed resistors). The outer shell of Type S resistors is made of hot tinned extruded brass; end seals are hermetic-sealing glass bonded to metal. End seals are soldered to the outer shell. Resistance wire is carefully unreeled and terminated to assure an unstressed wire condition prior to hermetic sealing. Specially-prepared resistance wire is employed. Maximum resistance values listed in the table are for .00065" minimum wire diameter.

Typical applications:

- Resistor Standards
- Bridge Ratio Arms
- Precision Meter Multipliers
- Feedback Resistors for Operational Amplifiers
- Divider & Ladder Networks

THIN FILM MICROWAVE RESISTORS

Minimum inductance, no spiralling
D.C. to 10,000 MC
1 to 400 ohms on Discs
10 to 1500 ohms on Rods & Tubes

—55°C to 150°C Carbon
—55°C to 200°C Metal
Temperature Coefficient:
Metal Film ±75 PPM
Carbon Film —200 PPM

Notes: 1. Substrate: Ceramic (standard). 2. Standard Resistance Tolerance: Carbon ±1%; Metal ±3%. 3. The nominal power rating is for units suspended in free air. 4. The resistance film on Discs is normally supplied on both sides of carbon film and one side of metal film resistors. 5. Terminals: Normally supplied plated; pretinned on special order. 6. Other sizes, Substrates, Resistances and Tolerances available to meet customer requirements.

SETTING NEW STANDARDS IN RELIABILITY

METAL FILM

Conformal coated high precision metal film resistors offer superior stability and reliability at a reasonable cost. Features include: small size, impervious to moisture, low noise, low T.C. and resistance range of 10 ohms to 100 Megohms. Surpasses MIL-R-10509 and MIL-R-55182. In-plant testing facilities are available. Standard T.C.: ±10, ±25, ±50 and ±100 ppm/°C.

WRITE FOR BULLETIN #PM-725

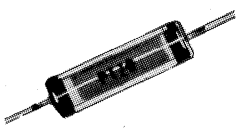
PME754	None	None	5	1M	100M

CARBON FILM Char-G



PyroSeal hermetically glass-sealed deposited carbon film resistors approved on most missile programs. Unmatched in performance with proven load-life stability for continuous 50,000 hours. Surpasses MIL-R-10509 and MIL-R-55182.

WRITE FOR BULLETIN #PC-925

Pyrofilm	Mil-R-10509 Char-G	Rating, Watts		Resistance Range-Ohms

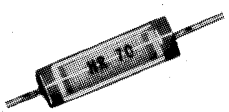
HIGH MEGOHM



PyroSeal miniature high resistance series offers long-term stability at higher than MIL resistance ranges. Uneffected by environmental conditions. Surpasses MIL-R-10509 and MIL-R-55182.

WRITE FOR BULLETIN #PC-925

Pyrofilm	Resistance Ohms	Max. DC-W.V.	Body Dimensions	
			Dia.	Length

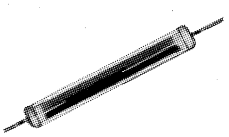
HIGH VOLTAGE



You can assure maximum stability with minimum size, low temperature coefficient, and voltage coefficient, for applications requiring high voltages. Processed and stabilized at high temperatures, these resistors have exceptional shelf stability and are virtually immune to other environmental conditions.

WRITE FOR BULLETIN #HV-5MA

NETWORKS

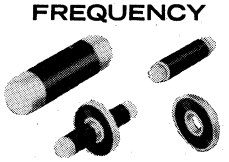
A small, lower cost, compact package of resistors for use in high precision networks such as: voltage dividers, feed-back networks, summing networks, etc. Original ratio values are maintained over wide temperature ranges for extended periods of time. Up to 9 half-watt resistors of values up to 10 megohms can be packaged in 0.6 cu. in.

WRITE FOR BULLETIN #N-20

• Metal Film •Carbon Film

Manufactured to customer specifications. Matched carbon or metal film precision resistors as unmounted sets, sealed in metal cans, epoxy encapsulated or ceramic protected. Matching capabilities. ±0.1% in resistance, ±1 ppm/°C in temperature coefficient for carbon film. Ratio matched within ±.05%. Temperature coefficient matched within ±5 ppm/°C for metal film.

MICRO-WAVE HIGH FREQUENCY



Pyrofilm micro-thin deposited carbon film microwave resistors are extremely stable, precision components specifically designed for microwave applications such as: coax. waveguide & high frequency attenuators, terminations, probes, dummy loads, coupling loops, and high power components. Available in rods, discs, tee pads and custom configurations.

WRITE FOR BULLETIN #RD25-5

Power Rating: to 25 watts
Tolerance: ±1.0% at 25°C
Resistance Range: 1 ohm to 4K
Temperature Coefficients: —200 to —300ppm/°C
Frequency Range: DC to 10,000 MHz
VSWR: 1.05 at 4000MHz
Temp. Range: —55°C to +160°C

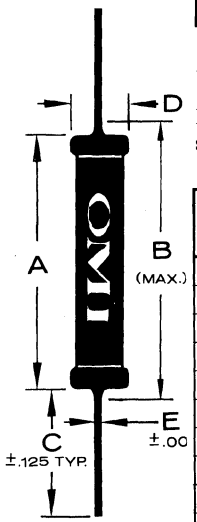
OMI RESISTORS T SERIES

OMTRONICS MANUFACTURING, INC. • 2406 LEAVENWORTH STREET, OMAHA, NEBRASKA 68105 • (402) 348-9500

PRECISION POWER RESISTORS, AXIAL LEADS



Highly reliable, silicone coated, precision resistors manufactured to meet MIL-R-26 specifications. There are 17 basic sizes with power ratings from ½ to 10 watts and resistance ranges from .05 ohms to 275K ohms. Resistance tolerances from .05% to 5% (1%, standard). Temperature coefficient of resistance 2PPM up (20PPM, standard).

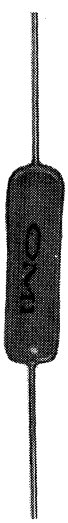
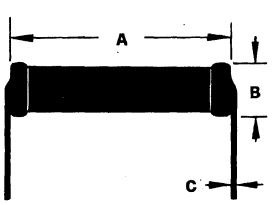
* Max. working voltage determined at .0008 wire.



SPECIAL FEATURES • Close tolerances (to .01% available). • Extremely high stability. • Low TC of resistance (to 2PPM). • Welded construction terminal to terminal. • Wide temperature range; from —65° to 275°C. • A specially formulated silicone coating makes OMI T-series resistors impervious to moisture, salt spray, abrasion and expanded temperatures.

PRECISION POWER RESISTORS, RADIAL LEADS

TR SERIES



SPECIFICATIONS

TR electrical, mechanical, material, power rating and derating specifications are identical to models of equivalent wattage and size in the OMI T Series. Also available, non-inductively wound, and identified as the "NR" Series.

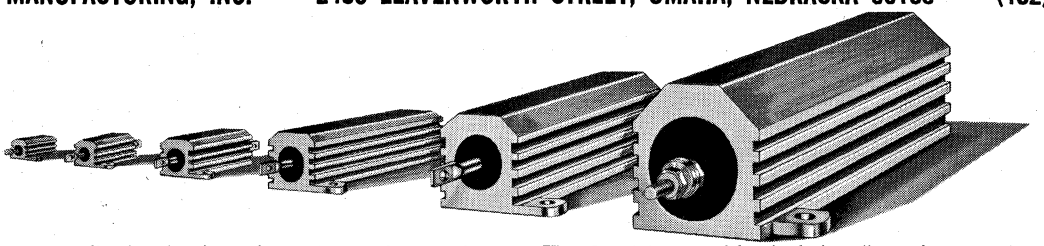
OMI RESISTORS HT HF

OMTRONICS MANUFACTURING, INC. • 2406 LEAVENWORTH STREET, OMAHA, NEBRASKA 68105 • (402) 348-9500



HT Models are anodized, aluminum-housed, precision wire-wound resistors, designed to chassis mount for maximum heat dissipation. They are manufactured to meet or exceed MIL-R-18546 specifications. Four sizes: 5 to 50 watts (mounted), resistance ranges from .1 ohm to 250K, depending on size. Tolerances —1% standard — .05% to 5% available. Temperature coefficient from 2PPM up. (20PPM, standard.)

HF Models are identical in dimensions, resistance ranges, tolerance and temperature coefficients with those of the HT Series, but offer a great increase in their power ratings as similar size through the use of beryllium oxide cores for increased heat dissipation. These are manufactured to exceed MIL-R-18546 power ratings.

STANDARD ELECTRICAL SPECIFICATIONS

OMI Type		MIL Type	Power Rating (Watts)*			Resistance Range		Max. Working Voltage		Max. Weight Grams
			HF (OMI)	HT	MIL	MIN.	MAX.	HF	HT	
HF-5	HT-5	RE-60	15	5	5	.1	22K	220	160	3
HF-10	HT-10	RE-65	20	10	10	.1	47K	340	265	7
HF-25	HT-25	RE-70	35	25	20	.1	90K	650	550	14
HF-50	HT-50	RE-75	50	50	30	.1	250K	1400	1250	29
	HT-75			75		.1	75K		1500	120

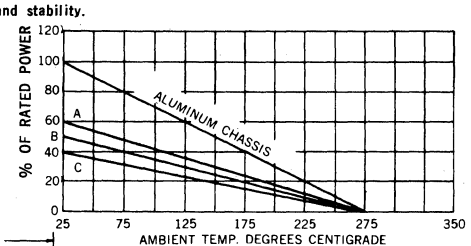
*Rating is based on chassis mounting area and stability.

Chassis Dimensions:

HT-5, HF-5, HT-10 and HF-10 — 6x4x2x .04", Aluminum Chassis.

HT-25, HF-25, HT-50 and HF-50 — 7x5x 2x.04". Aluminum Chassis.

HT-75 — 12"x12"x.062, Aluminum Panel.



DERATING

OMI, HT and HF resistors have an operating temperature range of —55°C to +275°C. Derating is required for reduced chassis mounting area and for high ambient temperatures. The graph curves shown apply to operation of unmounted resistors. Free air rating.

A = HT5, HT-10
B = HT-25
C = HT-50, all HF Series and HT-75

HN HFN

ALUMINUM HOUSED, NON-INDUCTIVE

HN and HFN Models with equivalent electrical and physical specifications to the HT and HF Series are also available with non-inductive windings. To order HT, non-inductively wound, specify "HN". To order HF, non-inductively wound, specify "HFN" instead of the basic HT and HF models. **NOTE:** The following conditions apply to non-inductive types as compared to HT or HF:

1. Maximum resistance values must be divided by 2.
2. Maximum working voltage must be multiplied by .707.
3. Maximum weights may slightly exceed those shown above.

OMI

HEAT SINK CAPABILITIES

OMI's factory tooling and engineering experience put at your disposal facilities of design and production to manufacture a resistor to your specific requirements. Unique . . . maximum quantity . . . or specially, exacting quality . . . call on OMI.

These special resistors are manufactured to customer specifications for exact applications and show an indication of OMI's versatility in the field of Heat Sink Resistors.

Outstanding characteristics include:

A. High power capabilities.

B. 4-Wire low value resistors as well as the standard 2-wire units.

C. Combined characteristics such as .05 ohms ±5 PPM and 4-wire termination.

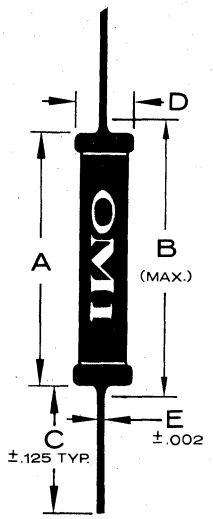
D. All resistors are high-temperature, high-pressure, integrally molded into their housing construction.

This advanced state of the art allows us to confidently solicit your inquiries on special resistor requirements.

OMI RESISTORS F SERIES

OMTRONICS MANUFACTURING, INC. • 2406 LEAVENWORTH STREET, OMAHA, NEBRASKA 68105 • (402) 348-9500

SILICONE COATED RESISTORS, AXIAL LEADS BERYLLIUM OXIDE CORE



The OMI F Series resistors — at ratings from 1 to 15 watts—offer greatly increased power ratings over conventional resistors of equivalent size. All resistors in the F Series are manufactured in accordance with MIL. Specs. and are available in ten basic physical sizes with resistance ranges from 0.1 ohm to 250K ohms. Resistance tolerances from 0.05% to 5% (1%, standard) and temperature coefficient of resistance from 2PPM up (20PPM, standard).

OMI TYPE	MIL TYPE	OMI WATTAGE RATING		RESISTANCE RANGE		MAX. WORKING VOLTAGE*		Max. Weight Grams	PHYSICAL DIMENSIONS

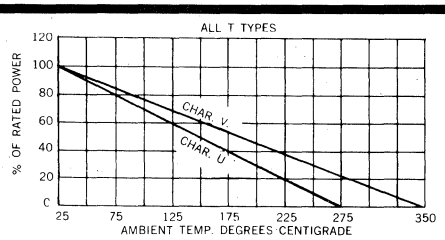
* Maximum working voltage determined at .0008 dia. wire.

SPECIAL FEATURES All features of the conventional precision power resistors, plus the beryllium oxide core for optimum heat dissipation, allow reduction of physical size of resistor while maintaining equivalent power ratings of conventional types.



DERATING

Applicable to both F and T Series

Both OMI, T and F Series resistors have an operating temperature range of −55°C to 275°C (characteristic U) or to 350°C (characteristic V). Derating is required for high ambient temperatures in accordance with the curve shown at left.

N FN

NON-INDUCTIVE TYPES

Available with both Axial and Radial Leads

OMI Models of equivalent physical and electrical specifications are available with non-inductive windings. They are identified by the letter "N"; to order non-inductively wound T Series, specify "N"; to order non-inductively wound F Series, specify "FN".

NOTE: The following conditions apply to specifications applicable to the non-inductively wound types, as compared to the basic T or F types.

1. Maximum resistance must be diveded by 2.
2. Maximum working voltage must be multiplied by .707.
3. Maximum weights may slightly exceed those shown for the basic T or F types.

MINIATURE POWER RESISTORS

FR SERIES

Radial Leads

As in the OMI, TR Series, models of equivalent electrical, mechanical, power rating and derating specifications are available in FR3, FR5, FR5A, FR5C, FR6, FR10, FR12, and FR15 dimensions. These models are also available non-inductively wound and identified as the FNR Series.

TEMPERATURE COEFFICIENT

Although all OMI, T, F, HT and HF resistors are manufactured with a temperature coefficient of ±20PPM/°C over the full temperature range and resistance range as standard production, closer temperature coefficients are available.

Special Close T.C. Availability: All styles can be supplied with temperature coefficients of ±10PPM, ±5PPM, and ±2PPM. Non-inductively wound styles can be supplied with ±10PPM.

Temperature Range: −65°C to +275°C.

Tolerance Range: 0.05% to 5%.

Resistance Range: 0 to 2 watts, 25 ohms to maximum for each size.
Over 2 watts, 50 ohms to maximum for each size.

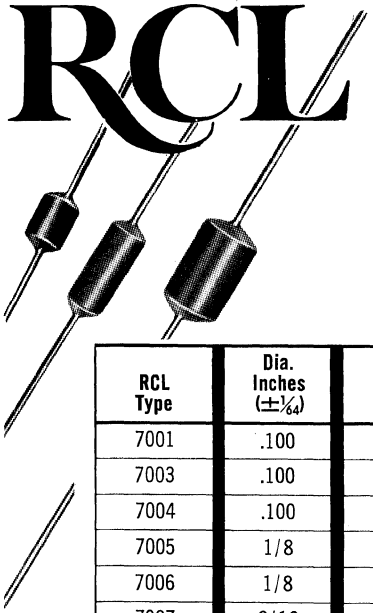
Code to Designate Special T.C: 10PPM C-10
5PPM C-5
2PPM C-2

To Order Resistors with Special T.C., Specify:
(example)

Resistor Type	Resistance Value	Tolerance	T.C. Code
T-5	4700 ohms	0.5%	C-5

RCL

subminiature axial lead resistors



These extremely small, encapsulated resistors meet and exceed the specifications of MIL-R-93D. Special RCL techniques also allow the production of custom sizes at minimal cost to the customer.

Tolerances available: from ±1.0% to ±0.001%

Temperature coefficient: Standard is ±10 PPM/°C.
Temperature coefficients available as low as ±1 PPM/°C.

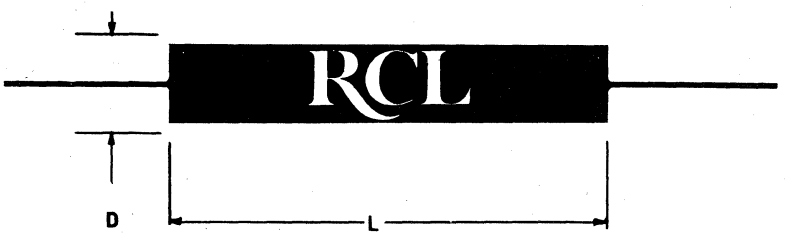
High positive TC of +0.7%/°C (Approx.)



RCL has developed its own proprietary special alloy resistance wire which gives the unusually high positive TC of silicon, together with the basic advantages of resistance wire which are:

- Provides temperature compensation.
- Much greater stability for digital and linear integrated circuits.
- Closer resistance tolerances.
- Broader range of resistance values.
- Operating temperature range from −55°C to +125°C.
- Derated to zero watts at 150°C.
- Lead length 1½" (±⅛")

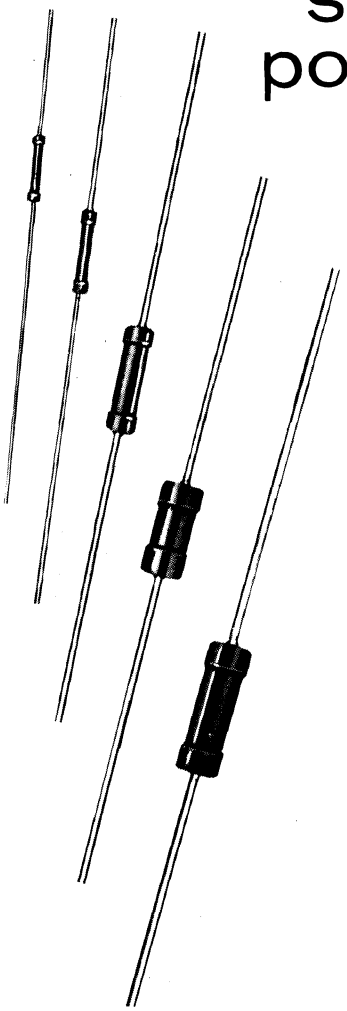
RCL SERIES T
silicone coated precision power wire-wound resistors



General Specifications Available:

- ☐ **Standard temperature coefficient:** ±10 PPM/°C. Additional TC's available from −50 PPM/°C to +6000 PPM/°C.
- ☐ **Tolerance:** ±1.0% is standard. Available to ±.01%.
- ☐ **Wattage Range:** ½ watts to 14 watts.
- ☐ **Resistance Values:** from .01 ohms to 275K. Higher values available.
- ☐ **Coating:** Silicone coating withstands moisture, salt, water immersion, and cleansing solutions.
- ☐ **Leads:** Tinned copperweld is standard. Leads are weldable and solderable.
- ☐ **Dielectric Strength:** 1000 VAC "V" block test.
- ☐ **Insulation Resistance:** 5000 Megohms minimum at 100 volts D.C.
- ☐ **Wide Temperature Range:** From −65°C to +275°C (Characteristic U) or +350° (Characteristic V).

Lead Length: 1¼" minimum. * Tolerance applies to all types unless otherwise indicated.

POWER RATINGS:

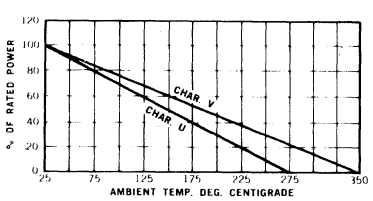
The RCL "T" Series has two power ratings, depending on operating temperature and stability requirements:

CHARACTERISTIC U: 275°C maximum hot-spot temperature.

CHARACTERISTIC V: 350°C maximum hot-spot temperature.

DERATING:

RCL Series "T" resistors have an operating temperature range of −65°C to +275°C (Characteristic U), or to +350°C (Characteristic V).



Ultra-fast delivery for prototpyes and initial production needs.

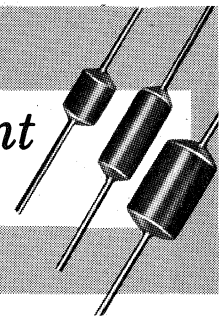
RCL special temperature coefficient wire wound resistors



- Applications include transistor circuits, zener diode temperature compensation, temperature measuring devices.
- Available in a range of temperature coefficients from −50 ppm/°C. to +6,000 ppm/°C.
- Values range from 10 ohms to 5 megohms.
- All available with axial or printed circuit leads.
- All meet applicable paragraphs of Mil-R-93D

These special T.C.'s are arrived at by the blending of special metals and alloys, and therefore the T.C. characteristics may vary over extremes of temperature. Each of these alloys has a special temperature characteristic. If your specific application necessitates coverage over a wide temperature range, please contact the factory for special details.

These T.C.s may be applied to almost all of the RCL precision and power resistors. Write for catalog for complete details.

Considerable attention should be paid to the column headed "R FACTOR". This factor should be applied to the "MAX RESISTANCE" values found for the style chosen in the normal catalog listing, and the resulting figure becomes the true maximum resistance for this high T.C. unit. This is caused by the varying resistivities of the metals used to obtain the listed T.C.'s.

FEATURES

- Tolerance: Available from ±3% to ±.01%.
- Standard T.C.: ±10 PPM/°C. Lower T.C.'s are available.
- All popular types, 5 watts through 50 watts
- Molded and welded construction
- Screw mounts on chassis
- Exceptionally high stability at all conventional power ratings
- Utilizes heat-sink effect of chassis
- Clearly marked on top surface of housing for ease of identification after mounting
- Exceeds MIL-R-18546D
- Complete protection against environment

*Available in ±1% and ±2% in most resistance ranges.

Types illustrated are protected by a high temperature electrical varnish coating. All types available encapsulated in filled epoxy resin.

Consult RPC for custom designs to meet your specific specifications.

PRECISION WIRE WOUND RESISTORS

Complete line of radial, axial and lug types in miniature and standard sizes that exceed the requirements of MIL-R-29, MIL-R-93 and MIL-R-39005.

Power wire wound resistors in miniature and standard types, silicone coated for operation to 350°C. Non-inductive winding available for high frequency operation.

PRECISION RESISTOR NETWORKS

Complete capability for the design, fabrication and testing of resistor networks to your exacting requirements.

MIL-R-18546D TYPE DESIGNATIONS

Example: RE65 G 1001

- RE65 — Style
- G — Characteristic, 275°C Max. G for regular inductive winding N for non-inductive winding
- 1001 — Nominal resistance, Ω. ±1% only. Three significant digits plus fourth indicating number of zeros. Below 100Ω R = decimal and following digits are significant.

T.C. ±30 ppm/°C 2000Ω and above
±50 ppm/°C under 2000Ω

MIL STYLE	SAGE STYLE	MIL WATTS	DEFINED OHMIC RANGE	
			Min.	Max. (.001 wire)
RE60G	3105M	5	.1	3320
RE60N	3105NM	5	1.0	1650
RE65G	3010M	10	.1	5620
RE65N	3010NM	10	1.0	2800
RE70G	3225M	20	.1	12100
RE70N	3225NM	20	1.0	6040
RE75G	3550M	30	.1	39200
RE75N	3550NM	30	1.0	19600

CONSIDER THESE DETAILS:

- Wattage Rating, ½ to 50 watts
- Tolerance and stability as close as .05%
- T.C. 20 ppm/°C or 10 ppm/°C
- 1000 volt rms body insulation
- Low values not available in other resistors (specials to .01Ω)
- Characteristic U or V wattage rating: to 275°C or 350°C
- Power load life stability <.5%/1000 hours
- Weldable leads when specified
- Non-inductive winding when specified

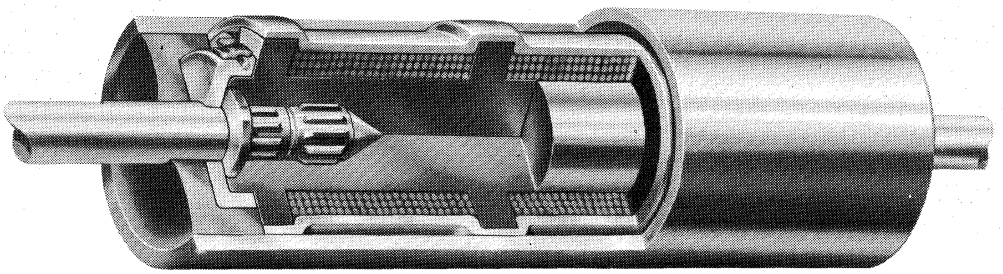
PRECISION WIREWOUND RESISTORS TO

Precision bobbin-type resistors



- Shallcross Precision Bobbin-Type Resistors meet the requirements for failure rate R (0.01% per 1000 hours) of Established Reliability specification MIL-R-39005.
- Competitively priced commercial versions for use where complete documentation is not required.
- Temperature coefficients of resistance to ±1ppm/°C.
- Resistance tolerances to ±0.0025%.
- 34 standard axial lead sizes — as small as 0.085 diameter by 0.200 long.
- 8 standard printed circuit sizes — with 0.200 inch standard-grid lead spacing.

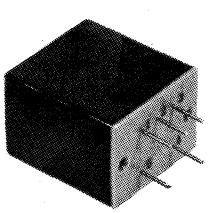
Shallcross series HR resistors are supplied to the most stringent reliability standards established by the military, missile, and aerospace industries. Separate production facilities with specialized procedures and unusually strict quality control have been developed and are maintained to produce resistors with superior documented reliability.

Actual size types SP10 and HR10
MIL-R-39005 type RBR56

Shallcross series VA, SP, and PC resistors are designed to meet military specification MIL-R-93 and a wide range of commercial specifications for critical parameter applications. Forty years of experience in the manufacture of precision wirewound resistors allow Shallcross to produce these quality resistors at competitive prices for commercial users.

A host of options are available on bobbin type resistors so that your needs may be met exactly. In addition to the wide range of sizes, resistances, and resistance tolerances, temperature coefficients from —30ppm/°C. to +5800-ppm/°C. are available. Special winding techniques are avaliable to minimize reactance. Other options are listed in Shallcross catalog LA194, available on request to your local representative or Shallcross.

Precision wirewound



Shallcross Precision Networks represent an economical means of specifying inter-related resistors. The most frequent uses involve analog-digital and digital-analog converters, precision voltage dividers, operational amplifier summing networks, etc. With high accuracy of matching (to 0.005%) over a wide temperature range, the potential uses are numerous.

The stability of wirewound resistors yields matching accuracies that are state-of-the-art, both as shipped and after many years of operation.

The networks are available in package configurations to your specifications. Only a few popular packages are pictured here.

Shallcross networks are temperature

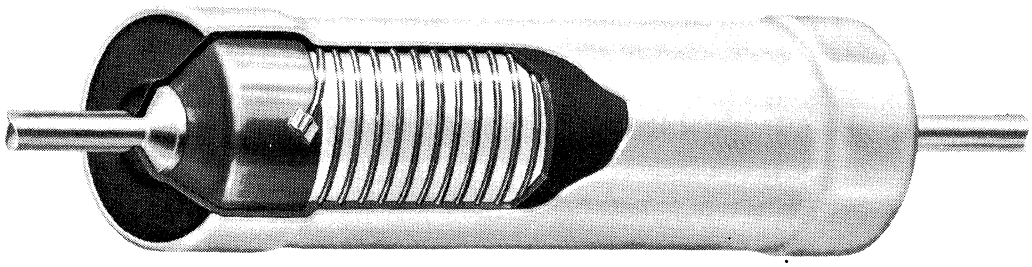
COMMERCIAL AND ESTABLISHED RELIABILITY SPECIFICATIONS

Precision power resistors



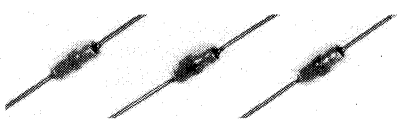
- Shallcross Precision Power Resistors are designed to meet the requirements for failure rate R (0.01% per 1000 hours) of Established Reliability specification MIL-R-39007.
- Competitively priced commercial version for use where complete documentation is not required.
- 11 standard sizes available to cover power ratings up to 15 watts at 275°C. hotspot.
- High thermal conductivity beryllia cores achieve minimum size for given power dissipation.
- Steatite and alumina cores for use where space is available and cost important.
- Resistance tolerances to ±0.1%.

Shallcross Precision Power Resistors combine excellent precision and stability with high operating temperature to achieve miniaturization in power dissipation.

Established Reliability resistor series PR is manufactured with exceptional process control and is fully documented. A silicone resin coating and a clear teflon sleeve provide excellent continuous protection of the resistor element through 275°C.

Resistance wire ends are sandwich-welded to the end caps as shown for maximum reliability. The cap and lead design isolates the terminations from external stresses. Premium grade wires are wound under precise stress control on centerless ground cores.

Commercial resistor series LA is designed to meet military specification MIL-R-26, characteristics U (275°C.), and V (350°C.). Application data and further detail on each resistor style are given in Shallcross catalog LA194, available upon request. Ask your local representative (listed in the yellow pages of EEM) or write Shallcross.



Actual size type LA68 and PR68
MIL-R-39007 type RWR81 — 1 watt

resistor networks

matched at three temperatures — high-limit, low-limit, and mid-range, so that they will track to **your** specifications over the temperature range that you require. Typical temperature ranges that Shallcross meets:

10°C. to + 50°C. for industrial work
—20°C. to + 85°C. for commercial avionics
—65°C. to +125°C. for military systems

Take advantage of Shallcross experience early in your project. Shallcross will help you specify your networks to achieve the accuracies you desire in a manner that best simplifies manufacturing and test procedures—and thereby minimizes the costs to you.

ELM7A	BELOW 1Ω	1Ω to 9.9Ω	10Ω to 100k
ELM10A	BELOW 1Ω	1Ω to 9.9Ω	10Ω to 275k

1. Less than 100°C temp., rise when derated to 30% of wattage under characteristic "V."
2. Silicone Coated
3. Non-Inductively wound version available. One-half the resistance value shown in data chart 1.
4. Reduces the possibility of burned printed circuit boards.
5. Insures resistor identification.
6. Shock and vibration problems reduced when properly installed.

PRECISION RESISTORS

TYPE SA EPOXY

ENCAPSULATED AXIAL

DESIGNED TO MEET OR EXCEED MILR93D.

All units represented may be modified for minimum inductance and capacitive effects at frequencies above the audio range. Rise and decay time characteristics are measured from 10% to 90% of peak pulse amplitude with a 100 kilocycle pulse input.

Temperature coefficients are available to 0 ± 4PPM/°C and T.C. matches are available to 2PPM/°C.

Stabilities of 0.005% per year are available on a production basis.

TYPE CR/CA/CL SERIES

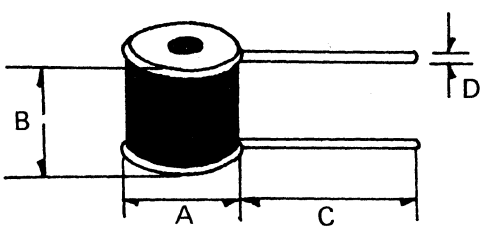
CERAMIC CORE RESISTORS

"CR" Ceramic Radial Leads

"CA" Ceramic Axial Leads

"CL" Ceramic Lugs

Ceramic spool type unit. Windings sealed in varnish. Hole provided for screw mounting. Operate from -65°C to 105°C. Inherently good stability.
Excellent for use under laboratory conditions and most commercial applications.



Style	Diameter A ±.015	Length B ±.031	Lead Diam. D	Max Value (.0005 Wire)	Wattage	Max. V	Hole (clearance) Screw #

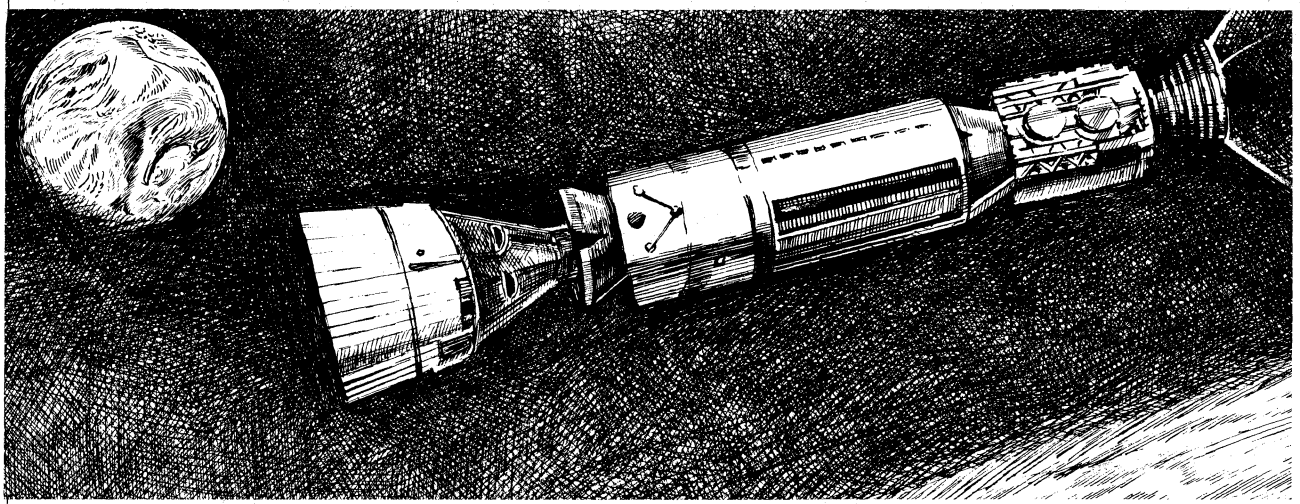
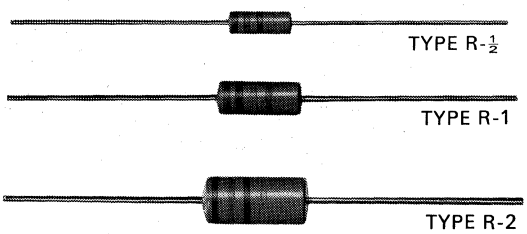
DEPOSITED CARBON FILM RESISTORS
HIGH STABILITY. HOT MOLDED





These MIL style hot molded carbon film fixed resistors possess highly reliable characteristics. R-½ reliability exceeds all requirements of MIL-R-11E, and also meets MILR-22684. BUT at composition prices!

TYPICAL PERFORMANCE CHARACTERISTICS

Type R-½ R-1, R-2 (molded) carbon film resistors have a very high frequency characteristic with low temperature coefficient, close tolerance and excellent low noise, as compared with composition types or similar products on the market.

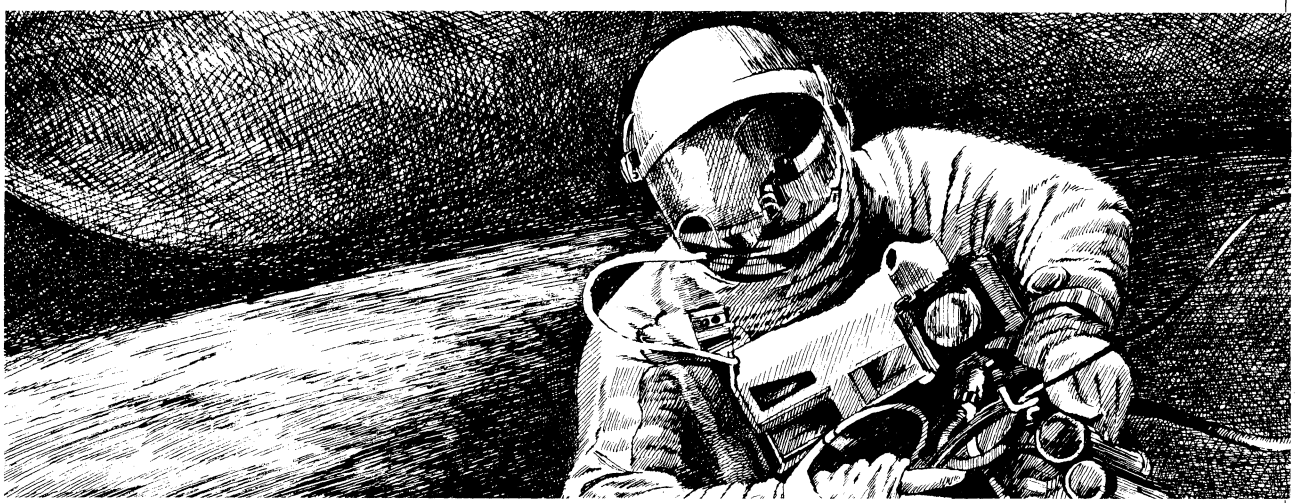
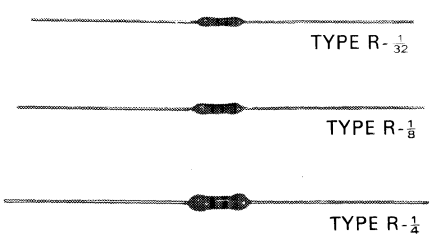
TOYO ELECTRONICS INDUSTRY CORPORATION

DEPOSITED CARBON FILM RESISTORS
MINIATURE. COATED





Our automated and accurate processing systems turn out nearly 7 million R (coated) type per day.....
Originally designed by Toyo Electronics Industry Corp. for general purpose applications in low power equipment and miniature printed-circuits. This R (coated) type is conformally coated with an inner coat of epoxy resin and an outer sheath of melamine resin. Performance characteristics meet all requirement of JIS-C-6402, and greatly exceed those of any composition types.

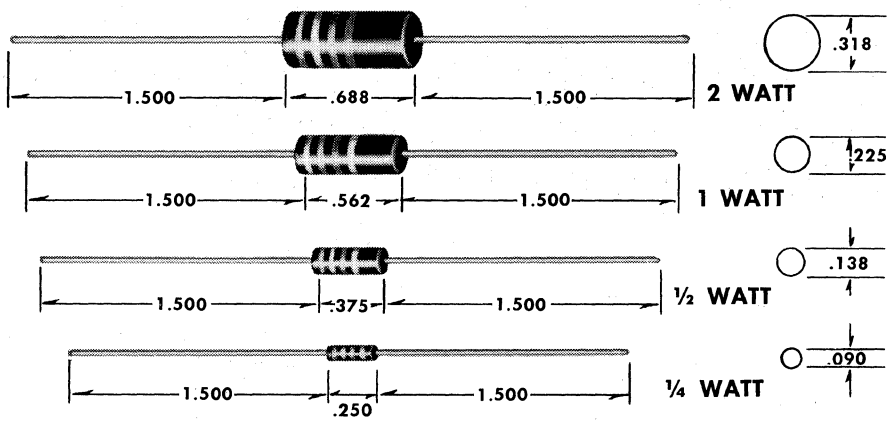
Rohm QUALITY · RELIABILITY

STACKPOLE

FIXED COMPOSITION RESISTORS



Stackpole Resistors offer superior performance in terms of load life, moisture resistance, shelf life, and other important characteristics. Available in ¼, ½, 1, and 2 watt insulated types in resistance values with 5%, 10% and 20% tolerances as shown below.

EASIEST SOLDERING

is asured thanks to an exclusive extra solder coating applied after the usual tin dipping. Leads of Stackpole Resistors solder readily by any method—dip or iron—stay tarnish free even after months in storage. And, their baked-on color codes resist solvent scrubbing operations . . . maintain uniform, attractive appearance.

VISHAY STANDARD PRECISION RESISTORS

Now, you get precision, speed and uniform TC for all R values . . . reliable, total performance no other resistor can possibly offer — in small size, competitively-priced resistors — available in any quantity — with fast delivery.

Every Vishay Precision Resistor offers this total-spec-package . . . *as standard:*

- Absolute Tolerance: to 0.005%
- TC (all R values): 0±1ppm/°C. (0° to 60°C.)
- Shelf Stability: 25ppm/yr. (50/3 yrs.) (also see "H" Series)
- Load Stability: 0.015% (60°C., 2000 hrs.)
- Response Time (to 100 MHz.): 1 ns. (no ringing)
- Non-inductive . . . Non-measurable Noise

STANDARD VISHAY STYLES (are available in tolerances of 0.01%, 0.02%, 0.05%, 0.10%, 0.25%, 0.50% and 1.0% . . . . to 0.005% in S102 style)

VISHAY "H" SERIES (Hermetically Sealed) PRECISION RESISTORS

Ultimate STABILITY, PRECISION, SPEED (5ppm/yr. stability . . . tolerance to 0.001%).

Now, you can have bedrock shelf stability (5ppm/yr.), higher precision, (0.001%), and unequalled TC (Absolute—0±1ppm/°C., Tracking — 0.5ppm/°C., and Matching — 0.25ppm/°C.) . . . plus all the other unique Vishay Resistor specs . . . in Vishay's new "H" Series Precision Resistors.

VISHAY RESISTOR NETWORKS

. . . fastest, most accurate, most stable networks you can buy. No trade-offs, outstanding total performance . . . as these standard specs show:

FULL SCALE ACCURACY: to ±0.001% (0° to 60°C.)

SHELF STABILITY: 25ppm (3 yrs.) guaranteed

SPEED: Rise time — 2 ns.
Settling time: <50ns. to 0.01% nominal

NON-MEASURABLE NOISE

VISHAY CUSTOM NETWORKS — Vishay network experience can help you solve your toughest problems. Send specs for a prompt quotation.

STANDARD SERIES PRECISION WIRE WOUND RESISTORS

- ☐ ACCURACY to .005%
- ☐ OPERATIONAL STABILITY; 30 PPM YEAR
- ☐ TEMPERATURE COEFFICIENT TO ±5 PPM/°C
- ☐ RELIABILITY TO .001%/1000 HR.
- ☐ OVER FORTY SIZES AND STYLES
- ☐ NOISE FREE
- ☐ LOW THERMAL EMF
- ☐ ENVIRONMENTALLY STABLE
- ☐ ZERO VOLTAGE COEFFICIENT
- ☐ SURPASSES MIL-R-39005A & MIL-R-93D

DESCRIPTION — Highly accurate, reliable Ultronix resistors are available in over forty styles and sizes with power ratings from .1 to 2 watts at 125°C. Standard accuracies are 1%, .1% .05%, .02% and .01% with guaranteed resistance shift within 30 ppm (one year at full power). First year drift is less than 10 ppm with S Series. On the Minute Man I Program Ultronix resistors operated more than 450,000,000 part hours with no field failures for a field failure rate of .00022% per 1,000 hours at 60% confidence. Standard resistor types meet or exceed MIL-R-39005A and MIL-R-93D.

APPLICATION — All major U.S. aerospace programs use Ultronix standard resistors in addition to discriminating commercial users. All resistor applications requiring accuracies better than .05%, stabilities of 10 ppm, or temperature coefficients less than 25 ppm/°C are applications for Ultronix resistors. Many applications requiring accuracies as loose as .1% under stringent environmental conditions demand the use of wire wound resistors due to the instabilities of other resistor types under moisture, shock, vibration, and other conditions. Typical circuit functions such as D to A conversion, ladder dividers, and zener compensation are performed by Ultronix resistors. Also, resistors for special applications can be custom designed to your specific needs.

DESIGN AND OPERATIONAL FEATURES — Ultronix molds bobbins and resistors of **STAKYD,** a specially compounded polyester having triple the time-temperature stability of epoxy. All welded construction is used throughout, lead to tab welds are made by automatic equipment, and are protected by encapsulation within the bobbin. Dual pi wall construction is used in all multiple pi Ultronix resistors. This feature eliminates the shorting failure mode of single pi wall resistors when reverse winding from one pi section to the next. All Ultronix resistors are stabilized by a unique time/temperature cycle to remove winding stresses before trimming to exact value. Resistors are 100% inspected per mechanical and electrical specifications. Sample lots from each day's production are accumulated and tested to the requirements of MIL-R-39005A, MIL-R-93D, and **ULTRA,** Ultronix own high reliability specification. Samples are taken from **all** production, not only military orders. When you specify Ultronix components, you get the benefit of Quality Assurance which has been approved by every major aerospace company and government agency.

S SERIES HIGH STABILITY PRECISION WIRE WOUND RESISTORS

- ☐ ACCURACY TO .0025%
- ☐ OPERATIONAL STABILITY 10 PPM/YEAR
- ☐ ENVIRONMENTALLY STABLE
- ☐ TEMPERATURE COEFFICIENT TO 1 PPM/°C
- ☐ RELIABILITY TO .001%/1000 HR.
- ☐ ZERO VOLTAGE COEFFICIENT
- ☐ NOISE FREE
- ☐ LOW THERMAL EMF
- ☐ SURPASSES MIL-R-39005A REQUIREMENTS

DESCRIPTION — Ultronix High Stability S Series wire wound resistors are designed for applications requiring maximum accuracy and stability in stringent environments. Ultronix resistors far exceed the requirements of existing military specifications. Resistance shift due to full power operation for one year is GUARANTEED to be less than 10 ppm. Ultronix resistors have more than 45,000,000 part hours of failure rate verification testing. Documented failure rates are better than .0010% per 1000 hours at 60% confidence and 100% stress. High stability series resistors exceed the requirements of both MIL-R-39005A and MIL-R-39D.

APPLICATION — Resistor applications requiring accuracies better than .05%, stabilities of 100 ppm, or temperature coefficients less than ±25 ppm are applications for wire wound resistors. As environmental demands increase, resistor selection is dictated more by environmental stability than by initial accuracy. If resistor accuracy of 0.1% or better must be maintained under vibration, shock, or other typical military environments, the proper resistor selection is Ultronix wire wound due to environmental instabilities of other resistors. To determine if you should be using Ultronix resistors, compare your circuit needs under your environmental requirements with the stabilities per Table 1.

DESIGN AND OPERATIONAL FEATURES — Ultronix molds bobbins and resistors of STAKYD, a specially compounded polyester having triple the time-temperature stability of epoxy. All welded construction is used throughout. Lead to tab welds are made by automatic equipment and are protected by encapsulation within the bobbin. Dual pi wall construction is used in **all** multiple pi Ultronix resistors. This feature eliminates the shorting failure mode from one pi section to the next.

Environmental protection is provided by molded STAKYD, or glass to metal sealed tubes, if complete hermetic seal is required. All Ultronix resistors are stabilized by a time/temperature cycle to remove winding stress before trimming to the exact value. Resistors are 100% inspected per electrical and mechanical specifications. Sample lots from each day's production are accumulated and tested to the requirements of MIL-R-39005A, MIL-R-93D, and ULTRA, Ultronix own high reliability specification.

TABLE I

RESISTOR ENVIRONMENTAL STABILITY COMPARISON

Table I compares the resistance stabilities required by the various military specifications and the stabilities of ULTRONIX S Series resistors under the same test conditions.

SPECIFICATIONS

STANDARD SERIES

☐ ACCURACY—Standard accuracies are 1%, .1%, .05%, .02% and .01%. Special resistors can be made to .005% accuracy with values and ratios matched to .001%. For more accurate resistors order Ultronix S series which can be supplied to .0025%.

☐ TEMPERATURE COEFFICIENT — Standard T.C.: From −55°C to +125°C is:

0 ±10 ppm, 50 Ω and over	0 ±30 ppm, 1 Ω to 10 Ω
0 ±15 ppm, 10 Ω to 50 Ω	0 ±90 ppm, less than 1 Ω

Special T.C.'s can be supplied in all standard wire alloys from 1 ppm to +5500 ppm/°C over limited temperature ranges.

☐ STABILITY — Long term stability of standard Ultronix resistors under typical operating conditions is better than 30 ppm for the first year, and less than 10 ppm per year in succeeding years. Typical shifts in resistance due to tests run per MIL-R-39005A are per Table I. If greater stabilities are required specify Ultronix S Series resistors.

☐ NOISE — Per MIL-STD-202 tests, noise is not present. Thermal EMF is less than 4 micro volts.

☐ VOLTAGE COEFFICIENT — Less than .01 ppm/volt.

☐ OPERATING TEMPERATURE — Wattages are rated at 125°C. Resistors used at higher ambient temperature, must be derated by a factor of 5% for each degree over 125°C. Normal operating range is −55°C to +145°C. −55°C to +145°C.

☐ MILITARY SPECIFICATION — Standard resistors meet or exceed the requirements of MIL-93D and MIL-R-39005A. Military specification size conversion to Ultronix size is per Table II.

MILITARY SPECIFICATIONS

STYLE NUMBER		ULTRONIX STYLE
MIL-R-93D	MIL-R-39005A	
RB52	RBR52	310A
RB53	RBR53	307A
RB54	RBR54	207A
RB55	RBR55	205A
RB56	RBR56	202A
RB57	RBR57	510A
RB58		515A
RB59		520A
RB71	RBR71	203PA
	RBR74	185A
	RBR75	202A
	RBR76	308A

☐ FREQUENCY CHARACTERISTICS — Ultronix resistors are non-inductive wound. A detail specification of the frequency characteristics of wire wound resistors, in limited space, is difficult. Frequency response is dependent upon the physical dimensions of the resistor, number of pi, distance between the pi, length of wire, or ohmic value, the ratio of wire insulation thickness to wire diameter and winding geometry. All of these items are controllable and may be varied to obtain reactive parameters to match your specified needs. For the large majority of applications however, the small reactance encountered in our resistors is negligible. In general, resistor values above about 10 K will be capacitive, and will not exceed 1 to 3 pfd depending on value. Resistors below 10 K will be inductive and less than 20 microhenries.

If you have specific speed requirements our applications group will be pleased to review them and recommend the resistor type best suited to your needs.

STABILITY	
TEST	ΔR
Load life @125°C	.003%
STOL	.005%
Moisture resistance	.015%
High temp exposure	.005%
Dielectric strength,	.002%
Acceleration,	.002%
Ultrasonic cleaning,	.002%
Shock & Vibration	.002%

☐ LEADS — Standard material is tin coated copper, 2.0 ±.25 inches long. 100 series resistors are supplied with 22 GA, all others, 20 GA. Gold plated nickel and "A" nickel leads are available on request.

S SERIES

☐ ACCURACY — .05%, .02%, .01% & .005% are standard S Series accuracies. Special resistors are supplied to .0025%. Values and ratios can be matched to .001%.

☐ TEMPERATURE COEFFICIENT — Standard T.C. is as follows over the range −55°C to +125°C.

0 ± 7 ppm, 50 Ω and over	0 ±30 ppm, 1 Ω to 10 Ω
0 ±15 ppm, 10 Ω to 50 Ω	0 ±90 ppm, less than 1 Ω

Special T.C.'s are supplied to 0 ±1 ppm over limited temperature ranges. If high T.C. parts are required order Ultronix Standard Series resistors in which T.C.'s are supplied in all available wire alloys to +5500 ppm/°C.

☐ STABILITY — Long term resistance stability of S Series resistors under full power is guaranteed to be within 10 ppm for the first year and 5 ppm per year in succeeding years.

☐ NOISE — is not present per MIL-STD-202 tests. Thermal EMF is less than 4 micro volts.

☐ VOLTAGE COEFFICIENT — Less than .01 ppm/volt.

☐ OPERATING TEMPERATURE — −55°C to +145°C, Wattages are rated at 125°C. Resistors used at higher ambient temperatures must be derated by a factor of 5% for each degree over 125°C.

☐ FREQUENCY CHARACTERISTICS — Ultronix resistors are non-inductively wound. A detail specification of the frequency characteristics of wire wound resistors, in limited space, is difficult. Frequency response is dependent upon the physical dimensions of the resistor, number of pi, distance between the pi, length of wire, or ohmic value, the ratio of wire insulation thickness to wire diameter, and winding geometry. All of these items are controllable and may be varied to obtain reactive parameters to match your specified needs. For the large majority of applications, however, the small reactance encountered in our resistors is negligible. In general, resistor values above about 10 K will be capacitive, and will not exceed 1 to 3 pfd depending on value. Resistors below 10 K will be inductive and less than 20 microhenries.

If you have specific speed requirements our applications group will be pleased to review them and recommend the resistor type best suited to your needs.

☐ LEADS — Standard material is tin coated copper, 2.0 ±.25 inches long. 100 series resistors are supplied with 22 GA, all others, 20 GA. Gold plated nickel and "A" nickel leads are available on request.

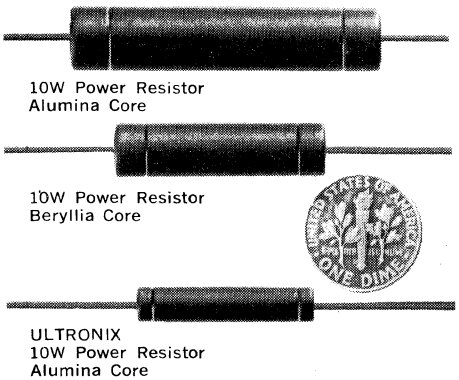
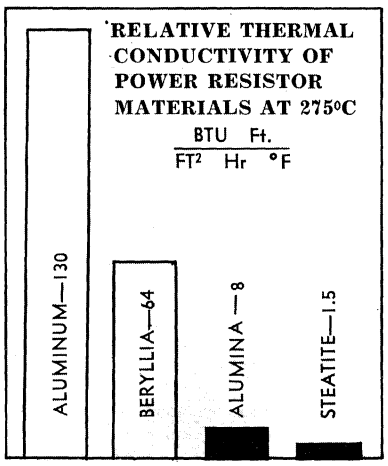
HIGHER POWER OR SMALLER SIZE



The size differential between 10 watt power resistors with alumina cores, beryllia cores and the ULTRONIX aluminum cores is graphically shown at left. An ULTRONIX power resistor with solid aluminum core requires ⅓ the volume of a beryllia core resistor, and 1/14 the volume of an alumina core resistor—at the same power ratings. These power/size advantages mean you can double the power and operate at the same temperature of an equal size beryllia core resistor—or you can operate at the same power levels and temperatures with a resistor size ⅓ the volume of a beryllia core resistor.



FOUR STANDARD POWER RATINGS

* Higher ohmic values available with finer wire.

Ultronix Power Resistors are manufactured in two series; the CC Series and the MS Series. These resistors are in conformance with the Ultronix basic philosophy of providing superior components through technological advancements. Both series boast the proven benefits of the new dielectrically coated solid aluminum core. This feature alone gives Ultronix power resistors cooler operation and greater stability than competitive units. By combining the aluminum core with Ultronix high emmisitivity DIKRAN conformal encapsulant, we have made the CC Series which is fully qualified to the High Reliability Resistor Specification MIL-R-39007 and in addition gives complete solvent and moisture resistance, smallest size, and eliminates harmful outgassing. The MS Series Resistor encapsulates the aluminum core in molded silicone. The molded encapsulation eliminates body to lead meniscus and gives highly repeatable physical dimensions. These features make the MS Series ideally adaptable to automatic insertions and still retain the aluminum core's inherent superior stability as well as Military Specification moisture and solvent resistance.

- ☐ ALL WELDED CONSTRUCTION
- ☐ MEETS OR EXCEEDS MIL-R-39007A & MIL-R-26D

DESCRIPTION — Supplied in many miniaturized sizes from 1 to 7 watts, Ultronix resistors feature durable, die molded silicone bodies and aluminum cores and fill the needs of the most demanding military and commercial applications. MS resistors offer improved stability, clip mounting capabilities, and are ideally suited to automated circuit assembly techniques.

APPLICATION — Size and shape repeatability of ±.005", within each production lot, makes these components ideal for high speed automated circuit assembly. Consistent clean lead to clean lead dimensions with complete lack of meniscus eliminates cracks during automated lead bending. The high density of SILCAP coating combined with uniform body size and shape allow these resistors to be clip mounted for heat sink purposes with no insulation breakdown. Resistor power rating can be doubled by heat sinking to a metal surface equivalent to .040" thick aluminum with an area of 1.5 square inches per watt.

DESIGN AND OPERATIONAL FEATURES — Ultronix pioneered the use of dielectrically coated aluminum as power resistor core material. Aluminum's higher thermal conductivity assures optimum heat dissipation, and minimizes "hot spot", one of the major causes of resistor instability. MS series resistors demonstrate stabilities typically twice as good as required by MIL-39007A (see figure 1). End caps are of stainless steel selected for its compatibility with the resistance wire, to minimize thermal EMF. SILCAP, the Ultronix molded encapsulant, is a dense, uniformly thick protective coating of pure silicone polymer which gives vastly superior solvent and moisture resistance over the commonly used co-polymer silicone conformal coatings. Complete lot traceability is maintained throughout all operations, another Quality Assurance benefit from Ultronix.

SPECIFICATIONS

ACCURACY: Standard tolerances are 5%, 3%, and 1%, closer tolerance is available on request.

TERMINALS: Tinned, copperweld leads are standard, Grade "A" nickel, untinned, available on request.

CORE: Aluminum core for high heat dissipation.

ELEMENT: Low temperature coefficient, High resistivity, nickel chrome alloys.

DIELECTRIC: 500VAC for MS-1 & MS-2, 1000VAC for others.

INSULATION RESISTANCE: Measured terminal to core equals 10^5 meg ohms minimum at 25°C, and 10^4 meg ohms minimum at 300°C.

END CAPS: Stainless steel end caps to minimize thermal EMF.

SHORT TIME OVERLOAD: Three seconds at 5 times rated power for MS-1 & MS-2. Others, 3 seconds at 10 times rated power.

INDUCTANCE: Less than 5μh.

ENCAPSULATION: Ultronix SILCAP, pure silicone polymer molding material.

STABILITY: MS Series stabilities are typically twice that required per MIL-R-39007A and are shown in Fig. 1.

TEMPERATURE COEFFICIENT:
Less Than 1 Ohm .....±90 ppm
1 Ohm to Below 10 Ohms .....±50 ppm
10 Ohms and Above .....±20 ppm

CC SERIES, WIRE WOUND POWER RESISTORS

- ☐ SMALLEST SIZE
- ☐ SOLVENT RESISTANT
- ☐ NO OUTGASSING
- ☐ IMPERVIOUS TO MOISTURE
- ☐ HIGH STABILITY
- ☐ MEETS OR EXCEEDS MIL-R-39007A
- ☐ LOWER OPERATING TEMPERATURES

DESCRIPTION — Ultronix CC Series Power Resistors offer the smallest package size available in the industry for a given power rating due to the greater thermal conductivity of the solid aluminum core and the high emissivity of the Ultronix encapsulating material, DIKRAN. Ultronix aluminum cores have twice the heat conductivity of beryllia and 16 times that of common alumina core.

Ultronix encapsulation material DIKRAN, unlike common silicone conformal coatings, is completely impervious to all solvents encountered in cleaning operations. The resilience and excellent adhesion factor of DIKRAN gives superior moisture resistance, and eliminates the shelf life and low power moisture problems of competitive power resistors. DIKRAN's extreme stability does away with outgassing and the associated open contact contamination caused by silicone coated resistors. These features of higher thermal conductivity, elevated temperature capabilities, and superior environmental resistance, make CC Series Power Resistors the most reliable units available in the industry today.

APPLICATION — Ultronix CC Series Power Resistors are specifically designed for applications which can not be satisfied by standard power resistors, and for those critical applications requiring the utmost in reliability. Review the following comparison, under Design and Operational Features to determine if your application could be better satisfied by Ultronix CC Series Power Resistors.

DESIGN AND OPERATIONAL FEATURES

CC SERIES DIKRAN COATED ALUMINUM CORE POWER RESISTORS	SILICONE COATED CERAMIC CORE POWER RESISTORS
Are truly moisture resistant	Absorb moisture, have shelf life and low power corrosion problems under moisture conditions.
Have minimal outgassing of non-contaminating material.	Outgas silicone which contaminates open contacts.
Are solvent resistant	Dissolve in chlorinated solvents used in circuit board cleaning.
Operate at lower, more even temperatures, improving stability 2 to 1	Develop "hot spots" and associated instabilities.
Are 1/3 to 1/10 the volume of equally rated resistors	Waste space
Are clip mountable under all conditions with up to 200 VDC differential, restistor to chassis.	Develop insulation breakdown if clip mounted, particularly under moisture conditions.
Are capable of operating at higher temperatures (maximum 700°F)	Maximum 500°F

SPECIFICATIONS

ACCURACY: Standard tolerances are 5%, 3%, and 1%, closer tolerance is available on request.

TERMINALS: Tinned, copperweld leads are standard, Grade "A" nickel, untinned, available on request. For nickel leads derate power rating 30%.

CORE: Aluminum core for high heat dissipation.

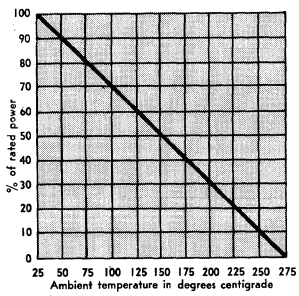
ELEMENT: Low temperature coefficient, high resistivity, nickel chrome alloys.

DIELECTRIC: 500VAC for CC10A (2 watt), 1000 VAC for all others.

INSULATION RESISTANCE: Measured terminal to core equals 10^5 meg ohms minimum at 25°C, and 10^4 meg ohms minimum at 300°C.

END CAPS: Stainless steel end caps to minimize thermal EMF.

STABILITY: Due to the unique construction and the efficient heat dissipation of the aluminum core, stability is inherently greater.



POWER DERATING CURVE FOR HIGH AMBIENT TEMPERATURES — ULTRONIX Type CC aluminum core resistors operate in a normal temperature range of −55°C to +275°C. At higher temperatures in this range, they must be derated. The power derating curve shows the percent of rated power at varying ambient temperatures.

SHORT TIME OVERLOAD:

CC10A 5x Ultronix rated power for 3 seconds
CC25A 5x Ultronix rated power for 5 seconds
CC50A 10x Ultronix rated power for 5 seconds
CC70A 10x Ultronix rated power for 5 seconds

INDUCTANCE: Less than 5μ h.

TEMPERATURE COEFFICIENT: Over the temp. range of −55°C to +275°C

Less Than 1 Ohm — ±90 ppm
1 Ohm to Below 10 Ohms — ±50 ppm
10 Ohms and Above — ±20 ppm

Special TC is available upon request.

RESISTIVE NETWORKS R-2R

TECHNOLOGICAL LEADERSHIP IN PASSIVE COMPONENTS

DIGITAL ⇔ ANALOG CONVERTER NETWORKS, R-2R SERIES

DESCRIPTION — Ultronix R-2R resistive networks are high reliability ladder adder circuits. By addition of a comparator and associated clock and gate logic to the network output, R-2R networks may also be used for analog digital conversion.

Techniques used in producing these highly stable ladder networks make possible straight binary conversion to 14 bits with ±½ least significant bit accuracy giving a capacity of recognition of 1 part in more than 30,000. Networks are designed to stay within ±½ LSB accuracy over their rated temperature range for the life of the unit.

APPLICATION — Ultronix converter networks have been selected for demanding applications in many United States aerospace programs. They have performed on the moon in Surveyor I and III as well as in F-4 and F-111 Aircraft. Any application which requires the accurate conversion of binary coded signals to analogs, or analog signals to binary is a possible application for ULN series converter networks.

The accuracies shown in Table 1 take into consideration resistance variations due to temperature change over the networks rated temperature range. Table II is provided to allow determination of the minimum value of "R" to be used with a given binary input voltage to maintain the accuracies and stabilities specified. The value of "2R" may be compensated to take into consideration the internal resistance of the related switching device if necessary.

Long term stability is specified in Table 1 in parts per million variation of output voltage with respect to input voltage, or variation of binary weighting, under constant operating temperature for one year.

DESIGN AND OPERATIONAL FEATURES — ULN 100 and ULN 150 networks are packaged in Diallyl Phthalate boxes and utilize all welded construction. The ladder circuits are made of Ultronix ultrastable, high reliability wire wound resistors that meet or exceed the requirements of MIL-R-93D and MIL-R-39005A. Special configurations can be supplied to meet your specific requirements.

SERIES	NO. OF BITS	2^n WHERE n=NO. OF BITS	OPERATING TEMPERATURE RANGE	ACCURACY TO FULL SCALE	STABILITY (Long Term)	SPEED TO SETTLE TO ½ LSB*

*Applicable above critical resistance

MOX-1E — MOX-5E in same values with diameter (**B**) $.315^{+.030}_{-.020}$

2 and 5% available in all values. 1% to 1000 megohms.

Temp Coefficient: This parameter varies with resistance value. Coefficients of 150 ppm in the low resistance values can be maintained, increasing to 2000 ppm in the higher values.

Voltage Coefficient: This parameter also depends on resistance value. Where a low voltage coefficient is required, it is possible to obtain values of 5 ppm or less.

Stability: Better than ±2% for 2000 hours at full load for MOX-400, -750, -1125; better than ±1% for 2000 hours for MOX-1 through -5.

Insulation Resistance: Adequate to 750 volts; with our special epoxy versions MOX-1E — MOX-5E available. This increases to 6000 volts with an attendant loss of power handling capabilities.

Standard Tolerances: For MOX-1 through -5, 1%, 2% and 5% available in all types and values. 2 and 5% available in all values. 1% to 1000 megohms. For MOX-400, -750, and -1125, 1% to 2000 megohms, 2% to 5000 megohms, 5% to 10,000 megohms. ½% in limited values on request.

For Less Critical Applications Involving HIGH VOLTAGE · HIGH IMPEDANCE HIGH WATTAGE

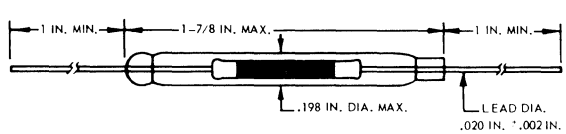
VARNISHED CARBON RESISTORS

HV Series High Voltage Resistors Features—Resistances from .01—25,000 megohms. Power ratings: Radial lug 1—10W; axial lead 1—5W. Max working voltages: Radial lug 3500—40,000 volts; axial lead 3500—30,000 volts.

HP Series High Power Resistors Features — Radial band type. Resistances 0.5—100,000 megohms. Power ratings 12—100W. Max working voltages 15—125 KV.

HF Series High Frequency Resistors — Elements are applied as a solid coating resulting in low inductance. Features: Resistances 20 ohms—100 megohms. Power ratings: Radial lug 1—10W; radial band 12—90W; axial lead 1—5W. Max working voltages: Radial lug 375—3100; radial band 1250—8500; axial lead 375—1500 volts.

TYPE RX-1 HI-MEGOHM RESISTORS



Features — Hi-Megohm resistors continue to be Victoreen's forte and the Type RX-1 series is pre-eminent as the most reliable of its type. Manufactured in accordance with MIL-R-14293A, characteristic T. Carbon coated glass rod resistor element banded with silver for electrical contact. Special silicone varnish coating. Noise level negligible. Available in resistances from 10^7—10^{14} ohms. Power rating is 1 divided by resistance in megohms. Tolerance 1% below 10^{12}, 2% and 5% below 10^{13} ohms, 10% over entire range. Max working voltage 1000V. Max ambient temperature 100°C.

GAMEWELL® precision potentiometers

CUSTOM-ENGINEERED WIRE WOUND AND CONDUCTIVE PLASTIC TYPES

...FOR YOUR MOST DEMANDING APPLICATIONS—Higher standards of performance at competitive prices are being demanded of today's electronic equipment. How does the precision pot stack up in this situation? It almost becomes a necessity. With Gamewell you specify exactly what you want — *no* more and *no* less! Gamewell precision pots pay off in the long run. They're tough. They're dependable. And they're remarkably precise. In most cases they actually cost less, when all is considered, than so called "economy" pots. Choice? You tell us. We can do — note the broad line of types shown below. These types represent but a small segment of the scope of Gamewell's *craftsmanship*. Let your pot requirements take a turn for the better; call in your local Gamewell representative today or write for a copy of our new detailed pot catalog.

NEW SINGLE-TURN POTENTIOMETERS EXCEED MIL-R-12934D

Amphenol now offers five single turn potentiometers that meet MIL-R-12934D in all requirements. The 2500 series potentiometers feature rugged welded terminations; a dual contact wiper that withstands up to 50 g's shock or acceleration; diallyl phthalate construction of rotor, insulator ring and element mount for high stability under varying humidity and temperature environments; and a movable clamp band that allows all phasing and zero settings to be accomplished in the field.

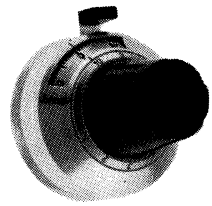
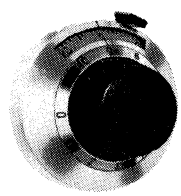
Specify these concentric scale Microdials for precise potentiometer control



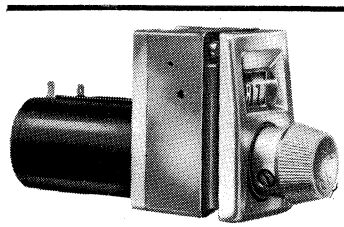
1370 Dial

Only ⅞" diameter (1" with finger brake), this 10-turn Microdial® projects 1 3/16" from panel. Don't let the small size of this dial fool you. It has the same silent gear action of the conventional size Amphenol dials. It indicates angular position of potentiometers and multiturn devices of 10 turns and less with 1000:1 indexing accuracy. Inner dial counts turns, outer dial ticks off hundredths. Locks rigidly on to shaft to eliminate backlash. Epicyclical internal gearing assures read-out accuracy. Finger-tip disc offers positive brake action without disturbing critical settings.



1350 Series, concentric

Indicates angular position of potentiometers and multiturn devices of ten turns and less with 1000:1 indexing accuracy. Inner dial counts turns, outer dial ticks off hundredths. Locks rigidly onto shaft to prevent backlash. Internal gearing is epicyclical type so you always know exact reading. Fingertip brake holds shaft position until reset.



3100 Dial-Pot Assembly

Amphenol's Dial-Pot assembly saves you time and money . . . eliminates costly mounting and phasing. If you now buy pots and dials separately, but for the same application, your production people must (1) mount the pot from back of panel, (2) mount the dial from front of panel, and (3) phase the dial to the pot so the dial reads zero at electrical output. Amphenol prephases and preassembles the 3100 dial to any potentiometer at no extra cost. You simply mount the assembly from rear of panel and wire into your circuit.

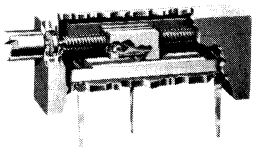
Humidity-proof trimmers pass MIL-R-27208A moisture resistance test.

Film-Met™ by Amphenol



It's an exclusive Amphenol resistance element* completely different from wirewounds and cermets.

Film-Met™ is a 100% metal element, not a cermet material. The process is different, too. We use a vacuum deposition chamber and our patented process to evaporate metal alloys onto an insulating substrate. The resistive track is then protected by a noble metal overlay.

But the big Film-Met difference is performance.

Film-Met offers both infinite resolution and a low temperature coefficient of 100 ppm/°C maximum. 50 ppm/°C is available on request. It also provides excellent high frequency and pulse characteristics along with low current and low thermal noise.

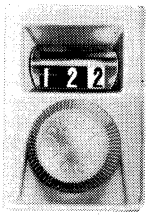
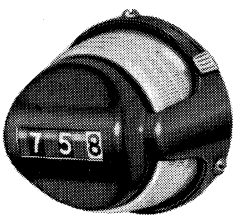
Get fast digital readout from this new miniature Microdial®



Remarkably accurate (1000:1 indexing accuracy) miniature 3100 Series dial almost makes a standard circular dial look gigantic by comparison. This new Microdial measures only 1-1/8 x 1-21/32 inches and protrudes only 25/32" from a panel.

Digits (with illumination optional) are magnified by convex lens in recessed window. Three-digit, ten-turn dial rotates continuously forward or backward with push-pull fingertip brake to lock settings. This 3100 miniature Microdial will mount on panels from 1/16" through 3/16" thick. Special readouts also available.

Standard color: natural brushed aluminum finish.



1300 Series, digital

Gives you fast, accurate indication of shaft position up to 1,000 turns. All models (3-digit 10-turn, 4-digit 100-turn, and 5-digit 1,000 turn) mount directly on shaft to be controlled, eliminating backlash. Speed: up to 6,000 counts per minute.

Large, contrasting numerals readable even from angular view because convex windows reduce glare, reflections. Rugged, dust-sealed construction includes nylon counter wheels, brass gear assemblies, knurled aluminum control knobs. Brake optional. Special readouts are also optional. This dial is also supplied in militarized models.

1330 Series, digital

You get straight-on or angular readout, even in the dark, with this illuminated turns-counting Microdial. One-piece 1.5x lens/window magnifies numerals. In exactly ten turns, unit counts from 000 through 999. Fingertip brake locks settings in place.

This Microdial is sealed against dust and moisture, yet its snap-on cap makes lamp replacement easy. Standard finishes for color coding: dark or light gray, red, white, and black; other colors available on request.

Microdial—

Helipot® NON-LINEAR PRECISION POTENTIOMETERS

Helipot manufactures non-linear precision potentiometers, identical to linear models in every way except for the resistance element. Non-linear models, with outputs ranging from the simplest monotonic function to the most complex non-monotonic function, can be supplied with either wirewound, cermet or conductive plastic resistance elements. The approximate conformity, total resistance and power rating of a Helipot non-linear potentiometer can be determined by using the following formulas and the constants listed in the table below.

$$\text{Conformity} = (\text{max. slope}) \times (\text{min. practical linearity})$$

$$\text{Total Resistance} = \frac{\text{max. total resistance}}{\text{max. slope}}$$

$$\text{Power Dissipation} = \frac{\text{max. slope}}{\text{power rating}}$$

SINGLE-TURN WIREWOUNDS

	Nominal Diameter					
	⅞"	1 1/16"	1 5/16"	1 7/16"	2"	3"
Min. Practical Linearity (± %)	0.15	0.12	0.10	0.08	0.07	0.05

	High temperature trimmer with metal housing meets most requirements of MIL-R-22097.	Commercially-priced miniature trimmer available with stops and longer pins.	Low-cost ⅜" square trimmer sealed for PC board washing and potting with low viscosity materials.	Economical ¾" trimmer sealed for solvent cleaning and low viscosity potting.	This adjustment trimmer with sealed plastic housing and RJ11 style pin spacing.

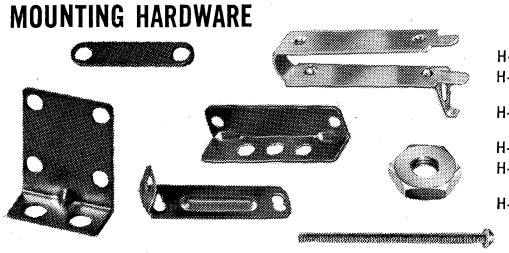
MOUNTING HARDWARE



H-01 —1½", 2-56 machine screw
H-02 —2-56 Stainless steel rod stock (12" length only)
H-03 —2.56 Hex nut, stainless steel for use on H-01 and H-02
H-04 —1-72 machine screw, 1" long
H-05 —1-72 hex nut, stainless steel (for use on H-04)
H-12S—Stainless steel side bracket for models with 1" mounting centers
H-22S—Stainless steel side bracket for models with ¾" mounting centers
H-25 —Stainless steel stacking straps for models with 0.520" mounting centers
H-11E—Stainless steel end bracket for models with 1" mounting centers
H-21E—Stainless steel end bracket for models with ¾" mounting centers
H-26S—Stainless steel side bracket for models with 0.520" mounting centers

NOTES

[1] Key to terminal types: L=Insulated stranded leads. S=Solder Lugs (includes panel mount bushings on models 3300S, 3301S, 3367S, 3368S only). P=Printed circuit pins (flat mounting). W=Printed circuit pins (edge mounting). Additional worm gear terminal classification: W=Printed circuit pins (edge mounting—top adjustment). H=Printed Circuit pins (edge mounting—side adjustment).

[2] Franchised local distributors quote factory prices to 500 pieces. Contact factory for prices in high quantities.

[3] The following resistances are standard if they fall within the limits listed: Wirewound—10, 20, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 25K, 50K, 100K. RESISTON, RESISTALOY—5K, 10K, 20K, 50K, 100K, 200K, 500K, 750K, 1 Meg., 2 Meg., 5 Meg. PALIRIUM—2, 5, 10, 20, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 20K, 50K, 100K, 200K, 500K, 750K, 1 Meg. Other resistances available on special order.

[4] Closer tolerances available on request except commercial models.

[5] All models are sealed against sand and dust.

[6] Humidity-proof versions available on special order. Contact factory for part number, price and delivery.

Other patents pending. Certain Bourns products are under issued and pending foreign patents.

BOURNS INC ADJUSTMENT POTENTIOMETERS

CERMET ELEMENT TRIMPOT POTENTIOMETER

NEW PRODUCT DEVELOPMENT

The vast improvements following the original design and prototype of the first adjustment potentiometer has now, as in the past, meant that Bourns sets the standard for the industry. The new products and processes constantly being developed – RESISTON® carbon and PALIRIUM® cermet elements, and the virtually indestructible SILVERWELD® termination, to name a few–serve to show that Bourns produces today what others predict for tomorrow.

Bourns potentiometers – not merely first, but the largest producer in the industry.

PRODUCT ENGINEERING

This group of highly trained, professional personnel utilize their specialized training to provide rapid, accurate technical assistance. Their individual experience and technical knowledge about adjustment potentiometers enables them to provide this service in a concise manner which saves you time and cuts costs. Such vital and time-saving assistance–available, incidentally, only from Bourns–is another part of the Bourns Total Value picture.

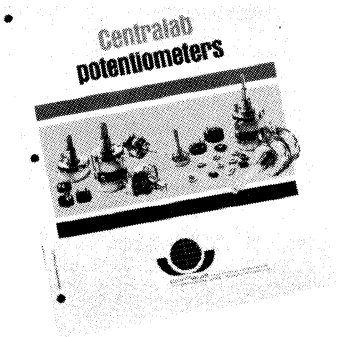
Centralab potentiometers and trimmers are available in the size, resistance wattage and styles you need!



Request your copy of this potentiometer catalog through Centralab's advertising department.

Below is a brief summary of the types listed in our sixty page potentiometer catalog. These potentiometers are in many cases available ganged and with either front or rear mounted wafer switches as well as rear mounted line switches. Special tapers for almost every application are already available.

Most of these potentiometers have dustproof construction. Equivalent noise resistance of as low as ½% of nominal maximum resistance is available.

Many models are available with numerous mountings and terminal configurations, enabling easy fitting into printed circuit boards or wired construction.

Diameter Inches	Rotation Mechanical	Resistance Range, Ohms	Tapers	Terminals	Power Rating	Application Mil.	Com'l.	Ind.
MODEL 1 MINIATURE COMPOSITION—SPST Switch Available								
5/8 without knob 45/64 with knob	260°	200—10 meg	variety	solder lug or P.C.	.2W @ 40°C		X	X
MODEL 2 COMPOSITION—Available in an almost unlimited range of mountings, terminals, shafts & line switches								
15/16	300°	200—10 meg	variety	variety of solder lugs & P.C.	.5W @ 40°C		X	X
MODEL 3 COMPOSITION								
43/64	260°	100—10 meg	variety	solder lug	.25W @ 40°C	X	X	X
43/64	260°	100—10 meg	variety	solder lug	.5W @ 70°C	X	X	X
MODEL 3W WIRE WOUND								
43/64	250°	30K—10 meg	variety	solder lug	1.5W @ 40°C		X	X
43/64	250°	30K—10 meg	variety	solder lug	2.W @ 70°C	X		X
MODEL 4 WIRE WOUND								
1-5/32	295°	1—100K	variety	solder lug	.5W @ 40°C	X	X	X
MODEL 5 COMPOSITION SINGLE OR MULTIPLE MINIATURE TRIMMERS (with integral fixed PEC® resistors & capacitors on ceramic plate optional)								
approx. 3/4" square (single unit)	290°	200—10 meg	linear	solder lug or P.C.	.25W @ 70°C	X	X	X
MODEL 6 MINIATURE COMPOSITION—SPST Switch Available								
1/2	250°	200—10 meg	variety	solder lug	.1W @ 40°C		X	X
MODEL 8 MICRO-MINIATURE COMPOSITION—SPST Switch Available								
9/32	250°	200—10 meg	variety	P.C.	.1W @ 40°C		X	
MODEL 9 MINIATURE COMPOSITION								
45/64	260°	100—10 meg	variety	solder lug or P.C.	.2W @ 40°C	X	X	X
MODEL 12 HOT MOLDED								
1-7/64	312°	10-5 meg	variety	solder lug	2.25 @ 70°C	X	X	X

FOR IMMEDIATE DELIVERY

Many types, in most popular resistance ranges, are stocked by Centralab Industrial Distributors.

CARTER MANUFACTURING CORPORATION

CARTER MANUFACTURING CORP. IS AN ORGANIZATION OF ENGINEERS AND CRAFTSMEN SPECIALIZING IN THE UNUSUAL IN POTENTIOMETERS AND SWITCH ENGINEERING AND THEIR MANUFACTURE. SINCE THE FOUNDING IN 1955 WE HAVE DEVELOPED FULL CAPABILITY IN WIRE WOUND AND CONDUCTIVE PLASTIC POTENTIOMETERS AND WILL WELCOME THE OPPORTUNITY TO WORK WITH YOU ON YOUR UNIQUE REQUIREMENTS AS WELL AS STANDARD COMMERCIAL OR MIL TYPES.

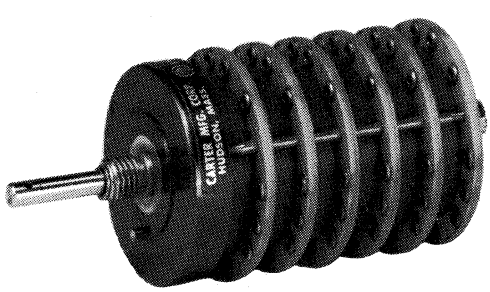
SWITCHES



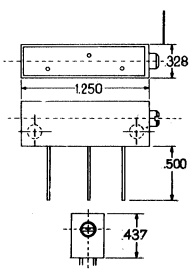
CARTER MANUFACTURES CUSTOM MADE SWITCHES IN CONJUNCTION WITH POTENTIOMETERS OR AS ENCLOSED WAFER TYPES. THEY MAY BE SIMPLE ANGLE INDICATORS OR PRECISION COMMUTATORS. SUCH APPLICATIONS REQUIRING HIGH PRECISION, MINIATURIZATION & SOPHISTICATED SWITCHING FUNCTIONS HAVE BEEN SOLVED, MANY WITHIN THE PARAMETERS OF COMMON SWITCH APPROACHES. CARTER'S UNIQUE SWITCH ENGINEERING HAS SUPPLIED THE ANSWER WHEN THE NUMBER OF POLES OR CONTACTS ARE IN CONTRADICTION WITH THE AVAILABLE SPACE. WHEN INTERCONNECTIONS BECOME A PROBLEM THEY CAN BE GREATLY REDUCED BY CUSTOM DESIGNED INTERNAL INTERCONNECTIONS INCREASING RELIABILITY & IMPROVED APPEARANCE.

DESIGN & SELECTION CRITERIA of

MINIATURE TRIMMERS

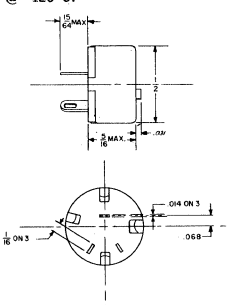
MULTI-TURN
Series 76

Resistance Range: To 20K ohms • **Tolerance:** ±5% • **Power Rating:** .75W @ 85°C, Derated to zero @ 150°C.



SINGLE-TURN
Series 371

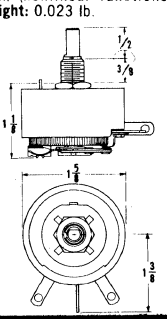
Resistance Range: 100 ohms to 1 megohm • **Tolerance:** ±20% standard, ±10% also available • **Working Voltage:** 350 volts R.M.S. max • **Power Rating:** ¼ watt @ 70°C derated linearly to zero watts @ 120°C.



RHEOSTAT

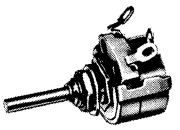
POWER RHEOSTAT
Series 25

Resistance Range: 0.5 to 5K ohms • **Tolerance:** ±10% or closer • **Power Rating:** 25W @ 25°C. • **Working Voltage:** 350V max. • **Effective Rotation:** 280°±5° (250°±5° with off switch) • **Tapers:** 18 ohms per° max. (nonlinear functions) • **Weight:** 0.023 lb.

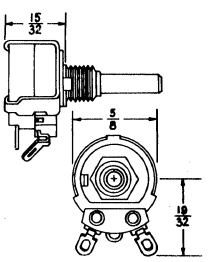


COMPOSITION-ELEMENT POTENTIOMETERS

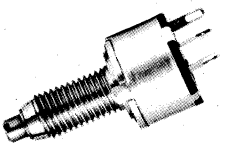
0.3 WATT
Series 48



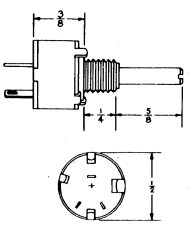
Resistance Range: Linear 100 ohm to 5 megohms, **Tapered** 500 to 2.5 megohms • **Tolerance: Linear** To 100K ohms ±10%, over 100K ohms: ±20%, **Tapered** 20% of all values • **Power Rating: Linear** 0.3W to 10K ohms; 0.2W over 10K ohms @ 40°C, Derated to zero power @ 85°C • **Weight:** 0.14 oz.



0.5 WATT
Series 63

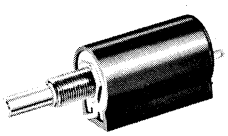


Resistance Range: 100 ohms to 5 megohms • **Tolerance:** To 1 megohm ±10%, over 1 megohm ±20% • **Power Rating:** 0.5W @ 70°C, Derated to zero power at 120°C.

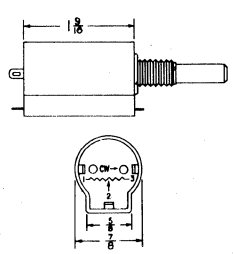


PRECISION POTENTIOMETERS

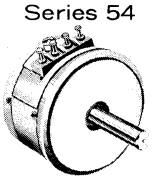
MULTI-TURN
Series 62



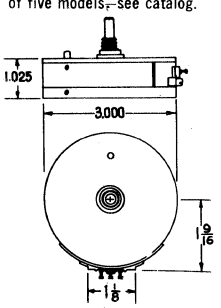
Resistance Range: To 100K ohms • **Tolerance:** ±5% • **Linearity:** 0.25% Absolute • **Power Rating:** 2W @ 25°C, Derated to zero @ 85°C • **Maximum Number of Turns:** 10 • **Weight:** 1.34 oz.



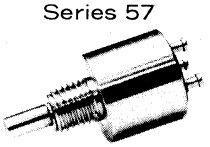
VARI-PHASE
Series 54



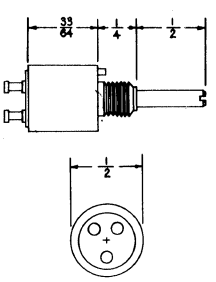
Resistance Range: To 300K ohms • **Tolerance: Standard** ±5%, **Special** ±1% • **Linearity: Standard** ±0.5% Absolute, **Special** ±0.15% Indep. • **Power Rating:** 6.1W @ 40°C, Derated to zero @ 125°C • **Maximum Number of Gangs:** 12 • **Weight:** 4.5 oz. • **Note:** One of five models—see catalog.



MINIATURE
Series 57

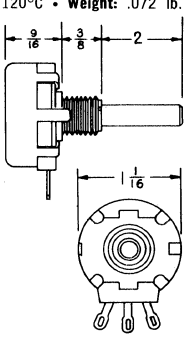


Resistance Range: Standard To 25K ohms, **Special** To 100K ohms • **Tolerance:** Standard ±10%, **Special** To ±3% • **Linearity:** Standard ±2.0%, **Special** Specify • **Power Rating: Standard** 2W @ 70°C, **Special** Specify • **Weight:** .25 oz.



2 WATTS MOLDED
Series 53

Resistance Range: Linear 50 ohms to 10 megohms • **Tapered** 250 ohms to 5 megohms • **Tolerance:** To 1 megohm 10%, over 1 megohm ±20% • **Power Rating:** 2W @ 70°C, Derated to zero power @ 120°C • **Weight:** .072 lb.



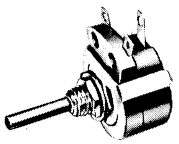
CLAROSTAT

CLAROSTAT MFG. CO., INC. DOVER, NEW HAMPSHIRE

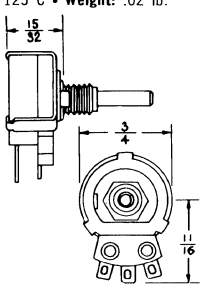
RESISTANCE & SWITCHING DEVICES

WIRE-WOUND POTENTIOMETERS

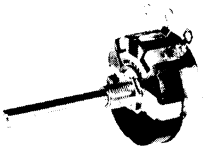
1.5 WATTS
Series 49



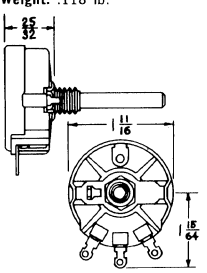
Resistance Range: 1 to 20K ohms • **Tolerance:** ±10% or closer, specify • **Linearity:** ±5% or closer, specify • **Power Rating:** 1.5W @ 40°C, Derated to zero power @ 125°C • **Weight:** .02 lb.



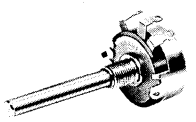
3 WATTS
Series 58



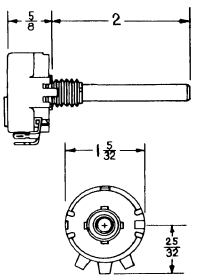
Resistance Range: 1 ohm to 75K ohms • **Tolerance:** ±10% or closer, specify • **Linearity:** ±5% or closer, specify • **Power Rating:** 3 or 4W (specify) @ 40°C, Derated to zero power @ 105°C • **Typical Weight:** .118 lb.



2 WATTS
Series 43

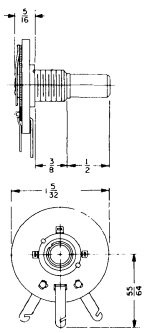


Resistance Range: 1 ohm to 50K ohms • **Tolerance:** 10% or closer, specify • **Linearity:** 5% or closer, specify • **Power Rating:** 2W @ 40°C, Derated to zero power @ 105°C • **Weight:** .077 lb.

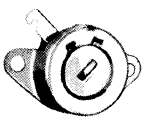


1 WATT HUMDINGER
Series MH

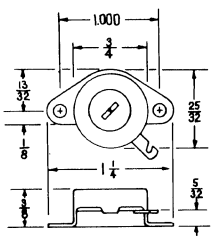
Resistance Range: 2 to 15K ohms • **Tolerance:** ±10% • **Power Rating:** 1 W @ 40° C. • **Taps:** Available in any position • **Effective Rotation** 280° • **Weight:** 0.024 lb.



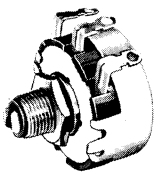
2 WATTS HUMDINGER
Series 39



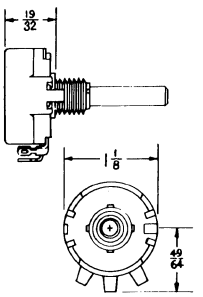
Resistance Range: 4 ohms to 5K ohms • **Tolerance:** ±20% • **Power Rating:** 2 Watts @ 40°C • **Weight:** 0.008 lb.



4 WATTS
Series 45



Resistance Range: 1 ohm to 10,000 ohms • **Tolerance:** ±10% or closer, specify • **Linearity:** ±5% or closer, specify • **Power Rating:** 4W @ 40°C, Derated to zero power @ 135°C • **Weight:** .077 lb.



FIXED WIRE-WOUND POWER RESISTORS

GREENOHM — Cement-Coated type, extra rugged, 5 to 200 watts.

GREENOHM, Jr — Ceramic-cased axial lead, 5 to 20 watts.

STANDEES — Ceramic-cased for upright chassis mounting, 10-20 watts.

SERIES ZT — Stack-mounting, cement coating, 30-75 watts.

FLEXOHMS & GLASOHMS — Flexible resistors for point-to-point circuitry.

GREENOHM "V" — Vitreous enameled power resistors 5-200 watts.

SERIES VZT — Vitreous enameled, stack-mounting, 30-75 watts.

SERIES SC — Precision molded power resistors, 1 to 10 watts.

SERIES VC — Vitreous enameled, axial lead 3, 6.5, 11 watts.

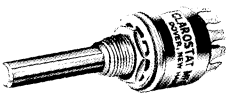
GREENOHM EDGE-WOUND — Vitreous enameled power resistors, 90-375 watts.

SERIES 25 & 25G — Power-type variable resistors, 25 watts — 0.5 ohm to 5000 ohms.

SERIES 50 & 50G — Power-type variable resistors, 50 watts — 0.5 ohm to 10K ohms.

SWITCHES

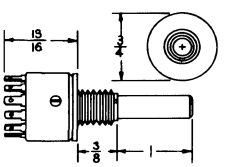
MINIATURIZED ROTARY SELECTOR SWITCHES
Series BHM



Current Rating: 50 ma @ 300 V.A.C. or d.c.; 500 ma @ 30 V.A.C. or d.c.

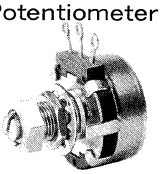
Switch Variations:
Shorting: Single pole, 12 positions; 2 pole, 6 positions; 3 pole, 4 positions; 4 pole, 3 positions.
Non-Shorting: Single pole, 12 positions, 2 pole, 6 positions; 3 pole, 4 positions; 4 pole, 3 positions.

Contact Resistance: 0.005 ohms.

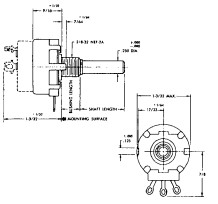


THE QUIET ONES

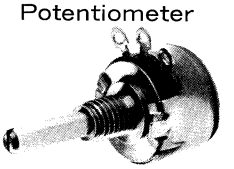
2 WATTS
Series 380
Potentiometer



Resistance Range: 100 ohms to 5 megohms. **Tolerance:** ±10% thru 0.5 megohms. **Linearity:** ±5%. **Power Rating:** 2W (single control). **Noise:** linear single controls max. initial noise level of 1% RT. **Weight:** 0.072 lbs.



1 WATT
Series 381
Potentiometer



Resistance Range: 100 ohms to 5 megohms linear; 500 ohms to 2 megohms tapered. **Tolerance:** ±10% thru 0.5 megohms; ±20% over 0.5 megohms. **Linearity:** ±5% (graph) **Power Rating:** 1 watt (single control). **Noise:** linear single controls max. initial noise level of 1% RT. **Weight:** 0.017 lbs.

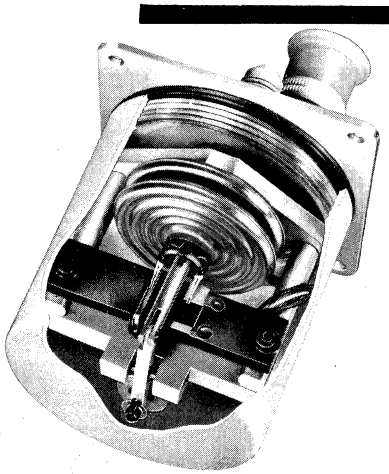
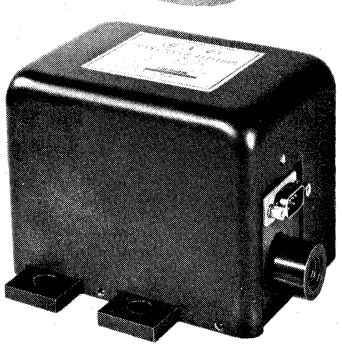
(Available in All Models)





AIR DATA TRANSDUCERS

CIC's Model 7000 and 7100 Altitude and Airspeed Transducers provide high AC or DC outputs, virtually infinite resolution, and extremely long life through the use of a unique CIC conductive film potentiometer element. Precise shaping of the film element to compensate for the non-linear pressure vs altitude or airspeed relationship affords a highly accurate output directly proportional to altitude or airspeed.

Used in many military and commercial aircraft, these transducers provide a firm building block for many of CIC's Air Data Systems.

CIC's series 8000 "NULL BALANCE" Transducers utilize an inductive type pressure sensor and servo follow-up system for the utmost in pressure sensitivity and accuracy. For altitude or airspeed outputs, a shaped CIC conductive film potentiometer provides correction for the non-linear pressure relationships.

Units available to cover Altitude ranges from –1K' to 2K' Full Scale up to –1K' to 100K' Full Scale, and Airspeed ranges from 0-100KTS Full Scale up to 0-1000KTS Full Scale.

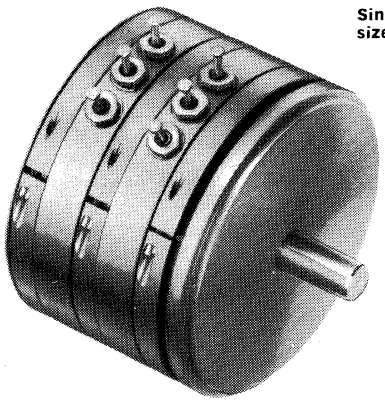
Special versions include circuitry which converts the transducer into a low cost Altitude Controller.

Digilog
PRECISION POTENTIOMETERS

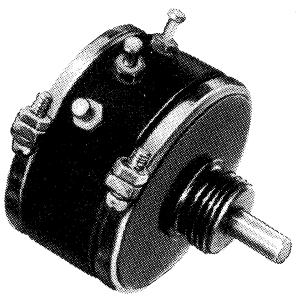
A product family in which Digilog can quickly meet your needs for

- **NON-LINEAR FUNCTIONS**
- **SPECIAL CONFIGURATIONS**
- **APPLICATION ENGINEERING KNOW-HOW**

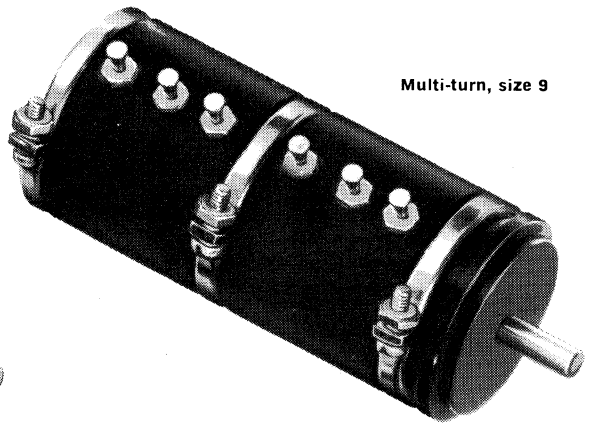
Need custom winding or non-standard configurations? Do you have problems with "dry circuit" noise, high wiper currents, special temperature or radiation environments? Digilog has both know-how and facilities to come up with the solutions — fast.



Single turn sizes 14-30



Single turn, sizes 8-11



Multi-turn, size 9

Shaft diameters, ⅛" and ¼"
Servo, bushing and screw mounting types
Power ratings, 1.5 to 7.5 watts
Temp. range, −55°C to +125°C

Temp. coefficient of resistance, +50 PPM/°C nominal
Stnd. resistance tolerance, ± 3%
All models comply with applicable paragraphs of MIL-R-12934
For special requirements, submit drawings and specs or request application data sheet

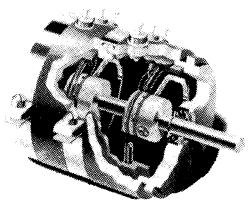
PRECISION POTENTIOMETERS—SINGLE TURN *(Write for Catalog B)*



• Precision machined anodized aluminum cups • Molded Diallyl Phthalate liners • Welded tap and terminal construction • Precious metal wipers and slip rings • Flush clamp bands • Gold-plated terminals • Precision sleeve or ball bearings • Centerless ground stainless steel shafts • Single or ganged units.

SPECIFICATIONS:

- Meet requirements of MIL-R-12934 and NAS-710
- Eight physical sizes, 3/4" to 3" diameter
- Electrical angles and functions to specification
- Special mechanical configurations available

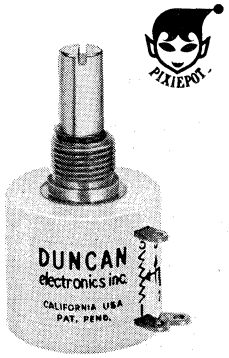
"From Duncan With Love"

PRECISION LINEAR AND NON-LINEAR POTENTIOMETERS AND MINIATURE TURNS-COUNTING DIALS

SUPER-ECONOMY PIXIEPOTS

The only thing smaller than Duncan Electronics' PIXIEPOT® is the price — under $3.50 in production quantities! It's the one and only precision 10-turn miniature pot at this price with all these features:

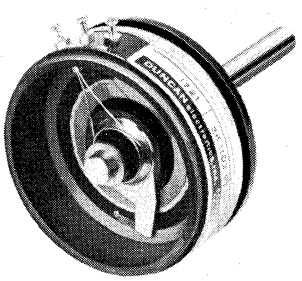
- Length: only ¾"
- Diameter: only ⅞"
- Linearity: ±0.25%
- Resistance Range: 100 ohms to 100K ohms
- Power Rating: 2 watts @ +20°C
- Temperature Range: —25°C to +85°C
- Resolution: Better than ANY wirewound pot TWICE its size
- Slotted Stainless Steel Shaft/C ring
- Now you can save big dollars on your instrument and system requirements. Specify Model 3253 PIXIEPOT potentiometers in a combination package with Model 61 miniature turns-counting dials at one super-budget price . . . under $7.00 in production quantities. In-stock delivery, of course.



RESOLON CONDUCTIVE PLASTIC

Duncan Electronics' RESOLON® single-turn, non-wirewound potentiometers are the perfect result of years of development. The RESOLON potentiometer's conductive plastic element provides a wide, flat surface that permits the use of multiple-finger wiper contacts. Either linear or non-linear functions may be provided by these potentiometers. State-of-the-art design and strict quality control add up to these outstanding features:

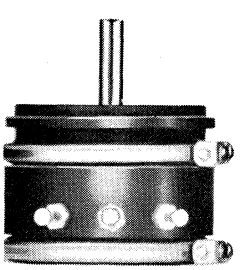
- Long Life: 20 million shaft revolutions without significant change in characteristics
- Low Temperature Coefficient: —300ppm/°C max.
- Wide Temperature Range: —65°C to +125°C
- Conformance to all applicable MIL specs, including MIL-R-39023
- Low Output Smoothness: maximum of 0.1% of total applied voltage
- Linearity and conformity tolerance to ±.05%
- Single-turn/servo-mounted; available in ⅞" to 3" diameters



PRECISION WIREWOUND POTS

Duncan Electronics' precision wirewound single-turn and multi-turn potentiometers offer such outstanding features as rugged diallyl phthalate housings; stainless steel shafts and clamp bands; gold-plated, turret-type terminals; welded terminations, and life expectancy to two million shaft revolutions. Military versions meet all applicable portions of MIL-R-12934. Design features include:

- Resistance Element: use of long-life, low-tempco resistance wire.
- Wiper Design: precious metal contact provides "leaf-spring" wiping action for positive contact at severe vibration and shock levels
- Slip-Ring Design: novel seating action of dual "whisker" in V-groove slip-ring virtually eliminates possibility of contact discontinuity from shock or vibration.
- Rotor Design: special low-inertia rotor allows quick response in stringent servo applications
- Housing: use of glass-filled diallyl phthalate (for military models) and special high-impact plastic (for commercial versions) assures high strength, excellent environmental resistance & dielectric properties.



TURNS-COUNTING DIALS!

Duncan Electronics has three big series of miniature turns-counting dials to enable the accurate positioning of multi-turn potentiometers. Yet despite their compactness, each dial provides for optimum readability — you can take precise readings at a glance from any angle. Duncan miniature turns-counting dials all feature positive-action locks, and require minimum panel drilling and mounting hardware. You can count on Duncan for fast in-stock delivery at the right low prices too.

- **SERIES 60:** inner scale graduated in fiftieths of a turn; outer scale in full turns from 0 to 9.
- **SERIES 80:** a 10-turn counter indicates full turns completed; the 100-division scale indicates hundredths of a turn.
- **SERIES 70**
- **Digital Model 71:** magnifying face lens projects 3-digit readout to a hundredth of a turn
- **Clockface Model 76:** only ⅞" diameter is ideal for minimum space applications. Excellent readability to 50ths of a turn.

THICK FILM RESISTOR NETWORKS (DUAL-IN-LINE PACKAGE)

Electra cermet is used in making thick film networks. Passivation is accomplished by screening with a glass material. Electra technology offers the advantage that substrate, cermet, and passivation materials have nearly the same expansion coefficient hence networks can be provided with superior TC of R characteristics.

1. **Resistance Range:** 10 ohms to 1.5 megohm
2. **Resistance Tolerance:** ±1% to ±10%
3. **Number per Network:** Up to 13 depending upon circuit.
4. **Absolute TC of R:** ±100 PPM/°C., −55°C to 125°C
5. **Tracking TC of R:** ±5 PPM/°C., resistors with 20:1 R ratio within a package.
6. **Matching of Resistance:** To ±.1%
7. **Package:** 14 Pin DIP Ceramic, Epoxy Sealed, 1 watt @ 70°C.
   14 Pin DIP Plastic, ½ watt @ 70°C.

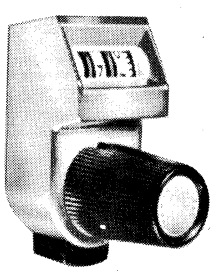
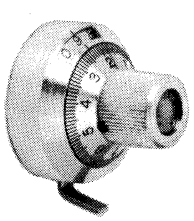
FAIRDIAL TURNS-COUNTING DIALS



DIGITAL TYPE DFD

- **250 Parts Per Million Reading Accuracy**
- **High-Density Packaging— Up To 72 Per Square Foot!**

INDICATION: Digital, three digit counting wheels registering from 000 to 999. Four intermediate graduations between adjacent numerals on right hand counter wheel.

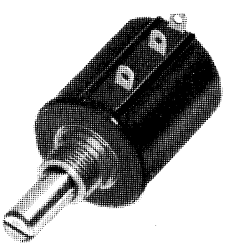


ANALOG TYPE DFA

- **1 Part in 1000 Reading Accuracy**
- **Up to 99 Dials Per Square Foot of Panel Space!**

INDICATION: Single counter type wheel and a graduated circular dial registering a total count of 999.

FAIRCON TYPE MF-78 WIREWOUND 10-TURN PRECISION POTENTIOMETERS



- **.007% to .033% Resolution**
- **±0.2% Linearity**
- **2 Watts Rated Dissipation**
- **In Less Than 1 Cubic Inch!**

The MF-78 is available in 9 standard resistance values: 500, 1K, 2K, 5K, 10K, 20K, 50K, 100K, 125K ohms—other values can be furnished on special order. Standard tolerance in Total Resistance value is ±3%.

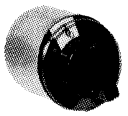
esi Precision Decades and Components

Electro Scientific Industries available panel mount decades, dividers and individual resistors that provide the nucleus components for all our precision measurement and calibration equipment (see Section 2900). The patented Dekadial® stacked decades save panel space at 0.02% accuracy in the decades, 20 ppm for the dividers. The miniature Dekadials are now 2.2 inches width, 4 inches in depth. Solid silver-alloy switches are used throughout, plus silicone-treated ceramic switch wafers. The wire-wound resistors are produced by a proprietary aging process for highest precision and stability.

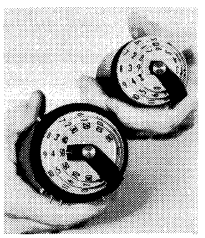
RESISTIVE DECADES



DS 12 Individual Decade Resistor. Nine different total resistances available for DC and audio frequency applications. Can be used as a divider by cutting jumper.

DS 625A Dual Dekastat. Six miniature resistor decades dual mounted for easy in-line reading.

DEKASTATS



DS 325A Miniature Dekastat. 3 decade coaxial available in three different total resistances.

DS 1365 Precision Dekastat. Three coaxial decades available in four different total resistances.

MODEL	DESCRIPTION	PER STEP	TOTAL RESISTANCE	NOMINAL ACCURACY	PRICE
DS 12	Single 10-step resistance decades	0.01 Ω—1 MΩ	0.1 Ω—10 MΩ	0.02%	$ 25.—$100.

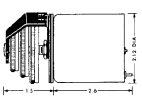
DEKAPOT® DIVIDERS

DP 1311 Decade Potentiometer. Kelvin-Varley linearity is guaranteed 20 ppm stable/yr. Three decades plus 100-division potentiometer gives resolution of 0.0003%. Three different values available.

DP 310 Miniature Decade Potentiometer. Just 2.2 inches of panel, but 2 decades and 100-division potentiometer with same basic operation performance of larger decades.



DEKATRANS®

DT 1145 Miniature Decade Ratio Transformer. Dekatrans are inductive voltage dividers for use at audio frequencies. High input impedance, low output, and low phase shift make it ideal for testing voltage and current division, turns-ratio measurement, divider calibration and impedance comparison.

MODEL	DESCRIPTION	VALUE OR RATIO	LINEARITY	PRICE
*DV 411	Resistive Divider, adjustable base, 3 decades plus pot	1 kΩ	20 ppm	$ 235.
		10, 100 kΩ	20 ppm	190.

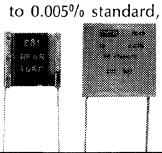
PRECISION WIREWOUND RESISTORS AND RESISTOR NETWORKS

Wirewound Resistors. A special ageing process ensures stability to 0.005% standard, or 0.001% on the best available. Standard accuracy is 0.01%, but 0.0015% is available. Changes in environment have little affect and ac residuals are low. Come in open frames (RF), encased in diallyl phthalate (RC) or hermetically-sealed cases (RH).



Custom Resistor Networks. Ideal for solving problems in ratio, temperature coefficient matching and special packaging. Economical and backed by 2-year warranty. Packaging available in variety of configurations, from low cost terminal boards to MIL-approved, hermetically sealed units. Ratios of 1:1 matched to 0.0002%; temperature coefficients matched to 1 ppm/°.

MALLORY CONTROLS

CARBON CONTROLS

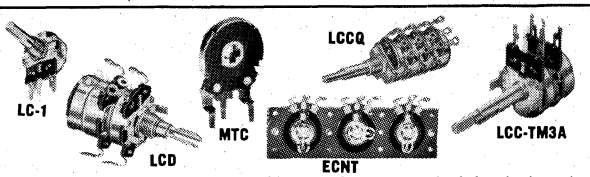
LC-1 — Mallory single bushing mount printed circuit type No. 1.

LCD — Mallory tandem dual bushing mount and twist ear mount. Any style mounting available. Any length metal shaft available. Also available with nylon shaft.

LCC-TM3A — Mallory concentric shaft dual printed circuit type number 3A twist ear mount. Any type mounting available. Any length metal shaft.

LCCQ — Mallory section concentric shaft control. Various combinations are available.

ECNT — Triple twist ear mounting nylon shaft. Standard FMS 3/8", 1/2", 3/4" and flush. Taps are not available in this design.

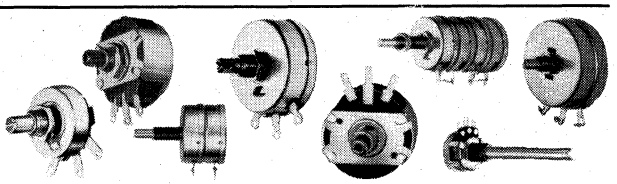


MTC — This Mallory type miniature trimmer control is designed for printed circuitry. It can be used in transistorized or tube circuits and wherever an occasionally adjusted, low wattage, carbon type variable resistance source is needed.

WIREWOUND CONTROLS

With a range of 2 to 12½ watts, Mallory offers the widest range of commercial wire-wound controls available. Within this wattage range, there are 19 different styles of wire-wound controls and 14 different styles of wire-wound attenuators that will meet nearly all applications where a variable wire-wound control or attenuator is specified.

When to Specify Variable Wire-Wound Controls: Mallory wire-wound controls and attenuators are ideal in all electrical and electronic circuits requiring a power dissipation of 2 - 12½ watts. They effectively bridge the gap between the services performed by carbon potentiometers and those performed by the larger vitreous enameled power rheostats.



Wire-wound potentiometers offer a much higher degreee of precision in overall tolerance, linearity and special curves than is obtainable from carbon units.

POWER WIREWOUND RHEOSTATS

STYLE "K" RHEOSTATS — Mallory offers a broad range of power rheostats in eight different wattage sizes with resistance values ranging from 0.5 to 10,000 ohms.

Style "K" rheostats are precision-constructed to provide long life and exact performance in hundreds of different electrical and electronic applications. All current-carrying parts are electrically insulated by dimensionally stable ceramic parts. All styles have been tested up to 5000V without breakdown between live parts and shaft or bushing.

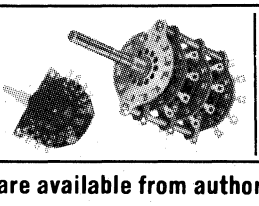
SWITCHES

Mallory's broad line of rotary, lever and push button switches are known throughout the world for reliability.

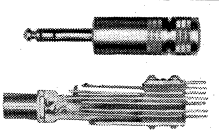
Whether your requirements are for prototype or production use, Mallory can readily supply a standard switch from stock or custom-made-unit tailored to your specifications.



JACKS AND PLUGS

Mallory offers a wide variety of jacks and phone plugs capable of meeting the designer's most exacting needs. An infinite number of circuit combinations is standard for various jack frame styles.

Each plug provides a conventional receptacle capable of mating with various plugs.



Standard Mallory components are available from authorized Mallory distributors throughout the United States.

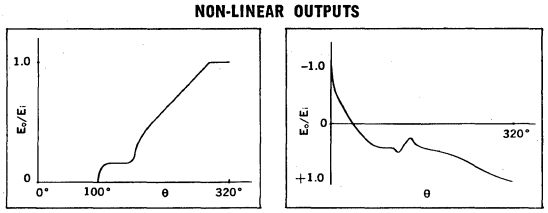
Resistance Tolerance	±10%					
Standard Linearity	±0.5% or ±0.2% (Please specify)					
Resolution	SUBSTANTIALLY INFINITE					
Ambient Temperature Range	−65°C. to +125°C., standard, continuous					
Continuous Power Dissipation (at 20°C., in air) *	1.5w	1.5w	2.0w	3.0w	3.2w	5.0w
Insulation Resistance	Greater than 20 megohms @ 500 VDC					
Dielectric Strength	1000 VRMS @ standard atmospheric conditions					

* Single Cup

- INFINITE RESOLUTION (no servo hunting)
- LONG USEFUL LIFE (many milions of cycles in system use)
- INCREASED RELIABILITY (rugged 1-piece molded element)
- NO CATASTROPHIC FAILURE (no sudden opens or shorts)
- HIGH ACCURACY: ±0.5% standard linearity; special accuracy to ±0.01% on 5" dia. units
- STABLE OUTPUT AND CONTINUOUS OPERATION IN EXTREME ENVIRONMENTS (no wiper bounce)
- CONSISTENTLY LOW NOISE IN SYSTEM USE (uniform and predictable throughout long life)
- INSIGNIFICANT QUADRATURE EFFECTS (to at least 100 Kc)
- UNIFORM PERFORMANCE OF PROTOTYPES AND QUALITY PRODUCTION (Close duplication assured through molding with precision steel dies)

NON-LINEAR OUTPUTS



The high accuracy functions above typify Markite's virtually unlimited capability in meeting the most demanding output requirements. These range from the simplest to the most complex functions, whether monotonic or reversing, with or without multiple inflections.

These units provide the same operational advantages furnished by Markite linear output potentiometers, including infinite resolution, exceptionally long useful life, consistently low noise in system use and stable, continuous operation even under extreme environments. Integral molding of any required series and/or parallel pads into the rugged one-piece molded element eliminates external components and wiring, improves reliability as well as temperature and humidity stability.

For more complete specification data on Markite standard and custom precision potentiometers, write today for Markite Condensed Catalog S-65. For assistance with your applications problems, write to Markite, or contact the Markite Representative in your area.

OHMITE has the answer in wirewound rheostats

Twelve sizes in wirewound, vitreous enameled rheostats are stocked by Ohmite distributors all over the country and at the Ohmite factory. This selection, the most extensive available to industry, covers ratings that meet the major portion of design, production and emergency needs. Ratings of 7½, 12½, 25, 50, 75, 100, 150, 225, 300, 500, 750 and 1000 watts are standard.

FEATURES OF CONSTRUCTION: Ohmite rheostats are designed to produce permanently smooth, close control. The construction is all ceramic and metal; there is nothing to smoke, char, shrink, or shift. All models have insulated shafts with provision to keep the rheostat from turning on the panel. The resistance wire is wound over a solid ceramic core. Each turn is a separate resistance step and is locked against shifting by vitreous enamel (except Model C). The core and base are also bonded by vitreous enamel. The pivoted universal-action-mounted contact brush is of metal-graphite and varies to fit current and resistance. It rides upon a large flat surface and assures perfect contact without wear on the wire. Pressure at the contact and at the center lead are independent. Ohmite Rheostat Models H, J, G, K, L, P, and N, all marked Series A, are listed under the Underwriters' Laboratories Reexamination Service.

RATING: The current carrying capacities shown in the tables are for use in **free air;** when units are enclosed, these currents should be reduced possibly as much as 30% to 50%, depending upon the degree of ventilation. The rated current will cause the rheostat to dissipate its rated wattage when the full resistance is in the circuit.

MODEL C, MINIATURE — 7.5 Watts* (See Bul. 203)

The Model C provides greater design flexibility. In addition to its small size, its versatile solder terminals will also plug into common transistor sockets or circuit boards. It is stocked with both standard and locking type bushings.

SINGLE-TURN CONDUCTIVE PLASTIC AND WIREWOUND PRECISION POTENTIOMETERS

- AVAILABLE WITH LINEAR OR NONLINEAR FUNCTIONS
- AVAILABLE WITH MULTIPLE TAPS
- AVAILABLE IN SINGLE OR MULTI-CUP CONFIGURATIONS
- AVAILABLE IN SERVO OR BUSHING MOUNTS
- AVAILABLE WITH OTHER COMPONENTS DESIGNED-IN (SPRING-RETURNS, STOPS, SWITCHES, MOTORS, ETC.

RELATIVE MERITS OF CONDUCTIVE PLASTIC VS. WIREWOUND

The major advantages of conductive plastic potentiometers over wirewounds are infinite resolution and longer life. In most other respects, the two types are comparable. NEI has made it a strong point over the years to maintain **balanced** capability in conductive plastic and wirewound potentiometers. Each has its advantages in given applications, and NEI is the **only** company that can objectively recommend and supply **either** type.

GENERAL SPECIFICATIONS — CONDUCTIVE PLASTIC

Resistance Tolerance
Standard: ±10%

Ambient Temperature Range
Standard: −55°C to +150°C

Bearings
Stainless steel ball bearings are standard.

Mechanical Rotation
Normally continuous; however, stops are available.

Electrical Function Angle
Standard: 340° ±5°

Travel Resolution
Essentially infinite

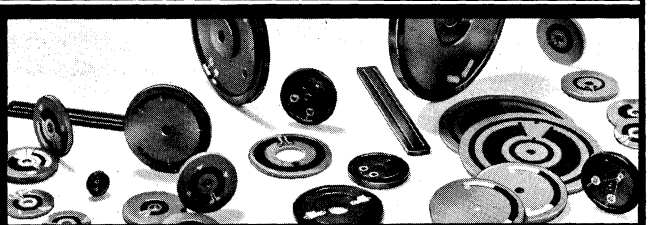
Life
50 million revolutions

SERIES	DIAMETER	NOMINAL RESISTANCE RANGE	NOMINAL POWER RATING	MAXIMUM STARTING TORQUE	NOMINAL ACCURACY
55 FT	½″	1K to 10K	0.5 W @ 25°C	0.35 oz-in	±1.0%
34 FT	¾″	1K to 20K	1.0 W @ 25°C	0.35 oz-in	±0.75%
78 FT	⅞″	1K to 25K	1.0 W @ 25°C	0.35 oz-in	±0.75%
116 FT	1 1/16″	1K to 50K	1.0 W @ 25°C	0.35 oz-in	±0.5%
176 FT	1 7/16″	1K to 75K	1.5 W @ 25°C	0.50 oz-in	±0.5%
158 FT	1⅝″	1K to 75K	2.0 W @ 25°C	0.50 oz-in	±0.5%
200 FT	2″	1K to 100K	3.0 W @ 25°C	0.75 oz-in	±0.3%
300 FT	3″	1K to 100K	5.0 W @ 25°C	1.0 oz-in	±0.25%

VALUES SHOWN ABOVE ARE NOMINAL. FOR SPECIFIC REQUIREMENTS, REFER TO NEI'S COMPLETE CATALOG OR CONTACT OUR APPLICATIONS ENGINEERING DEPARTMENT.

PRECISION CONDUCTIVE PLASTIC ELEMENTS

NEI can supply elements for any customer requirement; including linear and rotary motion, linear or nonlinear functions, and radial sector or full rotary elements. Elements can be molded to meet virtually any packaging requirement, and can be supplied with matching wiper arm assemblies.



GENERAL SPECIFICATIONS — WIREWOUND

Resistance Tolerance
Standard: ±5%

Ambient Temperature Range
Standard: −55°C to +125°C
Special: −55°C to +150°C

Bearings
Stainless steel ball-bearings are standard.

Mechanical Rotation
Normally continuous; however, stops are available.

ELECTRICAL CHARACTERISTICS — ALL MODELS

PARAMETER	VALUE	REMARKS
Resistance	1K, 5K, 10K	See table
Linearity	1%, 0.5%, 0.25%	See table
Electrical Angle	340° ±5°	
Output smoothness		As per MIL-R-39023
Rotational Life (Servo)	10,000,000 revolutions	without catastrophic failure
Resolution		Essentially infinite
Minimum Voltage		As specified in MIL-R-39023
End Voltage	0.5% of total applied voltage, maximum	As specified in MIL-R-39023
Power Rating	1 watt at 70°C derated to 0 at 125°C	As per Class 5 of MIL-R-39023
Insulation Resistance	1000 megohms minimum	As specified in MIL-R-39023
Dielectric Withstanding Voltage	750 volts rms	As specified in MIL-R-39023 for units less than 1¼" diameter
Resistance Tolerance	±10%	

ENVIRONMENTAL CHARACTERISTICS — ALL MODELS

PARAMETER	VALUE
Temperature Cycling	Test condition C, Method 102 of MIL-STD-202C
Operating Temperature	−65°C to +125°C
Humidity Cycling	Will meet MIL-R-12934 for Class 5 units
Salt Spray	Will meet test as specified in MIL-R-12934
Shock	50G. 11 milliseconds as per MIL-R-12934 Test Condition C
Vibration	0.06 inches double amplitude or 15G, whichever is less, from 10-2000 cps, as specified in MIL-R-12934, Test Condition B

DESIGN OPTIONS

1. Center Tap: (Voltage tap located at 50% plus or minus the linearity tolerance)
   ADD the following prices:
   Linearity:
   (a) ± 5% ..... $ 2.00
   (b) ± 1% 5.00
   (c) ± .5% 5.00
   (d) ± .25% 7.50

2. Shaft Variations: Standard is ⅛" Diameter:
   (a) Shaft Diameter ¼" (servo only) requires 1/16" longer shaft than standard ..... ADD $3.00
   (b) Shaft length up to 2" (standard ⅛" diameter) ..... ADD $2.00
   (c) Screw driver slot shaft end: ADD $1.00
   (d) Shaft ground flat on one side: ADD $2.00

3. Electrical angle other than standard:
   (Standard 340° ± 5°)
   Engineering charge per order $70.00
   ADD per unit 5.00

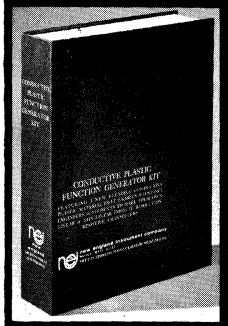
4. Torque Requirements (standard 0.5 oz.-in.):
   (a) Low torque (servo mounted units only) down to 0.2 in.-oz. minimum ..... ADD $5.00
   (b) High torque (bushing mounted units only) up to 6 in.-oz. ADD $5.00

5. Linearity (Standard .25%, .5%, 1%,) 5.0% linearity or greater with resistance tolerance ± 20%
   Deduct $2.00

6. Linearity accuracies greater than 0.25% with standard resistance tolerance ..... prices on request.
   Resistance tolerances better than 10% ..... prices on request.

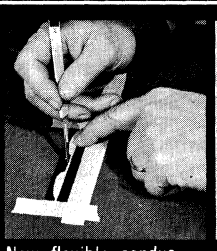
CONDUCTIVE PLASTIC FUNCTION GENERATOR KIT

FEATURING A NEW FLEXIBLE CONDUCTIVE PLASTIC MATERIAL THAT ENABLES SCIENTISTS, ENGINEERS, & STUDENTS TO MAKE THEIR OWN LINEAR & NON-LINEAR INFINITE RESOLUTION RESISTIVE TRANSDUCERS

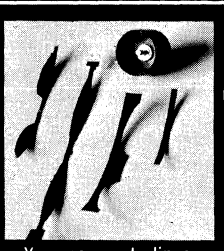


Conveniently packaged for book-case storage

Contains everything needed to make your own potentiometers



New flexible conductive plastic material (PATENT PENDING) enables you to cut complex element shapes for virtually any required electrical function in a 1K to 40 K resistance range.



You can cut linear or nonlinear elements for rotary pots up to 2" diameter or for linear motion applications up to 5" stroke.

Develop your own working prototype potentiometers. Save time and cost, and prove out your requirements in advance.

Electrical Overtravel
Supplied Both Ends of Electrical Function

Dielectric Strength
1000 VRMS under Standard Atmospheric Conditions

Travel Resolution
Less than 0.0050° (Essentially Infinite)

PRECISION ELECTRONIC COMPONENTS LTD.

variable resistors and trimmer potentiometers

An affiliate of Airco Speer Electronic Components

Manufactured with precision craftsmanship for the INDUSTRIAL-MILITARY MARKET

PEC offers industrial and military electronic equipment manufacturers the most reliable variable resistors available today at **very competitive prices.**

Because of PEC's unique flexibility special items, as well as standards, can be produced with shorter delivery times and more attractive prices, than any other manufacturer can provide.

New hot molding manufacturing processes are applied to all PEC variable resistors. In a single production operation the resistance element is integrated with a low resistance collector, heavy plated terminals and an insulating base to form a sturdy, reliable one-piece subassembly, insensitive to thermal shock and vibration. The bridging contact brush is a single block of corrosion free carbon.

The resistance element of PEC trimmer pots is a specially developed metal glaze with **low temperature coefficient** and **low contact noise.**

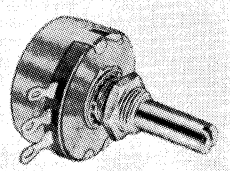
PEC variable composition resistors and metal ceramic trimmer potentiometers meet or exceed the requirements of Mil-R-94 and Mil-R-22097.

All PEC variable resistors are designed for **broad spectrum reliability,** which means that combinations of actual physical and electrical stresses are applied during quality assurance testing in addition to the standard rotational and load life tests.

Recently completed rotational life tests document average resistance change of 3% after two million cycles under full load. (PEC type M, Style RV4)

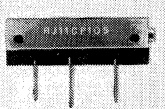
A whole range of **"beyond-mil-specified"** tests are performed on a daily basis; these include; immersion in hot water, fixed current noise, rotational "audio" noise, output smoothness. and contact resistance variation tests.

Send for our multi-page catalog which provides complete specifications on PEC components.



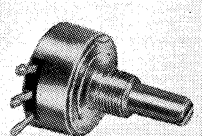
TYPE "K"
Style RV 4
2 Watt
1-3/32" Dia.

Available in all shaft and bushing types. Meets or exceeds requirements of MIL-R-94C. Also available in ganged units, concentric shafts, etc.



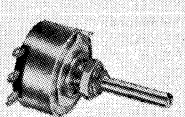
TYPE "A"
Style "RJ-11"
22 Turn Trimmer

Rectangular 1¼" x 1¾" x ⅜" metal ceramic resistor element.



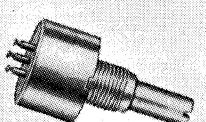
TYPE "N"
Style RV 2
1 Watt
29/32" Dia.

Also available in multi-section units. Meets or exceeds requirements of MIL-R-94C.



TYPE "T"
Style RV 5
1/2 Watt
3/4" Dia.

Available in all shaft and bushing types. Half as deep as Type "S". Meets or exceeds requirements of MIL-R-94C.

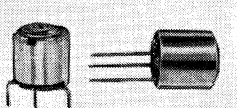


TYPE "R"
1 Watt
3/4" Dia.

The smallest unit available with ⅜" Dia. bushing and ¼" Dia. shaft.

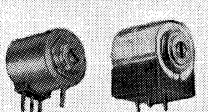
TYPE "S"
Style RV 6
1/2 Watt
1/2" Dia.

Available in all shaft and bushing types. Meets or exceeds requirements of MIL-R-94C.



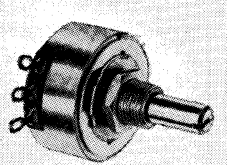
TYPE "P"
1/3 Watt
1/2" Dia.

Adapted from our Type "S" for printed circuit board mounting.



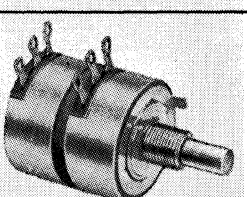
TYPE "L"
1/3 Watt
1/2" Dia.

Similar to our Type "P", except with right angle termination.



TYPE "M"
Style RV 4
2 Watt
1-3/32" Dia.

Available in all shaft and bushing types. Meets or exceeds requirements of MIL-R-94C.



TYPE "MM"
Style RV 4
Dual

Also available with concentric shaft or in triple or quad units. Meets or exceeds requirements of MIL-R-94C.

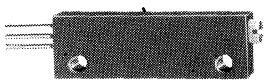
PRECISION ELECTRONIC COMPONENTS LTD. 19 Hafis Road, Toronto 15, Ontario, Canada | Phone: 416-249-7103 TWX: 610-492-1341

REON RESISTORS/POTENTIOMETERS

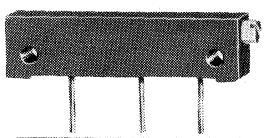
Reon manufactures a complete line of wirewound resistors to Mil-R-93C

MULTI-TURN TRIMMING POTENTIOMETERS WIREWOUND

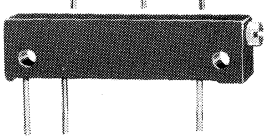
High Temperature—175°C
Humidity Proof—Mil
Wirewound—5% Tol.
Meets Mil-R-27208B



Model 101/ Style RT10



Model 201/ Style RT11



Model 301/ Style RT12

FEATURES

- ★ High power dissipation: 1 watt at 70°C
- ★ Operating temperature range: −65°C to +175°C
- ★ Moisture proof per MIL-STD—202C Method 106
- ★ GROUP Weld technique joins terminals directly to several turns of the resistance coil for High reliable terminations.
- ★ One piece molded housing:
  - ★ Provides a direct contact heat sink for the resistance coil, eliminating hot spots.
  - ★ Bonds each coil of the resistance element in place.
  - ★ Seals out moisture, eliminating external sealing problems.
- ★ Matched materials assure minimum stress on resistance wire and minimum temperature coefficient.
- ★ One piece self-locking contact wiper assures maximum reliability and setting stability when exposed to vibration, shock and acceleration.
- ★ Unique length and diameter of the resistance element permits the use of more turns of larger diameter resistance wire resulting in a more rugged assembly, and exceptional resolution.

RESISTANCE NETWORKS

- ★ Ladder
- ★ Fast rise time
- ★ Close temperature coefficient match (1 PPM)
- ★ Custom made to your specifications

2500 Ohms	.1 Meg	5 Meg*

*available linear only

Tolerance—10% (5% & 20% also available)
Rotation—295° (360° also available)
Tapers—(A) Linear (C) Clockwise Semilog (F) ccw semilog
Terminal Types—Lug or pin lead
Mounting Data—Bushing: ¼" Diameter ¼", ⅜", ½" lengths
Shaft: ⅛" Diameter 3/16" thru 3" lengths

SINGLE TURN TRIMMING POTENTIOMETERS Conductive Plastic Element—½" Diameter

Reon Type	DESCRIPTION	Height
H	Printed Circuit Mount	.532
CK	Knob Adjust	.350
CL	Screw Adjust	.350
CN	Right Angle Mount *	.625

*** Also available for Models B & H.**

SPECIFICATIONS:
Power Rating—¼ w @ 70°C, 0 w @ 120°C
Resistance Range—50 ohms to 5 Megohms

STANDARD VALUES:

50 Ohms*	5,000 Ohms	.25 Meg
100 Ohms*	10,000 Ohms	.5 Meg
250 Ohms*	25,000 Ohms	1 Meg
500 Ohms	50,000 Ohms	2.5 Meg*
1000 Ohms	100,000 Ohms	5.0 Meg*
2500 Ohms		

*Linear Taper Only
Tolerance—10% (5% & 20% also available)
Rotation—295° (360° also available)
Tapers—(A) Linear, (C) Clockwise Semilog, (F) ccw semilog
Terminal Types—Lead or Lug (with or without Ground Lug)
Shaft—Stainless Steel or Plastic

NOTE: All types meet environmental conditions of MIL-R-94D

VARIABLE RESISTORS 1⅛" Diameter: Carbon Element

Reon Type	DESCRIPTION	Mil-R-94 Type
RA	 Standard Bushing	RV4N
RL	 Locking Bushing	RV4L
RD	 2 Section (also available in 3 & 4 section)	
RC	 Concentric Shaft	

SPECIFICATIONS:
Power Rating—2 w @ 70°C, 0 w @ 120°C
Resistance Range—50 ohms to 5 megohms

STANDARD VALUES:

100 Ohms	5,000 Ohms	.25 Meg
250 Ohms	10,000 Ohms	.5 Meg
500 Ohms	25,000 Ohms	1 Meg
1000 Ohms	50,000 Ohms	2.5 Meg

Spectrol

TRIMMING POTENTIOMETERS

If your electronic equipment design calls for precise trimming with high reliability at realistic cost per unit, you should know—(1) Spectrol designs virtually eliminate noise, hot spots, burnouts, and wiper shifting; (2) Spectrol's selection of terminal configurations is the broadest in the industry; (3) Spectrol trimmers are available in all major configurations, sizes and performance types including ultraminiatures and models that meet severest environmental MIL-SPECS; (4) All models are 100% electrically inspected; and (5) Prices on these military-quality industrial trimmers (many less than $2. each in quantity) are keyed to a competitive market.

Spectrol

TRIMMING POTENTIOMETERS

Rectangulars—Large diameter mandrels dissipate heat efficiently to eliminate burnouts and open circuit failures. Dual wipers maintain positive contact under shock. Military and industrial models. **Squares and Rounds**—Mandrel and case configurations contribute to high power dissipation. All models meet or exceed applicable environmental military specifications, and are humidity-proof at no extra cost. **The Model 53**—Offers a unique, molded, seamless housing which provides a leak-proof trimmer with outstanding reliability and uniform construction characteristics.

Spectrol

TRIMMING POTENTIOMETERS

For most applications, choose from the complete Spectrol series of single-turn, three-turn, five-turn, ten-turn, precision wirewound potentiometers listed on these two pages. Many models can be ganged and easily phased in the field.

Close linearities are assured by winding equipment designed and built in-house by Spectrol. Other quality features include: fine resolution from extra-long resistance elements; high reliability through a unique "whisker" slip ring brush that assures positive contact under severe shock and vibration, yet exhibits low torque and long rotational life; and mounting flexibility with optional servo bushing and screw mountings. All models meet or exceed applicable military and commercial specifications for rotational load life, temperature range, shock, vibration, humidity and salt spray.▲

Spectrol

PRECISION POTENTIOMETERS

For special applications, remember Spectrol's well-earned reputation for unusual service in providing special precision potentiometers to help equipment designers solve unique problems.

In addition to offering a full line of off-the-shelf models, Spectrol is a custom house whose success is founded on exceptional responsiveness to its customers' needs and requirements. You can confidently turn to Spectrol for highly competent support in your most challenging design assignments for which no standard potentiometer is available.

Spectrol

NON-LINEAR POTENTIOMETERS

On the tables below, high and low values of resistance, with corresponding "best practical" peak-to-peak conformity obtainable, are given for the functions in each model size under the conditions of full electrical rotation and unloaded slider. For function angles less than full rotation, resistance and conformity values can be calculated based on resistance being directly proportional to the function angle, and conformity being inversely proportional to the function angle.

Empirical (Data Points)

Resistance and conformity is given in the table below in terms of S (maximum $\frac{\Delta\left(\frac{e}{E}\right)}{\Delta X}$), provided the following conditions are met. $0 \leq \frac{e}{E} \leq 1, 0 \leq X \leq 1$ and $\frac{\Delta\left(\frac{e}{E}\right)}{\Delta X}$ does not change sign (i.e., no slope reversal).

SWITCHES AND MULTIDIALS

Spectrol Model 87 Rotary Selector Switch introduces a new dimension of flexibility to discrete component circuitry. Now, for the first time, miniature switches are available in volume quantities at production-line prices for mounting directly on printed circuit boards, or for panel mounting. Designed with only two moving parts, this unique ½-inch switch has application wherever printed circuit boards are used . . . can be used to make other components do multiple duty. Spectrol offers this switch in either continuous or stop models, with up to ten positions for single-pole, up to five positions for double-pole, and up to three positions for three-pole units.

Multidials: Spectrol also offers a complete line of precision turns-counting dials for use on multi-turn potentiometers and other rotating devices.

Spectrol

OFFERS SPECIAL CAPABILITIES

PRECISION POTENTIOMETERS • TRIMMING POTENTIOMETERS • SWITCHES • DIALS

'SPEC' POTENTIOMETERS can be provided to meet your design requirements. Pots with clutches, brakes, switches, or other special mechanical or electrical features, can be designed and packaged the way you need them.

APPROVED MIL-SPEC POTS—Spectrol also offers a full line of approved Mil-Spec potentiometers (RR series) to MIL-R-12934.

⊙ MODELS 11 AND 21 AVAILABLE WITH BLACK CHROME (11-1-21/21-1-21) OR BRUSHED CHROME (11-1-31/21-1-31)

1 POLE/POSITION OPTIONS AVAILABLE THROUGH DISTRIBUTORS OR FACTORY

2 SINGLE POLE, TEN ACTIVE POSITIONS, STOPS

* INSULATION RESISTANCE AND DIELECTRIC WITHSTANDING VOLTAGE: NOT LESS THAN 1,000 MEGOHMS AND 1,000 VOLTS AC AT SEA LEVEL, RESPECTIVELY. SHOCK: 50 G'S FOR 11 MILLISECONDS. (METHOD 205B OF MIL-STD-202B). NON-SHORTING

VIBRATION: 20 G'S AT 20-2,000 CPS. (METHOD 204, TEST CONDITION D OF MIL-STD-202B).

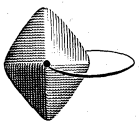
TECHNO MINIATURE WIREWOUND



Backed by a vigorous and extensive program of reliability testing, Techno wirewound trimming potentiometers have earned a reputation for quality and performance unmatched in the industry. Complete Quality Assurance facilities, including a fully equipped and MIL-approved test and environmental laboratory, guarantee the consistently superior performance of every Techno trimmer.

Techno's unique design incorporates a limited number of internal parts into a two-half plastic case that permits 100% final inspection prior to sealing. The design provides maximum flexibility and a uniform standard of excellence for a wide variety of military and industrial applications.

Throughout the electronics industry, designers and engineers have learned to trust Techno when precision trimming potentiometers are needed.

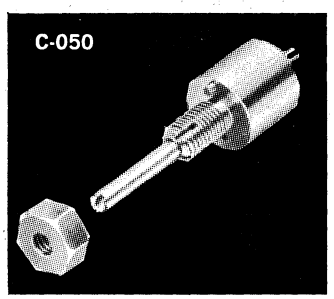
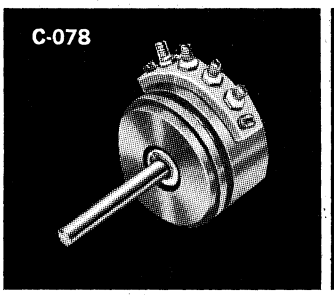
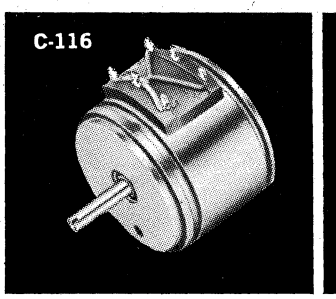
SAMARIUS HAS THE ANSWER

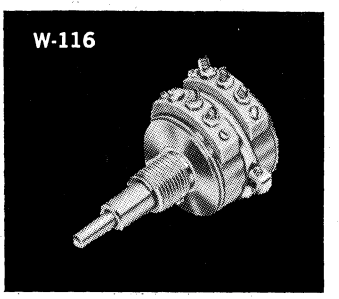
IF YOUR PROBLEM IN POTENTIOMETERS IS LITTLE OR BIG—DELICATE OR RUGGED—ACCURATE OR PRECISE—SINGLE OR MULTIPLE—THIN OR THICK—MINIATURE OR MONSTER—LIGHT OR HEAVY—SAMARIUS HAS THE ANSWER FOR YOU.

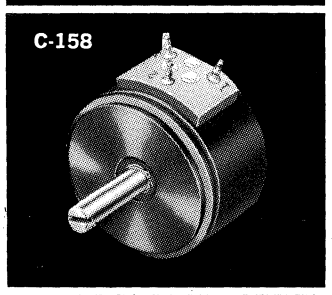
Our complete line of precision potentiometers start from Series C-050—½" micro miniature to Series HP-500—5" high resolution and linearity accurate potentiometers.

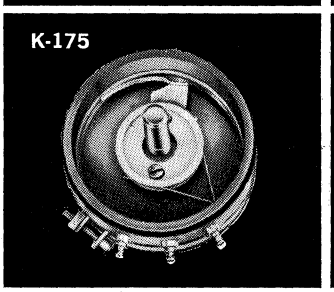


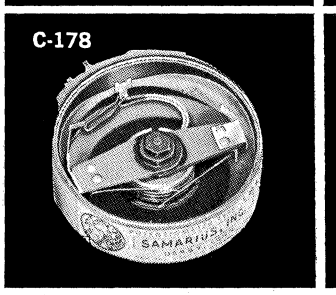


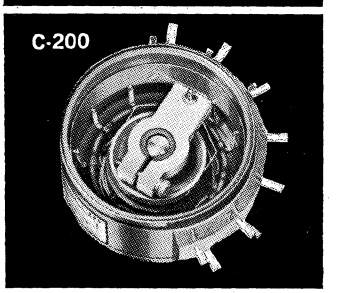


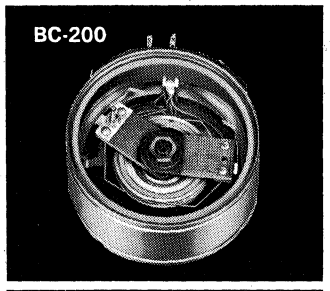


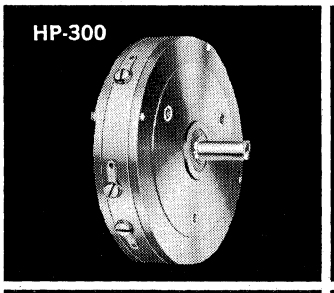


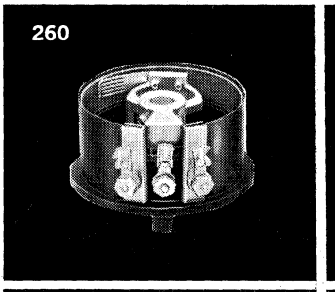


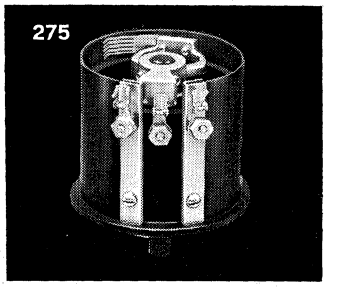


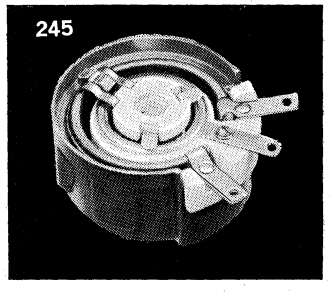


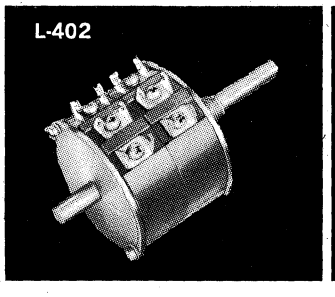


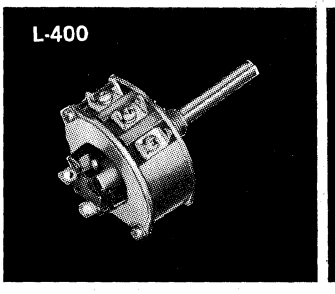


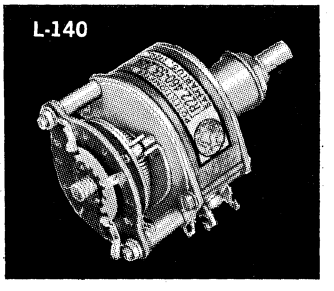




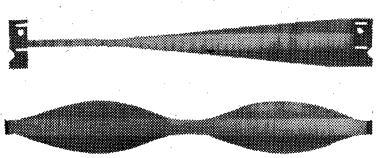








HIGH PRECISION POTENTIOMETER WINDINGS



Samarius, Inc. furnish their clients with a custom winding service for wire wound potentiometer elements in card and mandrel types. Linear or functional requirements are acheived through cooperative R & D with customers. Card profiles are ground with exact duplication from master templates on our own engineered and built machines to tolerances to meet all specifications. We can supply card windings for ¼" miniature potentiometers to cards 12 feet long and 4 inches wide. Mandrel windings are available up to 16 feet long in any type of wire needed. Over 30 years' experience in supplying high precision potentiometer windings to the field. Call on our engineering staff for their help in solving your winding or potentiometer problems.

WATERS POTENTIOMETERS

WATERS MANUFACTURING INC. • WAYLAND, MASSACHUSETTS 01778

WATERS' SINGLE TURN POTENTIOMETERS

WATERS single turn potentiometers are designed to meet exact military and industrial requirements, to provide the assured service demanded by any given application. Military standards and specifications including MIL-R-39002, MIL-R-12934, MIL-R-19, MIL-R-39023 are used as guides and/or determining factors. Reliability, accuracy, setability and stability — all important characteristics when an important function is to be performed.

WATERS POTENTIOMETERS

WATERS MANUFACTURING INC. • WAYLAND, MASSACHUSETTS 01778

Among recent important developments in Waters' research and development program is the achievement of a LOW NOISE characteristic on Types JP/2, PT 3/4C, APR 1/2 and APD 1/2. These potentiometers are now available with an EQUIVALENT NOISE RESISTANCE of 5Ω as a **standard** specification. MystR Servo Series have performed well over 400,000,000 dither cycles with end-of-test results of Output Smoothness 0.1% and less than 0.5% change in Total Resistance. This series is now available to MIL-R-39023.

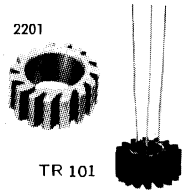
HEAT TRANSFER AND DISSIPATION DEVICES

From TO-18 sizes to high power heat sinks designed for use with high heat generating "pressure pack" rectifiers, there are standard Astrodyne heat dissipating devices and extrusions available from stock. In addition to natural convection and forced air units, Astrodyne stocks a complete line of compact heat exchangers. Catalogs and technical literature available on request for all items.

PRESS-FIT/CIRCUIT BOARD TYPES



2201/TR-101 Series—for optimum natural convection cooling of all standard TO-size transistors used in printed circuit boards, computer cards, etc. Four sizes in TR series provide from 1 to 4 square inches surface area.

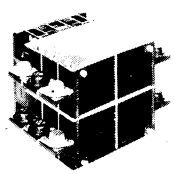
2700 (Convection)/2800 Conduction Series —provide greater surface contact plus secure mounting. Eight units provide thermal resistance ranging from 2°C/watt (2801) to 28°C/watt (2701).

2703

2300

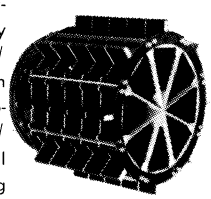
2300 Series — free circulation, low-profile units for circuit-board use. Four heat sinks (½", ¾", 1", 1¼" x 1.81"² base) of high conductivity aluminum alloy, supplied with black anodize or gold iridite.

FORCED CONVECTION



2401-12B

Modular Design permits custom assembly of compact electronic/heat sink units which may incorporate associated electronics and/or terminals. Model 2601 permits mounting more than 40 units to single fan.

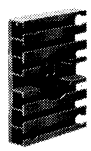


2601-40B

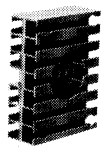
NATURAL CONVECTION UNITS

with 20% Greater Cooling Surface*

Catalog NC-2500 plus actual size outline drawing chart on request.



2501



2502

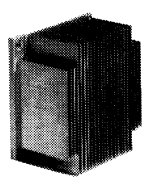
2513

2517

*Provided by Astrodyne patented T-FIN Construction.

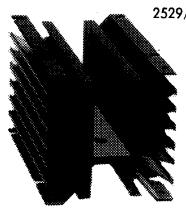
HIGH POWER — CRITICAL COOLING

Model 2450 in four standard sizes (2 x 2", 3 x 3", 4 x 4" and 4 x 6") provides exceptionally low thermal resistance for effective use with "pressure-pack" rectifiers. 4 x 4" unit dissipating 650 watts with 1500 LFM forced air has thermal resistance of 0.105°C/watt with 23 fins and 0.089°C/watt with 33 fins.



2450

2529/2530



Model 2507 handles heavy duty SCR devices on easily accessible, wide shelf.

Models 2529/2530 "Little Giant" heat sinks (5 and 6" lengths) provide .35°C/watt thermal resistance at 100 watts with natural convection for high power rectifier assemblies.

THERMAL/CONDUCTIVE/BONDING COMPOUNDS

THERMAL BOND 312 — general purpose conductive adhesive available in 5 oz. kits (12/carton — $46.60, individual boxes — $4.65 each), 2 qt. cans, 2 gal. cans.

CONDUCTIVE COMPOUND 829 — supplied in ready-to-use 1, 2, 4 and 8 ounce jars ($1.25, $2.00, $3.25 and $5.75 each — 12 jars/carton). Providing optimum, long-term thermal/electrical contact plus protection against oxidation.

POTTING COMPOUND 166 — for potting heat generating devices such as transformers, resistors, etc. Available in mix-and-use packages (jar of compound, vial of hardener). 12 boxes to case $42.00. Individual boxes $4.25 each.

DELCO RADIO GM MARK OF EXCELLENCE

DIVISION OF GENERAL MOTORS • KOKOMO, INDIANA

SEMICONDUCTOR PRODUCTS

A Directory outlining, by device and type number, the broad range of semiconductor products available from General Electric for both signal and power applications is presented on this and the following three pages. Included among others are audio amplifier IC's, economy transistors and triggers, and SCR's for power control.

General Electric provides technical back-up service to you through your GE Electronic Components Sales Operation (see inside front cover for nearby Office). Your GE representative will be glad to help you find the best circuit solution to your design problems. Call him at any time for product information or application assistance. In addition, your General Electric Distributor can provide you with personal service, factory prices, and fast delivery from inventory.

PRODUCT CHARACTERISTICS

Individual specification sheets may be ordered by JEDEC type or GE house number. Or Line Folders may be ordered by Line Folder numbers as identified below:

Number	Subject	Number	Subject
1	Tunnel Diodes	7	Rectifier Diode and SCR Stacks
2	Epoxy Transistors	8	Military Types and High Reliability Devices
3	Triode Thyristors	9	Signal Diodes
4	Switch and Trigger Devices	10	Germanium Diodes
5	Integrated Circuits	11	Solid-state Subassemblies
6	Rectifier Diodes	12	Selenium Components

Also available is a listing of all published specifications on GE semiconductors. Order Publication 450.52.

Order any of the above from General Electric Company, Distribution services — Building 6, Schenectady, N. Y. 12305.

SIGNAL SEMICONDUCTORS

SILICON TRANSISTORS

SIGNAL — NPN PLANAR

Small Signal Amplifiers — Audio to 30MHz

2N2711	2N2926	2N3394	2N3721
2N2712	2N3391	2N3395	2N3900
2N2923	2N3391A	2N3396	2N3900A
2N2924	2N3392	2N3397	2N5172
2N2925	2N3393	2N3398	

High-frequency Amplifiers and Oscillators — 262.5 kHz to 100 MHz Epitaxial

2N3843	2N3845A	2N3856	2N5232
2N3843A	2N3854	2N3856A	2N5232A
2N3844	2N3854A	2N3858	2N5249
2N3844A	2N3855	2N3859	2N5249A
2N3845	2N3855A	2N3860	

High-frequency Amplifiers and Oscillators — 100 mHz to 950 MHz Epitaxial

2N3662	2N3663	D16G6

Large Signal Amplifiers and Medium-speed Switches — Epitaxial

2N2713	2N3414	2N3975	2N4951
2N2714	2N3415	2N3976	2N4952
2N3402	2N3416	2N4256	2N4953
2N3403	2N3417	2N4424	2N4954
2N3404	2N3973	2N4425	
2N3405	2N3974	2N4426	

High-voltage Applications — to 100 MHz

2N3858A	2N3877	2N5174	2N5176
2N3859A	2N3877A	2N5175	

High-speed Switches — Low Storage Times — Epitaxial, Gold Doped

2N3605	2N3607	2N5028	2N5030
2N3606	2N5027	2N5029	

Monolithic Darlington Amplifiers

D16P1	2N5305	2N5307	2N5308
D16P2	2N5306		

General-Purpose PNP Amplifiers

2N5354	D29A7	D29A9	D29A11
2N5355	D29A8	D29A10	D29A12
2N5356			

Dual Diodes

SELENIUM RECTIFIER DIODES AND STACKS

Available in a variety of voltages and cell sizes, finishes and mountings that include low-cost epoxy encapsulated types, dual diode types, miniature tubular-catridge type, standard stud intermediate type, thyrector diodes, selenium arc suppressions, large plate stacks, copper oxide types, selenium computer diodes, and special miniature epoxy encapsulated thyrector diodes. Many others to suit individual needs.

ST2

TRIAC AND SCR ASSEMBLIES

S100 LINE
Seven circuit configurations with 6, 10, or 15 A TRIACS for 120 or 240 V (RMS) power lines.

S200 LINE
Zero-voltage switching AC power controllers for 10 and 15A; 120, 240, and 270 V service.

S300 LINE
With PA436 phase control IC for automatic control of AC motors and lamps.

CUSTOMIZED ASSEMBLIES

Using discrete components, they are available in a variety of mechanical configurations, including printed circuit boards, potted modules, standard tube shells, and many special packages to meet individual needs.

SCR COMBINATION STACKS

A new concept in stack design that includes SCR's, compatible rectifiers, heatsinks, interconnections, and all hardware in one package. Installation requires only mounting bolts and electrical connections for power and triggering signal.

ISC MAGNETICS DIVISION products are the result of over fifteen years research, development and application engineering on Hall Effect components and magneto-resistors for a broad range of detection, measurement, computation and control applications.

More than 30 different Hall generators and 15 different magnetoresistors, all in stock for immediate delivery, are available as standard catalog items.

Our applications engineering staff is at your disposal to discuss requirements for "black boxes" and complete systems involving processing, material handling, current regulation, and other automatic controls for military, space, and industrial applications.

COMPLETE GALVANOMAGNETIC DEVICE CATALOG AVAILABLE.

Numerous other probes, including thin film and ferrite embedded types are described in our catalog and all are stocked for immediate delivery.

Multiplers and current sensing yoke assemblies using Hall Generators or Magnetoresistors can be designed to OEM requirements.

MAGNETORESISTORS

More than 15 different magnetoresistors are stocked covering a wide range of zero field resistances (47 to 5,000 ohms), units with resistance changes of from 1.5 to 3.2 and temperature coefficients of from −0.05 to −0.40%/°C.

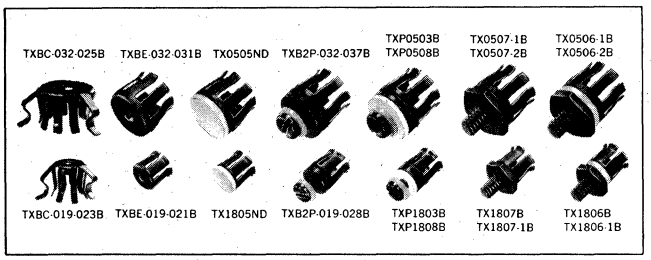
Semiconductor Heat Sinks/Dissipators

THERMAL-LINK RETAINERS — FOR TO-5, TO-18 TYPE TRANSISTORS



Efficient retainers and heat sinks when mounted to P-C boards due to their excellent conductivity and extra mass. Also efficient thermal links between transistor and chassis or heat sink. Beryllium copper spring fingers firmly retain transistors, fit wide case diameter variations; make transistor insertion and removal easy. Available with BeO washer for high frequency applications. Send for Bulletins 141 and 144.

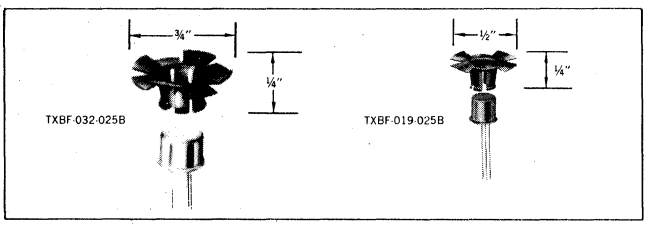
*Separate BeO washer. **BeO washer brazed to dissipator. ***BeO washer brazed between stud and dissipator. †Screw and shouldered nylon washer included. Letter "B" at end of part number denotes black cadmium finish; delete letter "B" for Insulube 448 finish; for dull nickel, substitute letters "ND". Contact your IERC representative or the factory regarding other transistor case sizes or finishes. Insulube 448 finish is a 500 volt dielectric coating.

"FAN TOP" SERIES — FOR TO-5, TO-18 TYPE TRANSISTORS



Low cost units give excellent case temperature reductions in natural or forced convection. Design allows location of other components close to transistors; adds virtually nothing to board height. Beryllium copper spring fingers firmly retain transistors, fit wide range of case diameters. Fast, press-fit installation without tools. Send for Bulletin 131.

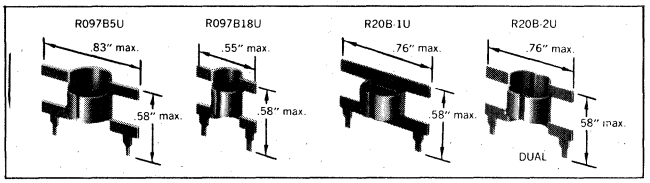
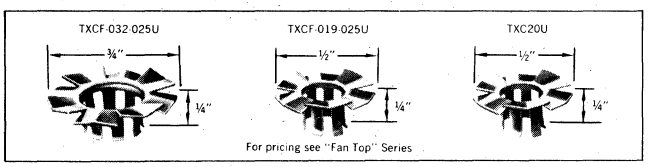
DISSIPATORS/RETAINERS FOR PLASTIC/CERAMIC TRANSISTORS

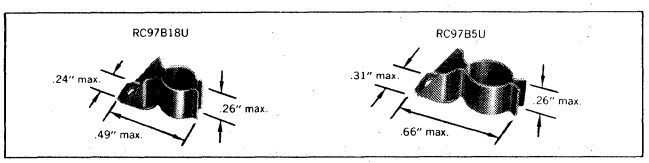
New IERC designs help you get maximum efficiency from epoxy semiconductors. Power ratings can be increased from 10% to 33% or additional operating safety margins provided. Send for Bulletin 148.



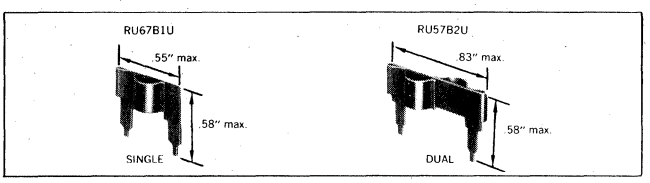
Spade-Type — Excellent dissipator and retainers. "Stand-off" legs provide positive 0.1" grid location for automatic insertion in P-C board; hold transistor above solder, eliminating possible thermal damage.



Fan-Top — Provides excellent dissipation with no loss in board area of vertical clearance space.



Clip-Type — Highly efficient dissipator retainer; also used as thermal-link or radiating device. Space and clip types excellent for RF shielding also.



Universal-Type — Unique spring clip retainer accommodates variations in case diameters. Both single and dual models accept all popular D-case transistors. Exceptionally efficient. Permits increased power capabilities, higher operational safety margins, and provides good stability in adverse environments. Legs hold transistor away from solder heat. Dual model ideal for matched-pair applications. Send for Bulletin 150.

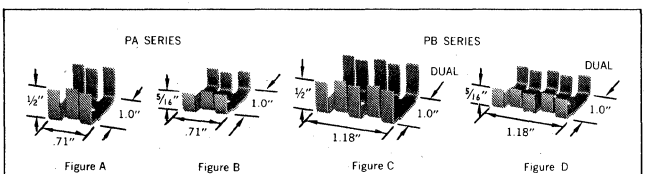
*Above items are manufactured from commercial brass, no finish. Parts are also available made from beryllium copper. Available finishes are black oxide and black cadmium. Contact your IERC representative or the factory for information on alternate finishes.

PA AND PB SERIES — FOR FLAT RECTANGULAR PLASTIC CASES



Accommodates flat, rectangular, medium power thyristors, transistors and SCR's. Staggered fingered design and aluminum construction maximize dissipation. In natural convection a PA will allow a single X-58 or case 90 device to be operated with 80% more power. See Bulletin 149.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

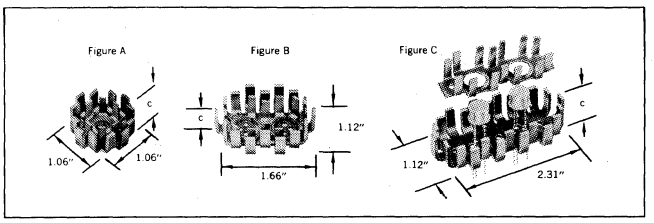
LP SERIES — FOR TO-5, TO-18 TYPE TRANSISTORS



Versatile transistor cooling devices provide excellent heat dissipation in applications of low to high power transistors of TO-5 and TO-18 configurations. IERC's efficient staggered-finger configuration optimizes convection currents and radiating surface area. Available for single and multiple transistor mounting. Send for Bulletin 135.

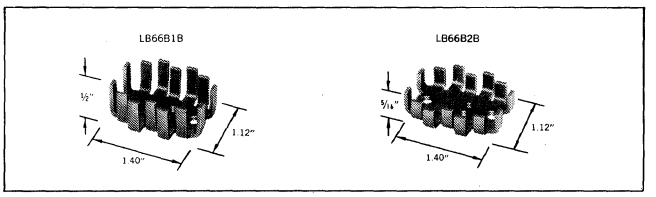
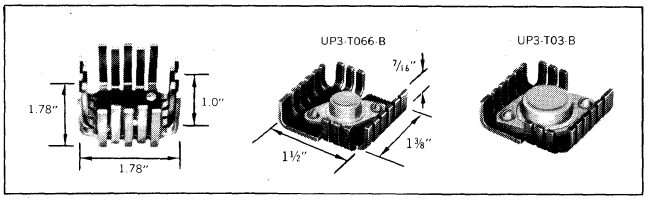
Note: Clamp sections may be used separately as retaining devices; change first two letters of the part number to "LC". Base section LB5A1B or LB5A2B may be used separately for TO-37 transistors such as 2N1172 and 2N1609. Delete letter "B" from part number for Insulube 448 finish. Consult your IERC representative or factory for special orders.

DISSIPATORS FOR CASE MOUNTED SEMICONDUCTORS

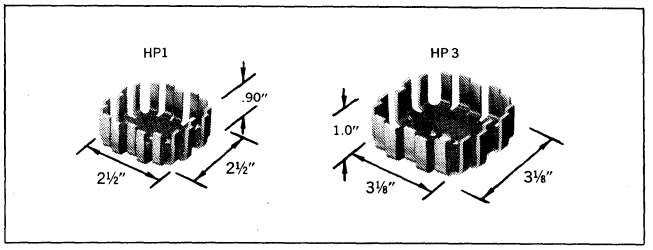
Standard LB, UP, HP, E1, E2 and E3 Series parts are aluminum with black anodize finish. However, all parts are available unplated, or with Insulube® 448 which provides positive insulation up to 500 volts. For Insulube® 448 finish delete letter "B" at end of part number. For unplated parts delete "B" and add "U".



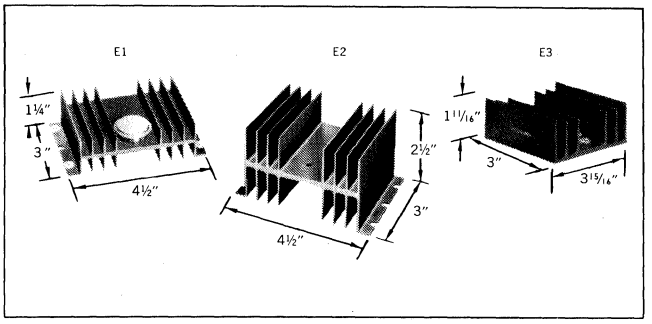
LB Series — For TO-66 Type Transistor Only — In natural convection the LB's efficient staggered-finger design dissipates 9 watts with case temperature held to less than 150°C. In forced air (1,000 FPM) the LB dissipates 15 watts with case temperature maintained at 90°C. Requires only 1.7 sq. in. of mounting area. Send for Bulletin 146.



UP Series — For Power Type Transistors and Diodes — Design gives maximum dissipation in medium power applications at lower cost than comparable finned extrusions. Staggered finger configuration allows maximum efficiency in both natural convection and forced air at less weight and volume. Increased dissipation achieved by mounting dissipators back-to-back on a bracket. Send for Bulletin 134.



HP Series — For Power Type Transistors and Diodes — Heat dissipating performance of IERC's staggered-finger design is comparable to conventional extrusions up to 3 times as heavy and 30% larger. Two sizes: may be used separately or with the smaller unit nested in the larger unit. Send for Bulletin 139.



Extrusions — E1, E2 and E3 Series — Optimized fin design gives the most power dissipation for volume and weight. Standard finish black anodize. Standard units supplied with mounting notches and choice of six popular semiconductor mounting hole patterns. Send for Bulletins 142 (E1 and E2) and 145 (E3).

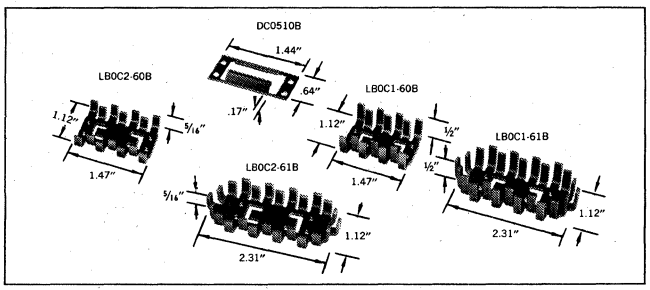
IERC — Semiconductor Heat Sinks/Dissipators and Tube Shields

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

MICROCIRCUIT PACKAGE DISSIPATORS



Models in this series consist of a retainer and dissipator. Retainer may be used alone to mount the package to a conduction plane, or used with the dissipator in radiation/convection modes. In natural convection, the LBOC2-60B with clamp dissipates 3.6 watts with a case temperature rise of 103°C. The slightly larger LBOC2-61B with clamp dissipates 5 watts with the same case temperature rise. All models incorporate IERC's efficient, patented staggered-finger design. Send for Bulletin 151.

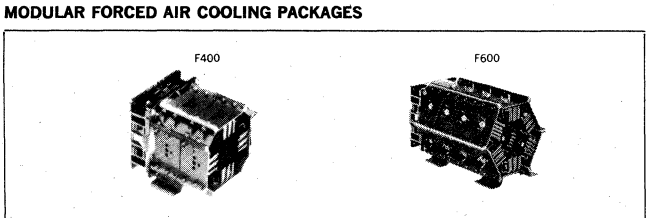
*The above series of heat sinks are manufactured to specific customer requirements. Prices listed include material, saw cutoff, deburring, fluid passage holes tapped and clear anodize finish.

MODULAR FORCED AIR COOLING PACKAGES



IERC's design provides the best use of the output of most available fan types for economical thermal control in multiple semiconductor installations. Two types, each as much as 50% lighter in weight than other assemblies with comparable power dissipation. **F-600 Series** units are available with one to four hexagonal banks with six modules each. Cools up to 24 semiconductors with one muffin fan. Available assembled or in kit form. **F-400 Series** units have one to four banks of four modules each to cool up to 16 semiconductors with one fan. Available assembled or in kit form. Bulletins 136, 137.

INSULUBE® 448 FINISH FOR HEAT DISSIPATORS

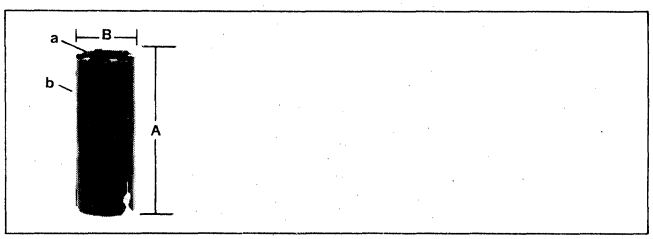
Insulube 448 is the only proven finish for positive electrical insulation in electronic equipment that meets the most stringent environmental requirements. Non-hygroscopic. High emissivity surface. Salt Spray resistant. Low thermal resistance. Unaffected by elevated temperature. High dielectric strength. High insulation resistance. Send for Bulletin 123.

Heat dissipating electron tube shields

Tubes fail primarily because of the heat they generate and the environment in which they operate. If tubes are operated at a lower bulb temperature, their life can be greatly extended.

The simple solution to high tube temperature is IERC's heat dissipating tube shields shown below.

TRN THERMA-REL SERIES HEAT DISSIPATING SHIELDS



Gives you six times longer use of electronic equipment before failure; costs only a fraction of that of a replacement tube. Directly replaces the obsolete JAN shields. Flexible, black cadmium plated beryllium copper liner adapts to variations in bulb contour and diameter. Positive base attachment gives superior retention in shock and vibration environment. Meets or exceeds all military requirements for heat dissipating tube shields and is qualified to applicable military specifications.

SILICON CONTROLLED RECTIFIERS, POWER LOGIC-TRIACS, AND FIRING CIRCUITS

IR leads all others in the applications of SCR's and of their related Firing Circuits. With three types of SCR's (the exclusive Epitaxial SCR, the super-speed Inverter-Type SCR, and the Standard-of-the-industry Alloyed-Diffused SCR), IR can satisfy any requirement from its broad listing of standard devices, or, if necessary, can select special devices, or develop a new series, to meet your needs.

POWER LOGIC TRIACS

IR also offers the highest rated, most powerful triacs in the industry, the 2N5257 series of 200 Ampere Logic-Triacs. 60 and 100 Ampere Logic-Triacs offer completely different packaging and junctions to extend the range of power triac applications.

SCR FIRING CIRCUITS

To complete the application of SCR's and Triacs, IR lists a complete line of SCR Firing Circuits.

Look to IR for single source semiconductor shopping.

HOW TO USE THIS SECTION

SILICON CONTROLLED RECTIFIERS

Data is listed by current rating on pages 1 and 2.

Look for these specifications opposite the "PARAMETER" heading.

PARAMETERS		RATING	
Symbol	Definition	Symbol	Definition
$I_{T(RMS)}$	Max. RMS on-state current	—	Amperes
$I_{T(AV)}$	Max. average forward current @ 180° conduction	—	Amperes
T_J	Operating temperature range	(°C)	Degrees Celsius
I_{GT}	Typical gate current to trigger @ 25°C	(mA)	Milliamperes
V_{GT}	Typical gate voltage to trigger @ 25°C	(V)	Voltage
Case	Case outline (see pp. 13-15)		

Then check opposite the "VOLTAGE" heading for the part number of the voltage required. FOR EXAMPLE:

For an SCR with an RMS current of 6 Amperes, you can choose any of the three series listed below under the 7.4A current rating beginning with "5RC10A." IR's popular 5RC series would offer you:

- RMS current rating of 7.4 Amperes
- Average current rating of 4.7 Amperes
- Junction operating temperature of -65° to 125°C
- Typical gate characteristics of 10mA and 1.2 V
- It is available in the TO-64 case outline and with IR's alloyed-diffused construction.

For a 250 Volt unit, you should select IR's 5RC30A, 300 Volt, 7.4 Ampere SCR.

POWER LOGIC-TRIACS

Data is listed on page 2.

Specifications are detailed the same as for SCR's.

FIRING CIRCUITS

Data is listed on page 2.

Specifications are detailed in an easily understood form.

(1) 71 types are flexible lead (TO-94) replace with 72 for flag terminal TO-83
(2) Similar to 71RA series but with faster turn-off capability
(3) Accelerated Cathode Excitation type for fast turn-on, di/dt = 800 A/μsec
(4) Inverter type
(5) I_{TSM} = 3,500 A
(6) Fast turn-off capability

IR FIRING CIRCUITS

IR's series of Firing Circuits offers the advantages of "Hard Firing" gate signals, a good "back porch" to eliminate "starved gate" conditions, signal isolation, and negative biasing.

Standard units are available off the shelf, special order devices will be quoted in quantity shipments.

Firing Circuits for IR's Logic-Triacs are available on special order.

STANDARD FIRING CIRCUITS

Part Number	Connection	Voltage	No. of SCR's
CL-1050	Single phase	120/240V	1 or 2
CL-1066	Three phase, three wire	240/480V	3
CL-788	Three phase, four wire	240V	3
CL-789	Three phase, four wire	480V	3
CL-1076	Three phase, three wire	240/480V	6

SPECIAL UNITS

Part Number	Similar to	Except	No. of SCR's
CL-781	CL-1050	120V input only	1 or 2
CL-782	CL-1050	240V input only	1 or 2
CL-783	CL-1066	240V input only	3
CL-784	CL-1066	480V input only	3

POWER LOGIC-TRIACS

IR's three LOGIC-TRIAC series offer circuit designers a wide array of specification advantages in high current and voltage ratings. The "logic" capability allows the selection of the conduction direction as a function of the gate signal.

With the gate biased positive with respect to Main Terminal 1, the device will turn on only if Main Terminal 2 is positive with respect to Main Terminal 1.

With the gate biased negative with respect to Main Terminal 1, the device will conduct with Main Terminal 2 either positive or negative with respect to Main Terminal 1.

SELENIUM AND SILICON HIGH POWER RECTIFIERS

Listed on these pages are the basic specifications for the complete series of IR's silicon power rectifiers.

Also listed are limited references to IR's selenium rectifiers. IR offers an extensive selection of standard and special order selenium devices including: power stacks, multi-circuit stacks, cartridges, miniature stacks, diodes, loose cell kits, voltage suppressors (Klip-Sels), and contact protectors.

Your local IR Industrial Distributor or IR Field Office will gladly supply you with complete specifications, ordering assistance, and price and delivery quotations.

HOW TO USE THIS SECTION

SELENIUM RECTIFIERS—See listings below.

SILICON POWER RECTIFIERS—Devices are listed by current rating on page 4.

Look for these specifications opposite the "PARAMETER" heading.

PARAMETER		RATINGS	
Symbol	Definition	Symbol	Definition
I_F (AV)	Max. average forward current	—	Amperes
I_{FM} (surge)	Max. peak one cycle, non-repetitive surge current	—	Amperes
I^2t	Max. I^2t rating (non-repetitive, for 5 to 8.3 milliseconds)	(A^2sec)	Amperes squared seconds
T_J	Max. operating junction temperature range	(°C)	Degrees Celsius
Case	Case outline (See pp. 13–15)	—	—

Then check opposite the "VOLTAGE" heading for the part number of the voltage required.

FOR EXAMPLE: (Refer to page 4)

For a rectifier with a current rating of 65 Amperes and a surge rating of 1,000 Amperes, you would locate these parameters under the 70 Ampere current rating on page 4.

This series offers you:

70 Ampere current rating
1,200 Ampere surge current rating
6,000 I^2t rating
—40° to 200°C junction temperature operating range
Available in IR's B-4 case.

For a rectifier with a 500 Volt rating, you would order IR's part number "70H50A".

(1) Fast Recovery Rectifier—add suffix to part number for Max. reverse recovery time:
S20 = 2.0 μsec.
S15 = 1.5 μsec.
Refer to Engineering Catalog.

(2) Ratings for reverse polarity units differ from basic units.
Refer to Engineering Catalog.

ZENER REGULATORS, VOLTAGE REFERENCES & LOW POWER SILICON RECTIFIERS

This section lists basic parameters to give you quick, easy reference to International Rectifier's Zener Regulators, Voltage Reference Diodes, and Low Power Silicon Rectifiers.

HOW TO USE THIS SECTION

Zener Regulators

Devices are listed by power rating on pages 4 through 6.
Look for specifications opposite the "PARAMETER" heading.
- Power rating
- Maximum operating temperature
- Standard tolerance range. (Other tolerances are specified in the Notes section.)
- Notes (Which are defined on page 5.)
- Case style (See pp. 13-15.)

Then check opposite the "VOLTAGE" heading for the part number of the voltage required.

Voltage Reference Diodes

Devices are separated into standard and time-stable types on page 6. They are listed by nominal zener voltage (V_Z) and by part number.

Each device is identified by:
- Part number
- Nominal zener voltage (V_Z)
- Nominal temperature coefficient

Each series is identified in the Comments column by:
- Power rating
- Case style and the differences of the "A" and "B" versions where applicable

Low Power Rectifiers

Devices are listed by current ratings on page 7.
Look for these specifications opposite the "PARAMETER" heading.
- Current rating.
- Maximum Peak One Cycle Surge Current (I_{FM}[surge]).
- Case connection to the stud or case.
- Case style.

Then check opposite the "VOLTAGE" heading for the part number of the voltage required.

Your local IR Industrial Distributor or IR Field Office will gladly supply you with complete specifications, ordering assistance, and price and delivery quotations.

SILICON ASSEMBLIES

Listing includes selected pre-engineered molded and open stack assemblies.
IR has a proven record of supplying new and unusual designs to meet stringent or unorthodox parameters.
For further assistance in ordering, or detailed information for designing, call your local IR Distributor, or your local IR Field Office, or IR's El Segundo offices.

GENERAL PURPOSE MOLDED CIRCUITS

Basic series of full wave bridges are specified. Other circuits shown are available.

RATINGS AND CHARACTERISTICS

Part Number	10DB	18DB	50FB	60FB
I_{FM} (surge)—Max. peak one cycle surge current	40	40	200	150
I_{FM}—Max. repetitive peak current	4	5	20	—
T_A—Operating temp (°C)	−40° to 140°	−40° to 140°	−20° to 140°	—
T_J—Operating temp (°C)	—	—	—	−65° to 150°

NOTE

Suitable safety factors—both voltage and current—commensurate with individual application conditions must be applied to the absolute maximum ratings to safeguard against voltage transients and current surges.

SILICON STACK ASSEMBLIES

International Rectifier offers the widest selection of standard stack assemblies and the largest potential for special order devices.

RECTIFIER CIRCUITS

As listed, rectifier circuits incorporate only standard rectifier devices. IR offers standard stacks in 6 circuit configurations with ratings of 12 to 1820 Amperes and 100 to 2000 Volts.

HYBRID CIRCUITS

Incorporating both silicon controlled rectifiers and standard rectifiers, these stacks provide controlled power for many applications. Four standard series are listed, with ratings of 8 to 720 Amperes and 100 to 1300 Volts.

SILICON CONTROLLED RECTIFIER CIRCUITS

All SCR circuits provide greater power control range for many applications. IR offers 17 standard circuits with ratings of 11 to 1300 Amperes and 100 to 1300 Volts.

LIGHT SENSITIVE DEVICES

IR offers both Silicon and Selenium photovoltaic cells for convenient design and product selection.

Complete specifications and detailed application data are available. For ordering and pricing information, contact your local IR Industrial Distributor, or your local IR Field Office, or IR's El Segundo Offices.

SILICON PHOTOVOLTAIC CELLS

Silicon Cells are commonly used for light sensing and power generation because of their high efficiency.

A normal response time for Silicon Cells is 2 microseconds. The cells respond well to the longer wavelength (red) light and poorly to the shorter wavelength (blue) light.

SELENIUM PHOTOVOLTAIC CELLS

Selenium Cells offer color response similar to human vision and are especially useful in ultraviolet range applications. Due to a slightly higher internal impedance, selenium has a slower frequency response than silicon.

SILICON READOUT ARRAYS

Designed for perforated tape and punched card data reading systems, analog-to-digital encoders, and shaft positioning systems, these readout photocells provide high speed response to light passing through punched cards or tape.

Typical current generated is 175 μA for 0.01 square inch of active area with load impedance of 1,000Ω and 500 FC illumination.

ELECTRICAL CHARACTERISTICS @ 500 FC, Color Temp. 2800°K Tungsten, 26°C Ambient

SOLAR CELL STANDARD

Precisely calibrated to provide accurate radiation measurement. This standard is the solid-state analog to the pyroheliometer standard. Each cell is calibrated against primary standard cells which were calibrated at Table Mountain, California.

This cell is used to check the efficiencies of production silicon solar cells and to calibrate artificial light sources in terms of solar energy radiation.

Each cell is supplied with an 8½" X 11" curve of the cell output characteristics. Each cell comes in a special carrying case, and the device incorporates thermocouple lead and plug-in output terminals.

IR Solar Cell Standard....Part Number SC-9

STANDARD INDIVIDUAL SILICON CELLS

This is a listing of popular silicon cells offered by IR. These cells offer excellent characteristics and high reliability in an inexpensive form.

(1) Cells listed are P-on-N. For N-on-P, use "A" in place of "P" (SAR-1-08E7 for N-on-P).
(2) All cells listed are P-on-N. For N-on-P, use "A" in place of "E" (S0505A6 for N-on-P).

SOLAR POWER MODULES

Assemblies listed are designed for solar power conversion. They are suited for remote locations. Three types are listed below.

Unmounted Power Modules: Individual modules of single cells connected in series.

Weatherproof Modules: Individual cells imbedded in an epoxy resin providing a rugged, shockproof, weatherproof housing.

Hermetically Sealed Solar Power Converters: Cells mounted on hard anodized aluminum base with an O-ring seal and replaceable plexiglass cover.

UNMOUNTED POWER MODULES

The first number in the part number code indicates the number of cells in series. The last number indicates the conversion efficiency rating. That is, 2SM1020E4 has 2 cells in series and a conversion efficiency rating of 4%.

Electrical Characteristics @ 100 mW/cm², M = 1

Part Number (1)	Minimum Output Power (mW)	Minimum Output Voltage (Volts)	Minimum Output Current (mA)
2SM1020E4	14.4	0.8	18.0
2SM1020E5	18.0	0.8	21.5
2SM1020E6	21.6	0.8	27.0
2SM1020E7	25.2	0.8	31.6
2SM1020GE8	28.8	0.8	36.0

Monolithic Circuits (See EEM Section 3130)....**1621 - 1629**
Germanium Diodes **2537**
Silicon Diodes **2540**
Silicon Zener Diodes **2545**
Silicon Rectifiers **2552**
Silicon Transistors
Small Signal Transistors **2559**
Economy Transistors **2570**
Power Transistors **2571**

some notes about our hughes catalog in **eem**...

These 50 catalog pages represent a broad variety of popular and readily available semiconductor products. Our complete semiconductor line also includes the following families which do not appear in this edition of EEM:

Silicon Voltage References
Germanium Transistors
Field-Effect and UHF/VHF Transistors
Dual and Darlington Transistors
Thyristors and Triggers
Silicon Capacitor Diodes
Special Package Silicon Rectifiers
Special Assemblies

In some cases the specific type you require may not be listed in our EEM pages. Because Hughes can supply virtually any semiconductor type you need, we encourage you to check directly with the factory over our toll-free "Hot Line". Or, call the Hughes sales office in your area.

our special device capabilities...

You'll find that Hughes can answer most any requirement you have for monolithic and discrete component **dice.** For special package or hybrid applications, contact us by "Hot Line" at the factory, or call your local Hughes sales office.

Additionally, Hughes can supply devices in the "LID" (Leadless Inverted Device) or "Hermet" microtransistor configurations. Hughes regional sales offices and our factory sales personnel are ready to handle your inquiry. Call us.

silicon zener diodes

NOTES: The following notes explain variations in the standard type numbers listed for Silicon Zener Diodes. "Note" numbers are inserted above type numbers in the "Type" column. A note number then pertains to all types which follow it, up to that point where another note number is inserted and takes effect for subsequent types.

1. Standard tolerances of 5.0% and 10% are available — no suffix is ±10% tolerance; suffix "A" denotes ±5% tolerance.
2. Standard tolerance of ±5%.
3. Standard tolerance of ±20%.
4. Standard tolerances of 5.0%, 10%, and 20% are available — no suffix is 20% tolerance; suffix "A" denotes ±10% tolerance; suffix "B" is ±5% tolerance.
5. Reverse polarity types available; add suffix "R."
6. Standard tolerances of 1.0%, 5.0% and 10% are available — no suffix is ±10%; suffix "A" denotes ±5% tolerance; suffix "B" is ±1%.
7. Standard tolerance of ±15%.
8. Impedance is derived from the 60 cycle AC voltage which results when an AC current having an RMS value equal to 10% of the DC Zener current is superimposed upon the DC current.
9. Standard tolerance of ±10%.
10. Standard types are ±10% tolerance; suffix "A" denotes ±5% tolerance; suffix "C" denotes ±10% clipper; suffix "CA" denotes ±5% clipper.

silicon rectifiers

lead mounted silicon rectifiers DO-1 case style — (cont'd)

The following condition applies, except where otherwise noted, for all silicon rectifier types in ths catalog:

Test Voltage = Peak Inverse Voltage

Type	Maximum Peak Reverse Voltage (volts)	Maximum Average Forward Current (Amps) @ Ambient Temp. (°C)	Maximum Forward Voltage (volts) @ Forward Current (Amps)	Reverse Current (μA) @ Ambient Temp. (°C)	Notes

silicon transistors

NOTES:

The following notes define test conditions or parameters. They are inserted directly below their appropriate column headings throughout the transistor section.

NOTE 1 — (for Power Dissipation @ 25°C)

A = Ambient Temperature
C = Case Temperature
J = Junction Temperature

NOTE 2 — (for BV_{CE-})

O = Base Open
R = Specified Resistance
S = Base Shorted
V = Used only when Voltage Bias is applied
X = Base-Emitter Back Biased

NOTE 3 — (for hf—)

E = Common Emitter
B = Common Base
C = Common Collector

NOTE 4 — (for f—)

B = Common Base Cutoff
E = Common Emitter Cutoff
M = Minimum Frequency of Oscillations
T = Current Gain-Bandwidth Product

LINEAR INTEGRATED CIRCUITS/TRANSISTORS

Every LTE Component 100% Tested to each Parameter

For military/industrial types, for consumer/entertainment types, for linear integrated circuits in ANY quantity, call us for low factory-direct prices; Government Source Inspection and Certificate of Conformance available where required.

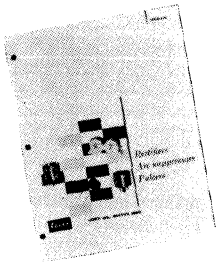
SILICON BRIDGE RECTIFIERS AND ARC SUPPRESSORS



Efficient, light, economical, and exceptionally reliable, Ledex transient protected silicon bridge rectifiers have built-in transient control. High voltage spikes on either AC or DC sides are automatically clipped at 200 volts, protecting the diode cells as well as other circuit components.

Stock models carry 7.5 amperes at intermittent duty, 1.8 amperes at continuous duty. Recommended for use with all Ledex electromechanical products and for any system subjected to high voltage spikes from solenoids, relays, or other inductive equipment sharing a common AC line. Storage and ambient temperature range is −55°C to +125°C.

RATINGS FOR 60 THROUGH 400 CPS*

	PIV	Input VRMS	Output VDC	Surge Amps
Nominal	Automatic Protection	115	100	—
Maximum	within design limits	130	116	25 amps 8 ms

* Sinusoidal input, resistive or inductive loads

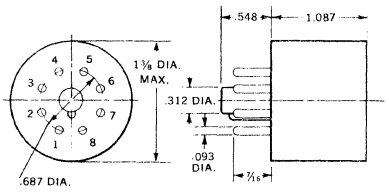
CURRENT RATING BY DUTY CYCLE (20°C)

Duty Cycle	Continuous	¾	½	¼	1/10
Max. Current Rating (amps)	1.8	2.4	3.6	7.2	7.5
Max. Pulse Length (sec)	Continuous	115	100	43	20

* Duty cycle = $\frac{\text{pulse length}}{\text{pulse length + "off" time}}$

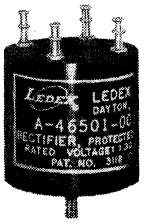
OCTAL PLUG-IN
MODEL NUMBER
A-46502-003

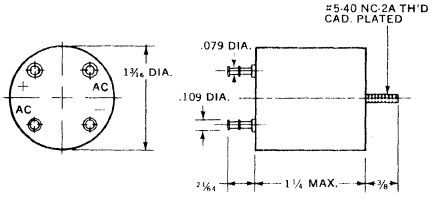
Weight: 1⅝ oz. Mates with standard octal tube socket such as Cinch-Jones 8AB or equal.



TURRET TERMINAL
MODEL NUMBER
A-46501-003

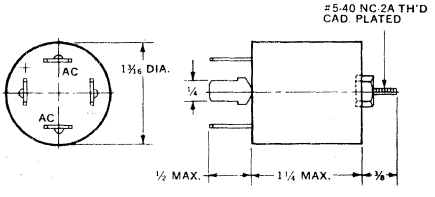
Weight: 1½ oz. Standard binding post type terminals, #5-40 x ⅜" mounting stud.

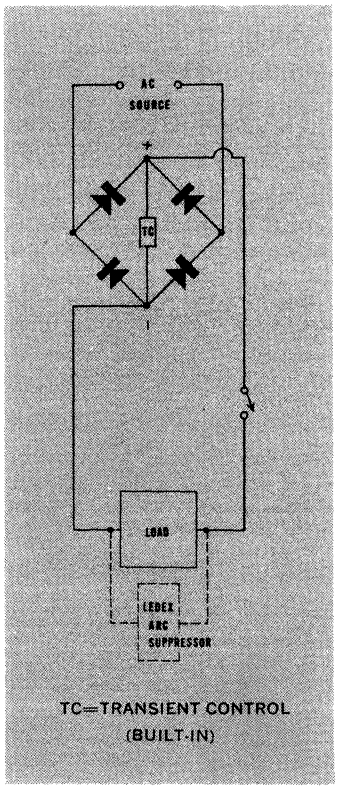




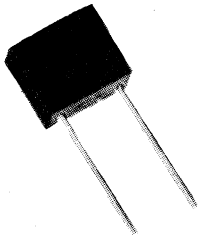
QUICK-CONNECT TERMINAL
MODEL NUMBER
121011-001

Weight: 1½ oz. Mates with A-AMP, Inc. Series 250 (Faston) or equivalent ¼" terminals.





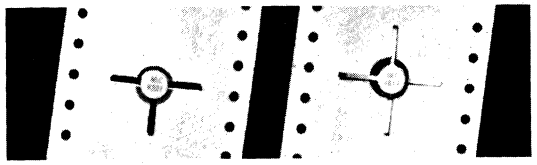
ARC SUPPRESSORS

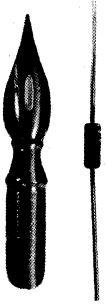


Ledex Arc Suppressors eliminate arcing caused by reverse voltage spikes produced when the circuit to an inductive load is disconnected. These reverse voltages, while of short duration, often reach high value. They can damage the contacts of the control circuit, cause shorts, radio interference, and eventual malfunction.

Stock models include diode/capacitor designs, with lowest peak reverse voltage rating — ideal for protection of solid state circuit components; and diode/capacitor/zener designs, which minimize armature drop-out time for applications in which operating speed is critical.

NEC ESAKI DIODES are recommended for high-speed switching applications. Specifications available upon request.

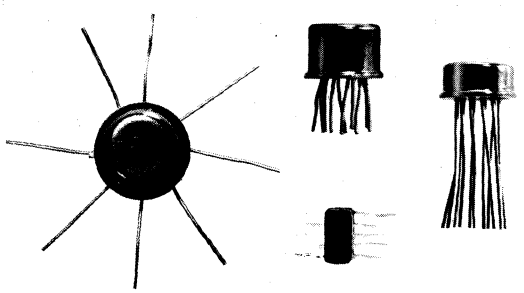




NEC "ESVAC" (Epitaxial Silicon Capacitance Diode) includes three groups: 1S1617, 1S1618 and 1S1619. Our outstanding Capacitance Diodes utilize "Hyper-Abrupt Junction," (the rate of junction capacitance varying with applied voltage). Especially recommended for use in automatic gain control, automatic frequency control, frequency modulation, phase modulation and voltage tuning circuits, with high reliability and excellent temperature characteristics.

NEC MICROWAVE TRANSISTORS—enthusiastically approved by leading telecommunications and electronic data processing engineers. In complex communications systems, NEC Microwave Transistors provide consistently excellent performance under the most difficult ambient environmental conditions. Our Type V417 Microwave Transistor, which operates with NF 9dB at 4 GH_z, is well known. In this same group we also recommend our types V327 and V415 Microwave Transistors.

Specification inquiries and consultations cordially invited, without obligation.



NEC manufactures high quality **SCR, SR, TRIAC, DIAC,** Unijunction, Voltage Reference Diodes (V_Z 7V — 1S550 through 1SS552), and HF Zener Diodes (RD7H, 8H and 10H). NEC Silicon Controlled Rectifiers and Silicon Rectifiers are recommended for high current, high voltage applications. NEC also produces SCR and SR, tailored for a vast range of current/voltage requirements.

INTEGRATED CIRCUITS: Nippon Electric **is Japan's foremost manufacturer of Integrated Circuits.** Recognizing the vital role of miniaturization in the electronic industry, NEC has perfected mini-microscopic IC's to insure maximum economy, function and durability.

FOR DESK CALCULATORS: The NEC MOS Series (μPD 9-15), now available in production quantities, offers high reliability with very stable performance. NEC will soon begin production of LSI (Large Scale Integration) to meet the industry's growing needs.

FOR INDUSTRIAL USE: NEC's new family of TTL, designated the μPB200 Series, provides total compatibility with standard U.S.A. products. Our μPC51 is designed for use in Operational Amplifiers, and the μPC71 for Comparator applications.

FOR CONSUMER PRODUCTS: The μPC16 is a linear IC for IF amplification in television audio circuits. Performance is excellent in limiting characteristics, linearity of detector and temperature stability. Advanced design concepts make the μPC16 significantly superior to circuits employing the usual discrete components.

NEC'S EXTENSIVE RANGE OF CAPACITORS ARE GUARANTEED TO MEET YOUR MOST EXACTING SPECIFICATIONS:

"BL" CAPACITORS. Special "Boundary Layer" ceramic semiconductor capacitors developed by NEC are based on a new principle enabling optimized by-passing applications in H F. and High Speed Pulse circuits, with improved temperature and frequency characteristics.

TANTALUM "E" SERIES. Small, rectangular, solid tantalum capacitors, transfer molded with plastic material, supplied with uni-directional leads for use in printed circuits.

TANTALUM "H" SERIES. Hermetically sealed in a metal case, designed expressly for communications equipment, industrial control systems and electronic computers.

"MICROSOLID" TANTALUM. Smaller size is more suitable for use in high density electronic circuits.

"MYLEX" (MYLAR FILM). More compact and lighter in weight than the polyester type, "Mylex" capacitors provide highly efficient operation at very low voltages.

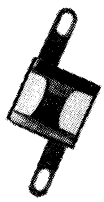
RECTIFIERS, DIODES and CARTRIDGES

DIODES FOR RE-CHARGING NICKEL-CADMIUM BATTERIES—TRANSFORMER TYPE CHARGERS

The Rect-A-Cell selenium diode is rugged, dependable and does not age. The mechanical construction includes a metal wrap plus a spring to insure positive contact to the selenium cell under all conditions. The diode may be included as a part of the transformer secondary winding assembly, and encapsulated without loss of contact. The transient-free characteristic of selenium makes this high density diode particularly well suited for low voltage battery chargers.



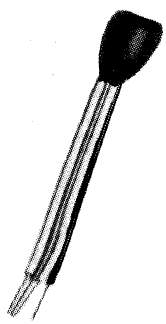
Part No. 302-123 5/16" x 3/16" x 13/16" overall length

AC Input: 33V RMS Max.

DC Output: 125-175 MA depending upon the heat transfer characteristics of the installation.

BRIDGE RECTIFIERS FOR TRANSFORMERLESS CHARGERS

Where the battery and charger are permanently connected, a capacitor plus the low voltage bridge rectifier may be used directly from the 125 volt AC line. The completely wired, four section bridge rectifier provides a small, efficient, long life device, protected from normal atmospheric conditions.

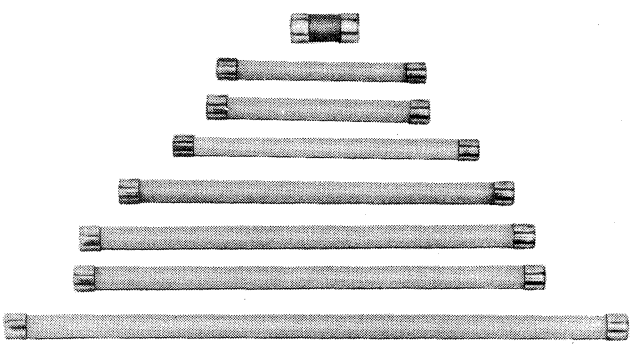


Part No. 301-173 33 V RMS AC
DC output: 50-150 MA.

Part No. 301-172 33 V RMS AC
DC output: 100-225 MA.

Larger sizes for higher charging rates are also available.

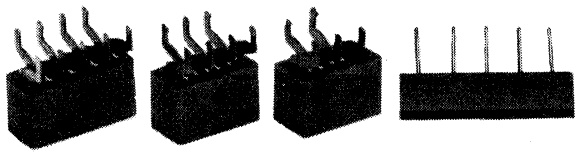
HIGH VOLTAGE SELENIUM CARTRIDGES



High Voltage Selenium Cartridges, which feature low leakage, high conductivity, stability and reliability.

Part No. 303-59	800 PIV	"Boost"	1 1/16" L x 9/32" Dia.
Part No. 303-248	6500 V	"Focus"	2 1/16" L x 9/32" Dia.
Part No. 303-351	7500 V		2 3/16" L x 9/32" Dia.
Part No. 303-352	10,000 V		2 15/16" L x 9/32" Dia.
Part No. 303-353	11,000 V		3 3/16" L x 9/32" Dia.
Part No. 303-354	12,000 V		3 5/8" L x 9/32" Dia.
Part No. 303-355	18,000 V		4 3/16" L x 9/32" Dia.
Part No. 303-356	20,000 V		5 5/8" L x 9/32" Dia.

COLOR TV CONVERGENCE RECTIFIERS

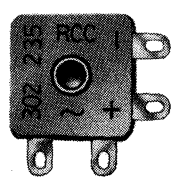


Selenium diodes with extra high conductivity and long life, epoxy encapsulated in Lexan cases, mechanically interchangeable with open plate construction rectifiers, and ready for application to printed circuit boards. Three types, covering 3, 4, and 5 cell devices are available. Other types may be made if required.

Part No. 301-58	3 cell	11/16" x 3/8" x 7/16"
Part No. 301-1	4 cell	11/16" x 3/8" x 7/16"
Part No. 301-261	5 cell	7/8" x 3/8" x 7/16"
Part No. 301-357	4 cell	

BRIDGE RECTIFIERS FOR SOLENOID, MOTOR AND RELAY OPERATION

A completely wired, single phase bridge rectifier, in a Lexan case, with center mounting and eyelet completely insulated.



Part No. 302-137
130 VAC RMS 100 MA DC 5/8" x 5/8" x 5/16"

Part No. 302-235
250 VAC RMS 80 MA DC 5/8" x 5/8" x 5/16"

Other ratings available upon request.

POWER RECTIFIERS — CONVENTIONAL CONSTRUCTION!

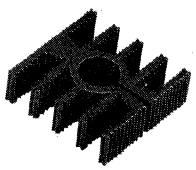
Rectifier cells from 0.7" x 0.7" to 8" x 16" are available as cells or stacks for convection cooling, fan-cooled or oil-cooled applications. The high efficiency, and long life expectancy (100,000 hours without aging) plus transient-free characteristics make this new selenium an economic device to be used in critical applications. The forward voltage drop at rated loads is less than silicon. Therefore, on all low voltage applications, the low voltage drop, high efficiency, long, non-aging life, and freedom from the need for transient suppressors or special mounting hardware, make the Rect-A-Cell rectifiers the most economical device for your applications.

RECTIFIER COMPONENTS CORPORATION
124 ALBANY AVENUE, FREEPORT, N.Y. 11520

GEORGE RISK INDUSTRIES

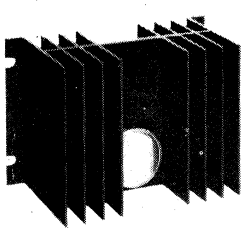
SEMICONDUCTOR COOLERS

SERIES 20 MILLIWATT COOLERS



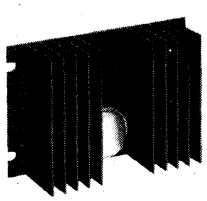
• New square design for greater cooling efficiency in smaller space • Four standard models: .50", .625", .75" and 1.00" square • Fit case diameters .177/.370" • Case temperature rise above ambient (25° C) is 20 to 50° C at 500 milliwatts.

NATURAL CONVECTION COOLERS



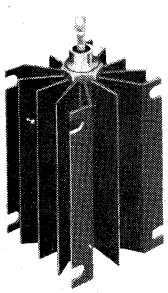
Power Type • 15 standard models • Dimensional range: 1.5" to 5.5" H; 4.5" to 4.81" W; .45" to 2.5" D • Case styles: TO-3 and TO-36, plus blanks with no mounting hole • Typical case temperature rise above ambient (25° C) = Model 13A0610 (3.0" x 4.5" x 1.25") 25° at 15 watts.

NATURAL CONVECTION COOLERS



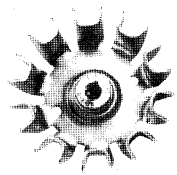
Flat Bottom Type • 12 standard models • Basic dimensions: 1.5" H x 2.75" W x 1.31" D; 3.0" H x 4.37" W x 1.31" D; 3.0" H x 5.9" W x 1.06" D • Case styles: TO-3 and TO-36 plus blanks with no mounting holes • Case temperature rise above ambient (25° C) at 15 watts is 18-36° depending on model.

RADIAL RECTIFIER COOLERS



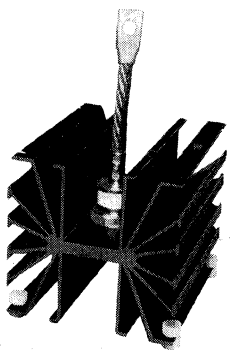
• 11 standard models • Dimensional range: 2" square x .75", 1.5 and 3" high. Standard mil. spec. black anodized finish • Furnished with semiconductor area and one mounting foot free of anodize • Will accommodate both stud mounted (up to 11/16" hex case) and press-fitted transistors and rectifiers • Temperature rise 40-70° above ambient (25° C) at 15 watts.

CIRCUIT BOARD COOLERS



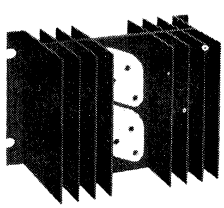
• For TO-3 and TO-36 transistors • Unique fin design provides unusually large surface area for natural convection cooling • Will dissipate up to 5 watts under 50 fpm forced air with only 50° C rise above ambient (25° C).

HIGH POWER MULTI-FIN HEAT SINKS



• Multi-fin design provides maximum surface area in minimum volume • Larger surface area permits operating at lower flow velocities for forced convection cooling • In applications where high power rectifiers are operated near upper limit of current rating, smaller, quieter fans may be used. NOTE: 3' and 6' lengths of raw extrusion are available for prototypes.

BERYLLIUM OXIDE INSULATING WAFERS



• Surface ground for maximum interface contact and heat transfer efficiency • Eliminate need for insulating heat sink from chassis • For case styles: TO-3, TO-36, TO-5, TO-8, TO-18, TO-53, TO-66.

COOLING ACCESSORIES

■ Insulation grommets ■ Baked-on isolation coating
■ Shroud assemblies

SPECIAL REQUIREMENTS

All the heat sinks shown here can be obtained in a number of variations and special design work can be carried out to meet your specifications. Send us your requirements. We will be happy to be of assistance in any way we can.

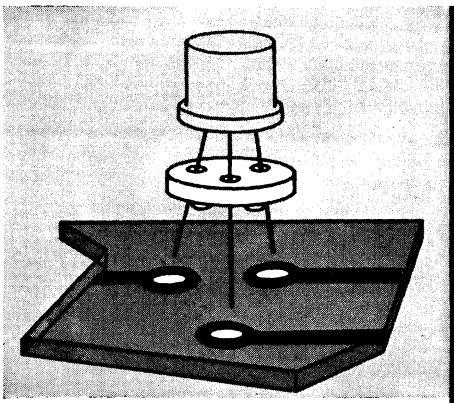
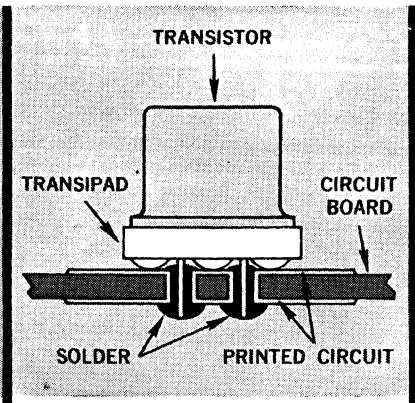
TRANSIPADS

TRANSISTOR MOUNTING PADS



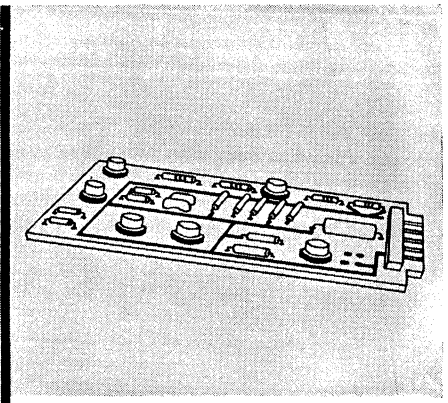
SIMPLIFY PC-BOARD ASSEMBLY

Transistor leads simply slip through molded-in holes. Transipads serve as lead-aligning jigs, give uniform above-the-board component spacing. Soldering of leads to board secures entire assembly.



PREVENT TRANSISTOR DAMAGE

Before mounting on the PC-board, the Transipad reinforces the transistor lead seal. After mounting, it protects against erratic soldering practices, provides longer lead length and a heat-dissipating air space.



ENHANCE PC RELIABILITY

Transipads provide rock-solid support, maintain lead-spacing, relieve leads of stress loads. The air space beneath a Transipad helps avoid moisture entrapment, permits solder-fillet inspection, allows thorough flushing of flux due.

Standard Transipads for Most Applications—At present, there are more than 150 standard Transipads. These meet the mounting requirements of the 24 most common transistor-case styles. For most TO types, you have a choice of several Transipads, in varying heights, and with standoffs on one side or both (or with no standoffs for minimum above-the-board silhouette).

Special-Purpose Transipads—Pads designed to widen lead spacing (e.g., from TO-18 to TO-5), change lead configuration, adapt 8, 10, 12 lead circuits, all available from stock. In addition, custom made mounting pads and converters can be supplied —with no tooling charge whatsoever on orders of 5,000 or more.

Choice of Materials — Milton Ross Transipads are precision-molded of glass-filled diallyl phthalate (DAP), or nylon, all of which have high dielectric strength. DAP is non-hygroscopic and withstands temperatures to 425°F.

Choice of Colors — Nylon pads are white; standard color for DAP is black. In addition, DAP pads can be supplied in red, grey, green, blue, or tan at slight extra cost.

SCHAUER 1% tolerance zener diode kit #SCH51. A $54.57 value for only $24.50!

A 51-piece assortment of 1% tolerance, 1 watt reliable Schauer zener diodes covering the voltage range of 2.7 to 16.0. Three diodes of each voltage are contained in reusable poly bags which are stored in a handy kit. Data sheet included.

May be used over and over in laboratory prototypes as well as in precision test equipment. Close tolerances mean fixed impedances and temperature coefficients and permit voltage range tests for optimum design.

SCHAUER silicon varistors

Consists of two matched silicon junctions connected in parallel and oppositely poled. The junctions are molded into one small package with axial gold plated nickel leads. Surge: 25 amps peak ½ cycle; dissipation: ¾ watt at 25°C.; TC of 2mv/°C. All have closely controlled forward conductance with log current characteristics.

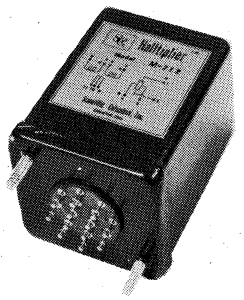
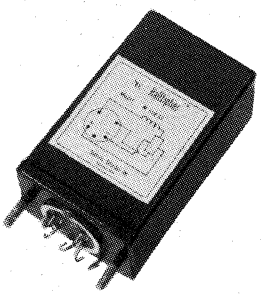
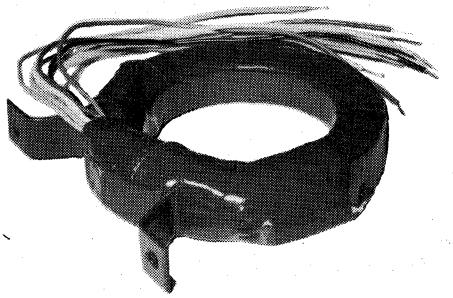
HALLTIPLIER™ HALL EFFECT MULTIPLIERS

DESCRIPTION: These multipliers supply an output voltage proportional to the product of two a.c. or d.c. input currents. One input (I_c) is to the Hall generator; the other (I_m) is to the magnetic circuit. The output voltage is given by the expression $V_h = k\, I_c\, I_m$. In the table below the Hall generator input resistance is given by R_i and the output resistance by R_o.







Model	I_c Max. ma	R_i ohms Nominal	R_o ohms Nominal	I_m Peak Series connection ma	I_m Peak Parallel connection ma	Coil Resistance Series ohms	Coil Resistance Parallel ohms	Coil Inductance Series	Coil Inductance Parallel	Zero Field Voltage @ I_c = 100 ma mv	Linearity	Minimum Output mv	Price

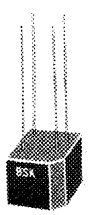
Selenium Transient Voltage Suppressors

- 30 or 60 volts clamping voltage per cell
- Up to 800 A single pulse at 1 millisec
- High stability — no aging
- 550 volts max. RMS-input/stack
- △ -and Y-connected devices for 3-phase applications
- Highly reliable epoxy version up to 15 A single pulse at 1 millisec



Selenium High Density Cells, Type Z,

are available in voltage ratings from 20 to 36 Volts RMS in numerous sizes from 0.7" x 0.7" to 4" x 20 " with only 1 volt RMS forward voltage drop at 1000 mA/inch² which makes the cells extremely competitive. For low voltage applications Selenium rectifier assemblies are available up to several thousand of amperes.

High Voltage Epoxy Silicon Diodes

Type	Max. aver. outp. curr. (A)	Max rep. peak rev. voltage (V)	Max. peak surge curr. (≦ 8 millisec) (A)	Max. I^2t (≦ 8 millisec) (A²sec)
ESK 1/06	1,5	600	50	10
ESK 1/10	1,5	1000	50	10
ESK 1/12	1,5	1200	50	10
ESK 1/16	1,5	1600	50	10

Silicon Rectifier Diodes

Type	Max. av. output current at T_c = 125°C (A)	PIV Range (V)	Peak surge current*) (≦ 8 msec) (A)	I^2t (A²sec)	Mounting
SKN 2,5	2,5	400-1600	130	70	lead
SKN 5	5,0	400-1600	180	130	lead
SKN 20	20	400-1600	300	360	stud

THYRISTORS (SCR's) SSPI SHORT FORM PRODUCT DISPLAY

MILITARY AEROSPACE TYPES

All devices intended for Military/Aerospace usage receive 100% TX type processing including high temperature storage, temperature cycling, and fine and gross leak tests as a normal part of the manufacturing procedure. These devices conform completely to MIL-S-19500 and are capable of being exposed to the most stringent high reliability processing for demanding "man-rated" space applications.

- All devices Planar Passivated for the utmost in built-in reliability
- Voltage capability up to 400V.
- DC current ratings up to 6 amps.
- High speed and sensitivity for optimum design.
- Standard series in TO-46, TO-18, TO-5, TO-9, and TO-59 packages for a wide range of power and size requirements.

HIGH SPEED TYPES

SSPI's GA 200-GB 200 "Nanosecond Thyristors" are the fastest high current devices available on the market today. They offer a unique combination of nanosecond rise times and submicrosecond recovery times at pulse currents of up to 50 amps unmatched by any other devices. Applications include radar pulse modulator switches, solid state laser drivers, harmonic waveform generators, and as reliable replacements for avalanche transistors. Features include the following:

- Rise times of 10 n sec to 1 amp and 20 n sec to 30 amps.
- Recovery times of 0.5 μsec.
- Surge current to 50 amps.
- Anode voltages to 100 V extendable to over 1000 volts through "series stringing" techniques.
- TO-18 and TO-59 packages for DC currents up to 6 amps.

RADIATION HARD TYPES

The GA 100 and GB 100 series of radiation hard devices have been designed to provide significantly greater radiation tolerance than conventional SCR's or transistors with comparable current handling ability. These series are capable of operation after exposure to 10^{15}NVT and have post radiation limits specified after $3X10^{14}$NVT.

- TO-18 and TO-59 package for DC current levels of up to 3 amps.
- Surge currents up to 15 amps.
- V_F of 3V max at 1 amp after exposure to $3X10^{14}$NVT.
- Fully characterized for worst case design.

EL DRIVER TYPES

The AA series is specifically designed for operation as a driver device for electroluminescent displays requiring bi-directional switching of high voltage AC. A single polarity control signal can be used for turn on for both positive and negative anode voltage for simple control circuit design. Features include:

- Planar passivation for low leakage current.
- High reverse gain for low level control.
- Anode voltage to 400V.
- Operation to 20KC.
- Low anode capacitance.

MIL APPROVED TYPES

The JAN2N1870A, JAN and JANTX2N2323 series provide the utmost in assured reliability for off the shelf usage in a majority of military applications where a MIL qualified device is required. Planar passivation on all devices assures parameter stability while extensive lot acceptance testing guarantees a failure rate of less than .01%/1000 hours in conservatively designed applications.

- Anode voltages to 400V.
- Available as JANTX types.
- Pulse currents to 30 amps.
- DC currents up to 1.25 amps at 100°C case temp.
- TO-5 and TO-9 packages.

INDUSTRIAL THYRISTORS (SCR's)

- Continuous DC current ratings of up to 1.6 Amps for lead-mounted packages and up to 5.0 Amps for stud-mounted packages.
- Blocking voltage capability to 400 volts.
- Maximum gate trigger currents as low as 2.0 μsec.
- Turn-on times as low as 200 nanoseconds.
- TO-46, TO-52, TO-18, TO-5, TO-59 packages are standard. All are hermetically-sealed, metal cans.
- Low-cost commercial grade series available in TO-18 and TO-5 packages.

TRIGISTORS (Gate Turn-off SCR's)

Trigistors are PNPN switches characterized for turn-off by application of a negative gate pulse as well as for turn-on by a positive gate pulse.

- Turn-off gains of 10 (ratio of Anode current to negative gate current) at Anode currents in excess of 5.0 Amps.
- Blocking Voltage capability to 400V.
- Continuous DC current Ratings up to 5.0 Amps.

PHOTO SCR's

- Light activated SCR's are PNPN switches characterized for turn-on by light impulse in addition to electrical gate pulse.
- Maximum light trigger intensities as low as 10 foot-candles (0.13 mw/cm^2).
- Blocking voltage capability to 200 volts.
- Packages include round lens and flat lens TO-18 metal can as well as epoxy-covered micro-package.

SHORT FORM PRODUCT DISPLAY (cont.)

POWER INTEGRATED CIRCUITS

- Standard power integrated circuits such as the PIC100 series Solid State AC Switch.
- Custom integrated circuit facility producing IC's to customer specifications utilizing Solid State Product's discrete semiconductor technology coupled with thick-film techniques.

Silicon Power Transistors

Power Switching

15 Watt Switching
- 2 Amp Ultra Fast
- 5 Amp High Speed
- 10 Amp High Speed

Features:
- Min. Current Gains to 100
- Saturated Switching times under 1 μsec.
- Saturation Voltages to .5V @ 5 A
- Packages (TO-5) and (Pancake TO-5)

15 Watt High Voltage Switching (2N5660)
- 3 Amp High Speed
- 10 Amp High Speed

- Collector Voltages to 400 volts
- Saturation Switching Times under 1 μsec.
- Saturation Voltages to .4V @ 3A
- Package (TO-5)

30 Watt Switching
- 20 Amp High Speed

- Isolated Collector Package Option
- Fast Switching
- Saturation Voltages to 1.0V @ 10 A
- Packages (TO-59) (TO-59 Isolated Collector)

High Current-Power

- 5 Amp 30 W
- 20 Amp 30 W
- 20 Amp 50 W
- 30 Amp 100 W
- 30 Amp 150 W

Features:
- Characterized for second breakdown
- Sustaining Voltages to 120V
- Min. Current Gains to 100
- Packages (TO-3, TO-59, TO-61, TO-63)

High Voltage Power-Switching (2N5664)

- 3 Amp 20 W
- 10 Amp 30 W

Features:
- Collector Voltages to 400V
- Fast Switching
- Package (TO-66)

2N545, 2N546, 2N547, 2N548, 2N549, 2N551, 2N876, 2N877, 2N878, 2N879, 2N880, 2N881, 2N882, 2N883, 2N884, 2N885, 2N886, 2N887, 2N888, 2N889, 2N890, 2N891, 2N892, 2N893, 2N894, 2N895, 2N896, 2N897, 2N898, 2N899, 2N900, 2N901, 2N948, 2N949, 2N950, 2N951, 2N1054, 2N1055, 2N1116, 2N1117, 2N1208, 2N1209, 2N1212, 2N1595, 2N1596, 2N1597, 2N1598, 2N1599, 2N1647, 2N1648, 2N1649, 2N1650, 2N1714, 2N1715, 2N1716, 2N1717, 2N1718, 2N1719, 2N1720, 2N1721, 2N1724, 2N1724A, 2N1725, 2N1869, 2N1870, 2N1870A, JAN2N1870A, 2N1871, 2N1871A, JAN2N1871A, 2N1872, 2N1872A, JAN2N1872A, 2N1873, 2N1874, 2N1874A, JAN2N1874A, 2N1875, 2N1876, 2N1877, 2N1878, 2N1879, 2N1880, 2N1881, 2N1882, 2N1883, 2N1884, 2N1885, 2N1886, 2N2009, 2N2010, 2N2011, 2N2012, 2N2013, 2N2014, 2N2150, 2N2151, 2N2322, 2N2322A, 2N2323, JAN2N2323, JAN TX2N2323, 2N2323A, JAN2N2323A, JAN TX2N2323A, 2N2324, JAN2N2324, JAN TX2N2324, 2N2324A, JAN2N2324A, JAN TX2N2324A, 2N2325, 2N2325A, 2N2326, JAN2N2326, JAN TX2N2326, 2N2326A, JAN2N2326A, JAN TX2N2326A, 2N2327, 2N2327A, 2N2328, JAN2N2328, 2N2328A, JAN2N2328A, 2N2329, JAN2N2329, 2N2344, 2N2345, 2N2346, 2N2347, 2N2348, 2N2657, 2N2658, 2N2679, 2N2680, 2N2681, 2N2682, 2N2683, 2N2684, 2N2685, 2N2686, 2N2687, 2N2688, 2N2689, 2N2690, 2N2811, 2N2812, 2N2813, 2N2814, 2N2828, 2N2829, 2N2849, 2N2850, 2N2851, 2N2852, 2N2853, 2N2854, 2N2855, 2N2856, 2N2858, 2N2859, 2N2877, 2N2879, 2N2878, 2N2880, 2N2890, 2N2891, 2N2892, 2N2893, 2N2995, 2N3001, 2N3002, 2N3003, 2N3004, 2N3005, 2N3006, 2N3007, 2N3008, 2N3027, 2N3028, 2N3029, 2N3030, 2N3031, 2N3032, 2N3254, 2N3255, 2N3256, 2N3257, 2N3258, 2N3259, 2N3273, 2N3274, 2N3275, 2N3276, 2N3418, 2N3419, 2N3420, 2N3421, 2N3469, 2N3487, 2N3488, 2N3489, 2N3490, 2N3491, 2N3492, 2N3555, 2N3556, 2N3557, 2N3558, 2N3559, 2N3560, 2N3561, 2N3562, 2N3597, 2N3598, 2N3744, 2N3745, 2N3746, 2N3747, 2N3748, 2N3749, 2N3750, 2N3751, 2N3752, 2N3850, 2N3851, 2N3852, 2N3853, 2N3878, 2N3879, 2N3996, 2N3997, 2N3998, 2N3999, 2N4000, 2N4001, 2N4002, 2N4003, 2N4075, 2N4076, 2N4096, 2N4097, 2N4108, 2N4109, 2N4110, 2N4144, 2N4145, 2N4146, 2N4147, 2N4148, 2N4149, 2N4150, 2N4212, 2N4213, 2N4214, 2N4215, 2N4216, 2N4217, 2N4218, 2N4219, 2N4301, 2N4863, 2N5038, 2N5039, 2N5487, 2N5488, 2N5552, 2N5658, 2N5659, 2N5660, 2N5661, 2N5662, 2N5663, 2N5664, 2N5665, 2N5666, 2N5667

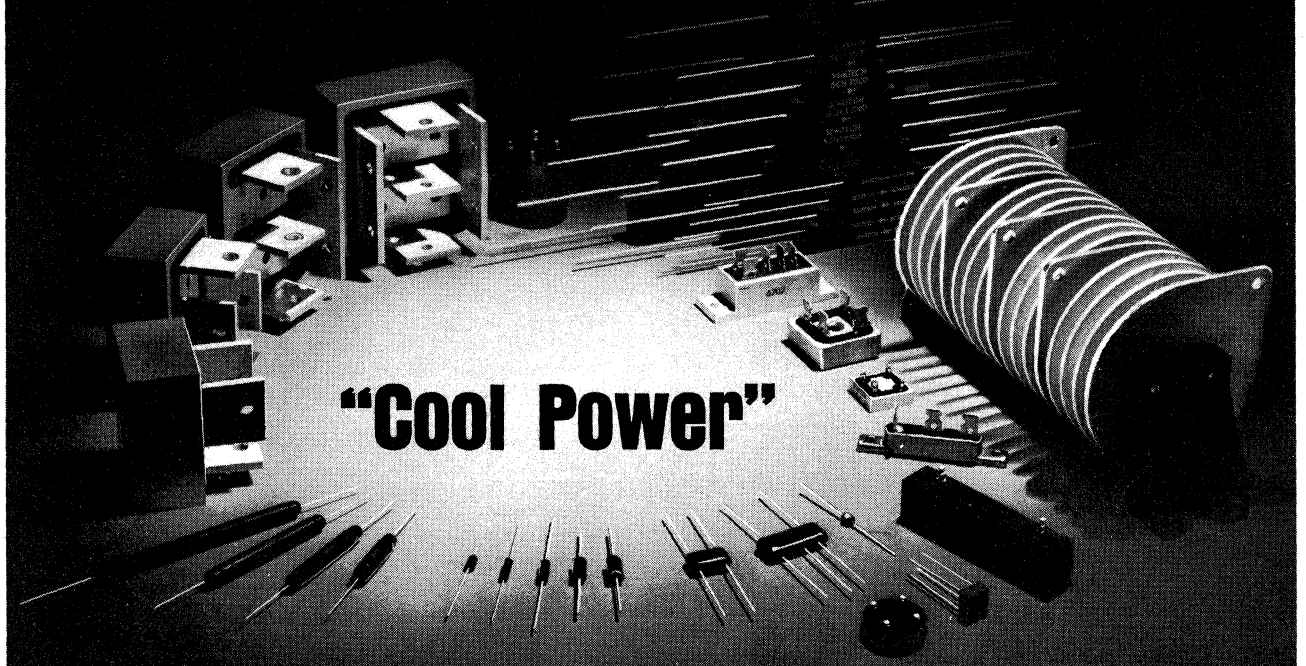
Semtech Silicon Rectifiers & Assemblies



Semtech Corporation manufactures a complete line of silicon rectifiers and devices. Offering unique packages — designed to solve old and new circuit problems efficiently, reliably and at low cost.

Semtech has a continuing research and development program, utilizing interrelated technologies, to guarantee state-of-the-art rectifiers and assemblies. The new "Metoxilite" rectifier is just such a device — the result of years of intensive materials research and testing. Fashioned from metal-oxides, this new device offers impermeable monolithic construction and advanced electrical characteristics.

Unique devices introduced by Semtech include: ■ SEMPAC® (100 to 1000V) ■ MINISTAC (1 to 7kV) ■ COMPAC (50 to 3000V) ■ MINISTIC (10 to 40kV) ■ SLIMPAC® (2.5 to 45kV) ■ ALPAC® (50 to 600V) ■ STACPAC (500V to 25kV) ■ "METOXILITE" (100 to 1000V) ■ A complete line of Multipliers (up to 50kV).

For complete information, contact your nearest representative and get your Free copy of Semtech's 1969 Silicon Rectifier Catalog. All products listed in our catalog are available for immediate delivery.

FOR YOUR TRANSDUCING APPLICATIONS

PITRAN®
PRESSURE SENSITIVE TRANSISTORS

DESCRIPTION:

The PITRAN piezotransistor is a silicon NPN planar transistor that has its emitter-base junction mechanically coupled to a diaphragm located in the top of the TO-46 can. When a pressure or point force is applied to the diaphragm, a large reversible change is produced in the transistor's characteristics. An unamplified linear output of at least 20% of the supply voltage can be achieved with supply voltages from less than one volt to more than fifty volts.

SPECIFICATIONS: (In standard circuit shown below)

Characteristic	Minimum	Typical	Maximum	Units
Linear Range PT-2/3	0.07	0.25	1	psid
PT-22/23	1	2	3	psid
(ΔV_{CE} = 2 V) PT-52/53	2.5	5	7.5	psid
Linearity (over ±1 volt range)		0.5	1	% Deviation from Best Straight Line
Hysteresis (over ±1 volt range)		0.5	1	% Deviation Between Same Point on Increasing and Decreasing Mech. Inputs
Temp. Coeff. (Zero Shift)				
PT-3/23/53	0	±50	±100	mV/°C
PT-2/22/52		±200	±400	mV/°C
Temp. Coeff. (Sens. Change)		−0.2	−0.5	%/°C
h_{FE} @ V_{CE} = 2 V, I_C = 800 μA	2	10	40	
I_{CBO} @ V_{CB} = 10 V		0.01	1	μA
BV_{CEO} @ I_C = 10 μA	50	120		Volts
Overload Range (No damage)	500	700		% of Full Linear Range
Mech. Resonance Frequency	100	150		kHz
Temp. Range	−40		75	°C

SYNTRON

SILICON CONTROLLED

SOLID STATE AC AND DC POWER CONTROL. Syntron Silicon Controlled Rectifiers are diffused, three junction, semiconductor units designed for use in medium and high power solid state control applications.

The Silicon Controlled Rectifiers shown on these pages are available in the popular standard JEDEC configurations from 25 amp rms to 235 amp rms with V_{BO} ratings to 1200 PRV repetitive, 1300 PRV transient.

The Syntron Silicon Controlled Rectifier is a rectifying device which exhibits the same reverse voltage avalanche characteristics found in all Syntron silicon diodes. The forward direction shows high resistance in the "off state," capable of blocking forward voltages. With a very small

value of voltage and current applied to the gate, the forward direction changes to a very low resistance allowing high currents to be conducted. This change, termed "turn on," is a fast switching function occurring in only a few microseconds.

In a single element application, this device can be used for direct conversion and continuous control of AC to DC power requirements or it can be used as a DC switch to initiate current flow. For AC power control, two silicon controlled rectifiers are required in an inverse parallel connection.

Syntron's rigid quality control, developed through strict avalanche diode requirements and more than 5 years field testing, have yielded the most reliable silicon controlled rectifiers available for solid state power control.

SYNTRON

AVALANCHE SILICON

Inherent protection against voltage transients. All Syntron silicon diodes are manufactured using a unique diffusion process that takes full advantage of the avalanche characteristics inherent in silicon.

The avalanche characteristics provide built-in protection against voltage transients by limiting the voltage across the rectifying junction. This reduces the electrical stress which normally results in the surface breakdown typical of non-avalanche diodes.

The diodes are manufactured in either standard or reverse polarity with a rated peak reverse voltage range of 50 to 1600 volts. The current rating is determined by the ambient condition in which the diode operates. **All Syntron Avalanche**

POWER RECTIFIERS

SYNTRON DIVISION
FMC Corporation
264 Lexington
Homer City, Pa. 15748
Cable Address: SYNTRON, HOMER CITY

silicon rectifiers will meet JEDEC specifications, yet all diodes that comply with the JEDEC specifications do not necessarily meet the capabilities of the Syntron Avalanche rectifiers.

The curves submitted include reverse power capabilities, typical single phase and three phase current ratings as well as the over-all surge current capabilities of the diodes. If the transient peak power exceeds the reverse power capabilities level, additional protection is required.

The quality is built in these devices and is controlled by rigid test procedures applied to each device before shipment. These test procedures are applied to the diode at a level that will insure its meeting the particular application for which it is intended.

Impedance (°C/W), Junction to Case 5.0 Maximum	Base .... Steel stud and base with a #10-32 UNF-2A thread for through mounting on a heat sink. Nickel plating produces low contact resistance and prevents corrosion. Header ..... Glass to metal construction. Hermetically sealed to base. Weight ..... Approximately 0.16 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 30 inch pounds maximum Dimensions .. In accordance with JEDEC DO-4 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction .....−65°C. to +175°C. Impedance (°C/W), Junction to Case 3.0 Maximum	Base .... Steel stud and base with a #10-32 UNF-2A thread for through mounting on a heat sink. Nickel plating produces low contact resistance and prevents corrosion. Header ..... Glass to metal construction. Hermetically sealed to base. Weight ..... Approximately 0.16 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 30 inch pounds maximum Dimensions .. In accordance with JEDEC DO-4 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction .....−65°C. to +175°C. Impedance (°C/W), Junction to Case 3.0 Maximum	Base .... Steel stud and base with a ¼"-28 UNF-2A thread for through mounting on a heat sink. Nickel plating of base produces low contact resistance and prevents corrosion. Header ..... Glass to metal construction. Hermetically sealed to base. Weight ..... Approximately 0.5 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 75 inch pounds maximum Dimensions .. In accordance with JEDEC DO-5 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction .....−65°C. to +175°C. Impedance (°C/W), Junction to Case 3.0 Maximum

264 Lexington
Homer City, Pa. 15748
Cable Address: SYNTRON, HOMER CITY

MECHANICAL CHARACTERISTICS	THERMAL CHARACTERISTICS	DIMENSIONS
Base .... Steel stud and base with a 1/4"-28 UNF-2A thread for through mounting on a heat sink. Nickel plating of base produces low contact resistance and prevents corrosion. Header ..... Glass to metal construction. Hermetically sealed to base. Weight ..... Approximately 0.5 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 75 inch pounds maximum Dimensions .. In accordance with JEDEC DO-5 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction ..... −65°C. to +175°C. Impedance (°C/W), Junction to Case 1.25 Maximum	Base .... Steel stud and base with a 1/4"-28 UNF-2A thread for through mounting on a heat sink. Nickel plating of base produces low contact resistance and prevents corrosion. Header ..... Glass to metal construction. Hermetically sealed to base. Weight ..... Approximately 0.5 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 75 inch pounds maximum Dimensions .. In accordance with JEDEC DO-5 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction ..... −65°C. to +175°C. Impedance (°C/W), Junction to Case 1.25 Maximum	Base .... Hi Strength Copper Stud and Base with a 3/8-24-UNF-2A thread for through mounting on a heat sink. Nickel plating produces low contact resistance and prevents corrosion. Header ..... Glass to metal construction. Hermetically sealed to base. Weight ..... Approximately 2.75 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 200 inch pounds maximum Dimensions .. In accordance with JEDEC DO-8 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction ..... −65°C. to +175°C. Impedance (°C/W), Junction to Case 0.5 Maximum	Base .... Hi Strength Copper Stud and Base with a 3/8-24-UNF-2A thread for through mounting on a heat sink. Nickel plating produces low contact resistance and prevents corrosion. Header ..... Glass to metal construction. Hermetically sealed to base. Weight ..... Approximately 2.75 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 200 inch pounds maximum Dimensions .. In accordance with JEDEC DO-8 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction ..... −65°C. to +175°C. Impedance (°C/W), Junction to Case 0.5 Maximum	Base .... Solid Copper Nickel Plated with 3/4"-16 UNF-2A thread for through mounting on a heat sink. Nickel plating produces low contact resistance and prevents corrosion. Header..... Ceramic header hermetically sealed to base. Weight ..... Approximately 8.5 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 600 inch pounds maximum 300 inch pounds minimum Dimensions .. In accordance with JEDEC DO-9 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction ..... −65°C. to +175°C. Impedance (°C/W), Junction to Case 0.3 Maximum	Base .... Solid Copper Nickel Plated with 3/4"-16 UNF-2A thread for through mounting on a heat sink. Nickel plating produces low contact resistance and prevents corrosion. Header..... Ceramic header hermetically sealed to base. Weight ..... Approximately 8.5 ounces Mounting Position .. May be mounted in any position Mounting Torque ..... 600 inch pounds maximum 300 inch pounds minimum Dimensions .. In accordance with JEDEC DO-9 Outline	Storage Temperature Range: −65°C. to +200°C. Operating Temperature Range: Junction ..... −65°C. to +175°C. Impedance (°C/W), Junction to Case 0.25 Maximum

Index to Texas Instruments Integrated Circuits and Preferred Semiconductors and Components

The following 17 pages list Texas Instruments integrated circuits and the **preferred** line of semiconductors and components. While important parameters and characteristics are briefly presented for most of these devices, you may obtain complete specification on these units by writing to Technical Information Services, Texas Instruments Incorporated, Mail Station 308, P.O. Box 5012, Dallas, Texas 75222.

About Preferred Semiconductors and Components . . .

PREFERRED SEMICONDUCTORS AND COMPONENTS is a bold, new concept designed to simplify discrete semiconductor selection. Nearly 70,000 discrete components are available today, making your choice difficult and risky. After months of computerized demand analysis, TI has pre-selected a line of 285 highly popular types (from our 1,500 "standards" and 13,000 "specials") that meet the vast majority of semiconductor requirements.

- All are in wide use today, known and proven.
- All are readily available from TI distributor and factory stocks.
- All are in volume production.
- All are recommended for either present or new designs.

PREFERRED semiconductors can pay off in simplified selection, faster delivery, lower costs, smaller inventories, and reduced testing.

integrated circuits

SERIES 54 AND 74 TTL DIGITAL

			High-Speed Circuits		Standard Circuits		Low-Power Circuits	
Typical Characteristics	Propagation Delay	Basic Gate	6 ns		10 ns		33 ns	
		Flip-Flop	17 ns		25 ns		47 ns

OTHER INTEGRATED CIRCUITS

The following families of digital circuits are available, dependent on customer requirements. For information contact your TI sales engineer.

- **Series 51 and 51R† RCTL Digital**
- **Series 53 and 73 Modified-DTL Digital**
- **Series 17900L and 17800L RTL Digital**

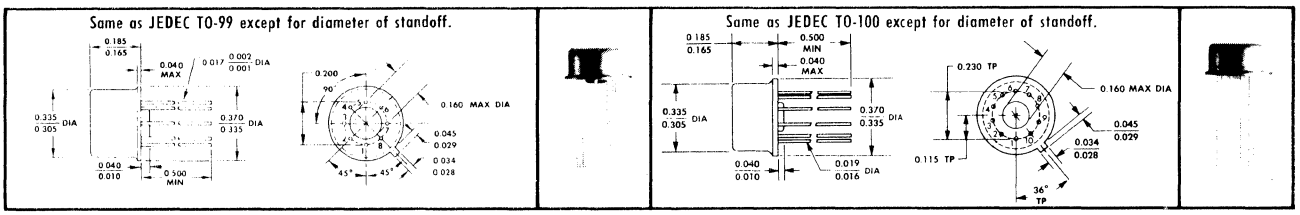
†Series 51R are standard units that have undergone special testing and processing for severe-environmental applications.

integrated circuits

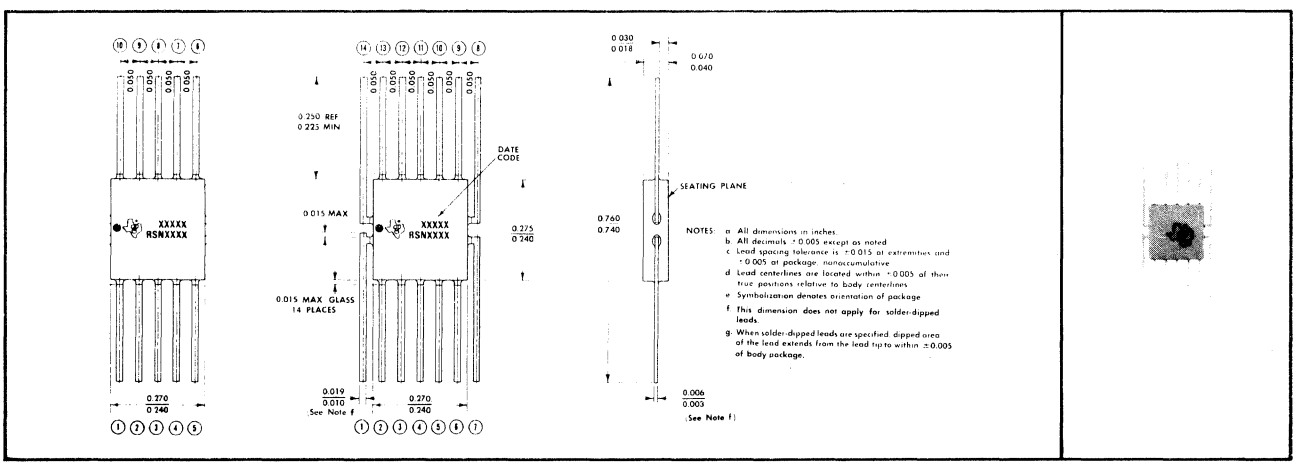
PACKAGING

The last suffix letter of the device number (e.g., SN74H10**N**) indicates the package designation. Variations in mechanical configuration of **F**, **R**, and **S** packages must be indicated when ordering by using the suffix numbers shown in the table at the right (e.g., SN521AF-**12**).

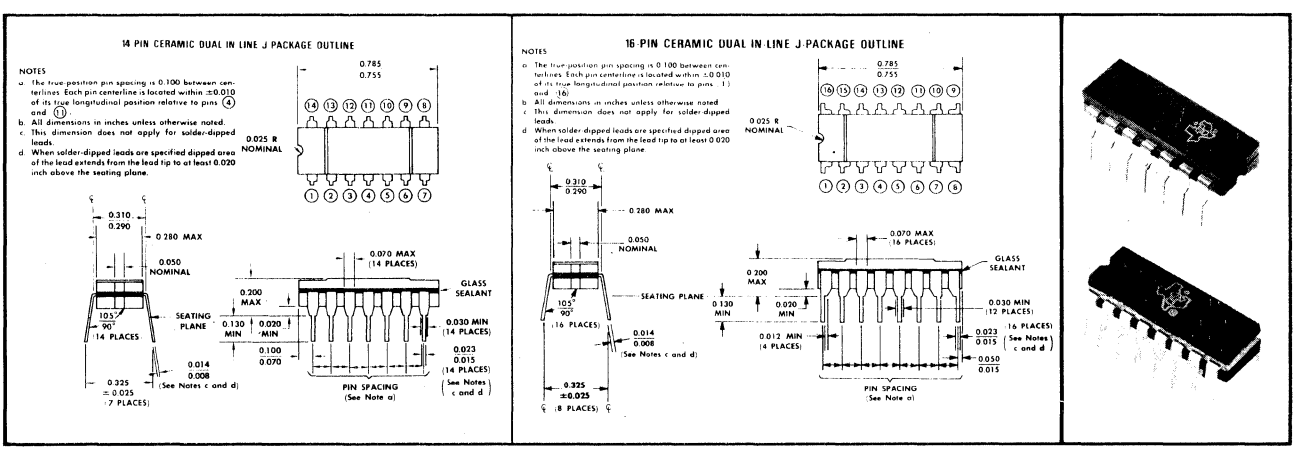
	MECH-PACKETTE CARRIER				MECH-PAK CARRIER			
Formed Leads	No	No	Yes	Yes	No	No	Yes	Yes
Insulators	No	Yes	No	Yes	No	Yes	No	Yes
Gold-plated Leads	–00	–06	–07	–01	–02	–03	–04	–05
Solder-dipped Leads	–10	–16	–17	–11	–12	–13	–14	–15



L — TO-99 AND TO-100 TYPES — Gold-plated F-15‡ Leads†



H — CERAMIC FLAT PACKAGES — Gold-plated F-15‡ Glass-sealing Alloy — 10 or 14 LONG Leads



J — CERAMIC DUAL-IN-LINE — Tin-plated Leads†

‡F-15 is the ASTM designation for an iron-nickel-cobalt alloy containing nominally 53% iron, 29% nickel, and 17% cobalt.
†For leads as described add suffix –00. For solder-dipped leads add suffix –10.

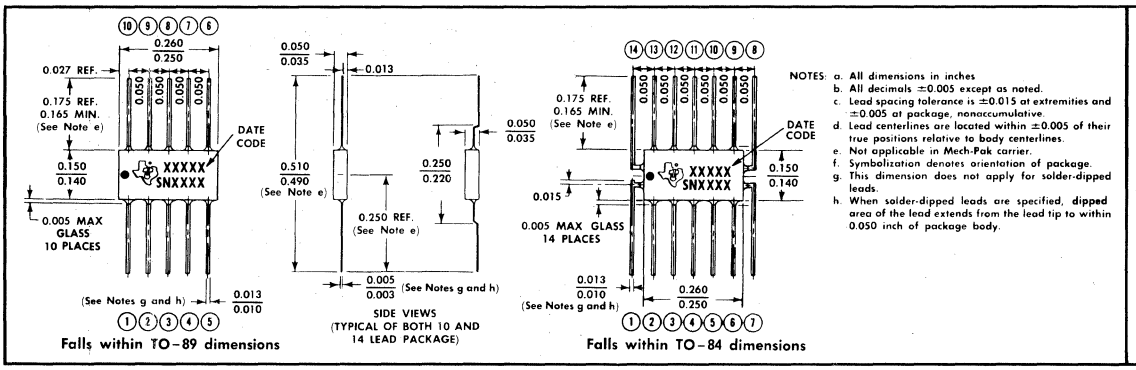
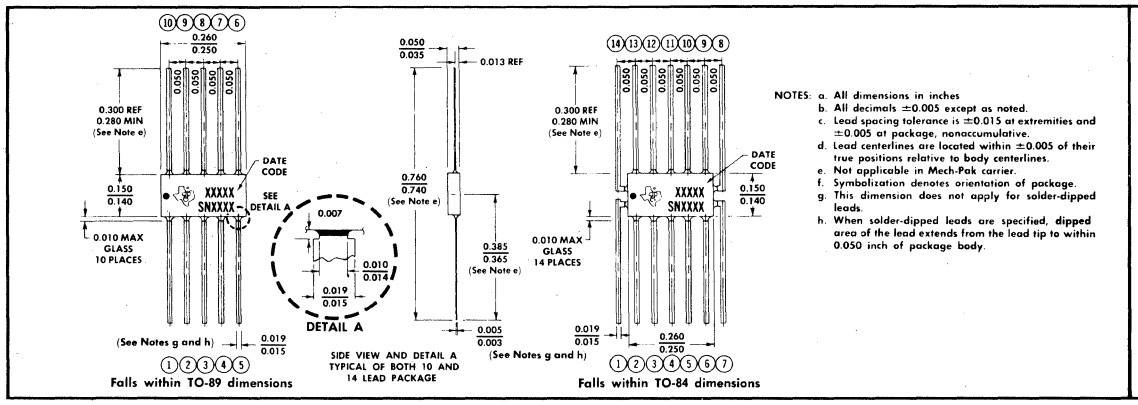
integrated circuits

PACKAGING Cont.



NOTES: a. All dimensions in inches
b. All decimals ±0.005 except as noted.
c. Lead spacing tolerance is ±0.015 at extremities and ±0.005 at package, nonaccumulative.
d. Lead centerlines are located within ±0.005 of their true positions relative to body centerlines.
e. Not applicable in Mech-Pak carrier.
f. Symbolization denotes orientation of package.
g. This dimension does not apply for solder-dipped leads.
h. When solder-dipped leads are specified, dipped area of the lead extends from the lead tip to within 0.050 inch of package body.

F AND S* PACKAGES *Circuit substrate is in electrical contact with the case.

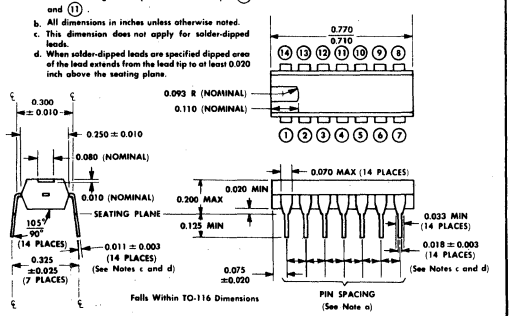


NOTES: a. All dimensions in inches
b. All decimals ±0.005 except as noted.
c. Lead spacing tolerance is ±0.015 at extremities and ±0.005 at package, nonaccumulative.
d. Lead centerlines are located within ±0.005 of their true positions relative to body centerlines.
e. Not applicable in Mech-Pak carrier.
f. Symbolization denotes orientation of package.
g. This dimension does not apply for solder-dipped leads.
h. When solder-dipped leads are specified, dipped area of the lead extends from the lead tip to within 0.050 inch of package body.

R — FLAT PACKAGES— Gold-plated F-15‡ Glass-sealing Alloy — 10 or 14 LONG Leads (for suffix, see table, page 2607)

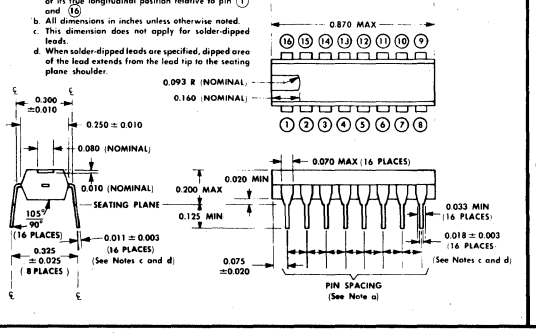
NOTES: a. The true-position pin spacing is 0.100 between centerlines. Each pin centerline is located within ±0.010 of its true longitudinal position relative to pin (4) and (11).
b. All dimensions in inches unless otherwise noted.
c. This dimension does not apply for solder-dipped leads.
d. When solder-dipped leads are specified dipped area of the lead extends from the lead tip to at least 0.020 inch above the seating plane.

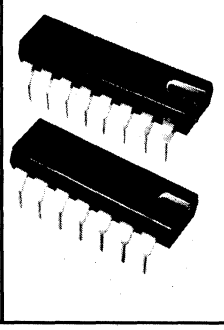
14-PIN PLASTIC DUAL-IN-LINE N-PACKAGE OUTLINE



NOTES: a. The true-position pin spacing is 0.100 between centerlines. Each pin centerline is located within ±0.010 of its true longitudinal position relative to pin (1) and (16).
b. All dimensions in inches unless otherwise noted.
c. This dimension does not apply for solder-dipped leads.
d. When solder-dipped leads are specified, dipped area of the lead extends from the lead tip to the seating plane shoulder.

16-PIN PLASTIC DUAL-IN-LINE N-PACKAGE OUTLINE





N — MOLDED PLASTIC PLUG-IN — Silver-plated Leads†

‡F-15 is the ASTM designation for an iron-nickel-cobalt alloy containing nominally 53% iron, 29% nickel, and 17% cobalt.

†For leads as described add suffix —00. For solder-dipped leads add suffix —10.

MILITARY TYPES

NOTES:

1. No suffix equals 10% tolerance, suffix "A" equals 5% tolerance (TMD01—TMD23, 1N4370—1N4372, 1N746—1N759, 1N3824—IN3828 and IN3994—1N3998)
2. No suffix equals 20% tolerance, suffix "A" equals 10% tolerance, suffix "B" equals 5% tolerance (1N962—1N984, EVR3—EVR150, 3VR3—3VR150, 1N3016—1N3051, 1N2970 & R—1N3015 & R, 1N2804 & R—1N2846 & R, 1N3305 & R—1N3350 & R)
3. Suffix "R" equals reverse polarity

TEMPERATURE COMPENSATED REFERENCE DIODES AVAILABLE AT 6.2V, 8.4V, 9.0V, 11.7V 12.6V & 19.0V
ALSO AVAILABLE CERTIFIED VOLTAGE REFERENCES AND SILICON MULTI-CHIP STABISTORS

MILITARY TYPES**

Transitron also manufacturers a complete line of Silicon Rectifier Stack Assemblies ranging from 0.200 amperes (for half-wave and doubler circuits) to 100 amperes (for three phase bridges). Write for Bulletins TE-1342 and TE-1343.

*Temperatures At Which Forward Current Rating Applies:
"A" Indicates Ambient Tempeature Rating Of A Lead Mounted Rectifier
"C" Indicates Maximum Allowable Case Or Stud Temperature At The Rated Current For Stud Mounted Units.

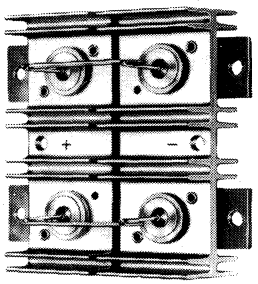
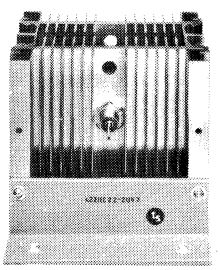
1N2154 thru 1N2160	H	50V to 600V	25 Amp at 150°C (Case)

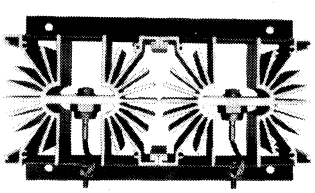
TUNG-SOL SILICON RECTIFIER STACKS AND ASSEMBLIES



LOW CURRENT STACKS—Simplicity, economy and efficiency are derived from the use of pressure-fit diodes. Units of both polarities are pressed directly into the heat sinks. Washers, spacers and other hardware common to stud-mounted units are eliminated. Supplied in compact modular assemblies for such standard rectifier circuits as: Single phase center tap; single phase bridge and three phase bridge. New designs utilizing "high current" pressfit rectifiers available.



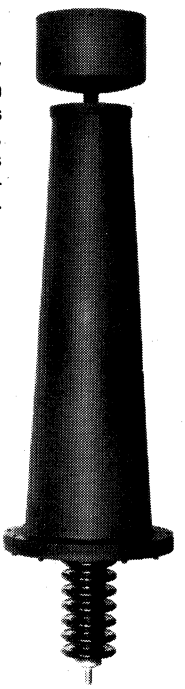
MEDIUM CURRENT STACKS—A newly designed extruded aluminum heat radiator is combined with silicon rectifiers of low thermal impedance to achieve new efficiencies in size, weight and power output. Flexibility of installation is enhanced by incorporating bolt grooves and interlock channels in the radiators. Assembly operation is simplified and the stack may be mounted in any desired plane. Made in such assemblies as: Single phase center tap; single phase bridge; three phase bridge and six phase star.

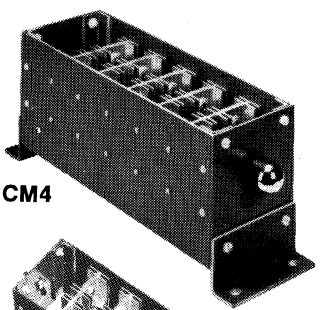


HIGH CURRENT STACKS—Improvements in size, weight and power output factors are achieved through the use of low impedance silicon rectifiers with a special extruded aluminum heat radiator having serrated fins. These have the same assembly and mounting features as the medium power stacks. Likewise made as single phase center tap; single phase bridge; three phase bridge and six phase star assemblies, as well as in non-standard configurations.

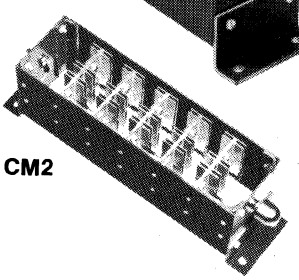
HIGH VOLTAGE ASSEMBLIES

VSC90—A 90 kv assembly designed for use in all high voltage diode applications including clipper, charging, inverse, or rectifier. Utilizes controlled avalanche diodes. Oil-sealed construction is of advanced design that provides both increased reliability and operational economy.



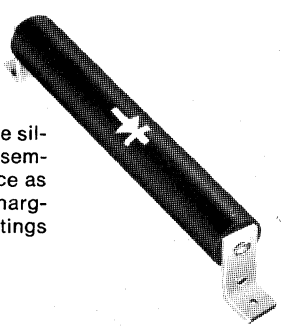


CM4



CM2

CM2, CM4 and CM5—Open lattice type assembly permits optimum cooling. Current ratings to 30 amperes half wave. For rectifier, clipper and charging diode applications at 5 kv and higher.



TM2—Controlled avalanche silicon diodes in low cost assemblies for high voltage service as rectifiers, clipping and charging. For use at current ratings to 5.5 amperes half wave.

TUNG-SOL SILICON POWER RECTIFIERS

Tung-Sol silicon power rectifiers offer distinct advantages over similar competitive types. Exclusive design features combine with Tung-Sol's historically rigid quality control to assure designers unmatched operational reliability. Wide interchangeability permits specification of these outstanding components for most commercial and military applications.

■ All the types shown are available in reverse polarity which may be ordered by the addition of the suffix 'R' to the indicated type number.

SEMICONDUCTOR MOUNTING PADS

Low cost Thermalloy color-coded mounting pads provide an economical way to protect transistors and integrated circuits from shock and vibration. Achieve uniform spacing above printed circuit boards. Available in Nylon per Mil-20693, Diallyl Phthalate per Mil-M-14F, Type SDG. N denotes Nylon; DAP denotes Diallyl Phthalate.

CUSTOM HEAT SINKS® Let Thermalloy's wide experience help you in your custom heat sink requirements. Thermalloy will evaluate your thermal and mechanical requirements and custom engineer a product to meet your special needs. Our model shop specializes in meeting your prototype needs fast. Thermalloy's specialized production equipment designed for these products — results in high quality at a price normally below the cost of in-house fabrications. Contact Thermalloy for a no-obligation estimate.

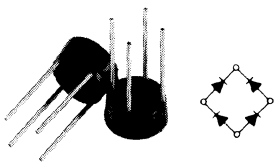
Very, very Varo.

(Very good. Very inexpensive.)

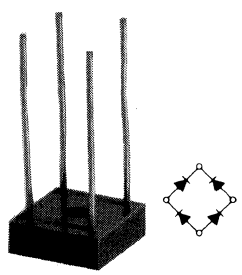
Each of these Varo epoxy bridge rectifiers has full-wave bridge, controlled avalanche, and 200V, 400V, and 600V ratings.



1 amp EBR. For printed circuit board mounting.

ONLY 91¢

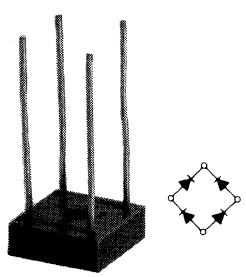
in 200V rating and quantity of 1,000.



2 amp EBR. For circuit board mounting.

ONLY 95¢

in 200V rating and quantity of 1,000.

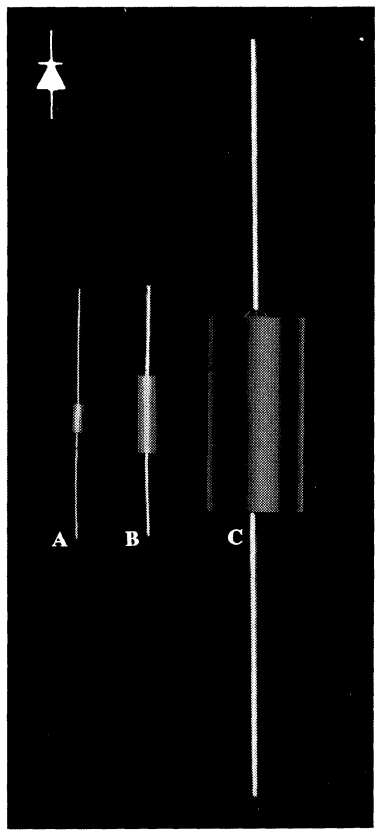


6 amp EBR. For chassis mounting.

ONLY $1.59

in 200V rating and quantity of 1,000.

High Voltage Rectifiers



Diffused High Voltage silicon rectifiers available with 300 nanosecond recovery time (optional) and in custom designed assemblies. Epoxy encapsulation.

A
.060 diameter.
.150 long.
1,000 to 3,500 volts PIV.
25 to 50 ma average rectified current.

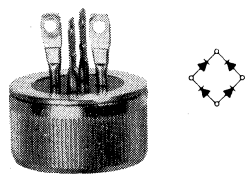
B
.100 diameter.
.400 long.
1,000 to 6,000 volts PIV.
50 to 100 ma average rectified current.

C
.500 diameter.
1 to 7 inches long.
3,000 to 70,000 volts.
15 to 75 ma average rectified current.

For use in diode-capacitor voltage multipliers, cathode ray tube power supplies, RF power supplies (up to 200 KC), precipitator power supplies, and photo multipliers. Also available in diode-capacitor multiplier assemblies.

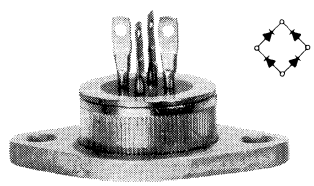
3 integrated bridge rectifiers with 3 mounting options

Each of these Varo Integrated Bridge Rectifiers is a controlled avalanche, full-wave bridge, and is electrically insulated for direct chassis mounting. Each offers three mounting options: Press mount. Single stud. TO-3 mounting adapter.



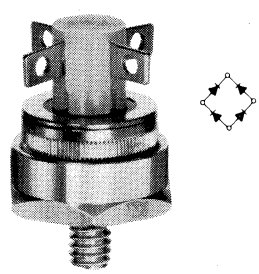
10 amp fast recovery IBR. Recovery time: 200 nanoseconds. 100V, 200V, and 400V ratings.

only $4.75 *



10 amp IBR. 200V, 400V, and 600V ratings.

only $2.35 *



25 amp IBR. 200V, 400V, and 600V ratings.

only $3.05 *

* In 200V rating and quantity of 1,000 (press mount).

For fast service contact Varo semiconductor sales manager.

HYBRID SEMICONDUCTORS

To meet the growing requirements of hybrid circuit manufacturers, Electronic Components has geared its advanced epitaxial and diffusion capability to the production of premium high power — high frequency dice for communication applications.

This catalog provides detailed specifications for the procurement of family types of PNP and NPN transistor devices for use as switches, both high and low power amplifiers, and in oscillator applications. All devices supplied are 100% tested to the DC parameters listed in this catalog. Sample dice are taken from each lot and assembled for 100% compliance to listed electrical specifications.

INTEGRATED CIRCUIT CAPABILITY

TTL — high speed, compatible. Available in TO-116 dual-in-line and TO-85 flat packs.

POWER SWITCHES — 2.5 and 5 Amp (TO-60 Stud).

CONTROL LOGIC — high voltage, high noise immunity, high output for direct display and indicator drive.

CUSTOM HYBRID CIRCUITS

A wide variety of linear and digital circuits can be provided in: **THIN FILM • THICK FILM • HERMETIC FLATPACK • STACKED TO-5 AND TO-8 • MULTIPLAYER (MSI).**

†Reverse recovery time is measured in a circuit switching from 10mA forward current to 10mA reverse current recovering to 5mA.

*These ratings are based on using "extender plates" that provide additional surface area to radiate heat.

††Ratings are based on a case temperature of 100°C.

**Forward Surge Ratings: Single cycle peak surge rating for an 8.3msec sinusoidal surge is shown.

Lead Information

Standard diodes are supplied with "Fine" grade solid silver leads for maximum solderability. For welding or other applications, consult your Unitrode representative for optimum lead material. Tinned copper, nickel clad silver (gold plated), and nickel (gold plated) are denoted by the following suffix letters:

Body	Lead Material	Lead Length	Lead Diameter	Suffix Letter
A	Silver (Standard)	0.7"	0.028"	None
	Copper-tinned	1.0"	0.028"	S
	Nickel-clad silver, gold plated	0.7"	0.028"	T
	Nickel-clad silver	0.7"	0.028"	U
	Nickel, gold plated	1.0"	0.020"	V
B	Silver (Standard)	1.0"	0.040"	None
	Copper, tinned	1.0"	0.040"	Q

Semiconductor Products Rectifiers

Rectifiers

Westinghouse offers a full range of rectifier devices with current ratings from 1 through 500 amperes. JEDEC ratings have been further extended throughout the line. Epoxy is being used extensively to reduce costs to users.

Westinghouse medium and high power rectifiers feature high ambient temperature capability, long life, high efficiency, ruggedness, and freedom from thermal fatigue.

To obtain all the advantages of technical excellence, competitive prices, and guaranteed reliability, specify the Lifetime Guaranteed rectifier marked with this symbol ✚.

Rectifiers are grouped by half-wave average current ratings. Ratings shown apply at case temperatures indicated. All surge ratings are peak one-half cycle currents at 60 Hz. Surge ratings apply at maximum load. Voltage ratings shown are maximum repetitive peak reverse values. Most units have somewhat higher transient ratings. Reverse polarity. JEDEC types are designated "R". On non-JEDEC types, the second letter indicates reverse polarity devices are available.

Westinghouse

Thyristors

Westinghouse thyristors are designed for reliable operation under severe operating conditions. All are 100% power-tested. They employ center-fire gate construction for faster turn-on time and lower switching losses. Most have exclusive Westinghouse compression-bonded encapsulation which eliminates solder fatigue. And, all standard thyristors carry the exclusive Westinghouse lifetime guarantee. In addition, full capacity devices give you increased current ratings, high surge current, high blocking voltage, and high dv/dt capabilities plus guaranteed repetitive di/dt ratings, low gate currents, and low thermal impedance.

The new high temperature series (40-175 amps) offers the above features in a device with a 150°C junction temperature. The fast-switching thyristors (40-300 amps) offer the fastest turn-off times available in the industry. These fast turn-off times in conjunction with our low dynamic forward voltage drop (dynamic turn-on) make these the best inverter devices on the market.

SCR types are listed by half sine-wave average current rating at 180 degree conduction angle. Surge ratings are peak one-half cycle currents at 60 Hz. Voltage ratings are maximum steady state blocking voltages. Transient voltage ratings and other design parameters are shown on the technical data sheets referenced at the bottom of the tables.

Semiconductor Products
Power Transistors

Power Transistors

Westinghouse silicon transistors are designed for high power applications in industrial and high reliability military and space systems, industrial computers and communications equipment. They offer the outstanding advantages of freedom from thermal fatigue and second breakdown. Devices are 100% power tested. All production lots are tested in accordance with specification MIL-S-19500. Such careful testing is another reason why all JEDEC registered devices bear this Westinghouse Lifetime Guarantee symbol ✚.

Transistors are grouped by maximum collector current ratings from 2A to 250A. V_{CEO} ranges from 30 to 300 volts. Gain and saturation resistance limits apply at the collector currents listed in the next line. With the addition of our epitaxial transistor we have gain bandwidth product, (f_T), in a range of .5MHz to 70MHz.

The Westinghouse line of low cost transistors is designed expressly to meet the needs of original equipment manufacturers of commercial electronic apparatus. Their low saturation resistance, high collector voltage, and high temperature characteristics make them ideally suited for use in regulators, power supplies, inverters, ignition systems, and amplifiers.

Semiconductor Products Assemblies

Molded Assemblies

Let Westinghouse help you reduce manufacturing and stocking costs with a durable and dependable encapsulated assembly. Buying a complete assembly versus discrete components offers these benefits:

1. Elimination of design, test and manufacturing time by using a complete one-package assembly;
2. A power tested assembly manufactured with proven components in an inexpensive package;
3. Reduction of heat sinks and interconnections to a reliable minimum;
4. "Off the Shelf" delivery.

All ratings at $T_{sink}=55°C$.

For additional curves, ratings and application information, see SA-10015.

Westinghouse

High Voltage Assemblies

With voltage ratings to 208 Kv and three phase current ratings to 312 amperes, Westinghouse Silicon Rectifier Stacks have proven their outstanding reliability. Each cell is shunted with a capacitor and resistor which provide the optimum in steady state and transient voltage division. Stacks can be designed for cooling by oil, convection or forced air, and vapor atmospheres. Where required, assemblies can be supplied with mil-type capacitors and resistors which, combined with the high temperature characteristics of the hermetically sealed silicon rectifier cells, allows operation in ambients up to 110°C. Use of these stacks in place of vacuum tubes will increase equipment efficiency by as much as 25%.

Ratings are based on forced air cooling of 1000 lfpm at 25°C ambient. Oil cooling will increase ratings. Assemblies are designed to meet most standard military environmental conditions.

For very high voltage applications, corona shielding is available. Where voltage will allow, entire rectifier assemblies can be packed in one channel.

Maximum Voltage and Current for High-Voltage Assemblies – Stacks can be Combined in Series or Parallel

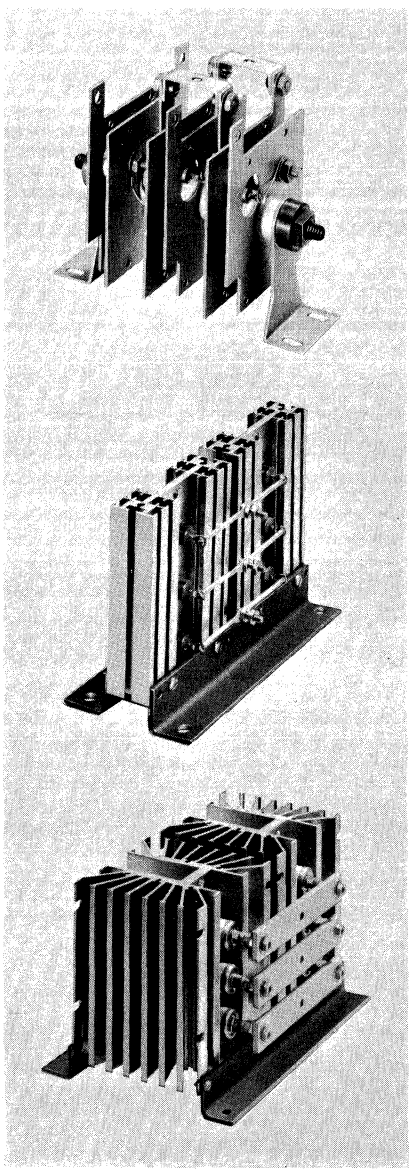
Typical High-Voltage Rectifier Assembly

Assemblies

Westinghouse rectifier and thyristor assemblies are available in all popular circuit configurations and in a wide range of ratings. Aluminum extrusions or nickel-plated copper plates are used to insure long operating life and extended reliability.

Gold-Line Rectifier Assemblies



The following tabulation covers all standard current ranges and the most popular peak inverse voltage ratings of Westinghouse assemblies in single phase full wave and three phase full wave configurations.

For your convenience, the listings are grouped by circuit configurations and listed in ascending order of output current and PRV. For additional curves, ratings and application information, see Catalog 54-300.

Dimensions in Inches

(See table on page 15)

	Length	Height	Width

① Maximum allowable peak one cycle surge current at maximum rated conditions (60 Hz base).
② Maximum rating of assemblies @ 40°C ambient temperature with natural convection cooling.
③ Maximum rating of assemblies @ 40°C ambient temperature with 1,000 linear feet per minute forced air cooling.
④ See table on page 14 for actual dimensions.

(All units operate from 28V DC line. Signal voltage 26V RMS max. All units have initial gain set ±1dB and ±2dB gain stability. Frequency 400 ±20 Hz except as noted.)

NOTES:

1. Unit is 90% efficient. Less than 1 ohm output impedance. Will drive motors without tuning capacitor.
2. These units available in many varied packages, consult factory for unit to meet your exact form factor.
3. These are low cost, 400 Hertz, card amplifiers and are available in varied gains from 100 to 5000.
4. These are low cost, 60 Hertz, card amplifiers and are available in varied gains from 100 to 2500.

Manufacturer of the widest range of Frequency Control Components: Crystals ● Crystal Oscillators ● Crystal Filters ● LC Filters ● Tuning Forks ● Fork Oscillators ● Ovens ● Coils ● Servo Amplifiers

Package Size:	—	—	4.5 x 4.5 x 1.0 Card Plug In

*Has common mode rejection of 60 db or greater at 800 and 60 Hz.

AC Summing (Operational) Amplifiers

Gains up to 10. Summing inputs matched to .02%. Up to 4 inputs. Single or dual channel units available.

Quadrature Rejection Amplifiers

Available with gains of up to 10 and rejection ratios of up to 150:1. Units may be supplied with up to 3 summing inputs. Units operate from 28 or 40V DC.

DC Torquer Amplifiers

Up to 8 amp. power output units available with or without built-in gain adjust. High efficiency, small size, low drift. Units operate from 28V DC.

Error Signal Detectors

These solid state circuits are designed to drive external or built-in relays. Time delays built in to avoid tripping due to pickup signals, low hysteresis. Wide magnitude of voltage ranges available.

Gain Control Amplifiers

Automatic gain control for 400 Hz servo systems; with transfer function of 26 divided by the control voltage. Other transfer functions available on request.

Gyro Wheel Supplies

Gyro Wheel Supplies can be provided to drive gyro-motors ranging in frequency from 400 to 3200 Hz. Units are specifically designed to drive 2 phase gyro motors and their respective pick-off windings.

Phase shift between outputs are held to 90° ±1 degree. Oscillator stability is better than 10^5 per degree C.

Manufacturer of the widest range of Frequency Control Components: Crystals ● Crystal Oscillators ● Crystal Filters ● LC Filters ● Tuning Forks ● Fork Oscillators ● Ovens ● Coils ● Servo Amplifiers

STEPCON® STEPPING MOTORS†

Stepcon® Permanent Magnet Motor—Stepping motors feature: Speeds to 1500 pps, controlled variable speed, immediate reversal, no mechanical detents or brushes, no drift, minimum overshoot, no compensation networks or feedback required, no external damping required. Motors are digital actuators which operate bidirectionally in precise increments of 15°, 30°, 45°, or 90° per pulse. Variation in precise control increments can be achieved by use of available gear heads. Provides accurate shaft rotation without feedback or position pickoff to actuate counters, x-y plotters, potentiometers, transducers, switching mechanisms, and digital to analog and analog to digital converters. Shock-free magnetic detenting between pulses permits smooth no drift operation. Available from stock in frame sizes 8, 11, 13, 15, 17, 20, 23 with a wide variety of torque, inertia, pinion, size, and impedance specifications with 2ø or 3ø stators and permanent magnet rotors. Designed to meet applicable paragraphs of MIL-E-5272, MIL-M-7969, and MIL-E-5400. Bearings are double shielded and life lubricated; cases are stainless steel or aluminum construction; class H insulation standard; all units rated at 28 V DC. Custom units available to specification.

*Measured with motor windings at 25°C, and with specified ADC controller at 28 VDC.

NOTES: 1. These data are for reference purposes only.

2. The recommended motor case operating temperature range is −55°C to +185°C. The +185° maximum may be exceeded but bearing life will be shortened.

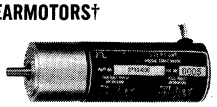
3. With typical mounting, a temperature rise of approx. 65°C above 25°C ambient can be expected. Heat radiators are available to reduce temperature rise.

4. For winding temperatures greater than 25°C, derate torque at 0.4%/degree C and stepping speed at 0.2%/degree C.

5. Inertia load decreases stepping rate. For inertia loads less than 50% of rotor inertia, derate no-load speed by the factor $\sqrt{\frac{\text{Rotor Inertia}}{\text{Rotor} + \text{Load Inertia}}}$

6. Gearheads are available for above motors.

STEPCON® GEARMOTORS†



Gear Motors—The STEPCON® Size 13 and 17 Gearmotors have been designed to provide an economical stepping motor/gearhead package which makes no compromise as regards performance or long life. Over 500 different ratios are available from stock in the range from 3/1 to over 800,000/1. Standard backlash is less than ±45 min. with a 2 in. oz. reversing load. Maximum static load is 150 in. oz., and maximum running load is 75 in. oz. The size 13 STEPCON® Gearhead can be adapted to either size 11 or size 15 motors on special order.

1. Nominal value based on 1 msec rise time.
2. Step angle selection determined by logic level input to controller during operation.

Stepcon® Controller—Required for use with stepping motors to obtain specified performance. Contains reliable solid-state transistor circuitry to accept pulse inputs from computer, tape, pulse-generating module, or other programmers. Determines sequential order of motor coil currents in response to input pulses, and provides magnetic detenting between pulses. Packaged in MIL-T-27A cans or plug-in printed circuit cards designed to meet applicable MIL-E-5272, MIL-E-4158, and MIL-E-5400 requirements. Power Requirements: All units rated at 28 ±5 VDC. Input Pulse Requirements: Amplitude: Positive going transition equal to at least 60% and no more than 100% of the controller supply voltage with a rise time of 1 μsec. or less. Pulse Width: Greater than 15 μsec. Controllers of the two half phase type provide simplified switching circuits and minimum cost. Full phase type controllers provide more efficient motor operation at slightly higher cost. Pulse adaptor circuits available to accept most any type of pulse or switching function. Controllers available from stock, or to customer specification to meet a wide variety of applications.

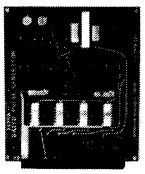
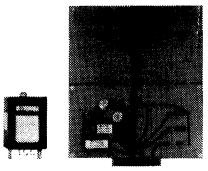
DIGITAL CONTROL EQUIPMENT

ADC offers a complete line of digital equipment building blocks compatable with ADC motors and controllers, allowing customer formulation of control systems to his unique requirements.

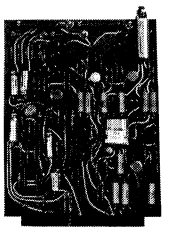
Model 503B Single Pulse Generator — This unit supplies exactly one pulse per push button activation, with characteristics to match the ADC controller requirements: Positive going pulse equal to unit supply voltage +0V, —1.8V with a rise time of 1 μsec max and a compatable pulse width. Rated at 28 VDC input. Mounts in 5/8" dia hole in panels up to 3/16" thick. A companion unit, the 1537A Switch Adapter supplies similar output when activated by an external SPST switch closure. This unit is particularly useful in masking contact-bounce inherent in reed-switches, snap action switches, relays, and other such mechanical switches, thus preventing false counts.



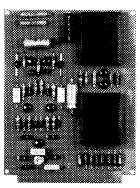
Model 1516A Gated Pulse Generator — This unit converts a single input pulse to a specified number of output pulses delivered at a specified rate. Pulse output characteristics match the ADC controller requirements: Positive going pulse equal to unit supply voltage +0V, —1.8V with a rise time of 1 μsec max and a pulse width of 15 to 75 μsec. Number of pulses out are variable from 0 to 256. Frequency range is variable within each of eleven standard ranges from 0.8 to 1600 Hz. Input pulse requirements: Amplitude positive going transition between 60% and 100% of the unit supply voltage with a rise time of 1 μsec max and a pulse width greater than 15 μsec. Unit rated at 28 ±5 VDC, 150 ma.



Model 576A and 1502A Pulse Generators — These units supply a string of pulses with output characteristics which match the ADC Controller requirements: Positive going pulse equal to unit supply voltage +0V, —1.8V with a rise time of 1 μsec max and a pulse width of 15 to 75 μsec. Frequency range is variable within each of eleven standard ranges from 0.8 to 1600 Hz. Pulse current output, 60 ma. Provision for controlling pulse rate remotely or inhibiting the pulse output are included. Supply voltage, 28± 5VDC. The 576A is card mounted and has a maximum operating temperature rating of 70°C, while the 1502A is mounted in a hermetically sealed can and has a maximum operating temperature of 125°C.

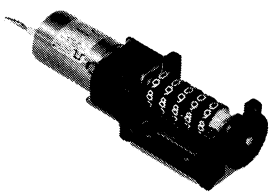


575A Analog to Pulse Rate Converter — Converts bi-polar analog input voltage to bi-directional pulse rate output which is compatible with ADC's Stepcon® Controllers. By adding a potentiometer to the stepper-motor shaft, a position servo can also be accomplished. The 575A can provide both angular position and step rate servo control, thus also accomplishing a DC motor function.

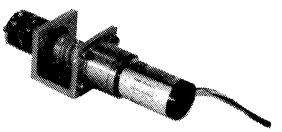


555A Digital Servo Comparator Series — Accepts DC analog voltage corresponding to a desired output shaft position. Using a Stepcon® driven potentiometer to supply feedback voltage, corresponding to the actual shaft position, the 555A provides pulses to a Stepcon® controller to drive the error voltage to a null. These pulses, which are the digital conversion of the analog input, may also be used to drive the Stepcon® counter at a remote location or used for data transmission.

Model 254A Power Saver — This unit automatically reduces power delivered to a stepping motor during non-stepping periods where full magnetic detent is not essential and minimum total power dissipation is required. The Power Saver is used in conjunction with the 048, 049, 062, 071 or 073 Stepcon® Controllers and their power supplies. Input requirements are compatable with ADC pulse generator outputs. Full power is delivered to the motor during the stepping period and reduced to an adjustable level of 3% to 70% during the non-stepping period. Hold-time, the period between removal of the stepping pulse and reduction to the standby power level, is adjustable between 15 and 500 msec. Available in both card and hermetically sealed can models.



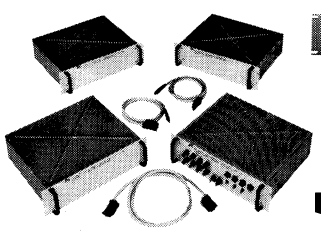
Model 1603A Stepcon® Driven Digital Counter — This unit provides readout on four or five digit wheels bi-directionally (addition or subtraction) at rates of 160 counts/second. Out-performs existing electro-mechanical and relay-operated devices. One pulse into controller advances last digit wheel one digit. Counter has mechanical reset, and each digit wheel can be set by hand to a predetermined number.



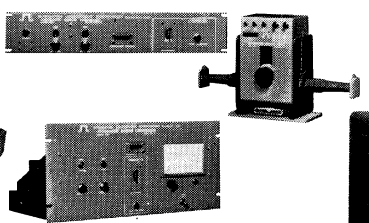
Stepcon® Driven Potentiometer Assembly — Illustrated is the 2711-000-45-1T2K/1T2K consisting of a 2711 Gearmotor with 45:1 reduction, a simple flexible coupling and a dual continuous turn 2K potentiometer. This assembly utilizes a 903A Servo Mount Adapter and provides a simple and inexpensive means for coupling Stepcon® Motors or Gearmotors to other components utilizing servo mounts. Adapters are available to mate size 8, 10, 11, and 13 components including potentiometers, synchros, resolvers, etc. Inexpensive slip-clutch coupling also available. Backlash, torque, speed, gear ratio, etc. are determined by components selected.

CONTROL SYSTEMS CAPABILITIES

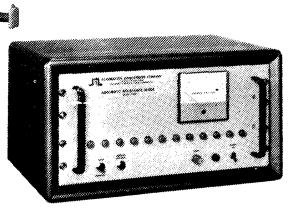
ADC can provide complete on-the-shelf, or custom designed control systems to your requirements.



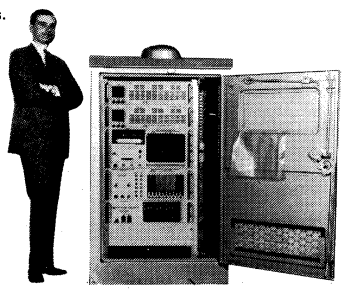
Model 850B Digital To Synchro-Analog Converter System — Converter system accepts 3 sets of 12-bit parallel binary input signals and strobe signals. These parallel binary inputs are converted to syncho positions within an overall RMS error of 0.12°. Conversion is accomplished by means of Stepcon® Controller and Motor drives. The Model 850B Digital to Analog Converter System consists of two Model 110A single output converters, one Model 110B dual output converter and a Model 214A Power Supply/Clock Generator. The 110A Contains a rotary single synchro digital to analog converter, i.e., the encoder is driven through the shortest path to null and may go through zero. The 110B contains a linear 2-speed synchro converter, i.e., the encoder is driven through the shortest path to null and may not go through zero.



833A Attenuator Remote Control System — Control system is designed to provide accurate, stable attenuation settings from 0 to 50 db when operated in conjunction with the Hewlett-Packard Model X382A Variable "X" Band Microwave Attenuator or equivalent. Digital-type control system provides a more accurate and reliable means of remote setting microwave attenuators without problems of stability and gain inherent in conventional servo systems. The Attenuator can be easily and accurately tuned or set at the Attenuator itself, or from the Master Controller, or from any Remote Controller Station. The Attenuator can be set to provide the desired attenuation in repetitive control increments of 0.5° (Average attenuation increment of 0.03 db) over the full range of 0 to 50 db. Power Required: 115V Single Phase, 100 Watt, 60 cps, AC.



Model 334A Automatic Resistance Tester — This equipment is representative of ADC's ability to custom design and produce automated test equipment for industry. It will test flash-cube lamps, twelve at a time, checking within specified limits at low resistance level without firing the lamps. If a lamp is out of limit, an appropriate indication is made and the automated test sequencing is halted until the lamp is rejected or an override is initiated. The entire cycle is completed in less than 2 seconds for all twelve lamps.



Traffic Analysis and Control Systems — Utilizing the latest in solid state circuitry, these systems offer improved factors of size, efficiency, accuracy and dependability to traffic engineering and maintenance personnel. Traffic Analyzers can be provided to offer continuously visible indications of vehicle count into and out of a test lane as well as differential count and vehicle-second occupancy accumulation. Automatic print-out is also available. Control Systems, designed to the specific application, can include electronic dial units, tone actuated encoders, master synchronizers, multiple background program cycles, and complex program timing and switching, all compatable with manual, preset, direct line, radio link and computer actuations.

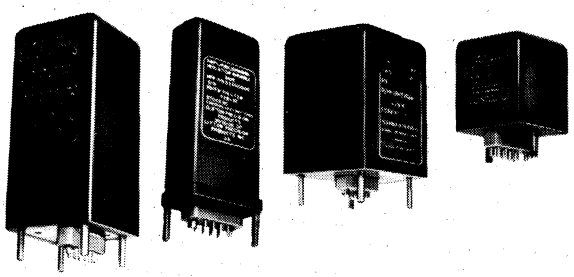
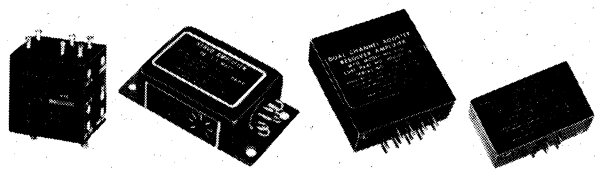
Buy CLIFTON QUALITY

ELECTRONIC MODULES



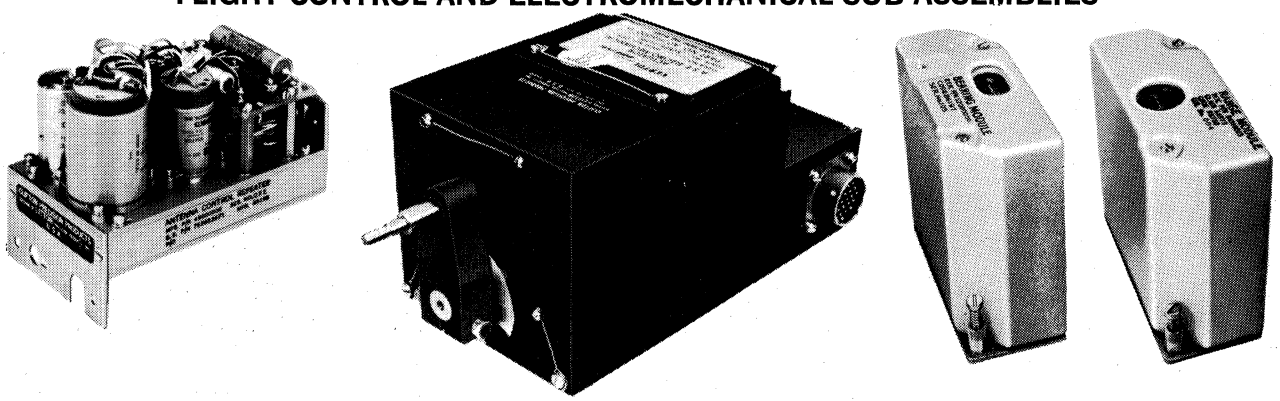
Clifton designs and manufactures power supplies (regulated and unregulated), signal comparators, summing and isolation amplifiers, single and dual channel amplifiers, amplifiers and resolvers chains, and a wide variety of similar items. Call Clifton for quality electronics.

SERVO AMPLIFIERS



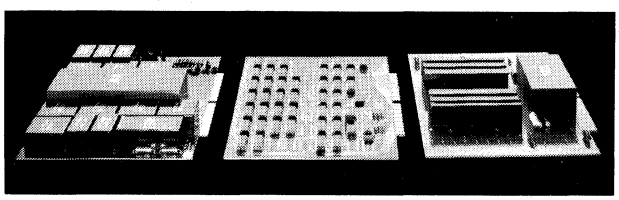
Clifton amplifiers include a wide variety of 0°-180° and 90° units, summing, isolation and booster amplifiers. Many of these have been especially designed to work compatibly with Clifton motors or resolvers. Call Clifton for sophisticated amplifier-resolver chains.

FLIGHT CONTROL AND ELECTROMECHANICAL SUB ASSEMBLIES

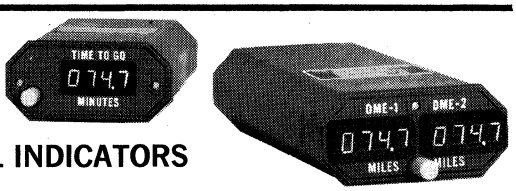


Clifton can custom design and manufacture servo packages to meet your special needs. As examples of our competence, shown above are (from left to right) a servo assembly in the F-111 aircraft, an automatic stabilization actuator used in the Sea Knight CH46A helicopter, and Tacan range and bearing couplers in use on a number of aircraft. Clifton also manufactures D/A and A/D converters, precise angle indicators, lat/long indicators. What's your special need?

S/D, D/S CONVERTERS



Composed of reliable, all solid state circuitry mounted on easily interchangeable printed circuit boards, these low cost converters can be used to interface any type of synchro outputs to digital computers, readouts, displays or printers. Or, conversely, they can convert a digital computer output to 3 or 4 wire synchro signals. Although designed especially for the process control and machine tool fields, this system can easily be modified for military applications.



DIGITAL INDICATORS

Using a serial BCD input signal, these indicators are designed to be used in conjunction with Air Transport Inertial Navigation System (INS) or Distance Measuring Equipment (DME) type equipment. All are fully compatible with the requirements of ARINC Specifications 561-2, 568 and those covering Air Transport Indicators.

In operation, each indicator recognizes the address of a specific function parameter, decodes the serial BCD data, and provides a digital display of the information. Important design advances in the areas of fault monitoring and detect circuitry plus central dimming capabilities are incorporated into the basic indicator design philosophy.

SEE SECTION 3500, page 1727 for a description of our wide line of Synchros, Servo Motors, and Torquers.

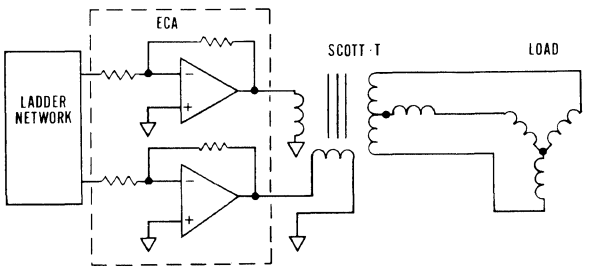
ECA 118 SERIES ELECTRONIC CONTROL AMPLIFIERS

The Model ECA 118-1 Electronic Control Amplifier provides the Systems Engineer with a new design tool. Particularly useful to airborne instrumentation, this unit obviates the classical servo methods of driving multiple synchro loads from a single source.

The Electronic Control Amplifier Series has been designed to withstand the rugged environmental extremes of MIL-E-5400. Common mode configuration, high open loop gain and power limiting circuitry provides extremely high accuracy and complete load-to-load, and load-to-source isolation. Completely solid-state (NO MOVING PARTS), these devices offer the extra dividends of high reliability and low maintenance.

TYPICAL APPLICATION



MODEL ECA 118-1 SPECIFICATIONS

PARAMETER	VALUE
ACCURACY	Three arc minutes
GAIN	Unity
PHASE SHIFT	Negligible
LOAD	Eight synchro servos (as low as 75 ohms)
INPUT IMPEDANCE	100K
OUTPUT IMPEDANCE	Negligible
INPUT VOLTAGE (1)	11.8 VAC line-to-line
INPUT POWER	115 VAC, 400 Hz; 10 VA Max.-MIL-STD-704 B
WEIGHT	1.5 pounds
OPERATING TEMP. RANGE	−55°C to 100°C

NOTES: (1) Also available 90 VAC line-to-line.

14 BIT MINIATURE DIGITAL/SYNCHRO CONVERTERS
EDSC Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY (1)	±4 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
LOGIC	parallel, positive logic, TTL levels
OUTPUT (2) (3)	3 wire synchro 11.8V rms L-L 400 Hz driving up to 300 ohms L-L balanced
REFERENCE INPUT (2) (3)	26V rms 400 Hz
POWER SUPPLY REQUIREMENTS	+15V at 100mA, −15V at 80mA, +5V at 50 mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies, ±10% amplitude and frequency variation and up to 10% harmonic distortion of the reference and for any balanced load from no load to 300 ohms L-L.
(2) Other input and output voltages and frequencies available.
(3) Transformer isolated.

Price (1-9) from $495

13 BIT MINIATURE SYNCHRO/DIGITAL CONVERTERS
ESDC Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY (1)	±4 minutes ±0.5 LSB
RESOLUTION	13 Bits
CODING	natural binary 'angle'
DIGITAL OUTPUT	parallel, positive logic, TTL levels 13 angle data and 1 inhibit lines
SYNCHRO INPUT (2) (3)	11.8V rms L-L 400 Hz (ESDC-L), 90V rms L-L 400 Hz (ESDC-H)
REFERENCE INPUT (2) (3)	26V rms 400 Hz (ESDC-L), 115V rms 400 Hz (ESDC-H)
SYNCHRO INPUT RATES	0 to 360°/sec for full accuracy
POWER SUPPLY REQUIREMENTS	+15V at 40mA, −15V at 20mA, +5V at 200mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of synchro and reference inputs.
(2) Other input voltages and frequencies available.
(3) Transformer isolated.

Price (1-9) from $645

14 BIT MINIATURE DIGITAL/RESOLVER CONVERTERS
MDRC Series Specifications — Electrical

PARAMETER	VALUE
ACURACY (1)	±4 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
LOGIC	parallel, positive logic, TTL levels
OUTPUTS	10 $\sin\theta \sin\omega t$ and 10 $\cos\theta \sin\omega t$ volts at 5mA. where θ = digital input angle and ω = reference input frequency
REFERENCE INPUT (2)	26V rms 400 Hz transformer isolated
POWER SUPPLY REQUIREMENTS	+15V at 30mA, −15V at 10mA, +5V at 50mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of reference.
(2) Other input voltages and frequencies available.

Price (1-9) from $425

MINIATURE RESOLVER/SYNCHRO CONVERTERS
ERSC Series Specifications — Electrical

PARAMETER	VALUES
ACCURACY (1)	±2 minutes
INPUTS (2)	resolver voltages, ±10V peak at 400 Hz
INPUT IMPEDANCE	10 megohms min.; 50 pF max.
OUTPUT (2)	3-wire synchro voltages, 90V rms L-L no load, 400 Hz transformer isolated
OUTPUT IMPEDANCE	100 ohms L-L max. balanced to 5%
LOAD	any balanced load from no load to 2500 ohms L-L
POWER SUPPLY REQUIREMENTS	±15V at 550mA peak at full load

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of the inputs and for any balanced load from no load to 2500 ohms L-L.
(2) Other input and output voltages and frequencies available.

Price (1-9) from $295

14 BIT MINIATURE SOLID STATE CONTROL TRANSFORMER
SSCT Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY (1)	±4 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
DIGITAL INPUT	parallel, positive logic, TTL levels
SYNCHRO INPUT (2) (3)	11.8V rms L-L 400 Hz (SSCT-L) 90V rms L-L 400 Hz (SSCT-H)
REFERENCE INPUT (2) (3)	26V rms 400 Hz (SSCT-L); 115V rms 400 Hz (SSCT-H)
OUTPUTS	AC (3) and DC (3), output gradient controllable by an external resistor
POWER SUPPLY REQUIREMENTS	+15V at 30mA, −15V at 10mA, +5V at 50mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of synchro and reference inputs.
(2) Other input voltages and frequencies available.
(3) Transformer isolated.

Price (1-9) from $400

ELECTRONIC CONTROL DIFFERENTIAL TRANSMITTER
ECDX Series Specifications — Electrical

PARAMETER	VALUE
ACCURACY (1)	±4.5 minutes
RESOLUTION	14 Bits
CODING	natural binary 'angle'
LOGIC	parallel, positive logic, TTL levels
OUTPUTS	10 $\sin\theta \sin\omega t$ and 10 $\cos\theta \sin\omega t$ volts at 5mA. where θ = digital input angle and ω = reference input frequency
SYNCHRO INPUT (2)	11.8V rms 400 Hz transformer isolated
POWER SUPPLY REQUIREMENTS	+15V at 30mA, −15V at 10mA, +5V at 50mA

(1) Accuracy applies over operating temperature range, ±5% variation of power supplies and ±10% amplitude and frequency variation and up to 10% harmonic distortion of synchro input.
(2) Other input voltages and frequencies available.

Price (1-9) from $635

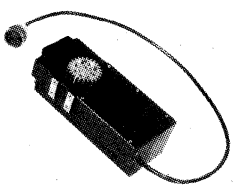
GAP
INSTRUMENT CORP.

COMPLETE SYSTEM CAPABILITY!

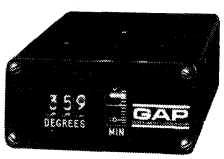
☐ SOLID STATE ☐ ELECTRO-MECHANICAL

SERVO

Pre-engineered Servo-Pax miniaturized modules which provide highly reliable, transistorized, high density servos for military and industrial systems.



ACTUATORS — A servo Rotary Actuator System for aircraft camera positioning that combines high torque and accuracy in its output. High density package with digital circuits capable of providing an increase in discrete output positions.

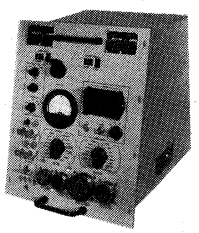


INDICATORS — To serve as inputs or outputs in the determination of distance, bearing or position and extremely useful as test equipment.

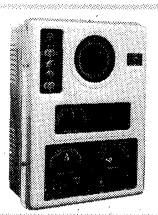
ANALOG

Generation of complete systems to meet all applicable MI6 specifications for • Navigation • ASW • Fire Control • Missile Tracking • Search • Computers • Simulators • Nuclear Controls.

RELATIVE VELOCITY COMPUTER TEST SET – A ground support equipment for testing a variety of inertial alignment computer systems with capability of complete self-test. A hybrid system employing analog and digital electro-mechanical and solid state circuitry.

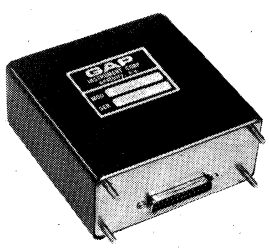


OWN SHIPS MOTION SIMULATOR A shipboard navigation and fire control training equipment using electro-mechanical computing techniques capable of simulating all surface maneuvers of ships of the fleet.



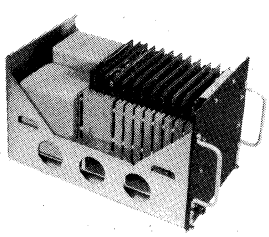
DIGITAL Converters

A to D... D to A To meet your interface requirements, GAP has a complete line of prototype converters which can be custom-designed for your individual application. Available as both solid state and electro-mechanical units, they feature multi-speed, multi-channel operation in a variety of visual displays. Two of the units are the Model S3262 and Model S3255.



DIGITAL/SYNCHRO CONVERTER SOLID STATE/MODEL S3262
A compact, low-cost unit for operation with digital computers associated with simulators, navigation and control applications. Logic levels and impedances are compatible with all present integrated circuits. Features — 3 wire synchro or 4 wire resolver output • 26V or 115V reference input • 60 or 400 Hz operation • 11.8V or 90V line to line output • Transformer output isolation • Non-standard input logic levels • Storage registers • Hermetic sealing.

8 CHANNEL SYNCHRO/ DIGITAL CONVERTER SOLID STATE/MODEL S3255
Converts synchro data to parallel digital data through the use of the dual phase shift technique, which features simple circuitry with few precision components. Variations in the reference frequency are compensated by means of a synchronized oscillator which tracks the reference frequency over the range of 380 to 420 Hz. Multiplexing of the 8 synchro channels is by means of a digital time gate so that no error is introduced by multiplexing.



GAP
INSTRUMENT CORP.

17 Brooklyn Avenue
Westbury, Long Island, New York
516/ED 3-8020

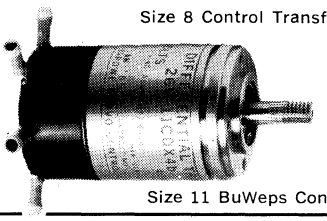
GAP INSTRUMENT CORP. is a designer/producer of precision electro-mechanical components, servo/digital/analog systems and remote-positioning devices for control, computation, display and simulation.

Harowe SYNCHROS, RESOLVERS & SERVO PACKAGES

STANDARD SYNCHROS & RESOLVERS

- All sizes: 5, 8, 10, 11, 15, 18, and 23 . . . 60 and 400 Hz
- All functions: control and torque transmitters and receivers; control transformers; differentials; induction pots; resolvers — including 4-wire and compensated types
- BuWeps and tandem models
- Typical accuracy ± 7 minutes; ± 3 minutes in hi-accuracy units
- Wide range of mechanical options: flanges, terminals, shafts
- **Throughbore** construction generates I.D. of stator, bearing cap, and housing in one pass for perfect alignment.

Size 8 Control Transformer



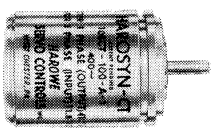
Size 11 BuWeps Control Differential

BRUSHLESS SYNCHROS & RESOLVERS

Brushless designs eliminate the wiping contact that normally couples signals to synchro rotors. Results are increased life, reduced friction error, vibration immunity, and reduced RFI emission. We make two types:

Full-Rotation HAROSYN® types use rotary transformers to couple signals to rotors; allow unlimited angular travel.

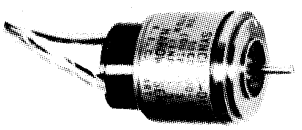
- Sizes 8, 10, and 11 standard; larger as special
- Full range of functions — including 4-wire resolvers
- Typical accuracies ± 7 minutes
- Rated for 175°C. continuous duty



Size 10 Full-Rotation Type

Limited-Rotation types use hairspring conductors to couple signals to rotors; have stops at ± 165° from electrical zero. Lower cost for limited-rotation applications.

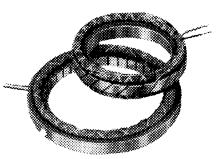
- Sizes 8 and 10 standard
- Full range of functions
- Typical accuracies ± 7 minutes
- Rated for 150°C. continuous duty



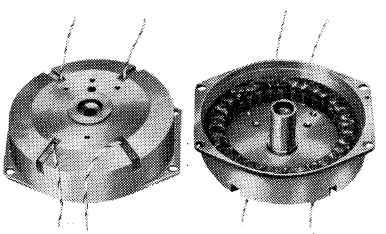
Size 10 Hairspring Type

PANCAKE SYNCHROS & RESOLVERS

- Custom-designed and built to your electrical and mechanical specifications
- Wide selection of stack heights, widths, and diameters
- Housed or unhoused; with or without integral bearings for gimbal support
- Housing materials include stainless steel, aluminum, beryllium, titanium
- Standard lamination dies on-hand for many common sizes



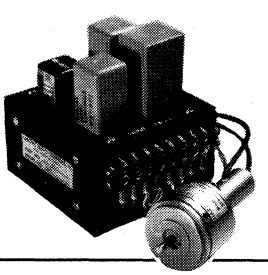
Unhoused for gimbal mounting



Titanium Housing

SERVO PACKAGES

Custom-built packages combine motors, synchros, and other rotating components with gear trains, clutches, and electronic logic to perform specific functions. Integrating, synchronizing, computing, and function generation are typical. We build to your prints or design to your input/output specs. You get uniform high performance because all rotating components — even gear trains — are built in-house.



Typical servo package integrates DC command signal to produce linear output speed. Linearity is ±0.1% over 1000:1 speed range. Used in tracking and fire control.

RATIO DRIVES

for FINE INSTRUMENT AND MACHINE CONTROLS

Ball Bearing Type **Compact, durable, exceptionally smooth action**

These unique ratio drives employ precision ball bearings. Used for rotary control of components in instruments, they provide unexcelled smooth motion. Ruggedly built, permanently sealed and lubricated, JAN Ratio Drives accommodate applications where miniaturization is essential.

Input and output shafts of these units operate in the SAME DIRECTION. Type "RDL" provides "in-line" input-output shafts. Type "RDLC" is supplied with **concentric** shafts whereby the output envelopes the input shaft. An added feature of type RDLCC is the output shaft in the rear.

CAT. No.	RATIO	A	B O.D.	B I.D.	C	D	Input Shaft E	F	Bolt-Mtg. Dia.

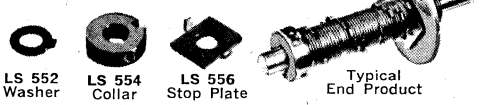
LIMIT STOP COMPONENTS

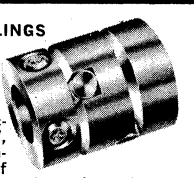
Designers can now consider the limit stop as a component to design with, such as potentiometers, capacitors, or other standard units. The simplicity of adjustment and the large number of available turns enables the stop range to be set with extreme precision. Conveniently located dual locking screws maintain settings under all conditions of shock and vibration.

Available for 1/4" and 3/16" shafts.
Specify — (3) for 3/16"
— (4) for 1/4"



AUTOLINEAR (INSULATED) SHAFT COUPLINGS

2.5 - 5KV BREAKDOWN
Universal, miniature, self-aligning
Cat. No. AP-1530 & AP-1538



A unique series of shaft couplers that accommodate either similar or disimilar 1/8", 3/16" or 1/4" shafts. Permits offset misalignment to 1/16" and 5° angle. Operates free of backlash. Self-extinguishing low water absorption characteristic plastic insulator between precision cast aluminum hubs. Each hub has 2 set screws for firm attachment. Alodine finish.

AP-1538 — 5000 VOLTS

RIGHT ANGLE RATIO DRIVES

Versatile, miniaturized, right angle rotary controls.

Featuring dual output stainless steel shafts at right angles to input, these engineered drives provide an ideal type of instrument control. Available with matched bevel or worm gears covering a wide range of ratios.

JAN'S RIGHT ANGLE DRIVES are especially useful for handling spring or gravity-loaded components since the output shaft automatically locks in any desired position yet remains free for smooth adjustment by the input shaft. Assembled in dust-proof housings, the gears are permanently pinned in place on stainless-steel shafts mounted in oilite bearings and held under constant pressure.

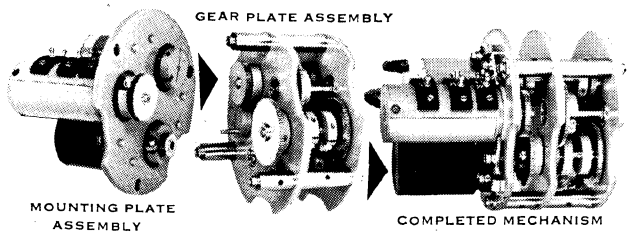
PMC SERVO MECHANISMS & COMPONENTS

PREDESIGNED MECHANISMS

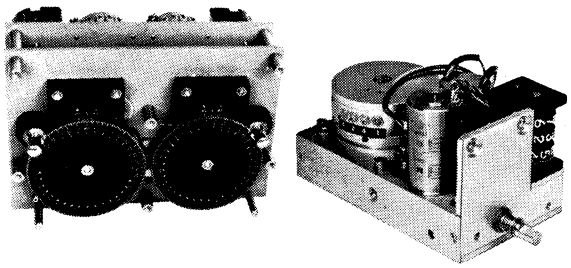
A complete line of off-the-shelf components for assembling an unlimited variety of geared mechanisms. Gear ratios to 78,125:1, zero-backlash spring-loaded gears and torque-limiting slip clutches are featured. Assembled units meet design and materials requirements of MIL-E-5400 and MIL-E-16400.



For complete data and catalog of stocked components, request Bulletin 102.

CUSTOM DESIGNS

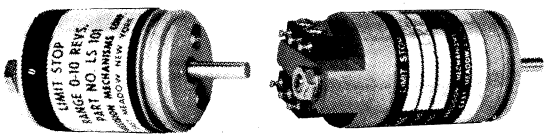
PMC specializes in design and manufacture servo mechanisms and mechanical modules to user requirements for airborne, ground support, communications, fire control and other critical applications. The units shown below are typical of the mechanisms designed and manufactured for military and industrial equipments.



Short lead time delivery on both prototypes and production quantities.

ADJUSTABLE LIMIT SWITCHES & STOPS

0-10, -20, -40 revolutions without snap action switch, 0-25 revolutions with snap action switches actuated just before mechanical stops. All models infinitely adjustable with single external screw. SPDT snap action switch rated 7A, 250V.



Limit Stop
Series LS 100
5/8 and 7/8" dia.

Limit Stop And Switch
Series LS 300
$1\frac{5}{16}$" dia.

For complete data, request Bulletins 103 and 104

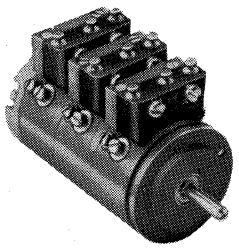
CAM SWITCHES

Adjustable-In-Motion

PMC's patented cam switch design incorporates in a single component all the functions of a conventional plate cam, cam follower and snap-action switch, eliminating the need for separately-mounted cam mechanisms and switches and their associated hardware. Externally-adjustable dwell angles can be set to any position with respect to the shaft. All models available as single- or multi-switch types, with ganged switches independently adjustable.

Model CS 402 Miniature Cam Switches

Miniature units designed and manufactured to military and aerospace specifications.

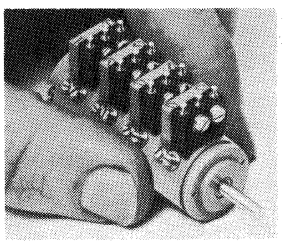


Diameter: 1-1/16", equivalent to to BuOrd Size 11
Length: 0.8", one switch, plus 0.5" per switch
Dwell Angle: 3° to 357°
Switch: SPDT
Rating: 5A, 250VAC, 30VDC
Multi-Switch Models: up to 10 switches
Shaft: 0.125" dia.

For complete data, request Bulletin 106

Model CS 601 Subminiature Cam Switches

Subminiature units for airborne, space vehicle and other applications where size and weight are critical.

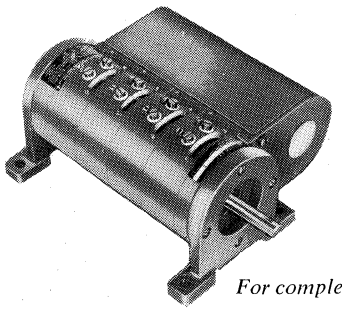


Diameter: 0.75", equivalent to BuOrd Size 8
Length: 0.730" one switch, plus 0.437" per switch
Dwell Angle: 3° to 357°
Switch: SPDT
Rating: 7A, 250VAC, 30VDC
Shaft: 0.125" dia.
Multi-Switch Models: up to 8 switches

For complete data, request Bulletin 109

Model CS 501 High-Power Cam Switches

Industrial types for control, cycling and sequencing of machine operations. End- or side-mounting, with or without switch covers. Dials permit visual adjustment of switching points and dwell angles.



Dwell Angle: 5° to 355°
Diameter: 3.5"
Length: 3" one switch, plus 1.5" per switch
Shaft: 0.5" dia.
Switches: SPDT, DPDT. Special types to requirements.
Ratings: to 25A and 600 V, inrush current to 75A.

For complete data, request Bulletin 108

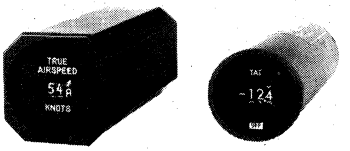
ELECTROMECHANICAL AND SOLID-STATE SYSTEMS

ABOUT SDC...

Servo Development Corporation specializes in the engineering, design, development and manufacture of sophisticated products from IC digital pulse generators to precision electro-mechanical servomechanisms.

SDC has pioneered the Microjuster®, an accurate manual input instrument for generating electrical signals proportional to a digital counter display.

The company has received recognition in the field of timers and intervalometers for navigation and weapons release systems. SDC brings its broad range of experience and engineering "know-how" to a variety of products for the aerospace field.



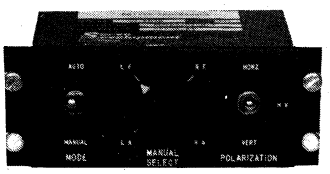
AIRCRAFT FLIGHT INSTRUMENTS

These servo indicators and digital data receivers are used in commercial jet transports and military aircraft. They are designed to meet ARINC and MIL-E-5400 standards.

Inputs can be analog voltages or synchro signals from a CADC or serial BCD information from a DADS computer. The temperature indicators can be driven by a resistance probe as part of their input bridge.

Digital, pointer or combination displays with red or white integral lighting are available.

Please write for our Aircraft Instrumentation Brochure which describes in detail our Servo Altimeter, SAT, RAT, Mach Number and other indicators.

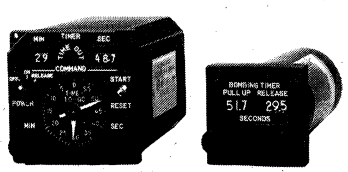


DIGITAL PRODUCTS

Digital solid-state pulse generators and programmers are custom designed for specific outputs and meet the standards of MIL-E-5400. Instrumentation is available to encode, decode and display digital signals.

The pulse generators are capable of accepting multiple input pulses, amplifying, limiting and/or shaping them to produce programmed signals. Outputs are available to the multi-ampere range and with rise and fall times down to the nanosecond region.

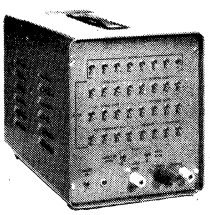
High current output pulses are shaped to eliminate R.F. generation. Techniques include the use of monolithic and discrete circuits.



INTERVALOMETERS AND TIMERS

This product line offers programmable intervalometers for weapons release systems and bombing and navigational timers, which have been designed and qualified to meet the requirements of MIL-E-5400. Digital solid-state/electro-mechanical techniques provide adjustable and fixed timing cycles from ten milliseconds to 24 hours with accuracies of .01% over the environmental range.

Electrical outputs in the form of relay closures, solid-state switching, single or repetitive spaced pulses are available to meet specified requirements. Timers featuring "Time-to-Go" displays are available with white and red integral lighting.

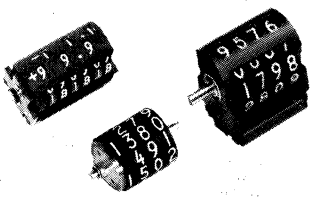


DIGITAL CODE GENERATORS

The Model No. 432A Code Generator is used for rapid testing of digital data receivers featuring digital readouts. It generates 2-wire, 32 bit digital serial data words compatible with the requirements of ARINC 575 and 576 DADS computer. The Code Generator is capable of simultaneously testing up to ten data receivers.

Four different modes of operation provide the capability for rapid automatic testing and scanning the digital data receivers and for generating repetitive 32 bit words for circuit trouble-shooting.

A similar instrument, Model No. 440 Code Generator is available for use in checking 6-wire ARINC 561 INS and DME equipment.



COUNTERS—LOW TORQUE

Revolution type instrument counters offer numeral sizes to 5/16 inch. They are available in internal and external pinion models. Variation counters display N-S, E-W, Lat.-Long., Plus-Minus.

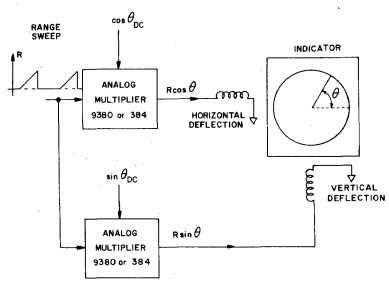
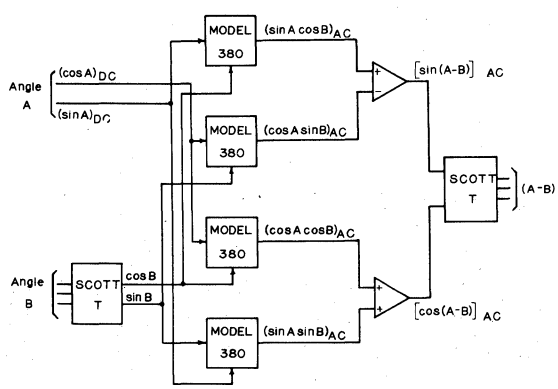
Solid State Servos

Transmagnetic solid state components and subsystems replace mechanical systems with moving parts, contain components including computing modulators and demodulators which are used in mechanical or solid state servos, and also interface systems with synchro, resolver, digital, AC or DC inputs and outputs. With many models off the shelf, you can have a working system in days.

TYPICAL APPLICATIONS





Synchro Input Devices

655 Series — SYNCHRO TO SIN-COS DC OUTPUT

Model	Freq.	3 Wire L.L. Ref. AC	Size
655MP4	400	11.8/26	0.58 x 2.03 x2.28
655MP2	400	11.8/26	0.78 x 2.53 x 3.22
*A655MP2	400	11.8/26	0.78 x 2.53 x 3.22
*655-NV-400M	400	11.8/26	1.84 x 3.19 x 3.44
655-90-MP2	400	90/115	0.78 x 2.53 x 3.22
655-60M	45 to 65	90/115	1.53 x 3.19 x 3.44
*655-NV-60M	45 to 65	90/115	2.75 x 3.25 x 5

***Buffered Outputs**

All models: Accuracy 5 minutes; outputs ±10V DC; operating temperature −55 to +85° (For lower cost 0-70°C replace M by C in model number; synchro and ref. a.c. inputs transformer isolated.

Line Variation: NV models; the sine and cosine DC outputs vary less than ½% for 10% amplitude variation in 3-wire synchro input. In all other models, outputs vary proportionately to line.

Output Impedance: Buffered units have less than 5 ohms. All others approximately 4K ohms with recommended load 100K ohms ±1%. Buffered units require ±15V DC and outputs are common to DC supply.

678 Series — SYNCHRO TO LINEAR DC

Model No.	Freq.	3 wire L.L. ref.	Input Imp. L.L. min.
678-26-M	400	11.8/26	40K ohms
678-115M	400	90/115	100K
678-60M	45-60	90/115	40K

SPECIFICATIONS

Accuracy: 6 minutes.

Line Variation: output invariant for ±10% AC line variation.

Output: −10 to +10V DC synchro angles from −180 to +180°.

Operating Temperature: −55 to +85°C. For lower cost 0 to 70°C replace M by C in model number.

1602 Series — SYNCHRO TO DIGITAL

All synchro inputs; 12 bit binary or 4 decade decimal output.

See section 2000 EEM for specifications.

Model 1620MP13 — SYNCHRO TO SYNCHRO

Description: This device is a power amplifier and synchro level translator accepting a 90V L.L. input and furnishing 11.8V L.L. out with capability of driving up to 3 Size 11 torque receivers plus control transformers.

OTHER SPECIFICATIONS

Accuracy: 6 minutes. **Frequency:** 400 Hz. **DC Supply:** ±25V. **Size:** 1.84 H x 3.19 x 3.44 max.

OTHER MODELS

Inputs and Outputs: 50, 60, 400 Hz L.L. 11.8, 90.

SEE EEM SECTIONS 2000 AND 2200 FOR MULTIPLIERS, DIVIDERS AND OTHER TRANSMAGNETICS MODULES.

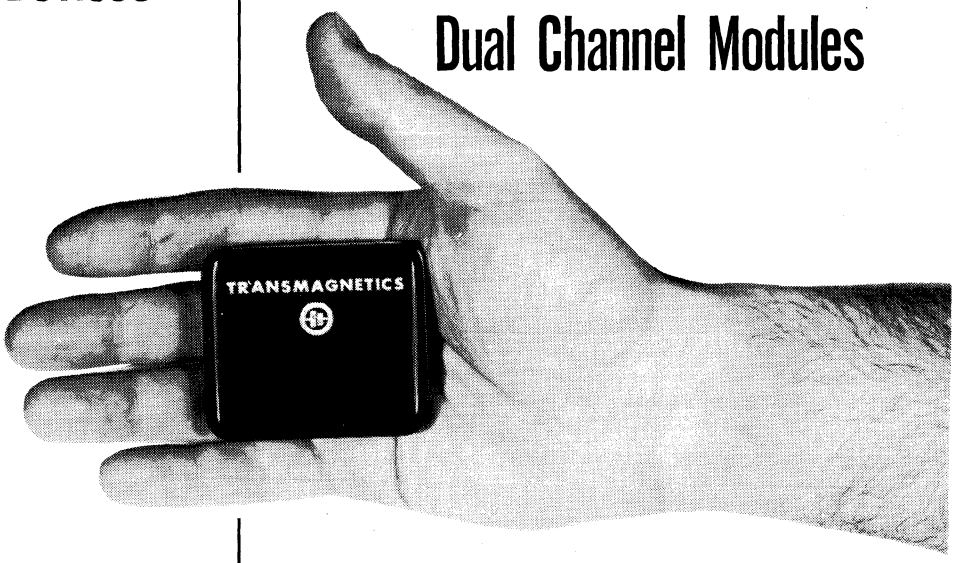
TRANSMAGNETICS INC.

Synchro Output Devices

Resolver Dual Channel Modules



SIN-COS DC TO 3-WIRE SYNCHRO

Model	Freq-Hz Out	3-Wire L.L.	Ref AC	Load Capability	Size — P.C. Card
650-31	400	11.8	26	3 Size 11 TR's	4½ x 8
A676-10	400	11.8	26	3 Size 11 TR's, CT's	4½ x 8
A676-20	400	11.8	26	2 Size 15 TR's	4½ x12
A676-90	400	90	115	1 Size 11 TR, CT's, CDX's	4½ x 8
A676-60	60	90	115	Size 23 TR, CT's, CDX's	4½ x12

INPUTS: 10 sin θ and 10 cos θ, DC voltages representing input angle.

TORQUE RECEIVER (TR) LOADS: TR's are difficult loads, drawing large currents under dynamic conditions, and may "hang up". All models are designed to drive sizes listed or equivalent and are short circuit proof.

CONTROL (CT) OR DIFFERENTIAL (CDX) TRANSFORMER: The 676 models will also drive CT's or CDX's. They are designed for a low null, preventing amplifier overload in follow-up systems.

1612 System — LINEAR DC TO 3-WIRE SYNCHRO

Description: This system consists of a model R670 followed by a 3-wire synchro output model above.

Ordering Information: Order 1612- followed by synchro output model. Example 1612-650-31.

1613 Series — DIGITAL ANGLE TO 3-WIRE SYNCHRO

12 bit binary angle input to 11.8 or 90V L.L. 60 or 400 Hz outputs.

See EEM Section 2000 for specifications.

Series 697 — RESOLVER (AC) TO SIN-COS DC

Model	Ref. Amp.	Size
697MP4	26V	.58 x 2.03 x 2.28
697MP2	26V	.78 x 2.53 x 3.22
697-115MP2	115V	.78 x 2.53 x 3.22

OTHER SPECIFICATIONS

Accuracy: 6 minutes. **Outputs:** −10 to +10V DC. **AC Inputs:** 0 to 11.8. **Input Imp.:** 40K ohms Min. **Isolation:** Inputs, outputs, excitation fully isolated. **Loads:** 100K ohms. **Operating Temperature:** −55 to +85°C. For lower cost 0-70°C replace M by C in model number.

FULL SCALE INPUTS 5 to 115V RMS UNITS AVAILABLE.

Series 1614 — DC SIN-COS TO RESOLVER (AC)

Model	Frequency	Outputs	Size — P.C. Card
1614-10C	400 Hz	0 to 15V RMS	4½ x 8
1614-90C	400 Hz	0 to 90V	4½ x 8
1614-60C	60 Hz	0 to 90V	4½ x 8

Accuracy: 6 minutes. **Operating Temperature:** 0 to 70°C. Replace "C" by "M" for −55 to +85°C.

Series 1613 — DIGITAL ANGLE TO RESOLVER (AC)

12 bit binary angle input and 0 to 115V RMS 400 or 60 Hz reference input. AC sine and cosine outputs.

See EEM Section 2000 for specifications.

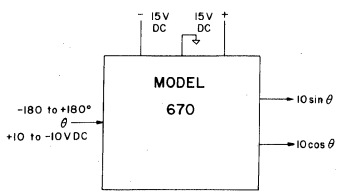
Trigonometric Computing Servos

These solid state modules perform trigonometric computations and transformations which previously required mechanical moving parts. Together with solid state synchro, resolver, digital, ac or dc conversion modules manufactured by Transmagnetics, they make possible all solid state computing servos and interfacing.

Series 670 — LINEAR DC TO SIN-COS DC



SPECIFICATIONS

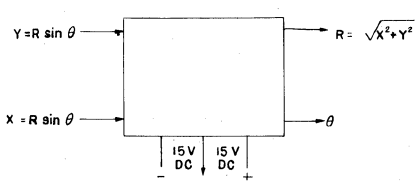
ACCURACY: 15 minutes.
SIZE: 1.84 x 3.18 x 3.43 max.
INPUT IMPEDANCE: 10K min.
DRAIN: 100 MA max. from ±15V DC.
MODELS AVAILABLE:
R670 0 to 50°C operating temperature.
670MP13 −55 to +85°C.

Series A678 — SIN-COS DC TO LINEAR DC

SPECIFICATIONS

ACCURACY: 6 minutes.
SIZE: 1.84 x 3.18 x 3.43.
INPUTS IMPEDANCE: 100K ohms.
CONVERSION TIME: 1 MS.
DRAIN: 125 MA max from ±15V DC.
MODELS AVAILABLE:
A678M −55 to +85°C operating temperature.
A678C 0 to 70°C.

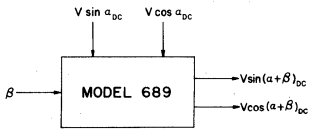
Series 695 — DC RECTANGULAR TO POLAR CONVERTER



SPECIFICATIONS

INPUTS RANGE: −10 to +10V.
OUTPUTS: R: .050 to 10V
θ: −10 to +10V.
ACCURACY: 6 minutes.
LINEARITY: 0.1%.
SIZE: 1.84 x 3.18 x 3.43.
CONVERSION TIME: 1 MS.
MODELS AVAILABLE:
695C 0 to 70°C operating temperature
695M −55 to +85°C.

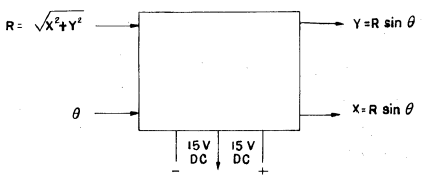
Series 689 — DC COORDINATE ROTATOR



SPECIFICATIONS

RECTANGULAR INPUTS: −10 to +10V DC
ANGLE INPUT: −10 to +10 for −180 to +180°C
RECTANGULAR OUTPUTS: −10 to +10V DC

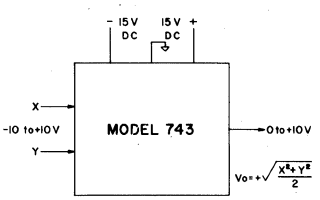
Series 1618 — DC POLAR TO RECTANGULAR CONVERTER



SPECIFICATIONS

R: 50 mv to 10V DC.
θ: −10 to +10V DC for θ −180 to +180°C.
ANGULAR ACCURACY: 15 minutes.
R LINEARITY: 0.1%.
MODELS AVAILABLE:
1618S 0 to 50°C
1618M −55 to +85°C.

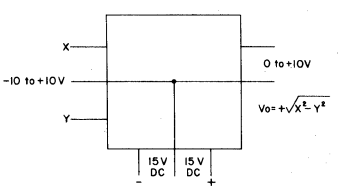
Series 743 — VECTOR SUMMER



SPECIFICATIONS

CONFORMITY: ½% F.S.
FULL POWER BW: 20K Hz.
9743 SERIES: recommended for square waves.
SIZE: .78 x 3.19 x 3.44.
MODELS AVAILABLE:
743CP5 0 - 70°C
9743CP5 0 - 70°C
743MP5 0 - 70°C
9743MP5 −55 to +85°C.

Series 749 — TRIANGLE SOLVER



SPECIFICATIONS

CONFORMITY: ½% F.S.
FULL POWER BW: 5K Hz.
SIZE: .58 x 3.19 x 3.44.
MODELS AVAILABLE:
749CP8 0 to 70°C
749MP8 −55 to +85°C.

TRANSMAGNETICS INC.

Computing Sine Wave Modulators

For DC to AC proportional conversion

These modulators offer high performance, small size and off the shelf delivery in military servo systems for radar, fire control, autopilots and navigation applications where precision DC to AC conversion is required. The 1102 Series are state of the art with phase constant to ¼° over 380 to 420 Hz, distortion less than ½%, and buffer amplifier output.

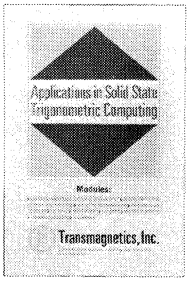
Model 1123 is a low cost modulator.

Modifications can be made for excitation inputs from 6 to 115V RMS and frequencies from 60 to 10K Hz.

The output of these models do not vary with a 10% line change. For "multiplying" modulators, see Section 2000.

	Series 1102	Series 152	Series 191	Series 1123
DC Input Volts	−10 to +10	−7 to +7	−5 to +5	−2 to +2
AC Output Volts RMS	0 to 6	0 to 1	0 to 5	0 to 0.7
AC Ref. Volts RMS	26	26	26	26
Frequency Hz	400	400	400	400
Null MV RMS	5 in phase	3	5	10
Phase Degrees	±1	±3	±5	±10
Size	.58x2.03 x2.28	1⅛ x 1¼ x 1⅞	1⅛ x 1¼ x 1⅞	0.7 x 1 x1.5

SEE EEM SECTIONS 2000 AND 2200 FOR MULTIPLIERS, DIVIDERS AND OTHER TRANSMAGNETICS MODULES.



DESIGN MANUAL

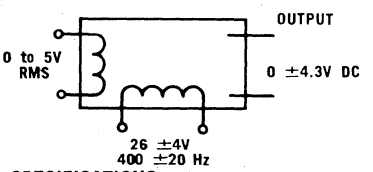
Send for your free copy of Transmagnetics' Design Manual 868. It describes and illustrates more than 45 applications for trigonometric modules. The "building block" modules, around which the manual is based, allow designers to develop all solid state computing systems.

Computing Demodulators

For AC to DC phase sensitive proportional conversion

These demodulators are companions of the modulators above for applications in the same types of systems. They are also used to condition ac signals from strain gauges, pressure and similar transducers to a dc format for telemetry and data processing.

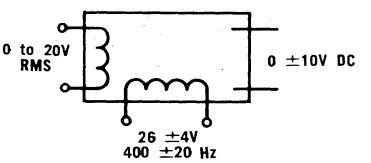
Model 840 — 0.1% LINEARITY



SPECIFICATIONS

NULL: 0.5 MV
LINEARITY: 0.1% FS
GAIN STABILITY: over −55 to +85°C: 1% or 20 MV
3 DB FREQ. RESPONSE: 150 Hz min.
RIPPLE: 1% or 20 MV rms
LOAD: 100KΩ (output impedance approx. 3KΩ)
INPUT IMPEDANCE: 50KΩ min.
SIZE: 1 x 1 x 1⅝ plus mounting studs and header.
WEIGHT: 2.5 oz.

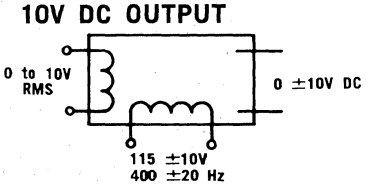
Model 854 — 10V DC OUTPUT



SPECIFICATIONS

NULL: ½ MV
LINEARITY: 0.1% FS
GAIN STABILITY: over −55 to +85°C: 1% or 40 MV
3 DB FREQ. RESPONSE: 150 Hz min.
RIPPLE: 1% or 50 MV rms
LOAD: 100KΩ (output impedance approx. 4KΩ)
INPUT IMPEDANCE: 50KΩ min.
SIZE: 1 x 1 x 1⅝ plus mounting studs and header.
WEIGHT: 2.5 oz.

Model 835 — 10V DC OUTPUT



SPECIFICATIONS

NULL: 50 MV
LINEARITY: 0.1% FS
GAIN STABILITY: over −55 to +85°C: 2% or 100 MV
3 DB FREQ. RESPONSE: 150 Hz min.
RIPPLE: 100 MV rms max.
LOAD: 100KΩ (output impedance approx. 5KΩ)
INPUT IMPEDANCE: 30KΩ min.
SIZE: 2⅛" H x 1⅛" sq. plus mounting studs & header.
WEIGHT: 4 oz.

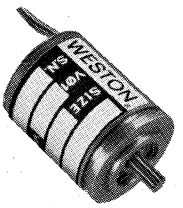
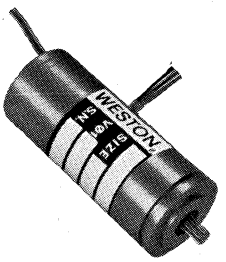
WESTON-TRANSICOIL

servo motors, generators, amplifiers & servo assemblies

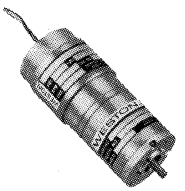
MOTORS *Sizes 5 thru 23, 60 & 400 cycles for military, commercial and industrial applications. Servo, synchronous, stepper, viscous or inertially damped. High temperature and high-torque types available. Versions to meet ARP 497 and MIL-S-22432 including QPL types. Integral gear heads, optional slip clutches. All units have vacuum impregnated windings, stainless steel shafts and bearings.*



Size 8
Servo Motor

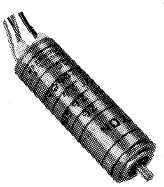


Size 8
Inertially-
Damped Servo Motor

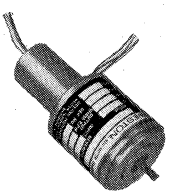


Industrial
Servo Motor
with Gear Head

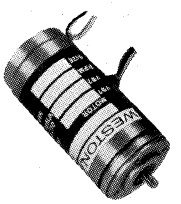
MOTOR—GENERATORS & TACHOMETERS *Sizes 5 thru 23, 60 & 400 cycles. Damping, rate and integrating (temperature compensated). Available in combination with servo motors or as separate units. Options include a range of short-housing, high-temperature and high-torque types. Low inertia motor tachometers have outputs up to 3.5 v/1000 rpm. Output voltage per 1000 rpm on temperature-compensated units within ± 0.5% from — 55C to 125C.*



Size 5
Motor-Generator

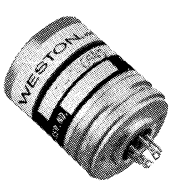


Size 18
Motor Tachometer

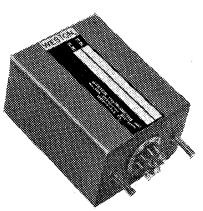


Size 11
Low-Null Motor-Generator

AMPLIFIERS & SPECIAL ELECTRONICS *Transistorized servo amplifiers designed to provide high linearity signal amplification to voltage and power levels required for driving motors up to and including size 23. Special features and extra inputs available on request. Stepper logic-driver programs field excitation to stepper motor windings for maximum response.*



Size 11
Servo Amplifier



Stepper
Logic Driver

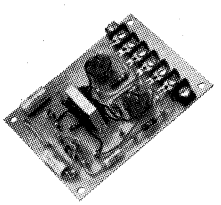


Plate
Amplifier

COMPLETE PACKAGES *Complete servo assemblies and sub-assemblies are designed, manufactured and tested by Weston-Transicoil to meet specific military, commercial and industrial application requirements. Included are data converters, incremental servos, indicators & display devices, function generators & computing servos.*

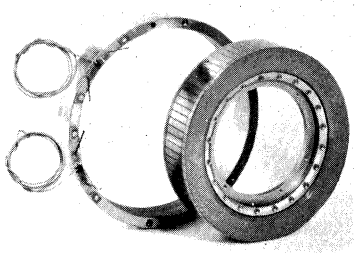
VERNITRON CATALOG DIGEST

MAGTECH

DC TORQUE MOTORS

D. C. Torque Motors are designed to produce high torque at low speeds, making them ideal for direct coupling to the driven load. Performance characteristics of torque motors provide significant system advantages:



- **DIRECT DRIVE**
  Elimination of gearing and associated backlash results in maximum servo coupling stiffness, increased torque to inertia ratio at the load shaft, and precise positioning resolution.

- **FAST RESPONSE**
  High flux density in the magnetic circuit results in low armature inductance and low electrical time constant.

- **PERMANENT MAGNET FIELD**
  Maximum torque with minimum input power and weight.

  Enables motors to be maintained under stand-by conditions without dissipation of power or generation of heat.

The selection chart lists basic D. C. Torque Motors and D. C. Tachometer Generators available from MAGTECH — Modifications to mechanical configutation or electrical operating characteristics can be provided to satisfy specific application requirements. Additional data is available upon request for torque motor ratings from six inch-ounce to 150 foot-pounds peak torque.
